Clutch Gear[®] FR

Goat Grain Mechanics with Cut-Resistant Kevlar[®] Liner and Nomex[®] Backs

#MXBGXKG

Clutch Gear[®] FR gloves bring together the beauty and fit of our mechanics gloves with the outstanding protection against flame and open spark. Nomex[®] fiber withstands prolonged exposure to direct flame and will not burn, char or harden.

Featuring black goat grain palms and a knit Kevlar[®] liner that gives these gloves incredible comfort, dexterity, and touch sensitivity. These gloves are a great choice for workers in utilities and the oil and gas industries where protection from arc flash is at the top of the list. Level 2 arc-flash resistant according to ASTM F2675/F2675M-13, Arc Rating ATPV= 13 Cal/cm². Goatskin palms provide unparalleled abrasion resistance and touch sensitivity, plus the beauty of a grain leather that conforms to your own hands. This glove also provides ANSI level 5 puncture resistance.

For impressive cut protection, the addition of the inner Kevlar[®] lining also provides impressive ANSI level A4 cut resistance.
