	<p>Eflex</p> 	<p>Altivar Outdoor 61/71 <i>New!</i></p> 	<p>PowerGard 61/71</p> 
Brief Description	Featuring the ATV61 which is a robust, industrial-grade enclosed solution for healthcare and industrial plant floor, pump and fan applications.	Featuring the ATV61/71 drive providing an array of power and automation options from 20hp to 350hp to meet your application needs. The Altivar Outdoor is a UL Type 3R rated drive designed for pumping solutions in outdoor environments, especially oil & gas.	Featuring the ATV61/71 drive providing an ideal solution for installations specifying compliance with IEEE 519-2014 guidelines for harmonic mitigation.
Special Features	<ul style="list-style-type: none"> - Built to conform to International Building Code (IBC) and ASCE seismic standards for ground and roof-level installations. - Available with isolation/bypass - 100,000 amps SCCR 	<ul style="list-style-type: none"> - Door-on-door - 50 °C rated - Optional cold weather option - Wide array of options available - Quick lead time 	<ul style="list-style-type: none"> - Clean power technology - Optional barriered bypass - Optional integrated bypass - Optional reduced voltage bypass - Optional soft start bypass - Aluminum transformer standard - Copper transformer as option

North America Drive Systems					
Key Applications and Market Segment	- Water Waste Water - Oil and Gas - Mining Minerals and Metals	- Water Waste Water - Oil and Gas - Mining Minerals and Metals - Food and Beverage	Pump, fan, and compressors for: - Water Waste Water - Oil and Gas - Mining Minerals and Metals		
	Altivar Plus 61/71 	Altivar 660 Process Drive Systems <i>New!</i> 	Altivar 1260 Medium Voltage Drive <i>New!</i> 		
Brief Description	Featuring the ATV61/71 drive providing a robust, packaged solution. Altivar Plus are pre-engineered, ready to use solutions in highly efficient designs.	The Altivar 660 Process System provides a wide range of fully tested and ready to connect drive solution. Starting from a compact pre engineered system to a fully engineered complex solution.	The Altivar 1260 combines the latest vector control strategies with the control of 3-level inverters using proven semiconductor technologies commanded via fiber optic cables. Engineered from the inside-out to reduce harmful grid harmonics and put less stress on motor bearings and insulation.		
Special Features	Compact design to save space Swiveling control panel Ease of maintenance (inverter slides out) Multiple options available 100,000 amps SCCR	Compact design to save space Dynamic QR Codes 50° C option available Pump curves embedded Multiple options available Process control embedded Embedded web server	Low component count 24/36 pulse rectifier (AFE option available) with 3-level NPC inverter utilizing medium voltage IGBT's. Standard output sine wave filter delivers a motor friendly waveform which allows long cable lengths and use with standard duty motors. Close-coupled or separately located rectifier transformer Easy to navigate local human-machine-interface (HMI) plus a web application for remote monitoring and control Front access with easy to maintain slide out power modules Integrated UPS for control backup Powerful central processor (CPU) with imbedded programmable controller (PLC) Modular and scalable architecture

Altivar™ 212 Drives

The Altivar 212 drive is for use with three-phase asynchronous motors for variable torque pump and fan applications. Select the Altivar 212 drive using the motor nameplate voltage, the full load ampere rating and the table below. The Altivar 212 drive includes 3 logic inputs, 2 analog inputs, 1 analog output, and 2 relay outputs (with 1 NO and 1 NO/NC contacts). The Altivar 212 drive includes an integrated 4 digit, 7 segment LED display with a 7 button keypad and includes an RJ45 Modbus port plus a four-screw terminal block for BACnet, Modbus, Metasys N2 and Apogee P1 communication protocols. LonWorks™ is available in an option card.

UL File E116875, CSA 2278406, Plenum rated per UL 508C for UL 1995 installations. NOM, CE

[1] These horsepower, wattage and continuous ampere ratings apply to the default switching frequency and maximum 40 °C ambient. Refer to the installation manual for derating curves as a function of switching frequency, ambient temperature, and mounting conditions.
 [2] IP20 Altivar 212 drives can be installed as UL Type 1 with an optional conduit box by following the instructions in the Installation Manual.
 [3] For ATV212W... drives with Class B EMC filter, add the letter "C" to the end of the standard catalog number.

