

## AERIAL BUCKET HOOKS

### RATED INJECTION MOLDED HOOKS

Our new rated aerial bucket hook is bright orange in color for quick and easy inspection, and does more than merely hold your buckets and aprons; it also provides load-bearing anchor points with a working load limit of 65 lbs each - an important element for protocols when working at height.

**1833-2**

Fits buckets with 2" - 2.5" lip.

**1833-3**

Fits buckets with 3" - 3.5" lip.

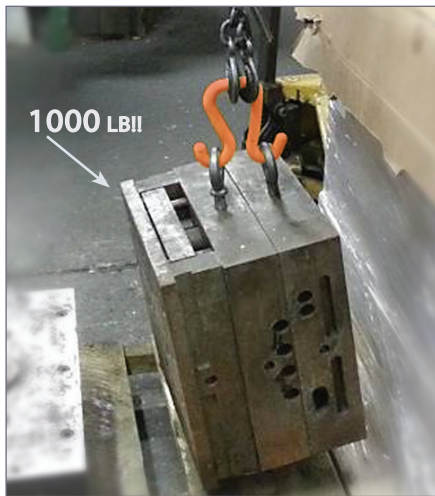

**1833-4**

Tapered, for use with Rubber Blankets

### SPECIFICATIONS AND FEATURES : RATED HOOKS

- WLL 65 lbs: Design Load
- Diameter fits aprons and buckets more securely
- Flammability - V2
- UV Resistant
- Abrasive Resistant per ASTM D1044
- Temperature Range -40° to 239° F
- Grease and Oil Resistant
- Made in USA

Static Load Capability Depiction for Rated Injection Molded Hooks

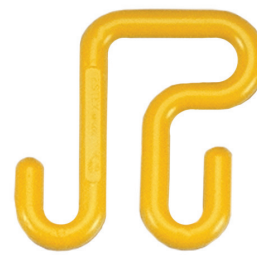

### POLYMER INJECTION MOLDED HOOKS

Polymer hooks are molded from a mixture of plastics that give these hooks high breaking strength and resistance to cold. Most hooks are designed to hold a tool apron inside the bucket, and an oval bag on the outside.

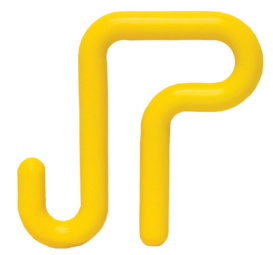

**1830**

Fits all standard buckets.

**1831**

Fits buckets with 3" lip.

**1832**

Fits buckets with 3" lip, no outside hook.

### INJECTION MOLDED HOOKS

Injection molded hooks have a high breaking strength and are resistant to cold temperatures. These hooks are economical and designed to hold tool aprons as well as oval buckets.

**1H-1842**

Fits buckets with 3" lip.

**1H-1840**

Fits all standard buckets.

### PVC HOOKS

**1848**

Fits buckets with 3" lip. 5/8" dia.

**1846**

Fits all standard buckets.

**1848-1**

Fits buckets with 3" lip. 3/4" dia.
