

CPANL™ DCMK

Direct Ceiling Mounting Reimagined

The DCMK by Lithonia Lighting® is the ideal option for securely mounting the CPANL™ flat panel directly to a hard ceiling.

The CPANL fixture paired with a DCMK bracket provides a crisp and clean aesthetic with a solution that extends less than 1.6" below your ceiling. Directly mounting CPANL can also serve as an economical alternative for fluorescent wraparound replacement.

CPANL with DCMK is a great choice for budget-conscious schools, commercial offices, or small retail footprint projects featuring hard ceilings.

Benefit to Contractors

- Less SKUs = less inventory and less ordering hassle
- Simple mounting alignment to J-BOX eliminates guesswork
- Stress-free, hands-free wiring

2' x 2' CPANL
with DCMK

2' x 4' CPANL
with DCMK

DCMK Bracket

Quick Facts:

- Minimal 5/16" gap from ceiling to fixture
- Accommodates all 3 sizes of CPANL with only 2 SKUs
- Audible locking click
- Clip teather cable for easy wiring
