

MEGASTRETCH™ HI-STRETCH NON-DETECTABLE TAPE 3" x 6000'

Stretches up to 10 times its length before breaking; its blended polymers create a unique, strong-yet-stretchable warning tape for the telecommunications industry. Unique polymer gives stretch and strength needed for plowed installations. This combination also provides the stretch properties needed for increased visibility during accidental dig-ins. "Plow-mount-ready" super-length spools minimize roll changes. Wound onto heavy-duty, wax-impregnated cores designed withstand the rigors of the job site.
