# Above-the-Neck **Protection Solutions**

Compatible safety products to protect your head, face, hearing, and vision

WE KNOW WHAT'S AT STAKE.

## Join the millions around the globe who choose MSA: *For safety. For value.*

This catalog highlights MSA's comprehensive head, eye, face and hearing (HEFH) protection line. Our hard hats, eye/face protection products, helmet accessories, hearing protection products—and more—provide seamless safety solutions to protect workers around the world. For a complete product listing, see the most recent MSA Safety Equipment Catalog, call our award-winning customer service department, or visit MSAsafety.com. Save money, increase revenue and reduce inventory costs with our comprehensive Above-the-Neck safety solutions:

- "Try It" sample program offers100+ leading MSA products, including V-Gard Hard Hats, V-Gard Accessories, left/RIGHT earmuffs, and Sightgard<sup>®</sup> eyewear-completely **FREE of charge**! Look for the methat tells you which products are in the program.
- Our products are tested by engineers in our own test facilities. They are also certified and/or tested by qualified, third-party test houses.

## ANSI/ISEA Z89.1-2014 and CSA Z94.1-2015 (Industrial Head Protection Standards)

ANSI/ISEA Z89.1-2014 and CSA Z94.1-2015 voluntary industry standards establish industrial helmet types and classes, providing performance and testing requirements. These standards include specifications for helmets designed to offer protection from top and/or lateral impact.

Three classes included in these standards indicate helmet electrical insulation rating:

**Class E (Electrical)** – Helmets intended to reduce the danger of exposure to high-voltage electrical conductors, proof-tested at 20,000 volts.

**Class G (General)** – Helmets intended to reduce the danger of exposure to low-voltage electrical conductors, proof-tested at 2,200 volts.

Class C (Conductive) - Helmets do not provide protection from electrical conductors.

Industrial head protection test requirements per ANSI/ISEA Z89.1-2014 and CSA Z94.1-2015 are separated by helmet type: Type I helmets protect wearers from top impact, while Type II helmets protect wearers from top and lateral impact. Test requirements for ANSI/ISEA Z89.1-2014 and CSA Z94.1-2015 are available from the Industrial Safety Equipment Association (www.safetyequipment.org) and www.CSA.ca, respectively.

In addition to three non-mandatory tests for reverse donning [, lower temperature [LT] and high-visibility [HV], the ANSI/ISEA Z89.1-2014 standard also includes these provisions:

#### Section 5: Accessories and Replacement Components

Revised standard includes language to further support the premise that accessory/ component manufacturers are responsible for proving that their products do not cause helmets to fail.

#### Section 6: Instructions and Markings

Clarification language was added to help customers understand that "useful service life" for helmets is not required by the Standard, although helmet manufacturers may choose to include it.

#### Section 7.3.3 Higher Temperatures (HT)

Revision enables additional protection in response to needs of users who may work within hot environments. Optional preconditioning at higher temperatures of  $60^{\circ}C \pm 2^{\circ}C$  ( $140^{\circ}F \pm 3.6^{\circ}F$ ) has been added. (In the 2009 Standard, temperature conditioning was  $48.8^{\circ}C \pm 2^{\circ}C$  ( $120^{\circ}F \pm 3.6^{\circ}F$ ).) If a helmet has been pre-conditioned to  $60^{\circ}C \pm 2^{\circ}C$  ( $140^{\circ}F \pm 3.6^{\circ}F$ ), the helmet will be marked as HT. In addition, new updates allow for flexibility and inclusion of emerging and current best manufacturing materials for higher temperature protection.

**NOTE:** the Standard does not address pre-conditioning that could be needed for temperature and radiant heat extremes. To ensure that you have the proper head protection level needed for your specific heat application, check with the manufacturer for stated usage of any helmet.

#### Non-Mandatory ANSI/ISEA Z89.1-2014 Tests

## Reverse Donning [

To enable a helmet to be worn in reverse, or a swing ratchet suspension to be used in a helmet, that particular helmet must be marked with the "double-arrowed circle" to indicate that it meets the non-mandatory reverse donning test.

#### Lower Temperature [LT]

The traditional low temperature test for a helmet is -18°C or 0°F. Helmets that meet ANSI Z89.1 requirements for LOWER temperatures (-30°C or -22°F) can be marked with LT by the manufacturer.

#### High-Visibility [HV]

Helmets that meet non-mandatory requirements for high-visibility, including special tests forchromaticity and luminescence for added visibility, can be marked with HV by the manufacturer.