Universal Bluetooth Interface			TCSWAAC13FB
Communication Option			
LonWorks Communication Card Option	Provides a four-screw terminal block for connection to LonWorks network. Install in place of standard control board that comes mounted in the Altivar 212 drive. The I/O count is reduced to 3LI, 1 AI and 1 NO/NC relay	Altivar 212	VW3A21212
Mounting Kit			
DIN Rail Mounting Kit	For installation on 35 mm wide DIN rail	Altivar 212H075M3X... U22M3X Altivar 212H075N4... U22N4	VW3A31852

[4] IP20 Altivar 212 drives can be installed as UL Type 1 with an optional conduit box by following the instructions in the installation manual.

[5] Not required if using VW3A1102.

[6] For ATV212W... drives with Class B EMC filter, add the letter "C" to the end of the standard catalog number.

Altivar™ 312 Drives

The Altivar 312 mid-featured AC drive is designed to make industrial and commercial machines more energy efficient while simplifying its integration into a single control system architecture.

With the highest overtorque and the only drive with a remote graphic keypad in its class, the Altivar 312 mini-drive is ideally suited to the needs of material handling, packaging, food and beverage, and other OEM machines. It also comes standard with integrated communications port for Modbus and CANopen networks, optional cards available for CANopen Daisy Chain, DeviceNet, and Profibus DP, and gateways can be used for Modbus TCP/IP and FIPIO.

[11] When ordering replacements for Square D™ brand E-Flex™, MCC and M-Flex™ enclosed drive controllers containing the Altivar 61 drive, identify the replacement catalog number by referring to the applicable instruction manual, the side nameplate on power converter, or using the graphic keypad (menu 1.11 identification).

[12] Option to have product treated for increased protection for dusty and corrosive environments. This product is not stocked. On 1 hp to 10 hp at 230 Vac 3 phase and up to 100 hp at 460 V, add "S337" to the end of the catalog number. On 15 hp to 60 hp at 230 Vac 3 phase, add "337" to the end of the catalog number. With this option, exposed copper is tinned, circuit boards are conformal coated in critical areas and plastics are treated to better withstand the corrosive nature of certain oils. This option is standard on 55 kW/75 hp @ 230 Vac 3 phase and higher and 90 kW/125 hp @ 460 Vac and higher.

[13] These products can be ordered with LonWorks® or BACnet communication option card shipped as one line item. Field installation required. Add "LW" to the end of the part number to receive a LonWorks option card. Add "BN" to the end of the part number to receive a BACnet option card.

[14] These products can be ordered with LonWorks® or BACnet communication option card shipped as one line item. Field installation required. Add "LW" to the end of the part number to receive a LonWorks option card. Add "BN" to the end of the part number to receive a BACnet option card.

[15] Product does not contain an EMC filter.

[16] Product ships with a DC choke that must be field mounted. A 5% line reactor may be purchased and installed in place of the DC choke. Add "D" to the end of the catalog number to receive just the AC drive.

[17] These products can be ordered with LonWorks® or BACnet communication option card shipped as one line item. Field installation required. Add "LW" to the end of the part number to receive a LonWorks option card. Add "BN" to the end of the part number to receive a BACnet option card.

[18] These products do not contain a dynamic braking transistor. A separate transistor must be added for applications requiring dynamic braking.

[19] Conformal coating is standard.
 [20] Product does not contain EMC filter.
 [21] An AC 5% line reactor is mandatory.
 [22] These products do not contain a dynamic braking transistor. A separate transistor must be added for applications requiring dynamic braking.

Altivar™ 61 Single-Phase Drives

In an application where it is necessary to use a 240 V single-phase input for a 3-phase motor, the drive must be derated; therefore, the power listed on the drive nameplate will be higher than the power rating on the motor nameplate.

For more information on wire and line reactor sizing, refer to *Altivar 61 and 71 Supplementary Ratings* (30072-451-38) and Price Guide 8800PL9701 for line reactor selection and pricing.

[30] Also possible for use with a synchronous motor. Add "383" to the end of the catalog number.

[31] Option to have product treated for increased protection for dusty and corrosive environments. This product is not stocked. On 0.5 hp to 10 hp at 230 Vac 3 phase and up to 100 hp at 460 V, add "S337" to the end of the catalog number. On 15 hp to 60 hp at 230 Vac 3 phase, add "337" to the end of the catalog number. With this option, exposed copper is tinned, circuit boards are conformal coated in critical areas and plastics are treated to better withstand the corrosive nature of certain oils. This option is standard on 55 kW/75 hp @ 230 Vac 3 phase and higher & 90 kW/125 hp @ 460 Vac and higher.

[32] Product does not contain an EMC filter.

[33] Product ships with a DC choke that must be field mounted. A 5% line reactor may be purchased and installed in place of the DC choke. Add "D" to the end of the catalog number to receive just the AC drive.

