by Schneider Electric

Overview

Square D™ brand QMB fusible power distribution panelboards are for use on AC or DC systems. They are UL® Listed under File E6294 and File E33139 and marked cULus.

QMB Panelboard Main Lugs and Solid Neutral Compartment

Features

QMB panelboards are engineered with the following features:

- Main Lugs ratings 100–1200 A
- Main Fusible Switch ratings 100–800 A
- Main lugs or main switch interiors are suitable for top or bottom feed
- Main switch factory-mounted on bus assembly (cannot back-feed branch switch)
- Main lugs and solid neutral mounted in same compartment
- Bolted cover isolates main lugs compartment from branch switches
- Type 1 enclosures are 38.00 inches wide by 11.5 inches deep
- Type 3R/12 enclosures are 38.89 inches wide by 14.90 inches deep

Service Entrance Equipment

The following are suitable for use as service entrance equipment:

- All main fusible switch panelboards (Canadian Service Entrance solutions are not available)
- All main lug panelboards with six disconnects or less.
- A solid neutral that is insulated, but may be bonded to the box with a ground strap.

Fuses

QMB switches are designed to accept the following fuse classes:

- QMB Switch rated 30–600 A — Class H, R, or J fuses
- QMB Switch rated 601–800 A — Class L fuses
- QMB Switch rated 400–800 A — Class T fuses
- QMJ Switch rated 30–600 A — Class J fuses only

QMB Panelboard Main Switch and Solid Neutral Compartment

QMB Fusible Panelboards

Overview

Standards

QMB fusible panelboards are designed, manufactured and tested to meet the requirements of the latest revisions of the following standards:

- UL 50; Enclosures for Electrical Equipment
- UL 67; Standard for Panelboards
- CSA C22.2, No. 29-1989; Panelboards and Enclosed Panelboards
- NEMA PB 1; Panelboards
- NFPA 70; National Electrical Code (NEC)
- Federal Specification W-P115C Type II Class 1; Fusible Switch Panelboards
- International Building Code (IBC), NFPA 5000, ASCE/SE17 - Seismically Qualification

QMB Fusible Switch Units

- UL 98; Enclosed and Deadfront Switches. UL Listed File E34358
- NEMA KS1; Enclosed Switches
- Federal Specification WC-865C; Fusible Switches
- CSA; File LL-48755

QMJ Fusible Switch Units

- UL 98; Enclosed and Deadfront Switches. UL Listed File E34358
- NEMA KS1; Enclosed Switches
- Federal Specification WC-865C; Fusible Switches
- CSA; File LR-48755

QMB Circuit Breaker Units

- UL 50; Enclosed for Electrical Equipment. UL Listed File E34358
- UL489; Molded Case Circuit Breakers
- NEMA AB1; Molded Case Circuit Breakers and Molded Case Switches
- Federal Specification WC-375B/Gen; Molded Case Circuit Breakers
- CSA; File 048755

Service

- 1 ϕ 2W, 240 Vac
- 1 ϕ 3W, 120/240 Vac
- 3 ϕ 3W, 240 Vac
- 3 ϕ 3W, 240 Vac corner ground delta
- 3 ϕ 4W, 208Y/120 Vac
- 3 ϕ 4W, 480Y/277 Vac
- 3 ϕ 3W, 480 Vac
- 3 ϕ 4W, 600Y/347 Vac
- 3 ϕ 3W, 600 Vac
- 2W, 250 Vdc
- 3W, 125/250 Vdc

Enclosure Types

Type 1 Enclosure

- Fronts; Standard, four-piece, without door with gray-baked enamel finish (ANSI 49)
- Enclosure; with removable endwalls with knockouts.

Type 2 Enclosures

- Type 1 with driphood

Type 3R, 5, and 12 Enclosures

- Gasketed door with keyed vault handle
- Self-adhesive directory card holder
- Gray-baked enamel finish (ANSI 49)
- No knockouts

Table 1: Enclosure Options

NEMA Type	Environment	Provides Protection Against
Type 1	Indoor	Contact with the enclosed equipment
Type 2	Indoor	Type 1, plus: • Dripping / light splashing of non-corrosive liquids
Type 3R	Outdoor	Type 2, plus: • Rain, snow, and sleet
Type 5	Indoor	Type 2, plus: • Settling airborne dust, lint, fibers, and flyings
Type 12	Indoor	Type 2, plus: • Circulating dust, lint, fibers, and flyings • Settling airborne dust, lint, fibers, and flyings • Oil and coolant seepage

QMB Fusible Panelboards Overview

▲ Per NEC Table 373-6 (AWG/kcmil).