#### Higher Temperature [HT]

The traditional pre-conditioning temperature test for a helmet is 48.8°C  $\pm$  2°C (120°F  $\pm$  3.6°F). Helmets that meet ANSI Z89.1 requirements for HIGHER temperatures pre-conditioned to 60°C  $\pm$  2°C (140°F  $\pm$  3.6°F) can be marked with HT by the manufacturer. HT does not indicate pre-conditioning that could be needed to validate temperature and radiant heat extremes.

All MSA hard hats have been tested per the mandatory and non-mandatory ANSI/ISEA Z89.1-2014 and CSA Z94.1-2015 requirements, as indicated. MSA offerings include:

MSA Hard Hat	Standard(s)	Туре	Class	ANSI Z89 Non-Mandatory Tests

## V-Gard<sup>®</sup> GREEN Hard Hats: the world's first hard hat made from renewable resources

V-Gard GREEN hard hats are constructed of renewable green high-density polyethylene (GHDPE); traditional V-Gard Helmets are manufactured through standard HDPE production methods. V-Gard GREEN hard hats provide the same appearance and quality as MSA V-Gard hard hat. Test results for V-Gard GREEN helmet shells indicated 95% bio-based content.

Classification	Type I
Application	General purpose
Shell Material	Green high-density polyethylene (GHDPE)
Styles	Slotted cap with 4-point Fas-Trac <sup>®</sup> III Suspension; slotted full-brim hat with 4-point Fas-Trac <sup>®</sup> III Suspension
Colors	
Sizes	Standard (6½ – 8″)
Standards	ANSI/ISEA Z89.1-2014 (Class E); CSA Z94.1-2015 (Class E)
Certification	Third-party by SEI; USDA Biobased Certified PRODUCT
Customization	Imprinting and striping available (see pages 8–9)
<b>Replacement Suspensions</b>	See page 7

	V-Gard GREEN Slotted Cap	V- Gard GREEN Slotted Full-Brim Hat
WHITE	10150199	10160923
YELLOW	10150200	10160924
BLUE	10150221	10160925
GREEN	10150222	10160926
RED	10150223	10160927

On average, production of each V-Gard GREEN helmet removes approximately 2 lbs. of CO<sub>2</sub> from the atmosphere, according to the GHDPE material supplier.

#### <sup>1</sup>Certified to CSA.

<sup>2</sup>V-Gard Cap/Hat meets voluntary standard for hi-visibility as prescribed by ANSI/ISEA Z89.1-2014. Look for official hi-visibility marking [HV] on the helmet's ANSI label.

## **Replacement Suspensions for MSA Hard Hats**

#### MSA Fas-Trac<sup>®</sup> III Ratchet Suspension

The MSA Fas-Trac III Suspension helps to reduce pressure headaches and pulled hair, and stays on your head.

- Sweatband fully covers headband and worker's forehead
- **2** Three levels of nape strap adjustment for customized fit
- 3 Lower nape strap improves retention
- Smooth ratchet rotation and secure hold

Learn how the Fas-Trac III Suspension can relieve your headaches. Visit **www.MSAsafety.com/fastrac.**

The Fas-Trac III Suspension sweatband accessory keeps workers cool and dry.

Ра	art No.	Product Specifics
	TRY TT	<ul> <li>For use with MSA Fas-Trac<sup>®</sup> III Suspension</li> <li>Optional, moisture-wicking and washable</li> <li>Can be attached/replaced while suspension is assembled in helmet</li> <li>Sold ONLY in packages of 10</li> </ul>

#### **A** WARNING

Use only the indicated MSA suspension in your MSA helmet. Do not mix suspension sizes and helmet sizes (i.e., putting a standard sized suspension in a large helmet or any other mismatched combination). Do not use competitor suspensions in MSA helmets. Inspect your suspension frequently. Suspensions should be replaced every 12 months, regardless of inspection results. Replace immediately (along with the helmet), if an impact has occurred. Failure to follow these instructions will reduce the energy absorbing ability of the protective helmet to receive impact, and could result in serious injury or death.

7

## Helmet Customization For 30+ Years

#### Practice makes perfect logos:

- MSA uses inks and processes that create durable logos.
   We have never had a complaint about a logo "scratching off" in the 30+ years we have been in the logo business!
- It can be tricky to avoid logo distortion due to the curvature of the hard hat. That's why MSA Logo Express<sup>®</sup> Service employs graphic designers who process logos onto hard hats. These skilled artisans ensure each logo is placed properly so it not only endures, but also accurately represents your brand and logo in color, size and shape–despite the curve of the hard hat.
- MSA offers multiple printing services from simple one-color logo to digital photos, in up to four locations
- We don't require "color-separated" artwork for 1+ color logos; nor do we require customers to identify the PMS colors in their logos. Our graphic artists can manage that, if you do not have these details.
- Re-ordering is easy because we keep your logo on file until you change it<sup>1</sup>.

