

Fast, Powerful Charging
from the Brand you Trust

LEVITON[®]

Adapter-free Charging to Suit your Lifestyle

Keeping your smartphones, tablets and other electronic devices up and running is essential to staying connected to family, friends and business. Don't take chances when you power up. Choose Leviton USB In-Wall Chargers for fast, efficient charging backed by the quality you expect from the brand you trust.

With a variety of colors to choose from, Leviton USB In-Wall Chargers are a seamless addition to any room in your home.

Fast Charging

POWERFUL

With up to 2X the charging power (up to 30W*) of typical USB chargers, our USB In-Wall Charger Dual Type-C™ with Power Delivery is the most advanced, powerful in-wall charger on the market.

Our entire line of USB In-Wall Chargers feature a smart chip which recognizes and optimizes the charging requirements of the connected device. This ensures each device gets the power level it needs to charge fast and efficiently. Plus, our in-wall chargers are designed to accurately manage power output to each connected device; and the tamper-resistant outlets are available for other power needs. Perfect for busy households with multiple devices!

Future Focused

INNOVATIVE

With technology evolving daily, it's important to choose a USB Charger that can keep pace.

- **Type-C USB Port** – Accepts the newest Type-C reversible connector used on the latest smartphones, tablets, laptops and monitors
- **Power Delivery (PD)** – State-of-the-art charging technology that supplies a higher level of power to the latest Type-C PD-enabled devices for faster charging (available with T5635)
- **Type A USB Port** – Accepts the standard Type A rectangular connector commonly found in the market today

SAFETY

For over 110 years, Leviton has been at the forefront of developing electrical products with safety in mind, and our USB In-Wall Chargers continue this tradition.

- Overcurrent protection helps protect electronics from receiving too much power which can damage devices
- Internal regulator prevents electronics from overheating
- Outlets are tamper-resistant to help keep children safe

Fast Charging

More Watts = More Power = Faster Charging

Your smartphone, tablet, laptop or any electronic device requires a certain amount of power to charge. Like light bulbs, the power is measured in wattage (watts). So, the more watts you have, the more power is flowing. Taking it one step further, the more power flowing equals faster charging.
