Overview of Altivar™ 12

Type of Motor Control		Simple Machines
Key Application/Market Segment		• Conveyors • Mixers • Gate control • Machine movement
Drives		**Altivar 12**
Distribution voltage ranges for 50/60 Hz line supply		Single-phase 100–120 V Single-phase 200–240 V Three-phase 200–230 V
Horsepower ratings for three-phase motors		1/4–1 hp, 115/230 V single-phase input 1/4–3 hp, 208/230 V single-phase input 1/4–5 hp, 208/230 V
Drives	Output frequency	0.5– 400 Hz
	Type of Control	
	Asynchronous motor	Sensorless flux vector control Kn2 quadratic ratio for pump and fan
	Synchronous motor	—
	Transient overtorque	150% to 170% of nominal motor torque
Functions Number of Functions		40
Number of I/O	Analog inputs	1
	Analog outputs	1
	Logic inputs	4
	Logic/Relay outputs	1 L.O., 1 N.O./1 N.C. relay contacts
Communication	Integrated	Modbus™
	Available as an option	—
Other Option Cards		—
Enclosure Rating		IP20
Standards and Certifications		EC/EN 61800-5-1, IEC/EN 61800-3 (Environments 1 and 2, categories C1 and C3) CE, UL, CSA, C-Tick, NOM, GOST

Overview of Altivar™ 680/980 Process, and 660/960 Process

	North America Drive Systems	
Key Applications and Market Segment	• Water Waste Water • Regenerative Applications • Oil and Gas • Mining, Minerals, and Metals • Food and Beverage	• Water Waste Water • Regenerative Applications • Oil and Gas • Mining, Minerals, and Metals • Food and Beverage
	Altivar 680/980 Process Drives *New!*	**Altivar 660/960 Process Drives**
Brief Description	The world's first three-level low harmonic drive, Altivar 680/980 drive solutions are designed for pumping or mechanical movement applications where harmonic mitigation and overall size is a priority. The ATV680/980 has embedded, industry-leading harmonic mitigation technology, which results in THDi levels of 2.3%. With its small footprint and capability to be customized, the ATV680/980 is a very flexible low harmonic solution. The ATV680/980 is a more efficient, more compact, and higher performing active rectification drive than any of our competitors by the integration of a common mode suppressing filter, and unique active filter resonance control. The ATV680 is capable of 120% regeneration, while the ATV980 is capable of 180% of nameplate current.	The Altivar 660 Process System provides a wide range of fully tested and ready to connect drive solution. Starting from a compact pre engineered system to a fully engineered complex solution.
Special Features	Industry Leading Harmonic Mitigation: 2.3% THDi Common Mode Voltage Suppression Reduction of Bearing Currents Generator Supply Capability	Compact design to save space Dynamic QR Codes 50° C option available Pump curves embedded Multiple options available Process control embedded Embedded web server

Altivar Outdoor 630/930

Overview of Altivar™ Outdoor 630/930

Key Application/Market Segment	• Oil and Gas • Rod Pump Controls, PCP Controls • ESP Controls, HPS Controls • Irrigation
Brief Description	The Altivar Outdoor 630/930 is a UL Type 3R rated drive designed for pumping solutions in outdoor environments, especially oil and gas.
Special Features	- Door-on-door - 50 °C rated - Optional cold weather option - Wide array of options available - Quick lead time
Enslosure Ratings	Nema Type 3R Outdoor
Power Range	20–250 hp, Heavy Duty
Distribution Voltage Ranges for 50/60 Hz Line Supply	480 Vac
Standards / Certifications	- UL Listed per UL 508A - Conforms to applicable NEMA ICS,NFPA, & IEC standards - Service entrance rated - Manufactured under ISO 9001 standards
Contact your local Schneider Electric Field Office for further information

Altivar™ 212 Drives

The AHRI (Air-Conditioning, Heating, & Refrigeration Institute) certified Altivar 212 drive is for use with three-phase asynchronous and permanent magnet motors for variable torque pump, fan, and scroll compressor applications. Select the Altivar 212 drive using the motor nameplate voltage, the full load ampere rating and the table below. The Altivar 212 drive includes 3 logic inputs, 2 analog inputs, 1 analog output, and 2 relay outputs (with 1 NO and 1 NO/NC contacts). The Altivar 212 drive includes an integrated 4 digit, 7 segment LED display with a 7 button keypad and includes an RJ45 Modbus port plus a four-screw terminal block for BACnet, Modbus, Metasys N2 and Apogee P1 communication protocols. LonWorks™ is available in an option card.

