

24" TRUE BLUE® I-Beam Level

Find the plumb, level or slope of a surface using the Empire® Level 24-Inch Heavy-Duty Aluminum Level. This level features a VARI-PITCH™ vial, which provides slope readings at 1/8-, 1/4-, 3/8- or 1/2-inch per foot on a horizontal run. To prevent rust and corrosion and extend the life of the tool, the Empire Level 24-inch heavy-duty aluminum level has an all-metal anodized construction. It also features durable, shock-absorbing end caps that help preserve the frame and vials from accidental drops. The TRUE BLUE® vials have shatter-resistant lenses as well for damage protection and are easily replaceable. Like many Empire Level anodized frame box beam levels, this I-beam tool has e-BAND™ vials that highlight the edge of the bubble for visibility in almost any light. A centered top window makes seeing readings from overhead easy.

INCLUDES:

(1) [24" TRUE BLUE® I-Beam Level \(e80.24\)](#)

FEATURES:

- High impact acrylic e-BAND™ mono vials offer superior durability
- High contrast e-BAND™ vials highlight the edge of the bubble
