Square-Duct™ Wireways Wireway Offerings

(Clockwise from top): Oiltight—NEMA Type 12 Wireway Tee, Flange Gasket, Connector, Barriers with Brackets, 90° Elbow

General Purpose—NEMA Type 1 Wireway

Application and General Information

Wireway is designed to protect electrical wiring from dust, dirt, oil, and water. It is also designed to carry electrical feeders, branch circuits, and other groups of conductors. Most sections and fittings are completely open on one side so wires and cables can be laid in along an entire wireway run. No pulling through of wires or cables is required with most designs.

The Square D™ Wireway products, manufactured by Schneider Electric, are available in the following types:

- General Purpose—NEMA Type 1 Painted Wireway
- Oiltight—NEMA Type 12 Wireway
- Raintight—NEMA Type 3R Wireway
- Raintight—NEMA Type 3R Trough

All wireway is UL listed under file E27524, 870, and CSA file 42184, Type 1.

Wireway can be used for a variety of applications and, in most cases, can be installed faster and at less expense than conduit. Applications include:

- Incoming cable runs and feeder circuits from switchboards to power and lighting panels
- Distribution of power in industrial plants
- Ganging equipment such as motor controllers, safety switches, and metering devices
- Vertical runs of cable in elevator shafts

When comparing wireway with conduit, wireway provides the following advantages:

- Weighs less and is reusable
- Is easier to install
- Allows conductors to be laid in
- Makes additions to the wiring system easier
- Provides provisions for tap-offs

General Purpose—NEMA Type 1 Painted Wireway

Application

General Purpose—NEMA Type 1 Painted Wireway is designed to protect electrical wiring from dust, dirt, oil, and water. All sections and fittings are completely open on one side so wires and cables can be laid in along an entire wireway run. No pulling through of wires or cables is required with this design.

General Purpose—NEMA Type 1 Painted Wireway

A complete selection of sections and fittings is available in six sizes:

Inches	Millimeters
2.50 x 2.50	64 x 64
4.00 x 4.00	102 x 102
6.00 x 6.00	152 x 152
8.00 x 8.00	203 x 203
10.00 x 10.00	254 x 254
12.00 x 12.00	305 x 305

Square-Duct™ Wireways

General Purpose—NEMA Type 1 Painted Wireway

Construction

General Purpose—NEMA Type 1 Painted Wireway construction consists of:

- 16 gauge galvanized steel covers and bodies in sizes:
 - 2.50 in. x 2.50 in. (64 mm x 64 mm)
 - 4.00 in. x 4.00 in. (102 mm x 102 mm)
 - 6.00 in. x 6.00 in. (152 mm x 152 mm)
- 14 gauge galvanized steel covers and bodies in sizes:
 - 8.00 in. x 8.00 in. (203 mm x 203 mm)
 - 10.00 in. x 10.00 in. (254 mm x 254 mm)
 - 12.00 in. x 12.00 in. (305 mm x 305 mm)
- Available with knockouts or without knockouts in sizes:
 - 2.50 in. x 2.50 in. (64 mm x 64 mm)
 - 4.00 in. x 4.00 in. (102 mm x 102 mm)
 - 6.00 in. x 6.00 in. (152 mm x 152 mm)
- Available without knockouts in sizes:
 - 8.00 in. x 8.00 in. (203 mm x 203 mm)
 - 10.00 in. x 10.00 in. (254 mm x 254 mm)
 - 12.00 in. x 12.00 in. (305 mm x 305 mm)
- Patented hidden hinge permits the screw-cover arrangement to be converted to a hinge-cover system on all sizes except 12.00 in. x 12.00 in. (305 mm x 305 mm), where hold-down screws are on BOTH sides of the wireway
- Open-top assembly protection for wire and cable insulation that could be damaged in a pull-through wiring system
- Knockouts on wireway sides
- Adapters available for connection to other brands of wireway

Finish

General Purpose—NEMA Type 1 Painted Wireway is furnished in ANSI 49 gray polyester powder finish inside and out over phosphatized surfaces.

Various Components for Type 1 Wireway

Square-Duct™ Wireways

General Purpose—NEMA Type 1 Painted Wireway

Industry Standards

General Purpose—NEMA Type 1 Painted Wireway is in compliance with the following industry standards:

- UL Listed to File E27524, 870
- NEMA/EEMAC Type 1
- CSA Listed to File LL42184, Type 1
- IEC 60529, IP30

Square-Duct™ Wireways

General Purpose—NEMA Type 1 Painted Wireway

This drawing illustrates how most of the General Purpose—NEMA Type 1 Painted Wireway sections and fittings could be used in an actual wireway run. The covers have been omitted to present the lay-in feature more clearly. Many different sections and fittings can be combined in any configuration desired.

