

# STL

## Volumetric Linear Wraparound

### Superior Aesthetics and Quality in a Revitalized Design

The STL linear wraparound brings superior lighting to your space with a sleek and minimalist design. The STL can be surface, stem or suspend mounted, allowing it to adapt to a wide variety of ceiling conditions. The volumetric design of the STL creates a uniform distribution of light for increased comfort of occupants in the space.

#### Key Features:

- **Design Options** - Available in 2' and 4' sizes and three mounting options
- **Volumetric Distribution** - Deep center basket design allows for an equal distribution of light in the space.
- **Controls** - Embedded nLight® lighting controls aid in code compliance and added cost savings
- **Long Life** - Rated to deliver L90 at 60,000 hours
- **Dim to Dark** - Dimming can operate as low as 0.1%

#### Complete Outfit

The STL, suspended linear wraparound, is part of the VT family of volumetric lighting solutions. In this family is the VTL volumetric toffer, VTLR LED Relight kit and VTLX surface-mount LED troffer.
