

PISA[®] ANCHOR HELIX ASSEMBLIES

PISA[®] anchor installation takes about 5 minutes with two workers.

Chance Standard-Strength 4,000 foot-pound anchors and Mid-Strength 6,000 foot-pound anchors have curvilinear leading edges to help penetrate rocky soils and to reduce damage during installation. These anchors are available in single and twin-helix designs. The same installing wrench installs Standard and Mid-Strength anchors as well as TOUGH ONE[®] C10252- - series anchors. See page 4A-4 for installing wrench information.

Ordering Information

STANDARD-STRENGTH ANCHOR SERIES

1³/₈" CORE — 4000 ft.-lbs. Typical Working Torque — Squared Helix — 3.0" Helix Pitch

| SINGLE HELIX | Catalog Number | | | | | | | |