#### **Our Process**

Once your order has been received by the MSA Logo Express Service Design center we get to work. Files are imported from your on-line hard hat configuration, assessed for usability and colors separated (if the PMS colors have not been identified) and layout finalized. Should you choose to personalize your hard hat, don't forget to complete form ID# 0617-17 and submit with your order.

#### Delivery

Once the layout process is complete, our factory craftsman get to work on your order. Your order for a new hard hat logo should ship within eight (8) days from our Murrysville, PA plant from the date we receive your approval on the artwork<sup>2</sup>.

#### **Minimum Order Quantities (MOQ)**

MSA requires MOQs, by hard hat type, for logoing and striping. Qualifying MOQs of custom-imprinted or striped hard hats must be of the same size, model and options (i.e., color and suspension). MOQs are:

- 20 for V-Gard, SmoothDome<sup>®</sup>, Topgard, Comfo Cap Hard Hats, and Nexus Climbing Helmets
- 16 for Skullgard or Thermalgard<sup>®</sup> Hard Hats
- 12 for Super-V and Vanguard Hard Hats
- 40 for Bump Caps

#### Pricing

Please refer to your local distributor for pricing details on standard and non-standard charges that may apply to your order.

#### Striping

Add any of 27+ different reflective and retro-reflective stripes to your hard hat. MSA reflective stripes help enhance the visibility of workers in daytime conditions, while retro-reflective stripes<sup>3</sup> offer additional enhancement in nighttime or low-light conditions. Stripes are available in various sizes and shapes, and can be placed on all types of MSA hard hats.

Keep in mind too, that while you can order more stripes for self-application, MSA does not recommend doing this. The reason for this is MSA pre-treats all hard hats prior to striping with an electrical discharge treatment to enhance the ability of the stripes adhesive bonds.

#### **Stock Logos and Slogans**

With 23 "pre-built" stock logos and slogans, MSA offers more "off-the-shelf" hard hat graphics than anyone in the industry. Our newest stock logos honor breast cancer survivors and fighters everywhere. They were designed specifically for use on our new Hot Pink V-Gard, but work well on just about any MSA hard hat! Standard logos make it easy for you to place emphasis on safety, patriotism or personnel identification without having to develop your own artwork. They can be can be used alone or with your customized logo and striping.

#### **Hard Hat Color Choices**

MSA offers more stocked color options than competitors. In fact, in our popular V-Gard hard hat, we offer 21 stocked colors, including our newest: Hot Pink! There are non-stocked color options available for all MSA hard hats; a qualifying MOQ of 100 hard hats is required.

#### Personalization

The same quality and precision that MSA logos have become famous for is now available with personalization. You can add your name, ID#, title, or anything else with this additional option.

You can create a shell color of your choice. You need only order a qualifying MOQ of 500 hard hats or more.

<sup>1</sup> Files are purged from MSA's system if no logoed hard hat order is received within three (3) years of the first order.

<sup>2</sup> Orders for repeat logos ship within seven (7) days. This includes 2-3 days for order processing, and 5 days for production.

## **Placing Customized Hard Hat Orders**

#### Steps to complete your on-line logo configuration order:

- 1. Visit: http://webapps2.msasafety.com/logoexpress/#/intrologin
- 2. Select "No" when asked are you a distributor.
- 3. Select "Customize Now".
- 4. Choose a standard.
- 5. Select your hard hat and click "Customize It".
- 6. Choose your size.
- 7. Choose your suspension (Fas-Trac III is recommended).
- 8. Choose your shell color.
- **9.** Choose any striping you wish to include.
- **10.** Upload your logo or chose from a stock logo.
  - Logos cannot be trademarked or of any sports team without the written consent of the logo owner.
  - For optimum quality and turnaround, please submit artwork as a vector file format.
  - Acceptable formats include: CDR, AI, and EPS. Don't have a vector file? We also accept these formats: JPG, PDF, TIFF, PNG, BMP and GIFs.
- 11. Place your order.

If you are the end user:

- Save and email.
- · Review terms and click "Accept".
- Complete form and send email to:
- Distributor Name
- Distributor Email

*If you are a Channel Partner,* you can place the order once you have completed the logoing process OR you can enter in the code emailed to you by the end user to finalize the ordering process.

Should you choose to personalize your hard hat, please complete form ID #0617-17-MC and submit with order.

## The "Try-It" Sample Program

The "Try It" sample program offers some of the most popular MSA head, eye, face and hearing protection products, including V-Gard Helmets, V-Gard Accessories, left/RIGHT Hearing Protection, and Sightgard® Eyewear completely FREE of charge! Look for the that tells you which products are included in the program.

