

Scotch-Brite™

**THE LATEST
ADVANCES IN
ALUMINUM
SOLUTIONS**

CUBITRON™ II

Scotch-Brite™ **COMPLETE** **ALUMINUM SOLUTIONS**

Scotch-Brite sets the standard for non-woven industrial abrasives. It's *the original*—invented by 3M and proudly made in the USA. The performance of Scotch-Brite innovations is reflected in the aluminum finishes of countless craftsmen and metal professionals across the globe. As 3M continues to innovate, you'll always have the most advanced abrasive technologies right in your hands.

Introducing the latest aluminum solutions from 3M. With a complete selection of abrasive products and tools, you'll have the most advanced equipment to make a professional finish on aluminum and other soft metals each and every time.

- **New Scotch-Brite™ AL Surface Conditioning Discs**
- **New Scotch-Brite™ Deburr and Finish PRO Unitized Wheels**
- **New 3M™ Cubitron™ II Roloc™ Durable Edge Disc 947A**
- **The latest 3M™ Disc Sanders and Die Grinders**

NEW SCOTCH-BRITE™ AL SURFACE CONDITIONING DISCS

Combining the most advanced blending and finishing capabilities, these non-woven surface conditioning discs give you a finish that can meet the highest standards of quality control. The unique, open web construction resists loading, providing up to twice the service life giving an easy-to-handle blend on aluminum, oily carbon and other soft metal surfaces.

Features	Applications
Scotch-Brite™ non-woven construction	Aluminum and other soft metal finishing
Benefits	Grade*
<ul style="list-style-type: none"> • Same great performance you know and trust • Loading resistant • Longer life • Faster blending and finishing • Better edge retention 	<ul style="list-style-type: none"> • Very Fine • Medium • Coarse  <p><i>*Roloc™ and Hook-and-Loop</i></p>

Performance Graphs

Scotch-Brite™ discs outperform the competition in both the rate of blend and consistency of finish. The graph above shows how they blend material faster to increase productivity. The graph at right shows how they maintain a consistent finish while achieving this higher blend rate. Overall, this means Scotch-Brite discs can reduce your finishing time without sacrificing your finish quality. So when you factor in their longer life, you've got everything needed to lower finishing costs.

NEW SCOTCH-BRITE™ DEBURR AND FINISH PRO UNITIZED WHEELS

Built for productivity, no other non-woven unitized wheels are as effective for deburring and finishing. They let you blast through aluminum imperfections with less loading—so you'll get a smooth finish over and over again.

Features

- Scotch-Brite™ non-woven construction
- 3M Precision-Shaped Ceramic Grain Technology

Benefits

- Loading resistant
- Up to 3X longer life (see graph left)
- 30-50% faster burr removal (see graph right)
- Consistent finishes
- Smooth running feel

Applications

- Deburring
- Finishing
- Blending

NEW 3M™ CUBITRON™ II ROLOC™ DURABLE EDGE DISC 947A

Designed for speed and durability, these quick-change discs come in a range of sizes and grades to give you a faster, more consistent cut each and every time.

Both the Scotch-Brite™ Deburr and Finish PRO Unitized Wheels and the 3M™ Cubitron™ II RoLoc™ Durable Edge Disc 947A feature **3M Precision-Shaped Ceramic Grain**. This revolutionary technology features triangular shaped ceramic minerals. As those minerals wear during use, they fracture at angles that continually form sharp points. This allows the minerals to keep slicing through the substrate with ease, while helping the grain wear more evenly. No other industrial abrasive delivers the same kind of performance, feel or finish.

Conventional Grain

Precision-Shaped Grain

3M Precision-Shaped Ceramic Grain cuts faster, lasts longer, and produces a more consistent finish.

3M™ DISC SANDERS AND DIE GRINDERS

The latest pneumatic 3M Disc Sanders and Die Grinders have been completely re-engineered to work even better with Scotch-Brite and Cubitron II abrasives. On the outside, a stronger, all-steel head gives you more control during use. On the inside, larger gear sets, spindle bearings and seals greatly extend durability. Simply put, these are the most advanced pneumatic tools for extending the life of abrasives and achieving a professional finish on every job.

Features	Applications
<ul style="list-style-type: none">• Heavy-duty head design• Larger gear sets, spindle bearings and seals• Ergonomic safety lever and jacket• Kevlar reinforced vanes• CE Certified	<ul style="list-style-type: none">• Adhesive removal• Coating removal• Contour finishing• Deburring edges• Defect repair/leveling• Edge beveling/chamfering• Paint stripping• Prepping metal prior to paint• Radiusing• Right angle• Sealant removal
Benefits	
<ul style="list-style-type: none">• Intuitive grip• Greater wrist comfort• Increased durability• Minimal vibration• Quieter operation	
Power