High-strength, glass-reinforced polyester bus supports. Mounting 30–800 A switch units, 15–400 A circuit breaker units, and NEMA size 0–3 motor starter units require only a screwdriver.

The integrated equipment short circuit current rating of the QMB panelboard is equal to the lowest short circuit or interrupting capacity rating, at the supply voltage of the installed circuit breaker or motor starter. The rating is a maximum of 200,000 rms symmetrical amperes at 600 Vac.

Blow-on Connections

All main or branch unit-to-bus bar connections are “blow-on” type. Under high level short circuit conditions, the magnetic forces developed tend to draw the connector jaws together, gripping the QMB bus bar more firmly.

Mounting brackets support and align switch units, circuit breaker units and motor starter units.

Fusible switch units, circuit breaker units, and motor starter units have permanently attached mounting brackets.

Extruded bus provides high mechanical strength.

QMB Bus Structure and Branch Unit Mounting

QMB Switches

QMB switches are designed for use in panelboards and switchboards to provide a means for disconnecting a load from its source, open and close a circuit, and to provide overcurrent and short circuit protection.

30–100 A Fusible Twin Switch Units—UL Listed Ratings

- 600 Vac maximum
- 250 Vdc maximum—2-pole construction only
- 30–100 A twin-mounted switch units
- For use with Class H, R, or J fuses
- UL Listed for use on systems with up to 200,000 rms symmetrical amperes available fault current when used with Class R fuses, and the appropriate Class R fuse kit installed, or Class J fuses installed.

Typical QMB Fusible Twin Switch Unit

Typical QMB Fusible Single Switch Unit

200–800 A Fusible Single Switch Units—UL Listed Ratings

- 600 Vac maximum
- 250 Vdc maximum—2-pole construction only
- For use with Class H, R, J, L, or 600 Vac Class T fuses
- UL Listed for use on systems with up to 200,000 rms symmetrical amperes available fault current with Class R fuses, and the appropriate Class R fuse kit installed, or Class J, L, or T fuses installed.

Positive lock-off means with provisions for three 3/8-inch shackle padlocks.

Dual-cover interlock

Features of a Typical QMB Switch

QMB Fusible Panelboards

QMB Switches

Visible Blades

- 30–800 A QMB switches
- Provides positive identification of the position of the switch blades

Visible Blades

Class R Fuse Kits

- 30–600 A QMB switches
- With kit installed, the QMB switch accepts only Class R fuses
- Available for field installation

Class R Fuse Kits

Class J Fuse Provisions

- 30–600 A QMB switches only, 600 Vac maximum
- For field modification, move load-side base to position indicated in switch

Class J Fuse Provisions

Fuse Pullers

- 30–100 A QMB switches only
- Convenient aid for removing fuses

Fuse Pullers

Versa-Crimp® Lugs

- 100–800 A QMB switches only
- Available for field installation
- Accepts either Cu or Al wire

Versa-Crimp Lugs (installed)

Versa-Crimp Lugs

Electrical Interlocks

- 30–200 A QMB switches only
- For use on motor control circuits or auxiliary functions
- Available for field installation

Electrical Interlocks

QMB Fusible Panelboards

QMB Switches

QMB Fusible Panelboards QMJ Fusible Switches

QMJ Fusible Switches

QMJ fusible switches allow for smaller panelboards, saving installation time and space. With the Class J fuses installed, overcurrent and short circuit protection are provided.