[4]   IP20 Altivar 212 drives can be installed as UL Type 1 with an optional conduit box by following the instructions in the installation manual.
[5]   Not required if using VW3A1102.
[6]   For ATV212W... drives with Class B EMC filter, add the letter "C" to the end of the standard catalog number.

Altivar™ 12 Drives

Big function in a small footprint. The Altivar 12 variable frequency drive combines flexibility, reliability, and the most advanced sensorless flux vector technology into very small space. This drive features an integrated communications port, user-friendly navigation wheel on the faceplate, and an optional multi-loader that streamlines set-up by making programming quick and easy. All of this comes with the versatility to handle applications from simple to complex, across industries, and harsh environments.

Altivar™ 320 Machine

The new benchmark in machine performance. Altivar 320, part of the new Altivar™ Machine range, is a powerful combination of safety, reliability, and simplicity which makes it a versatile choice that reduces costs both during installation and throughout the machine's life cycle. Altivar 320 has a number of out-of-the-box features for building more effective machines.

AC DRIVES AND SOFT STARTERS

Altivar™ 340 Machine

Stay on top of the Smart Machine Era! Altivar Machine ATV340 is engineered for high performance application requirements by maximizing the machine performance thanks to real time variable speed drive operation, more connectivity, flexibility, and scalable safety. The ATV340 is available from 1 to 100 hp with the ability to control any kind of motor in open and closed loop.

[8] Normal duty applications requiring an overload up to 110% for 60 seconds. Typical for variable torque loads.
[9] Heavy duty applications requiring an overload up to 150% for 60 seconds. Typical for constant torque loads.
[10] These values are given for a nominal switching frequency of 4 kHz up to ATV630D45N4, or 2.5 kHz for ATV630D55N4...D90N4 for use in continuous operation. The switching frequency is adjustable from 1...16 kHz for all ratings. Above 2.5 or 4 kHz (depending on the rating), the drive will automatically reduce the switching frequency in the event of an excessive temperature rise. For continuous operation above the nominal switching frequency, derate the nominal drive current (see the derating curves on our website www.schneider- electric.com).
[11] Typical value for the indicated motor power and for the maximum prospective line Isc.

S-Flex™ Variable Torque AC Drive—208 V, 230 V, and 460 V Ratings

The AHRI certified S-Flex enclosed drive features the Altivar 212 drive and provides 100 KAIC rating for commercial pump, fan, and scroll compressor applications.

The S-Flex is an economical package that includes a circuit breaker disconnect and option bypass contactors, drive input disconnect switch or line contactor.

The S-Flex is rated as a UL Type 1, 12, and 3R enclosure an ideal for use in residential high rise and mixed-use buildings, commercial office buildings, schools and campus environments.

All S-Flex 212 Enclosed Drives are supplied with:
- Altivar™ 212 power converter
- Square D™ circuit breaker disconnect (Power Fuses for 460 V version only)
- Coordinated short circuit rating for 100,000 A
- Adjustable Frequency Controller-Off-Bypass selector switch
- Local/Remote configurable on controller
- Power On red LED
- Bypass Run green LED
- Fire/Freezestat interlock for Adjustable Frequency Drive and Bypass mode

- Form C Adjustable Frequency Controller fault auxiliary contact
- Modbus RJ-45 communication port
- Smoke Purge Function
- Bypass Run Auxiliary Contact
- Drive Run Auxiliary Contact
- Full Voltage Bypass Power Circuit with overload relay
- 120 Vac fused control power transformer

S-Flex 212 Enclosed Drive Controller Type 1, 12, 3R Rated +14 to +104 °F (-10 to +40 °C)

[1] Default selection. For Modbus control, see the Instruction manual.
[2] Options A07 Drive Input disconnect and B07 line contactor are available only when a full voltage bypass option Y is selected. Options A07 and B07 are mutually exclusive.
[3] For UL Type 12 and 3R only.

