Life Is 

Schneider
Electric

Your energy needs are changing.

Today's **connected lifestyle** includes multiple devices that run on electricity — but leaves you with little visibility into how much power they use.

Meanwhile, energy prices are expected to increase nearly five percent by 2022,* even as the grid sometimes fails to deliver power when you need it most.

Establish your **energy autonomy** with Schneider Electric™ connected home solutions — **smart electrical products** that help you save electricity, simplify your life and prepare for future energy needs.

* For residential customers, the U.S. Energy Information Administration projects a 2.8% increase in electricity prices in 2021 over 2020 and then a further 1.8% increase in 2022. See <https://www.eia.gov/outlooks/steo/>

Why Schneider Electric connected home solutions?

Save energy and money while simplifying your life and preparing for the future.

Smart and sustainable

Easily integrate solar and battery power into your home's electrical supply and add EV charging for a more sustainable lifestyle.

Resilient and reliable

Seamlessly switch to a battery or generator for backup power in the event of an outage, without the need for a separate subpanel.

Efficient and easy

Monitor energy use down to the device level in real time with mobile apps that can help you identify opportunities to increase efficiency.

Prepared and personalized

Preset lighting scenes and program schedules with beautiful, smart switches, dimmers, sensors and outlets.

What makes a connected home?

A connected home includes a full suite of smart energy management solutions that connect you to your home's energy usage, from grid to plug.

Switches, dimmers, sensors and outlets

This full line of smart and elegant light switches, dimmers, sensors and electrical plugs can be conveniently programmed in advance and controlled remotely. These wiring devices are equipped with interchangeable wall plates that snap into place, making it easy to update designs as your home decor changes.

Mobile apps

Our suite of mobile apps lets you quickly and easily monitor energy use, set automated lighting moods, and remotely control lights, outlets and more.

Energy Center from Square D™

This smart electrical panel significantly simplifies adding solar, battery, generator and EV charging to your home's electrical system and provides digital intelligence to help you improve electrical usage. It also includes whole-home surge protection and a \$50,000/year warranty covering connected equipment.

Connects to...

The Grid
Solar
Batteries
Generators

Wiser Energy™

This connected energy monitoring system relies on machine learning to understand how your home uses electricity, presenting that information via an easy-to-understand mobile app so you can make wiser decisions about reducing your energy consumption.

Schneider Electric connected home solutions are compatible with your favorite smart home products, including Alexa™, Google Home™ and Philips Hue.