Application

- Type 1 vented enclosures only
- For use on 400, 600, 800, and 1200 A interiors only
- 30 through 200 A twin-mounted switch units
- 400 and 600 A single-mounted switch units
- 600 Vac or 250 Vdc maximum
- On dc systems, use top and bottom switching poles
- 200,000 rms symmetrical amperes at 600 Vac short circuit current with Class J fuses
- Use 600 V Class J fuses only
- Horsepower ratings from 3 to 500 horsepower
- Use only 90 °C insulated conductors based on an ampacity of 75 °C conductors

Typical Single and Twin Switch Units

Typical QMJ Switch

QMB Fusible Switches Features and Accessories

Visible Blades

- 30–600 A QMJ switches
- Provides positive identification of the position of the switch blades

Visible Blades

Electrical Interlocks

- 30–400 A QMJ switches
- For use on motor control circuits or auxiliary functions
- Available for field installation
- UL Listed
- CSA Certified

Electrical Interlocks

Fuse Puller

- 30–100 A QMJ switches
- Convenient aid in removing fuses

Fuse Puller

Versa-Crimp Lugs

- 100–600 A QMJ switches
- Available for field installation
- Accepts either Cu or Al wire
- UL Listed
- CSA Certified

NOTE: QMJ switches are limited to NEMA 1, 400–1200 A panelboards.

▲ “-1” indicates one normally open and one normally closed contact. “2” indicates two normally open and two normally closed contacts.

■ On dc systems, use top and bottom switching poles.

◆ Blank units cannot be modified to accept a switch interior.

▲ Use only 90 °C insulated conductors based on an ampacity of 75 °C conductors.

QMB Circuit Breaker Units

QMB circuit breaker units are designed for use in panelboards and switchboards to:

- Provide a means for disconnecting a load from its source.
- Open and close a circuit.
- Provide overcurrent and short circuit protection.

NOTE: Refer to the QMB Motor Starter Centers Catalog, Class No. 2320, for horsepower ratings.

QMB Single- and Twin-Mounted Circuit Breaker Units

Optional Circuit Breaker Accessories

- Shunt trip
- Undervoltage trip
- Auxiliary switch
- Alarm switch

NOTE: Refer to the Square D Digest for additional information.

15–150 A Twin-Mounted Circuit Breaker Unit

QMB SurgeLogic™ TVSS Devices

The IMA series is a modular parallel transient voltage surge suppressor (TVSS) designed for service entrance or downstream applications. The IMA device is a multi-stage suppression circuit consisting of field-proven, fast-acting 34 mm metal oxide varistors (MOVs).

A surge suppression path is provided for each mode, line-to-neutral (L–N), line-to-line (L–L), line-to-ground (L–G), and neutral-to-ground (N–G). Each surge suppression mode is individually fused and uses circuitry with thermal cutout to provide normal operation during severe overvoltages and high fault current conditions. The suppression elements are encapsulated in a UL® recognized potting material, providing additional protection. A filter is added to provide a high level of EMI/RFI noise attenuation. On-line diagnostics continuously monitor the unit status and have redundant LEDs to signal a loss of a suppression circuit. An audible alarm with an enable/disable feature and dry contacts are included in the standard diagnostic package.

QMB Switch with TVSS Device

Features

- Individually fused suppression modes
- Thermal cutout
- Solid state bi-directional
- Press-to-Test on-line diagnostic display
- Front panel alarm with enable/disable switch
- LED indicators indicate loss of protection, or fully operational circuit including N–G
- High-energy parallel design for category A, B, and C3 applications
- AC tracking filter with EMI/RFI filtering up to -50 dB from 100 kHz to 100 MHz

QMB8IMA■_	600Y/347 Vac 3-phase, 4-wire	1200	1200	1200	2000	420

▲ MCOV = maximum continuous operating voltage

■ Add "C" suffix for surge counter

Table 14: Specifications

Relative Humidity	0 to 95% non-condensing
Operating Frequency	47–63 Hz
Storage Temperature	-40 to +65 °C (-40 to +149 °F)
Operating Temperature	-10 to +50 °C (+14 to +122 °F)
Standards	ANSI/IEEE C62.41 and C62.45 UL 1449 Second Edition
Fusing	Individually fused suppression modes

Table 15: Options

Option	Description	Catalog Option Number
Audible Alarm	Sounds the alarm.	None (standard)
Dry Contacts	Provides remote indication of the TVSS device's operating status to a computer interface board or emergency management system.	None (standard)
Surge Counter	Displays the number of transient voltage surges since the counter was last reset. The counter is battery powered to retain memory in the event of a power loss to the TVSS device.	C
Remote Monitor	Provides TVSS status up to 1000 feet away from the unit.	TVS12RMU