Altistart™ 22 Soft Starters

The Altistart 22 is designed for commercial and normal duty industrial applications, it uses both voltage and torque control to provide a soft start and soft stop for there-phase asynchronous motors between 17 A and 590 A. The conformal-coated, printed circuit boards provide enhanced resistance to harsh environments, increasing the service life of installations and lowering maintenance costs.

Select the Altistart 22 soft starter using the nameplate full-load ampere rating of the motor and the table below. The horsepower ratings are for reference only.

Power Supply Voltage For Control	For Use On Altistart	Catalog Number
The ATS22C21S6,S6U..C59S6,S6U units come with an integrated fan. The ATS22D17S6,S6U..C17S6,S6U units are ventilated by means of natural ventilation. For more demanding applications, such as those with a greater number of starts, the Altistart 22 range offers fans as an option. The fans are powered by the Altistart 22 unit and attach to the back of the device. The fan's noise level is less than 60 dBA.		
220 V	ATS22D17–D47S6	VW3G22400
	ATS22D62–D88S6	VW3G22401
	ATS22C11–C17S6	VW3G22402
110 V	ATS22D17–D47S6U	VW3G22U400
	ATS22D62–D88S6U	VW3G22U401
	ATS22C11–C17S6U	VW3G22U402

[1] Motor full load amperate (FLA) must not exceed the ampere ratings of the soft starter.
[2] S6 = 208–600 line voltage, 220 V control voltage
[3] S6U = 208–600 line voltage, 110 V control voltage
[4] Value not indicated when there is no corresponding standardized motor.
[5] A remote keypad cord set is required.

Altistart™ 480 Soft Starters

The Altivar Soft Starter ATS480 is a controller with six thyristors using the TCS (torque control system) algorithm to control acceleration, deceleration, and stopping of three-phase squirrel cage asynchronous motors up to 900 kW.

The ATS480 is a cost-effective solution designed to:

- Reduce machine operating costs by reducing mechanical stress and improving machine availability
- Reduce the risk of severe damage by reducing fluid shocks
- Reduce the stress on the electrical distribution system by reducing line current peaks and voltage drops during motor starts

Altivar Soft Starter ATS480 consists of one range only covering:

- Operational voltage from 208 V to 690 V
- Operational current from 17 A to 1200 A

ATS480 integrates Modbus serial line communication protocols as standard. Each device is equipped with two RJ45 ports for:

- Connection to configuration and firmware update software
- Connection of the plain text display terminal or graphic display terminal
- Connection to a Modbus fieldbus

In addition, the ATS480 is equipped with one slot for a communication module:

- Modbus TCP
- CANopen
- PROFIBUS DP
- EtherNet/IP
- PROFINET

Enclosed Altistart™ 22 Motor Controllers

Enclosed Altistart 22 (ATS22) solid-state combination motor controllers are a pre-engineered, integrated solution for reduced voltage starting and soft stopping of standard three-phase asynchronous induction (squirrel cage) motors. The Enclosed 22 controllers consist of a disconnect means and an ATS22 softstarter in a stand-alone enclosure. Enclosed 22 controllers integrate the ATS22 softstart technology into a combination package for application requirements up to 400 hp at 460 V.

- 3–150 hp, 208 V
- 5–200 hp, 230 V
- 10–400 hp, 460 V
- 15–500 hp, 575V

[1] This option is not selectable with power circuit option B05.
[2] Select only one option.
[3] To omit, do not include a selection in the catalog number.
[4] This option is available only for enclosure size D.
[5] This option is not selectable with power circuit option B05
[6] This option is not selectable with power circuit option B05. This option is valid only with the following control options: C06, D06, or E06.
[7] Options E10 and Z10 cannot be used together.
[8] This option is not selectable with power circuit option B05. The contacts are available only when power circuit option Y05 is selected.
[9] The contacts are not available when power circuit option R05 is selected. This option is valid only with the following control options: C06, D06, or E06.
[10] If you select option U10, you must separately order the remote keypad (VW3G22101) and cable (VW3A1104R30) to commission the softstarter. Refer to the *ATS22 User Manual*, BBV51330, for serial communication programming and control capabilities.
[11] Options E10 and Z10 cannot be ordered together.