[34] Conformal coating is standard.

[35] Option to have product treated for increased protection for dusty and corrosive environments. This product is not stocked. Up to 100 hp at 460 V, add "S337" to the end of the catalog number. With this option, exposed copper is tinned, circuit boards are conformal coated in critical areas and plastics are treated to better withstand the corrosive nature of certain oils. This option is standard on 90 kW/125 hp @ 460 Vac and higher.

[36] Also possible for use with a synchronous motor. Add "383" to the end of the catalog number and multiply the listed price by 1.2 to obtain new price.

[47] Normal duty applications requiring an overload up to 110% for 60 seconds. Also known as variable torque loads.

[48] Heavy duty applications requiring an overload up to 150% for 60 seconds. Also known as constant torque loads.

[49] These values are given for a nominal switching frequency of 4 kHz up to ATV630D45N4, or 2.5 kHz for ATV630D55N4...D90N4 for use in continuous operation. The switching frequency is adjustable from 1...16 kHz for all ratings. Above 2.5 or 4 kHz (depending on the rating), the drive will automatically reduce the switching frequency in the event of an excessive temperature rise. For continuous operation above the nominal switching frequency, derate the nominal drive current (see the derating curves on our website www.schneider-electric.com).

[50] Typical value for the indicated motor power and for the maximum prospective line Isc.

Variable Torque AC Drive—208 V, 230 V, and 460 V Ratings

The S-Flex enclosed drive features the Altivar 212 drive and provides 100 KAIC rating for commercial pump and fan applications.

The S-Flex is an economical package that includes a circuit breaker disconnect and option bypass contactors, drive input disconnect switch or line contactor.

The S-Flex is rated as a NEMA Type 1 enclosure an ideal for use in residential high rise and mixed-use buildings, commercial office buildings, schools and campus environments.

S-Flex 212 Enclosed Drive Controller Type 1
Rated +14 to +104 °F
(-10 to +40 °C)

All S-Flex 212 Enclosed Drives are supplied with:

- Altivar™ 212 power converter
- Square D™ circuit breaker disconnect (Power Fuses for 460 V version only)
- UL 508C coordinated short circuit rating for 100,000 A
- Adjustable Frequency Controller-Off-Bypass selector switch
- Local/Remote configurable on controller
- Power On red LED
- Bypass Run green LED
- Fire/Freezestat interlock for Adjustable Frequency Drive and Bypass mode
- Form C Adjustable Frequency Controller fault auxiliary contact
- Modbus RJ-45 communication port
- Smoke Purge Function
- Bypass Run Auxiliary Contact
- Drive Run Auxiliary Contact
- Full Voltage Bypass Power Circuit with overload relay
- 120 Vac fused control power transformer

[2] Options A07 Drive Input disconnect and B07 line contactor are available only when a full voltage bypass option Y is selected. Options A07 and B07 are mutually exclusive.

Altistart™ 22 Soft Starters

The Altistart 22 is designed for commercial and normal duty industrial applications, it uses both voltage and torque control to provide a soft start and soft stop for three-phase asynchronous motors between 17 A and 590 A. The conformal-coated, printed circuit boards provide enhanced resistance to harsh environments, increasing the service life of installations and lowering maintenance costs.

Select the Altistart 22 soft starter using the nameplate full-load ampere rating of the motor and the table below. The horsepower ratings are for reference only.

Table 26.24: Fans Selection

Power Supply Voltage For Control	For Use On Altistart	Catalog Number
220 V	ATS22D17..D47S6	VW3G22400
	ATS22D62..D88S6	VW3G22401
	ATS22C11..C17S6	VW3G22402
	ATS22D17..D47S6U	VW3G22U400
110 V	ATS22D62..D88S6U	VW3G22U401
	ATS22C11..C17S6U	VW3G22U402

The ATS22C21S6,S6U...C59S6,S6U units come with an integrated fan. The ATS22D17S6,S6U..C17S6,S6U units are ventilated by means of natural ventilation. For more demanding applications, such as those with a greater number of starts, the Altistart 22 range offers fans as an option. The fans are powered by the Altistart 22 unit and attach to the back of the device. The fan's noise level is less than 60 dBA.

[1] Motor full load amperate (FLA) must not exceed the ampere ratings of the soft starter.

[2] S6 = 208–600 line voltage, 220 V control voltage

[3] S6U = 208–600 line voltage, 110 V control voltage

[4] Value not indicated when there is no corresponding standardized motor.

[5] A remote keypad cord set is required.

