

CLICK RING PRODUCT DATA SHEET

FEATURES

- Built-in barrel lock permits fast, keyless installation
- One-piece design frees hands to do work - no tools or keys needed for installation
- Scalloped rear flange promotes easy application and higher security by eliminating pry points
- Plated lock protection offers lasting endurance in corrosive environments
- Permanent seal adapter is slotted to accept security seal
- Available in stainless or hardened steel for durability and resistance to physical attacks
- Available in several key-lock combinations

This high security ring is ideal for AMI deployment or contractor installation, as it can be used without a key. Ring design promotes utility security and key control.

ACCESSORIES

Seal Adapter Cap

Deters tampering and protects the barrel lock from dirt and debris

Indicative Padlock Seal

Hasp inserted through the slots of the seal adapter - indicates tampering