Straight Section

Available in lengths from 1 ft (30 cm) to 10 ft (305 cm).

90° Flush Tee

Use wherever flush mounting against a vertical or horizontal surface is required.

90° Sweep Elbow

When a large radius is needed, use this sweep elbow.

90° Cross-Junction

This unique fitting forms left or right 90° turns. It can also be used as a tee or cross. When fitted with an open adapter, entrances can be made in the top and bottom. Each unit includes two closure plates.

90° Elbow

Any side can be removed, so lay-in feature is retained regardless of how the elbow is oriented. Sides are held together with screws.

45° Elbow

Similar to the 90° elbow in design and function.

Square-Duct™ Wireways General Purpose—NEMA Type 1 Painted Wireway

Telescope Fitting

Length is easily adjustable to approximately 12.00 in. (305 mm). No cutting or welding required.

1.38 in. (35 mm) on:

- 2.00 in. x 200 in. (51 mm x 51 mm)
- 4.00 in. x 4.00 in. (102 mm x 102 mm)
- 6.00 in. x 6.00 in. (152 mm x 152 mm)

Open Adapter

Used with the 90° Elbow-Tee-Cross fitting to permit a run directly up or down.

Panel Adapter

A flanged fitting which allows the wireway to be securely connected to an enclosure.

2.00 in. (51 mm) on:

- 8.00 in. x 8.99 in. (203 mm x 203 mm)
- 10.00 in. x 10.00 in. (254 mm x 254 mm)
- 12.00 in. x 12 in. (305 mm x 305 mm)

Connector

Wireway sections and fittings are rigidly joined together with connectors. The top member swings aside to retain the lay-in feature. A connector is required at each wireway joint except at telescope fittings, panel adapters, open adapters, closing plates or reducers. Connectors must be ordered separately.

Closing Plate

Closes the end of a wireway section or run.

Reducer

Used to reduce to a smaller wireway size.

Drop Hanger

Used to support a wireway run.

Bracket Hanger

Used to support a wireway run.

Support Hanger

Support hangers can be used for floor or wall installations.

Square-Duct™ Wireways
General Purpose—NEMA Type 1 Painted Wireway

Oiltight—NEMA Type 12 Wireway

Application

Oiltight—NEMA Type 12 Wireway is designed to protect electrical wiring from dust, dirt, oil, and water. All straight sections and fittings are completely open on one side so wires and cables can be laid in along an entire wireway run. No pulling through of wires or cables is required with this design.

Oiltight Lay-in—NEMA Type 12 Wireway

A complete selection of sections and fittings is available in five sizes:

Inches	Millimeters
2.50 x 2.50	64 x 64
4.00 x 4.00	102 x 102
6.00 x 6.00	152 x 152
8.00 x 8.00	203 x 203
12.00 x 6.00	305 x 152

Construction

Oiltight—NEMA Type 12 Wireway construction consists of:

- 14 gauge steel covers and bodies
- 10 gauge steel end flanges
- Seams continuously welded and ground smooth—no holes or knockouts
- Smooth, rounded edges on all sections and fittings to prevent damage to insulation
- Heavy butt hinges and strong latches to ensure complete seal between covers and bodies
- Quick-release cover latches that permit immediate access to wireway interior
- Oil-resistant gasket and adhesive
- Solid oil-resistant gasket positioned between flanges when sections and fittings are bolted together
- Gasketed quick-release connector that provides complete sealing at each joint

Square-Duct™ Wireways Oiltight—NEMA Type 12 Wireway

Finish

Oiltight—NEMA Type 12 Wireway is furnished in ANSI 49 gray polyester powder finish inside and out over phosphatized surfaces. The sealing plate and quick-release latches are zinc plated with yellow chromate coating.

(Clockwise from top): Oiltight—NEMA Type 12 Wireway Tee, Flange Gasket, Connector, Barriers with Brackets, 90° Elbow

Industry Standards

Oiltight—NEMA Type 12 Wireway is in compliance with the following industry standards:

- UL Listed to File E27524, 870
- NEMA/EEMAC Type 12
- JIC standards EGP-1–1967 and EMP-1–1967
- CSA Listed to File LL42184, Type 12
- IEC 60529, IP54

Accessories

Touch-up paint (order # PK49SP)

NOTE: Dimensions H, J, and K are from intersections of center lines. All dimensions are to outside surfaces. Allow 0.12 in. (3 mm) for flange gasket when two pieces are joined. If, however, one piece is a "Closure Plate," "Box Connector," "Cut-off Fitting," or non-lay-in wireway, allow .25 in. (6 mm) for the thicker gasket which is used.

