RadioRA 2 Maestro local controls function much like standard dimmers and switches, but can be controlled as part of a lighting control system. Local lighting controls are useful in locations where single circuits of lighting need to be dimmed or switched. Local fan speed controls are useful in locations where control of a single ceiling paddle fan is needed.

RadioRA 2 Maestro dimmers incorporate advanced features such as fade-on/fade-off, delayed long fade-to-off, and rapid full-on. RadioRA 2 Maestro local controls include a Front Accessible Service Switch (FASS) for safe lamp replacement. RadioRA 2 Maestro local controls install in single pole or multi-location applications. Remote dimmers/switches are available for multi-location control.

Use Lutron Designer (Claro or Satin Colors) wallplates or designer-style wallplates from other manufacturers. Wallplates are sold separately. Lutron Claro and Satin Colors wallplates snap on with no visible means of attachment, RadioRA 2 Maestro local controls support color change kits.

# **Specifications**

•	
Model Numbers	Dimmer: RRD-6CL, RRD-6D, RRD-6ND, RRD-10D, RRD-10ND, RRD-6NA, RRD-F6AN-DV
	Switch: RRD-8ANS, RRD-8S-DV
	Fan Speed Control: RRD-2ANF
	Remote: RD-RD, RD-RS, RD-RD-277, RD-RS-277
Power	<i>120 V</i> ∼ <i>50/60 Hz:</i> -6CL, -6D, -6ND, -10D, -10ND, -6NA, -2ANF, -8ANS, -RD, -RS
	<b>120-277 V∼ 50/60 Hz:</b> -F6AN-DV, -8S-DV
	<b>277 V∼ 50/60 Hz:</b> -RD-277, -RS-277
Typical Power Consumption	Dimmer/Switch/Fan Speed Control: 0.6 W Test conditions: load is off and nightlight mode is enabled.
	Remote Dimmer/Switch: 0 W Test conditions: load is off.
Regulatory Approvals	UL, CSA (all except -6CL and -6NA), cUL (-6CL and -6NA only), NOM, FCC, IC, COFETEL, ANATEL (all except -6ND, -6NA and Remotes)
Environment	Ambient operating temperature: 32 °F to 104 °F (0 °C to 40 °C), 0% to 90% humidity, non-condensing. Indoor use only.
Communications	Dimmers and switches communicate with the system through Radio Frequency (RF) and must be located within 30 ft (9 m) of a repeater. Remote dimmers/switches are not required to be within a specific range of a repeater. System devices operate on frequencies between 431.0 MHz and 437.0 MHz.
ESD Protection	Tested to withstand electrostatic discharge without damage or memory loss, in accordance with IEC 61000-4-2.
Surge Protection	Tested to withstand surge voltages without damage or loss of operation, in accordance with IEEE C62.41-1991 Recommended Practice on Surge Voltages in Low-Voltage AC Power Circuits.
Power Failure	Power failure memory: should power be interrupted, the control will return to its previous state when power is restored.
Mounting	Requires a U.S. wallbox. 3½ in (89 mm) deep recommended, 2¼ in (57 mm) deep minimum.
Wiring	Uses conventional 3-way and 4-way wiring.
Warranty	www.lutron.com/TechnicalDocumentLibrary/Warranty.pdf

## RadioRA 2 Maestro Local Controls

### **Design Features**

#### Dimmer

- On a single-tap, lights fade ON or OFF.
- On a double-tap, lights go to full ON.
- When ON, press and hold the tapswitch to engage the delayed long fade to OFF.
- Light levels can be fine-tuned by pressing and holding the dimming rocker until the desired light level is reached.
- Neutral and two-wire dimmers available.

#### Switch

- On a single-tap, lights or motors turn ON or OFF.
- Neutral and two-wire switches available.