Altistart™ 48 Soft Starters

The Altistart 48 soft starter combines ease of selection with simple installation and high motor control performance. With its exclusive motor Torque Control System, the Altistart 48 helps eliminate uncontrolled motor acceleration and deceleration, a problem inherent with standard voltage—ramp soft starters. The Altistart 48 includes features to help with motor and machine protection and is available for motors ranging from 208 to 575 volts. In addition to a built-in display and programming terminal, a remote keypad option and programming software is available to ease integration and commissioning. The Altistart 48 has a built-in Modbus™ port and is offered with serial communication gateways to such popular networks as Ethernet and DeviceNet™.

Open Style Soft Starters 50–60 Hz, Three-Phase, 690 V Maximum

The Altistart 48 soft starter must be selected using the table below, based on nameplate full load ampere rating of the motor. The horsepower ratings shown in table are for reference only.

Table 26.25: Altistart 48 Selection [6]

Standard Duty (Low Inertia Loads) [7] Maximum Horsepower					Altistart Soft Starters	
208 V	230 V	400 V (kW)	460 V	575 V	Rated A	Catalog Number

Software	Description	Catalog Number
SoMove™	This software enables the user to configure, set, debug and organize maintenance task for the complete Altivar product line and the Altistart 22 and Altistart 48 soft starters. It can also be used to customize the integrated display terminal menus. It can be used with a direct connection or a Bluetooth® wireless connection. Free download www.schneider-electric.us	
User Interface Kits		
	Remote Keypad Display Mounting Kit, including: Keypad with 3-character 7-segment display IP65 cover and seal, mounting screws, and 3 meter cable to connect keypad display to Altistart 48	VW3G48101
	Cover for power terminals—Set of 6 for ATS48C14Y and ATS48C17Y	LA9F702
	Cover for power terminals—Set of 6 for ATS48C21Y, ATS48C25Y, and ATS48C32Y	LA9F703
	Modbus Ethernet Gateway	TSXETG100
	DeviceNet Gateway	LUFF9
	Profibus DP Gateway	LUFF7
	FIPIO™ Gateway	LUFF1
	1/3 meter connection cable (RJ-45 to RJ-45)	VW3A8306R03
	1 meter connection cable (RJ-45 to RJ-45)	VW3A8306R10
	3 meter connection cable (RJ-45 to RJ-45)	VW3A8306R30
	1/3 meter splitter cable (For RJ-45 daisy chain connection)	VW3A8306TF03
	1 meter splitter cable (For RJ-45 daisy chain connection)	VW3A8306TF10
	RJ45 terminator (2 per package)	VW3A8306RC
	Modbus hub (Eight RJ-45 ports)	LU9GC3
	USB to RJ45 Adaptor Kit For use in connecting to a PC with a USB port	TSCMCNAM3M002P
	Size M10 Bolt Kit	W808780210111
	Size M12 Bolt Kit	W808780220111
	Altivar and Altistart Programming Cable. For use with the iPad Configuration App. 30-Pin Mobile to RS-485 Converter Cable	VW3A8151R20U

[6] Motor full load amperage (FLA) must not exceed the ampere rating of the soft starter.

[7] Low Inertia—Connected motor load inertia equal or less than 10 times motor rotor inertia.

High Inertia—Connected motor load inertia greater than 10 times motor rotor inertia.

Enclosed Altistart™ 22 Motor Controllers

Enclosed Altistart 22 (ATS22) solid-state combination motor controllers are a pre-engineered, integrated solution for reduced voltage starting and soft stopping of standard three-phase asynchronous induction (squirrel cage) motors. The Enclosed 22 controllers consist of a disconnect means and an ATS22 softstarter in a stand-alone enclosure. Enclosed 22 controllers integrate the ATS22 softstart technology into a combination package for application requirements up to 400 hp at 460 V.

- 3–150 hp, 208 V
- 5–200 hp, 230 V
- 10–400 hp, 460 V
- 15–500 hp, 575V

Table 26.28: Catalog Number Example: 863922UCG4BA06A07

—	Field						
	1	2	3	4	5	6	7
8639	22U	C	G	4	B	A06	A07
Controller Class	PowerPact™ Thermal-Magnetic Circuit Breaker	7.5 hp	Type 1 General Purpose	460 Vac	Basic Shunt Trip	Start-Stop Pushbutton	Run Light (Red), Off Light (Green)

[1] This option is not selectable with power circuit option B05.

[2] Select only one option.

[3] To omit, do not include a selection in the catalog number.

[4] This option is available only for enclosure size D.

