

4" Internally Adjustable LED Fixtures

Adjustable, beautifully made fixtures that blend seamlessly into the ceiling

Juno® 4" Internally Adjustable LED Fixtures

Downlighting, accent lighting, sloped ceiling or wet location, round or square aperture, it's the one fixture for all your needs – now and in years to come.

Juno 4-inch internally adjustable LED fixtures are agents of change. Imagine just about any change in room décor or interior design you might desire, and these fixtures are ready to respond.

Let's say you would like to change the trim.

Instead of having the trim integrated with the light source, trims for these fixtures are sold separately. You can change color or style anytime you want without needing to replace the entire luminaire. And there are a bevy of trims to choose from.

Want to adjust the light beam?

These fixtures offer internal adjustability of up to 35-degrees vertical and 360 degrees rotation so that light can be directed where needed. There are no mechanical parts below the ceiling plane ... just a beautifully made fixture that blends seamlessly into the ceiling. Redirect the light pattern anytime a change is desired.

Changing the beam spread is easy, too.

High-precision TIR optics are field interchangeable. The fixture series offers a 40-degree flood, a 30-degree narrow flood or 18-degree spot – all easy to switch out when your lighting design needs change.

The fact is, these fixtures are all about change and adaptability. The dimmable drivers enable change to lumen output to alter light intensity and mood. The media holder accepts a wide variety of lenses, films, and filters, permitting unlimited changes to lighting effects.

If you want stylish, efficient fixtures that are capable of responding to all your current needs, whether residential or commercial, you won't find a better solution than Juno 4-inch internally adjustable LED fixtures.

Dimmable LED drivers
available in dedicated
120V or universal
voltage versions.

35° vertical adjustment
with patent pending slider
mechanism for precise aiming

Ultra-efficient performance from
fixtures delivering either 700 or 1000
lumens using a fraction of the energy
of typical incandescent products.

A stunning collection of
round and square trims
including downlights,
adjustables and lensed
are easily changed in
the field to adapt to your
design needs.

Interchangeable TIR optics in
18° Spot, 30° Narrow Flood,
or 40° Flood distributions.

Adjustable and Totally Adaptable

Latest generation, high-output LED array binned within a 3-step MacAdam Ellipse for superior fixture-to-fixture color uniformity.

4"

fixture popular for both residential and commercial applications.

Accepts 2" media, including lenses, films, and filters for customized lighting control.

Visionary Design

It's a downlight, it's an adjustable... versatility in design is the key for this discreet 4" fixture. A single housing offers so many design possibilities with just a change-out of trims. A stunning collection of round and square trims including downlights, adjustables and lensed are easily changed in the field to adapt to your design needs. Exclusive to this design are trims developed specifically for slope ceiling applications, making this fixture the first dedicated small aperture LED product optimized for sloped ceiling installations.

Offering internal adjustability of up to 35° vertical and 360° rotation using the patent pending adjustable light engine module, light can be directed where needed for downlighting or accent lighting applications. No mechanical parts below the ceiling plane... just a beautifully made fixture that blends seamlessly into the ceiling. Re-direct the light pattern anytime a change is desired.

Changing the beam spread is easy, too. This fixture series offers a choice of optics including 18° spot, 30° narrow flood or 40° flood. Select one optic at the time of fixture ordering, but rest assured that the high-precision TIR optics can be ordered separately and are field interchangeable to allow for design flexibility.

These LED dedicated recessed housings boast a smaller footprint than others in the category with the IC housing installing easily in 2 x 6 construction. Housings are available in new construction and remodel versions, making them a perfect fit for both residential and commercial applications with insulated (IC) or non-insulated (TC) ceilings.

Two lumen packages, choices in LED color temperature, multiple driver options and extensive trim selection... if you want stylish, efficient fixtures that offer a magnitude of options for customizing your fixture to your needs now or in the future, you won't find a better solution than Juno 4" internally adjustable LED fixtures.

Trims

All trims for Juno 4-inch internally adjustable LED fixtures are sold separately and easily changed to adapt to future needs. The available styles and finishes are extensive.

This stunning trim collection is an expansion of the popular Juno 4-inch LED fixture family and offers perfectly matched finishes. Round trims feature a beveled edge design that blends cleanly with the ceiling.

Now you can change trims whenever lighting requirements dictate or whenever the mood strikes you. It's all part of the visionary philosophy behind the design of these extraordinary fixtures.