### Fan Speed Control

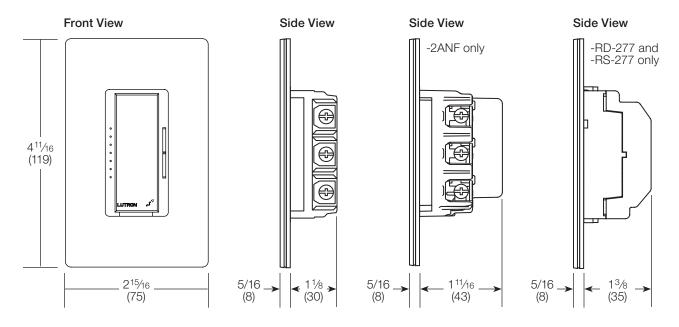

- On a single-tap, fan turns ON or OFF.
- Fan speeds can be selected by pressing and holding the fan speed control rocker until the desired fan speed is reached.
- Controls one paddle-type ceiling fan (Permanent split-capacitor motor) up to 2 A.
   Not for use with shaded-pole type motors (e.g., bath exhaust fans).
- Provides 4 quiet speeds plus OFF.
- Not for use with fans that have integrated fan speed and/or light control modules.
- Requires a neutral connection.

### **Dimensions**

All dimensions are shown as: in (mm)

# Mounting and Parts Identification

# RadioRA 2 Maestro Local Controls

### Ganging and Derating

When combining controls in the same wallbox, derating is required (see *Load Type and Capacity*). No derating is required for remote dimmers, remote switches, or fan speed controls. -8ANS, -RD-277, and -RS-277 have fins that need to be removed for multigang installations.

### Load Type and Capacity

#### Dimmer Load Type:

- -6CL: designed for use with permanently-installed incandescent, MLV, tungsten halogen, CFL, or LED only.
  -6D, -6ND, -10D, -10ND: designed for use with permanently-installed incandescent, LED, MLV, or tungsten halogen only.
  -6NA: designed for use with permanently-installed incandescent, LED, ELV, MLV, or tungsten halogen only.
  Note: Do not install dimmers to control receptacles or motor-operated appliances.

- Low-Voltage Applications:

   -6CL, -6D, -6ND, -10D, -10ND: use with magnetic (core and coil) low-voltage transformers only. Not for use with electronic (solid-state) low-voltage transformers.
- -6NA: use with electronic (solid-state) or magnetic (core and coil) transformers; do not mix ELV and MLV load types on a single control. Operation of a low-voltage circuit with lamps inoperative or removed may result in transformer overheating and premature failure. Lutron strongly recommends the following:
- Do not operate low-voltage circuits without operative lamps in place.
- Replace burned-out lamps as soon as possible.
- · Use transformers that incorporate thermal protection or fused transformer primary windings to prevent transformer failure due to
- Do not mix CFL or LED loads with MLV loads. Power Boosters/Load Interfaces: -6ND, -10ND, -6NA can be used to control power boosters/load interfaces. For a list of compatible power boosters/load interfaces see Compatible Power Boosters and Load Interfaces, page 8.
- Minimum load depends on lamp and is not limited to a particular wattage. Refer to the LED Product Selection Tool at www.lutron.com/ledtool

Continued on next page...

Lighting	40 W/VA	8 A	8 A (2-gang); 7 A (3-gang)	7 A	No			
Motor 0.4 A		1/10 HP 3 A						

Note: Do not install dimmers to control receptacles or motor-operated appliances.

Power Boosters/Load Interfaces: -F6AN-DV, -8ANS can be used to control power boosters/load interfaces. For a list of compatible power boosters/load interfaces see Compatible Power Boosters and Load Interfaces, page 8.