Enclosed Altistart 22 Control Options (pick one)

Mod A06	Start/Stop push buttons
	Provides black start and red stop push buttons (3-wire control scheme).
Mod B06	Forward-Off-Reverse selector switch
	Provides three-position selector switch to select between forward, off and reverse. Uses 2-wire control.
Mod C06	Hand-Off-Auto selector switch
	Provides a three-position selector switch, 2-wire control scheme.
Mod D06	Stop-Run selector switch
	Provides a two-position selector switch.
Mod E06	Hand-Auto selector switch and Start/Stop push buttons
	Provides a two-position selector switch and start/stop push buttons (3-wire control).

Enclosed Altistart 22 Pilot Light Cluster Options (pick one)

Mod A07	Pilot light cluster #1
	Consists of red "RUN" and green "OFF" pilot lights. Provides standard red "RUN (ON)" and green "OFF" pilot lights for status annunciation.
Mod B07	Pilot light cluster #2
	Consists of red "RUN" (push-to-test) and green "OFF" (push-to-test) pilot lights. Provides push-to-test type red "RUN (ON)" and standard green "OFF" pilot lights for status annunciation.
Mod C07	Pilot light cluster #3
	Consists of red "RUN", green "OFF" and yellow "FAULT" pilot lights. Provides standard red "RUN (ON)" green "OFF" and yellow "FAULT" pilot lights for status annunciation.
Mod D07	Pilot light cluster #4
	Consists of red "RUN (ON)" (push-to-test), green "OFF" (push-to-test) and yellow "FAULT" (push-to-reset) pilot lights. Provides push-to-test type red "RUN (ON)" standard green "OFF", and push-to-reset type yellow "FAULT" for status annunciation.

Enclosed Altistart 22 Meter Display Options (pick one)

Mod BO8	Elapsed time meter
	Provides a seven-digit analog, non-resettable elapsed run time meter. Not available on Type 3R Enclosures

Enclosed Altistart 22 Miscellaneous Options (multiple compatible options may be selected

Mod A10	Floor mounting kit
	Only available for size D enclosures.
Rules: Available for power options S05, N05, R05, Y05.	
Mod B10	150 VA additional control power capacity
	Provides 150 VA additional control VA capacity for customer use.

Information and Selection of AC Drives

For product information and selection, visit **Variable Speed Drives** on www.se.com/us

Technical Support and Services for AC Drives

Drive Product Support Group

For support and assistance, contact the Drive Product Support Group. The Drive Product Support Group is staffed from 8:00 am until 8:00 pm Eastern time to assist with diagnosis of product problems. For support with applications or product selection, please contact a drive specialist at your local authorized Schneider Electric Distributor. Click here to locate an Automation and Control distributor near you: Find Electrical, Automation, and Control Distributors.

EMERGENCY Technical phone support is available 24 hours a day, 365 days a year.

Toll Free:	888-778-2733
E–mail:	drive.products.support@schneider-electric.com
Fax:	919-217-6508

Schneider Electric Services

Schneider Electric offers a broad range of Services for electrical distribution assets and systems to support the lifecycle of your equipment, for any manufacturer's. With 6,500+ experts and 260+ consultants in electrical and automation asset management services in 140 countries within 430 Services centers, Schneider Electric Services responds to your requests, seven days a week, 24 hours a day.

Toll Free (888-778-2733)

se.com/us/services

Customer Training for AC Drives

Schneider Electric offers a variety of instructor-led, skill enhancing and technical product training programs for customers. For a complete list of drives/soft starter training with dates, locations, and pricing, please call:

Phone:	978-975-9306
Fax:	978-975-2821

Packaged Product Documentation for AC Drives

Standard Documentation

Each adjustable frequency drive or soft starter shipped includes one set of instruction bulletins. Each set of instruction bulletins includes installation, start–up, troubleshooting and wiring diagram information. Separate Approval and/or Record Drawings are not included.

Approval and Record Drawings

All factory orders for enclosed drives and soft starters come with factory supplied user drawings and are identified by a factory order number. The factory supplied drawing set typically includes:

- Enclosure outline drawing
- Power elementary drawing
- Control elementary drawing
- Interconnection drawing

These drawings are also available in DWG, DXF, IGS, Microcad and PDF formats upon customer request.

Product Literature