Square-Duct™ Wireways Oiltight—NEMA Type 12 Wireway

This drawing illustrates how most of the Oiltight—NEMA Type 12 Wireway sections and fittings could be used in an actual wireway run. The covers have been omitted to present the lay-in feature more clearly. Many different sections and fittings can be combined in any configuration desired.

Straight Section

Available in lengths from 1 ft (30 cm) to 10 ft (305 cm).

Lay-In Cut-Off Fitting

For lengths of 9.00 in. (229 mm) to 15.00 in. (381 mm) only. Body comes in two pieces. Shorten body and cover to the desired length and weld together.

Non-Lay-In Cut-Off Fitting

For lengths up to 12.00 in. (305 mm). Shorten body to desired length and weld on flange. This is not a "lay-in" fitting, but is often used when entering an enclosure.

Square-Duct™ Wireways

Oiltight—NEMA Type 12 Wireway

Lay-In Telescope Fitting

Length is easily adjustable from 1.00 in. (25 mm) to 7.00 in. (178 mm). No cutting or welding required.

Junction Box

The junction box has a removable panel on which terminal blocks and other components may be mounted. Panel dimensions are:

- 8.75 in. x 6.88 in. (222 mm x 175 mm) for F-22LJ
- 10.75 in. x 8.88 in. (273 mm x 225 mm) for F-44LJ
- 12.75 in. x 10.88 in. (324 mm x 276 mm) for F-66LJ
- 14.75 in. x 12.88 in. (375 mm x 327 mm) for F-88LJ

Cross

Used when there are four branches, all open along the same side.

90° Elbow Top Opening

90° Elbow Inside Opening

90° Elbow Outside Opening

Because sections of lay-in wireway can be mounted with covers oriented in any direction, three different 90° elbows are offered. Proper selection allows the user to maintain the same access and thereby preserve the lay-in feature for right-angle installations.

Square-Duct™ Wireways Oiltight—NEMA Type 12 Wireway

90° Elbow Outside Top Opening

This elbow fitting allows a vertical drop to equipment below at a 90° corner while maintaining the top opening lay-in feature.

45° Elbow Top Opening

Similar to the 90° elbows in design and function, but is used where a 45° angle is needed.

45° Elbow Inside Opening

45° Elbow Outside Opening

Similar to the 90° elbows in design and function, but is used where a 45° angle is needed.

Tee Top Opening

This fitting is used when the covers of all three branches of the wireway run are open along the same side.

Outside Tee Top Opening

This fitting is used when the covers of two branches are on the same side and the third cover is on a different side.

Nipple

Available in lengths of 1.00 in. (25 mm), 2.00 in. (51 mm), 3.00 in. (76 mm), and 6.00 in. (152 mm).

Drop Hanger

Hangers are used to support a wireway run. The drop hanger is normally attached to an overhead beam or ceiling, while the bracket hanger can be used for wall, floor, or ceiling installations.

Bracket Hanger

Square-Duct™ Wireways

Oiltight—NEMA Type 12 Wireway

Box Connector

When wireway enters an enclosure, a box connector should be used on the inside of the enclosure to ensure a tight seal.

Closing Plate

Used to seal the end of a wireway section or run.

Clockwise Transposition Section

These fittings are used when it is necessary to rotate the open side of the wireway run by 90° and still retain the lay-in feature.

Counter-Clockwise Transposition Section

90° Elbow Clockwise Transposition

90° Elbow Counter-Clockwise Transposition

These fittings are used when it is necessary to rotate the open side of the wireway run by 90° and still retain the lay-in feature.

Barrier, Bracket Mounted

Divides wireway into two or three compartments. Spring steel brackets hold barriers in place by friction fit inside wireway. Order barrier and bracket separately. Recommended spacing in increments of 3 ft (91 cm).

W = 3.00 in. (76 mm) for 4.00 in. x 4.00 in. (102 mm x 102 mm)

W = 4.50 in. (114 mm) for 6.00 in. x 6.00 in. (152 mm x 152 mm)

Barrier Kit (Bolt-On)

Divides wireway into two or more compartments. Barriers are fastened to wireway sections with screws. Sealing washers are included.