- Please see "MSA Logo Express® Service Artwork Guidelines" (ID 0617-06-MC) for details on artwork submission. We can deliver your custom hard hats faster if we have our preferred artwork file formats, but we will work with whatever you give us to recreate your logo.
- Submit an electronic file of your artwork by email (Logo.Express@MSAsafety.com) or by US Postal Service:

**MSA Logo Express** 3880 Meadowbrook Rd. Murrysville, PA 15668-1753

*Be sure to include a copy of the completed Order Form with your artwork submission.*

#### The #1 Selling Hard Hat Has a New Look!

The features that have set the MSA V-Gard as a world leader in head protection remain: comfort, durability, customization, and support. The hydro dip finish provides a new twist on style, without sacrificing safety or performance. Choose from eight different standard looks, with the ability to customize to your specific design.\* All V-Gard hydro dip hard hats come with the first-in-class comfort of the Fas-Trac<sup>®</sup> III Suspension and are products of the U.S.

## Above-the-Neck Protection Solutions

## V-Gard 500 Hard Hats

Vented V-Gard 500 Caps and Hats provide cooling vents for improved air circulation and comfort; Non-Vented V-Gard 500 Caps and Hats provide dielectric head protection.

NFPA 70E is a work practice; it is not a standard and does not specify any test methods. No products "meet" NFPA 70E—users simply follow the practice of NFPA 70E. For head protection, NFPA 70E recommends that users wear Class E hard hats in following this work practice.

Customization: Imprinting and striping available—see pages 8–9 Replacement Suspensions: See page 7

#### **A WARNING**

Use only MSA's Fas-Trac III Suspension designed for Super-V Helmets. Use of any other suspension will reduce the energy-absorbing ability of the protective helmet, which can result in serious personal injury or death.

Customization: Imprinting and striping available—see pages 8–9 Replacement Suspensions: See page 7

<sup>1</sup>Skullgard caps and hats have been tested to radiant heat loads producing temperatures up to, but not exceeding, 350°F.

<sup>2</sup> Hi-Viz red-orange Skullgard Cap meets voluntary standard for hi-visibility as prescribed by ANSI/ISEA Z89.1-2014. Look for official

hi-visibility marking [HV] on the helmet's ANSI label.

<sup>3</sup>Alternative Skullgard Assemblies that include welder's lugs or lamp bracket and cord holder are certified to Class C electrical rating.

PRODUCT SPECIFICS	<ul> <li>Stowable slot adaptors secure frame tightly in slotted MSA caps, and allow frame to work with or without earmuffs<sup>2</sup></li> </ul>	Stowable slot adaptors secure frame tightly in slotted MSA caps, and allow frame to work with or without earmuffs	<ul> <li>Heavy duty flat rubber strap allows easy and secure placement on all MSA caps, including non-slotted models<sup>4</sup></li> </ul>
	<ul> <li>Sliding adjustment blades allow visor to work with most half-mask respirators and other PPE worn under a visor</li> </ul>	Sliding adjustment blades allow visor to work with most half-mask respirators and other PPE worn under a visor	Design allows use with other PPE, including MSA earmuffs and respirators

## V-Gard Accessory System: V-Gard Frames for Full-Brim Hard Hats

#### **V-Gard Frames for General Purposes**

Markets: General industry, manufacturing, repair and maintenance, construction, oil and gas, forestry, shipbuilding, metalworking, automotive, mining Applications: Chipping, splash, chiseling, drilling, grinding, machining, power fastening, sanding, sawing Standards<sup>1</sup>: ANSI/ISEA Z87.1-2015; CSA Z94.3; EN 166; and AS/NZS 1337

**Certification:** Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd. **Min Order Qty:** 10

PART NO.	10116627	
MATERIAL	High density polyethylene (HDPE)	
DEBRIS CONTROL	Offered without debris control ONLY	
PRODUCT SPECIFICS		
	• Design allows use with other PPE, including MSA earmuffs and respirators	
	Fits MSA Full-Brim Safety Helmets	

#### V-Gard Frames for Elevated Temperature Applications

**Markets:** Food manufacturing/canneries, steel mills, construction, open-pit mining, agriculture, oil/gas/petrochemical refineries, rubber manufacturing, and steam tunnels

**Applications:** Food processing, machine operation, maintenance, millwright, cutting, punching, extrusion, drilling, blasting, casting/conveying, chemical mixing, sanding

**Features:** Tested to withstand temperatures of 350°F (176.7°C), reducing warping, cracking or crazing

**Standards1:** ANSI/ISEA Z87.1-2015; CSA Z94.3; EN 166; and AS/NZS 1337 **Certification:** Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd.

