

300' x 1/2" Fiberglass Measuring Tape

The Empire® Level 300-Foot x 1/2-Inch Open Reel Fiberglass Measuring Tape is rugged enough to give you many years of reliable service on job sites in all weather conditions. Its fiberglass construction will stand up to the effects of sun, wind and water. The tape's face is printed with bold black markings, making it easy to read. Simply lock it in place while you record the measurement you need. For easy reference, the white side of the tape is marked off in inches and fractions of inches and the yellow side features the engineering scale. The high-impact-resistant ABS case included with the Empire Level heavy duty open reel tape keeps it protected from drops and dings. It also ensures that the tape rolls out smoothly, without any snags. The sturdy handle with its comfortable grip makes winding the tape in after use a quick and easy process. It also makes it easy to transport the tape between work areas.