W = 3.00 in. (76 mm) for 4.00 in. x 4.00 in. (102 mm x 102 mm)

W = 4.50 in. (114 mm) for 6.00 in. x 6.00 in. (152 mm x 152 mm)

W = 6.00 in. (152 mm) for 8.00 in. x 8.00 in. (203 mm x 203 mm)

Square-Duct™ Wireways Oiltight—NEMA Type 12 Wireway

Reducer

This fitting permits the lay-in feature to be retained when reducing to a smaller wireway size.

Connector

When joining a lay-in section or fitting to a closure plate, a box connector, a non-lay-in cut-off fitting, or any similar non-lay-in section or fitting, a 90° angle sealing plate is required at each junction. This plate is furnished with fittings as noted on page 15. Additional 90° angle sealing plates may be required in some cases. Plate includes a flange gasket and flange screws, not shown.

Extra Connector Kit

This hinged sealing plate permits quick and easy access to the wireway interior without using a tool.

Patent number 4,398,564

Flange Detail

Square-Duct™ Wireways
Oiltight—NEMA Type 12 Wireway

Raintight—NEMA Type 3R Wireway

Application

Raintight—NEMA Type 3R Wireway is designed to protect electrical wiring in outdoor installations against rain, sleet, and snow or indoors against dripping water. All sections and fittings are completely open on one side so wires and cables can be laid in along an entire wireway run. No pulling through of wires or cables is required with this design.

Raintight Lay-in—NEMA Type 3R Wireway

A complete selection of sections and fittings is available in three sizes:

Inches	Millimeters
4.00 x 4.00	102 x 102
6.00 x 6.00	152 x 152
8.00 x 8.00	203 x 203

Construction

Raintight NEMA —Type 3R Wireway construction consists of:

- 16 gauge galvanized steel straight sections in sizes:
 - 4.00 in. x 4.00 in. (102 mm x 102 mm)
 - 6.00 in. x 6.00 in. (152 mm x 152 mm)
- 14 gauge galvanized steel straight sections in size
 - 8.00 in. x 8.00 in. (203 mm x 203 mm)

NOTE: All other components of this product line are 14 gauge steel.

- Open top assembly protection for wire and cable insulation that might otherwise be damaged in a pull through wiring system
- Self-connecting system with minimum usage of fasteners
- Removable covers held firmly closed with quick-release latches to maintain rain-tightness throughout
- Quick-release cover latches permit immediate access to wireway interior

Square-Duct™ Wireways

Raintight—NEMA Type 3R Wireway

Finish

Raintight—NEMA Type 3R Wireway is furnished in ANSI 49 gray polyester powder finish over galvanized steel.

Industry Standards

Raintight—NEMA Type 3R Wireway is in compliance with the following industry standards:

- NEMA/EEMAC Type 3R
- IEC 60529, IP32

Square-Duct™ Wireways

Raintight—NEMA Type 3R Wireway

Straight Section

Available in lengths from 1 ft (30 cm) to 10 ft (305 cm).

90° Flush Tee

Use wherever flush mounting against a vertical surface is required.

30° Sweep Elbow

When a large radius is needed, use this sweep elbow.

90° Elbow-Tee-Cross

Use when there are four branches. It can be used as a 90° Elbow or a 90° Flush Tee by adding Closure Plates.

90° Elbow

Used whenever a right-angle installation is needed.

Panel Adapter

Allows the wireway to be securely connected to an enclosure.

Closing Plate

Closes the end of a wireway section or run.

Reducer

Used to reduce to a smaller wireway size.

Connector

Used to rigidly join fittings to straight sections.

Drop Hanger

Used to support a wireway run.

Bracket Hanger

Used to support a wireway run.

Wall Hanger

Used to support a wireway run.

Raintight—NEMA Type 3R Trough

Application

Raintight—NEMA Type 3R Trough is designed to protect electrical wiring in outdoor installations against rain, sleet, and snow or indoors against dripping water.

Raintight—NEMA Type 3R Trough

Construction

Raintight—NEMA Type 3R Trough construction consists of:

- 16 gauge or 14 gauge galvanized steel
- Drip shield top and seam-free sides, front, and back that protect from rain, snow, or sleet
- Slip-on removable cover fastened with captive, plated steel screws along bottom edge
- Embossed mounting holes on back of enclosure
- Provision for padlocking
- No gasketing or knockouts

Finish

Raintight—NEMA Type 3R Trough is furnished in ANSI 49 gray polyester powder finish over galvanized steel.

Industry Standards

Raintight—NEMA Type 3R Trough is in compliance with the following industry standards:

- UL Listed to File E27524, 870
- NEMA/EEMAC Type 3R
- CSA Listed to File LL42184, Type 3R
- IEC 60529, IP32