Min Order Qty: 10

<sup>1</sup>Standards requirements met by each V-Gard Frame/V-Gard Visor combination designated on each V-Gard Visor. <sup>2</sup>Patent pending

<sup>3</sup>MSA recommends the use of debris control on V-Gard frames when wearing BOTH large V-Gard molded Visors and cap-mounted earmuffs. <sup>4</sup>MSA does not recommend the use of the V-Gard Universal Frame with the MSA SmoothDome when using cap-mounted muffs and large V-Gard molded Visors. The V-Gard Frame for Slotted Caps should be worn with this particular combination. MSA**safety**.com

## V-Gard Visors: Heavy Duty Chemical and Splash

Markets: General industry, heavy manufacturing, laboratories, chem/petrochemical, agriculture, pharmaceutical, oil and gas, mining

**Applications:** Chipping, splash, chemical mixing, grinding, machining, power fastening, sanding, sawing

Standards<sup>1</sup>: ANSI/ISEA Z87.1-2015; EN 166 (MSA 1B 3); CSA Z94.3 and AS/NZS 1337

**Certification:** Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd. **Min Order Qty:** 5

PART NO.	10115855	10115856	10115851		
MATERIAL	Propionate – clear	Propionate – clear	Propionate – clear		
FEATURES	Impact-rated (Z87+)     Please refer to MSA's Chemical Application Quick Reference Guide (ID 0670-007-MC) for chemical performance details				
PRODUCT SPECIFICS	•8" (20.3 cm) x 17" (43.2 cm) x .098" (2.5mm) •Extra-thick to help prevent warping, cracking or crazing under tough conditions	<ul> <li>•8" (20.3 cm) x 17" (43.2 cm) x .098" (2.5mm)</li> <li>•Nitrometer; for use with V-Gard Retractable or Standard Chin Protectors</li> <li>•Extra-thick to help prevent warping, cracking or crazing under tough conditions</li> </ul>	<ul> <li>9.25" (23.5 cm) x 18" (45.7 cm) x .098" (2.5mm)</li> <li>Extra-thick to help prevent warping, cracking or crazing under tough conditions</li> <li>Extended length and width for greater coverage of neck and face</li> </ul>		

V-Gard propionate Visors offer both chemical resistance and impact protection, unlike most propionate visors on the market. Not only are they marked with Z87+, but the clear visors are also compliant with EN166, meaning they were tested at a velocity nearly 32% faster than ANSI/ISEA Z87.1-2010. V-Gard green tint propionate Visors also offer maximum UV protection.

## V-Gard Visors: Elevated Temperature with High-Performance Anti-fog/Anti-scratch Coatings

**Markets:** Food manufacturing/canneries, steel mills, construction, open-pit mining, agriculture, oil/gas/petrochemical refineries, rubber manufacturing, steam tunnels

**Applications:** Hot/humid conditions, chipping, splash, chiseling, drilling, grinding, machining, power fastening, sanding, sawing, outdoor work

Standards<sup>1</sup>: ANSI/ISEA Z87.1-2015; EN 166 (2C-1.2 MSA IBT9KN); CSA Z94.3 and AS/NZS 1337 Certification: Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd. Min Order Qty: 5

PART NO.	10115853	10115854
MATERIAL	Polycarbonate with EN 166 performance-rated anti-fog/ anti-scratch coatings for hot/humid conditions (N,K marks, respectively) – clear	Polycarbonate with EN 166 performance-rated anti-fog/ anti-scratch coatings for hot/humid conditions (N,K marks, respectively) – green tint to reduce glare
FEATURES	<ul> <li>Maximum UV protection</li> <li>Impact-rated (Z87+)</li> <li>Thick for heavy-duty industrial impact applications</li> </ul>	
PRODUCT SPECIFICS	<ul> <li>10.375" (26.4 cm) x 17" (43.2 cm) x .098" (2.5 mm)</li> <li>Molded visor for superior optics under heavy duty use</li> <li>Extended length for greater coverage of neck/face</li> <li>Performs well against many chemicals. ## V-Gard Visors: Radiant Heat/Elevated Temperature

Markets: Metal industries, glass manufacturing, iron and steel foundries, chemical manufacturing, construction, general manufacturing, textile manufacturing, mining, oil and gas Applications: Grinding, pouring, casting, blowing/melting, rolling, sawing, cutting, crimping, millwrighting, machining/operating, pipelining, pulping Standards<sup>1</sup>: ANSI/ISEA Z87.1-2015; EN 166 (2C-2.5 MSA 1BT3R [clear] and 2-4 MSA 1BT3R [green tint]); CSA Z94.3 and AS/NZS 1337 Certification: Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd. Min Order Qty: 5