Fluorescent Dimmer Load Type: -F6AN-DV: designed for use with permanently installed 3-wire 120 V~ or 277 V~ line voltage control fluorescent ballasts or LED drivers. Use with only Hi-lume, Hi-lume Compact SE, Eco-10, or EcoSystem (H3D-, FDB-, ECO-, HL3-, EC5-, L3D). Do NOT use with any other ballasts or drivers. Do not install to control receptacles or motor-operated appliances. Maximum Load: The maximum load for the -F6AN-DV is either the derated load or the number of ballasts, whichever is LESS. Ceiling Fan Application: -2ANF

- Use to control one paddle-type ceiling fan (permanent split-capacitor).
  Use the ceiling fan's pull chain to set its speed to the highest setting.
  Do not use to control fans that use shaded-pole motors (e.g., bath exhaust fans).
  Do not use to control fans that have integrated fan speed controls (e.g., fans that have a remote control) unless the integrated control is Do not connect to any other motor-operated appliance or to any lighting load type.
- Do not use to control a fan lighting load (e.g., light kit).

- Do not use to control a fan lighting load (e.g., light κit).
  Switch Load Type:
  -8ANS, -8S-DV: designed for use with permanently installed 120 V~ incandescent, MLV, ELV, tungsten halogen, fluorescent, CFL, LED, or motor loads.
  -8S-DV can also be used with permanently installed 277 V~ MLV or fluorescent loads.
  Shunt Capacitor: Some -8S-DV installations may require the use of a shunt capacitor; this is especially necessary for load types sensitive to leakage current (e.g., fluorescent ballasts). If load flickers, install a shunt capacitor. Optional shunt capacitor must be installed inside the load fixture or in a separate J-box. For shunt capacitor installation see Wiring Diagram 4, 9, or 10.

# RadioRA 2 Maestro Local Controls

### Mixing Lamp Types

Mixing lamp types (using a combination of CFL/LED, Incandescent/Halogen bulbs) and ganging with other dimmers or electronic switches may reduce maximum wattage as shown in the chart below.

Example: If fins from one side of dimmer are removed and you have two 24 W bulbs installed (total CFL Wattage = 48 W), you may add up to 300 W of incandescent/halogen lighting.

> Do not remove outside fins on ends of ganged controls (shaded areas).

		A		B		BCB	
	Total Incandescent/Halogen Wattage					Wattage	
Total CFL/LED Wattage		A Not Ganged		B End of Gang		C Middle of Gang	Neutral Connection
RRD-6CL <sup>1,2</sup>							
0 W	+	50 W-600 W	Or	50 W-500 W	Or	50 W-400 W	No
1 W-25 W	+	0 W-500 W	Or	0 W-400 W	Or	0 W-300 W	
26 W-50 W	+	0 W-400 W	Or	0 W-300 W	Or	0 W-200 W	
51 W-75 W	+	0 W-300 W	Or	0 W-200 W	Or	0 W-100 W	
76 W-100 W	+	0 W-200 W	Or	0 W-100 W	Or	0 W-50 W	
101 W-125 W	+	0 W-100 W	Or	0 W-50 W	Or	0 W	
126 W-150 W	+	0 W	Or	0 W	Or	0 W	

Dimmer Load Type -6CL is designed for use with permanently-installed incandescent, CFL, LED, MLV, or tungsten halogen only. Do not install dimmers to control receptacles or motor-operated appliances. Do not mix CFL and LED loads with MLV loads.

# Compatible Power Boosters and Load Interfaces

Some local controls can be used to control power boosters or load interfaces. Up to three power boosters or load interfaces can be used with one control. See table below for a list of controls and compatible power boosters and load interfaces.

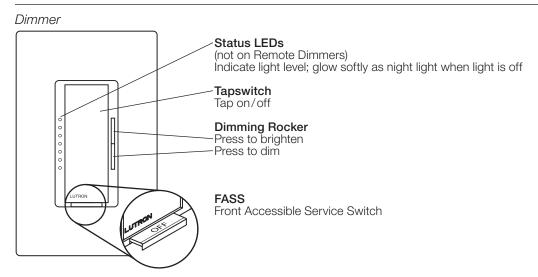

Control	Phase Adaptive Power Modules: PHPM-PA-120-WH; PHPM-PA-DV-WH	3-wire Fluorescent Power Modules: PHPM-3F-120-WH; PHPM-3F-DV-WH	Module:	0-10 V Interface and Switching Module: GRX-TVI