[5] This option is not selectable with power circuit option B05

[6] This option is not selectable with power circuit option B05. This option is valid only with the following control options: C06, D06, or E06.

[7] Options E10 and Z10 cannot be used together.

[8] This option is not selectable with power circuit option B05. The contacts are available only when power circuit option Y05 is selected.

[9] The contacts are not available when power circuit option R05 is selected. This option is valid only with the following control options: C06, D06, or E06.

[10] If you select option U10, you must separately order the remote keypad (VW3G22101) and cable (VW3A1104R30) to commission the softstarter. Refer to the *ATS22 User Manual*, BBV51330, for serial communication programming and control capabilities.

[11] Options E10 and Z10 cannot be ordered together.

Control Options (pick one)

Mod A06	Start/Stop push buttons Provides black start and red stop push buttons (3-wire control scheme).
Mod B06	Forward-Off-Reverse selector switch Provides three-position selector switch to select between forward, off and reverse. Uses 2-wire control.
Mod C06	Hand-Off-Auto selector switch Provides a three-position selector switch, 2-wire control scheme.
Mod D06	Stop-Run selector switch Provides a two-position selector switch.
Mod E06	Hand-Auto selector switch and Start/Stop push buttons Provides a two-position selector switch and start/stop push buttons (3-wire control).

Pilot Light Cluster Options (pick one)

Mod A07	Pilot light cluster #1 Consists of red "RUN" and green "OFF" pilot lights. Provides standard red "RUN (ON)" and green "OFF" pilot lights for status annunciation.
Mod B07	Pilot light cluster #2 Consists of red "RUN" (push-to-test) and green "OFF" (push-to-test) pilot lights. Provides push-to-test type red "RUN (ON)" and standard green "OFF" pilot lights for status annunciation.
Mod C07	Pilot light cluster #3 Consists of red "RUN", green "OFF" and yellow "FAULT" pilot lights. Provides standard red "RUN (ON)", green "OFF" and yellow "FAULT" pilot lights for status annunciation.
Mod D07	Pilot light cluster #4 Consists of red "RUN (ON)" (push-to-test), green "OFF" (push-to-test) and yellow "FAULT" (push-to-test) pilot lights. Provides push-to-test type red "RUN (ON)", standard green "OFF", and push-to-test type yellow "FAULT" for status annunciation.

Meter Display Options (pick one)

Mod B08	Elapsed time meter Provides a seven-digit analog, non-resettable elapsed run time meter. Not available on Type 3R Enclosures
---------	---

Miscellaneous Options (multiple compatible options may be selected)

Mod A10	Floor mounting kit Only available for size D enclosures.
Rules: Available for power options S05, N05, R05, Y05.	
Mod B10	150 VA additional control power capacity Provides 150 VA additional control VA capacity for customer use.

Information and Selection of AC Drives

For information and selection, contact your nearest Schneider Electric sales office or visit our website:

www.schneider-electric.us

Technical Support for AC Drives

Drive Product Support Group

For support and assistance, contact the Drive Product Support Group. The Drive Product Support Group is staffed from 8:00 am until 8:00 pm Eastern time to assist with product selection, start-up, and diagnosis of product or application problems.

EMERGENCY Technical phone support is available 24 hours a day, 365 days a year.

Toll Free: 888-778-2733
E-mail: drive.products.support@schneider-electric.com
Fax: 919-217-6508

Services (On-Site)

Square D Services is your single source of service expertise for all major brands of electrical equipment. With our national network of service locations and qualified experts, Square D Services is capable of providing customer-based solutions anywhere in the United States. Services responds to your requests, seven day a week, 24 hours a day.

Toll Free: (888-778-2733)

Customer Training for AC Drives

Schneider Electric offers a variety of instructor-led, skill enhancing and technical product training programs for customers. For a complete list of drives/soft starter training with dates, locations, and pricing, please call:

Phone: 978-975-9306
Fax: 978-975-2821

Packaged Product Documentation for AC Drives

Standard Documentation

Each adjustable frequency drive or soft starter shipped includes one set of instruction bulletins. Each set of instruction bulletins includes installation, start-up, troubleshooting and wiring diagram information. Separate Approval and/or Record Drawings are not included.

Approval and Record Drawings

All factory orders for enclosed drives and soft starters come with factory supplied user drawings and are identified by a factory order number. The factory supplied drawing set typically includes:

- Enclosure outline drawing
- Power elementary drawing
- Control elementary drawing
- Interconnection drawing

These drawings are also available in DWG, DXF, IGS, Microcad and PDF formats upon customer request.

Product Literature