PART NO.	10177690	10177701	
MATERIAL	Polycarbonate with EN 166 performance-rated reflective coating (R mark) — clear; molded	Polycarbonate with EN 166 performance-rated reflective coating (R mark) – green tint to reduce glare and eye strain; molded	
FEATURES	<ul> <li>Maximum UV protection</li> <li>Impact-rated (Z87+)</li> <li>Reflects &gt;60% Infrared (IR) radiation (EN166 R mark) in the 780nm t</li> </ul>	o 2000nm wavelength	
PRODUCT SPECIFICS	<ul> <li>9.5" (24.1 cm) x 17.75" (45.09 cm) x .07" (1.8 mm)</li> <li>Reflective coating reflects IR and helps dissipate heat</li> <li>Thick visor helps prevent warping, cracking or crazing</li> <li>Extended length for greater coverage of face and neck;</li> <li>DO NOT use for welding</li> </ul>	<ul> <li>9.5" (24.1 cm) x 17.75" (45.09 cm) x .07" (1.8 mm)</li> <li>Reflective coating reflects IR and helps dissipate heat</li> <li>Not for use where a Shade IR visor is required</li> <li>Thick visor helps prevent warping, cracking or crazing</li> <li>Extended length for greater coverage of face and neck; DO NOT use for welding</li> </ul>	

Reflective-coated visors offer protection from irradiance, or the electromagnetic radiation (EMR) energy created in elevated temperature environments. V-Gard Reflective Coated Visors offer an EN166 "R" mark. This means they have been certified to reflect >60% Infrared (IR) radiation in the 780 nm to 2000 nm wavelengths. V-Gard Reflective Visors have been shown to reduce temperatures behind the visor by several hundred degrees, and lower irradiance to below 0.1 kW/m<sup>2</sup>. For details on V-Gard Reflective-Coated Visors performance, please see the MSA White Paper, "Radiant Heat Resistance" (ID 0670-020 MC) and "MSA V-Gard® Reflective-Coated Visors: Radiant Heat Resistance Simplified" (ID 0670-023 MC), available on MSAsafety.com.

<sup>1</sup>Standards requirements met by each V-Gard Frame or Headgear/V-Gard Visor combination designated on each V-Gard Visor.

## V-Gard Visors: Welding (Shade 3 and Shade 5)

**Markets:** Fabrication, steel mills, shipbuilding, construction, openpit mining, agriculture, oil/gas/petrochemical refineries, rubber manufacturing

Applications: Welding, metal pouring, gas soldering, light cutting/ brazing, manufacturing, impact and debris **Standards<sup>1</sup>:** ANSI/ISEA Z87.1-2015; EN 166 (4-3/3 MSA 1BT39 [shade 3] and 4-5/5 MSA 1BT39 [shade 5]); CSA Z94.3 and AS/NZS 1337

**Certification:** Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd. **Min Order Qty:** 5

<sup>1</sup>Standards requirements met by each V-Gard Frame or Headgear/V-Gard Visor combination designated on each V-Gard Visor. <sup>2</sup>Do not use V-Gard Arc Visors with V-Gard Headgear. These visors are designated for use with specified V-Gard Frames and MSA helmets ONLY. See "V-Gard Headgear" for additional details.

## **V-Gard Headgear**

V-Gard Headgear can be used for face protection when head protection is not required. V-Gard Headgear is available in two versions: General Purpose and Elevated Temperature (Extended). V-Gard Headgear are designed and approved for use with V-Gard Visors.<sup>1</sup>

**Markets:** General industry, manufacturing, repair and maintenance, construction, oil and gas, forestry, shipbuilding, metalworking, automotive, mining, chemical industries

**Applications:** Chipping, splash, chiseling, drilling, grinding, machining, power fastening, sanding, sawing, laboratory

Size: Standard (6-1/2 – 8) Sandards<sup>3</sup>: ANSI/ISEA Z87.1-2015; EN 166; CSA Z94.3; and AS/NZS 1337

**Certification:** Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd.

PRODUCT NAME	V-Gard Headgear Kit (General Purpose)	V-Gard Headgear Replacement Sweatband <sup>4</sup>
PART NO.	10127063	10127065
PRODUCT SPECIFICS	<b>Contains:</b> • V-Gard General Purpose Headgear (PN 10127061) • V-Gard Clear, PC Visor, 8" (20.3 cm) x 17" (43.2 cm) x .04" (1.02 mm) (PN 10115836)	<ul> <li>Sweat-wicking material over breathable foam helps keep workers cool, dry and comfortable</li> <li>Hook &amp; loop closure makes replacement easy</li> <li>Tested to the FR requirements in CSA Z94.3-07</li> <li>Sold in boxes of 25 (5 packages of 5)</li> </ul>

<sup>1</sup> Standards requirements met by each V-Gard Frame or Headgear/V-Gard Visor combination designated on each V-Gard Visor.

<sup>2</sup> **DO NOT** use V-Gard Headgear with V-Gard Arc Visors tested to ASTM F2178-2008 Test Method (ref. NFPA 70E-2012, Hazard Risk Category). These visors are designated for use with specified V-Gard Frames and MSA helmet ONLY as face protection for workers exposed to high voltage electric arcs. V-Gard Headgear has not been tested or certified to the Test Method, and should not be used for this type of Arc Flash protection.

<sup>3</sup> Exposure to extreme heat can cause thermal discomfort. Proper precautions should be taken to prevent heat stress and other injuries.

<sup>4</sup> Use only genuine MSA V-Gard Headgear replacement parts to help ensure compatibility and compliance. MSA does not warrant, guarantee or promote the use of components manufactured by other companies when used in conjunction with MSA products.

## V-Gard Chin Protectors<sup>1</sup>

Work with select V-Gard Nitrometer Visors to provide extra protection from impact and splash hazards to face and neck.

MSA does not warrant, guarantee, or promote the use of components manufactured by other companies when used in conjunction with MSA products.

## Welding Shield and Adapters

The best brand in hard hats and the best brand in welding shields have joined forces to combine the best of both technologies. This partnership, between MSA and Miller, delivers a truly unstoppable force in welding applications across all industries both companies touch.

MSA/Miller welding series offers five shields, three lens types and three specially-designed adapters that integrate seamlessly with MSA helmets. The welding shield and adapters are now certified for use with MSA V-Gard® Caps, Skullgard® Caps, Thermalgard® Caps, and SmoothDome® Caps. Their lightweight, low profile design makes these shields ideal for confined space welding applications.

**Applications:** Welding, gas soldering, light cutting/brazing, manufacturing, impact, and debris **Standards:** Certified to ANSI Z87.1-2015, ANSI Z89.1-2014 and compliant to CSA Z94.3.-2015

## **Elite Series Welding Shields**

## Hard Hat Accessories

#### **V-Gard Winter Liners**

V-Gard Winter Liners deliver extra warmth and protection under hard hats.

**Note: Flame resistant (FR)** liner is made of special fibers that allow it to self-extinguish when exposed to flame or thermal ignition. Flame resistance cannot be removed by washing. Unlike many other winter liners in the market, ALL layers of fabric in V-Gard Supreme Liner are flame-resistant, affording FR protection throughout the life of the product.<sup>2</sup> For this reason, only V-Gard Supreme Liner offers resistance to arc exposure.

PRODUCT SPECIFICS	Sheet of 25 labels

## Industrial Hearing Protection and Communication Systems

MSA has hearing protection products for nearly every industrial application. In fact, MSA offers what customers want most: economical options, cutting-edge technology, guality and outstanding performance.

The Noise Reduction Rating (NRR) describes the average sound level reduction ("attenuation") provided by hearing protectors in a laboratory setting. Because the NRR reflects lab (and perhaps not real-world) usage, the Occupational Safety and Health Administration (OSHA), recommends "de-rating" the NRR to help account for incorrect fit and inconsistent wear time on worksites. OSHA's methodology for Estimating *Hearing Protector Attenuation*<sup>1</sup>:

- **1.** 8-hour Time Weighted Exposure  $(TWA) = 94 \, dBA$
- **2.** *NRR of hearing protector* = 31 *dBA*
- **3.** Subtract 7 dB from the NRR
- = 31 dB 7 dB is 24 dB
- **4.** *Reduce value by 50%*  $= 12 \, dB$
- **5.** Subtract this value from the TWA =  $82 \, dB$  (Estimated Protection)
- 6. Decide if the Estimated Protection works for your environment!

#### **Helmet Mounted**

#### left/RIGHT<sup>®</sup> Hearing Protection for MSA Slotted Caps

MSA left/RIGHT earmuffs are different from any other on the market: the cups are designed to account for the asymmetrical position of each ear on the head. MSA left/RIGHT cups can be adjusted to the angle of the ear, and also independently raised or lowered.

Markets: General industry, manufacturing, repair and maintenance, construction, OGP, forestry, shipbuilding, mining

#### **Applications:**

- Heavy mechanical industries, compression rooms, airports (HIGH)
- Utilities, construction, general industry (MEDIUM)
- Food manufacturing, automotive, light industry (LOW)
- Standards: Meets ANSI S3.19-1974 and CSA Class A Standards **Compatible PPE:**
- V-Gard Slotted and Universal Frames-no additional parts needed Most V-Gard Visors
- MSA Slotted Caps and V-Gard H1 Helmets (for NRR/CSA Class, see chart)

#### **Economuff Value Hearing Protection**

Economuff hearing protector provides cost-effective options that don't sacrifice comfort or protection.

**Markets:** Repair and operation (MRO), mining, food and beverage manufacturing, metal fabrication, oil & gas, general manufacturing **Applications:** Facility maintenance, grinding, machine operations, sanding, welding, demolition, painting, assembly, cleaning

PRODUCT NAME	Economuff Multi-Position		
PART NO.	10061273		
NRR	23 dBA 24 dBA (under chin/behind head) (over the head)		
PRODUCT FEATURES	• Offers three positions: under the chin, behind the head or over the head		
Under the chin or behind the head positions     use of head protection			
	Durable design for use in tough environments		
	No metal parts		
	Padded headband makes longer wear possible		
	•One size fits most		

Standards: Meets ANSI S3.19-1974 and CSA Class B Standards Compatible PPE: MSA Helmets<sup>1</sup>

The attenuation of an earmuff depends on the fit of the muff against the head and around the pinnae (i.e., the "tightness" of the seal). Gaps, including those caused by safety glasses, provide an easy path for sound to travel, reducing protection levels. To reduce this effect, try not to put anything under the cup (such as pencils, hair, etc.). But, if you must wear protective eyewear, select either those with a thin strap or a very thin temple. If the gap is noticeable, the protection level is compromised.

The EPA requirement (40 CFR 211) specifies that hearing protectors sold in the U.S. must be tested to ANSI S3.19-1974 and labeled with a Noise Reduction Rating (NRR). MSA Hearing Protectors have been tested and labeled according to the EPA requirements. Standards organizations, such as ANSI and CSA, do not approve or certify hearing protectors. 37

#### Material: Polycarbonate

Standards<sup>1</sup>: ANSI/ISEA Z87.1-2015 and CSA Z94.3 (as noted)

#### **Outdoor with UV Exposure**

Markets: General industry, manufacturing, construction, oil and gas, forestry, shipbuilding

**Applications:** Chipping, splash, chiseling, drilling, grinding, machining, power fastening, sanding, sawing

**Certification:** Third-party by ICS and CSA International **Minimum Order Qty:** 12

OUTDOOR/UV MODEL Racer Red PART NO. 10106381	
SAFETY FEATURES	STYLING
<ul> <li>Impact-rated (Z87+)</li> <li>Anti-fog coating</li> <li>Maximum UV protection (U6)</li> </ul>	<ul> <li>Rich-red mirrored lens reflects light and reduces glare without color degradation</li> <li>Ideal for utility, aviation, mining, and transportation markets</li> </ul>

A common misconception is that all polycarbonate blocks UV. This is not the case. Under ANSI/ISEA Z87.1-2015 there is a required marking if the manufacturer claims protection from UV. Look for eyewear that both meets ANSI/ISEA Z87.1-2015 and has a U mark.

#### **Over-the-Glasses**

Markets: Facility safety, maintenance, repair and operations, overhaul, general industry, manufacturing, construction, oil and gas, metalworking, automotive

Applications: Assembly and mechanical, drilling, grinding, machining, masonry, power fastening, riveting, sanding, sawing

<sup>1</sup> CSA International certified models are denoted with a () symbol

Material: Polycarbonate

Standards<sup>1</sup>: ANSI/ISEA Z87.1-2015 and CSA Z94.3 (as noted)

#### Low Light

Markets: Transportation, inspection and repair, assembly, general industry, indoor construction, shipbuilding, automotive, food and beverage, pharmaceuticals

**Applications:** Assembly, chipping, chiseling, drilling, grinding, machining, pouring/casting, power fastening, riveting, sanding, sawing

LOW LIGHT MODEL Easy Flex PART NO. 10070919

## MSA—**The Safety Company**

Our business is safety. We've been the world's leading manufacturer of high-quality safety products since 1914. MSA products may be simple to use and maintain, but they're also highly-sophisticated devices and protective gear—the result of countless R&D hours, relentless testing and an unwavering commitment to quality that saves lives and protects millions of hard working men and women each and every day. Many of our most popular products integrate multiple combinations of electronics, mechanical systems and advanced materials to help ensure that users around the world remain protected in even the most hazardous of situations.

#### Our Mission

MSA's mission is to see to it that men and women may work in safety and that they, their families and their communities may live in health throughout the world.

#### MSA: WE KNOW WHAT'S AT STAKE.

Note: This Bulletin contains only a general description of the products shown. While product uses and performance capabilities are generally described, the products shall not, under any circumstances, be used by untrained or unqualified individuals. The products shall not be used until the product instructions/user manual, which contains detailed information concerning the proper use and care of the products, including any warnings or cautions, have been thoroughly read and understood. Specifications are subject to change without prior notice.

MSA operates in over 40 countries worldwide. To find an MSA office near you, please visit **MSAsafety.com/offices**.
