THE MARK OF EXCELLENCE

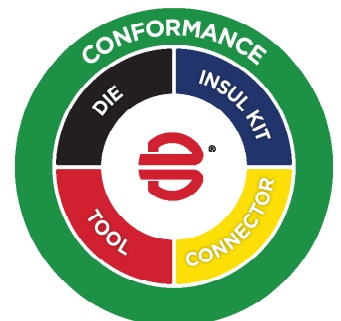

The BURNDY® Engineered System

Our mark means no guesswork. Behind every embossment is over 90 years of innovation, testing and support. BURNDY® HYDENT™ Compression when used as part of the BURNDY® Engineered System provides a UL Listed connection for power, grounding and bonding.*

Lightning Protection Information / Special Features

⚡ LIGHTNING PROTECTION INFO.

Basic rules for selection are:

1. Must be like material to the conductor.
 2. Two bolts to ground rod - minimum.
 3. Cable to cable connections can be anything, one bolt, two bolt, compression, etc.
 4. Cable to steel structure must have 8 square inch contact with steel.
 5. Heavy duty stacks - mechanical only.
6. On all connectors with heavy duty stack rating, we must offer 1/16" thick lead plating as an option. The reason for that is closest 25 ft. to stack opening must use lead coated product.
 - ⚡ Complies with NFPA 78-86 Ordinary Structures.
 - ⚡⚡ Complies with NFPA 78-86 Heavy Duty Stacks. (Order: LD for Lead Plating for Heavy Duty Stack applications.)

SPECIAL FEATURES

Other features are also available for products listed, such as undrilled or special drilling, 45° or 90° pad angles, bellling for extra flexible cable, smooth or special threaded studs, special labeling or packaging, extra long braid, and nuclear certification. Please contact BURNDY Customer Service for any inquiries.

REVOLUTIONARY BURNDY® DESIGN MEETS STRICT UL486B STANDARDS

Unique “bite and grip” TRITAP™ SERVIC® contact delivers safe, long-term reliability — even without scratch brushing ... without oxide inhibiting compounds.†

... and puts the bite on aluminum connections forever!

For use on all combinations

- Aluminum to aluminum
- Aluminum to copper
- Copper to copper

† When used in NEC applications of insulated cables only.

Patented

Available in sizes from #10 through 500 kcmil

SERVIT® Split-bolts; SERVIT® Covers

TYPES KS & KS-3 SERVIT®

Copper, Copperweld

Compact, high strength, high copper alloy SERVIT® split-bolt has free-running threads and easy to grip wrench flats. Highly resistant to season cracking and corrosion, the SERVIT® provides maximum pressure and assures a secure connection on all combinations of run and tap conductors. Type KS-3 accommodates 3 maximum size conductors.

▲ Listed torque values are for maximum conductor combinations accommodated. Consult UL486 Tables 7-4, 7-5, 7-6 for smaller conductor combinations.

See note LIGHTNING PROTECTION INFO. on page A-2

* Not UL Listed or CSA Certified.

* In addition to UL Listed for wire connectors and CSA Certified, these items are also UL rated for direct burial.

TYPE SC SERVIT® COVER

HUG-A-BUG

Used indoors or outdoors, this compact, one-piece plastic SERVIT® cover saves time and material, eliminates costly taping of split-bolts. Positive latch snaps easily and quickly over connector, ideal for tight quarters. Self-positioning plastic fingers wrap around wires fully insulating joint. UL Listed for 600 volt indoor application with type KS. Three covers accommodate a range of 6 SERVIT® sizes through 2/0 Str.

Universal SERVIT® Split-bolts

TYPE KSU UNIVERSAL SERVIT®

All Combinations of Copper, Aluminum, ACSR, AAAC, 5005, and Steel

Tin-plated, high strength, copper alloy SERVIT® split-bolt with spacer. Spacer separates dissimilar conductors and provides long contact length that prevents high pressure point contacts between run and tap conductors.

Use of PENETROX™ joint compound recommended with Aluminum and ACSR.

Accommodates compressed conductors within conductor ranges.

See note **LIGHTNING PROTECTION INFO.** on page A-2

TRITAP SERVIT® Split-bolt

TYPE KSA TRITAP™ SERVIT®

All Combinations of Aluminum to Aluminum,
Aluminum to Copper and Copper to Copper,
Aluminum Alloy Tin Plated

PATENTED TRIANGULAR PENETRATION
TECHNOLOGY (TPT) CONTACT

Features & Benefits

- No scratch brushing required
- No oxide inhibitor required
- Orients the conductor
- Provides maximum pressure and assures a secure connection of run and tap conductors
- Facilitates piercing the aluminum conductor surface oxides
- UL 486B listed, 90°C rated
- Provides a low contact resistance
- Provides equal coefficient of expansion
- Inhibits the reformation of oxides by producing a gas-tight seal
- Provides improved retention of minimum to maximum conductor combinations

▲ Listed torque values are for maximum conductor combinations accommodated. Consult UL486 Tables 21, 22, 23 (found in Section O of this catalog) for smaller conductor combinations.

** No scratch brushing or oxide inhibiting compounds required for insulated 90° C max. rated conductor for N.E.C. applications.

OKLIP™ Connectors

TYPE KVS OKLIP™

Copper & Copperweld

Compact, two-piece, high strength, high copper alloy BURNDY® OKLIP™ recommended for heavy duty connections. Neoprene rings hold DURIMUM™ silicon bronze bolts in place during installation. Installed with ordinary wrench.

▲ Listed torque values are for maximum conductor combinations accommodated. Consult UL486 Tables 21, 22, 23 (found in Section O of this catalog) for smaller conductor combinations.

See note LIGHTNING PROTECTION INFO. on page A-2

TYPE KVSU UNIVERSAL OKLIP™

All Combinations of Copper, Aluminum, ACSR, AAAC & 5005

Compact, high strength, tin plated copper alloy two-piece connector with spacer and tin-plated silicon bronze DURIMUM™ hardware. Recommended for heavy duty connections. Spacer separates dissimilar conductors and provides long contact length. Neoprene ring prevents loss of shorter bolt during installation. Longer peened bolt permits swivel action for easier installation. Use of PENETROX™ joint compound recommended with aluminum and ACSR.

Accommodates compressed conductors within diameter range.

TYPE KVSW OKLIP™

Copper and Copperweld

Similar to OKLIP™ Type KVS except for a high copper alloy spacer that separates run and tap conductors. Provides high contact pressure, confines conductor strands, and assures vibration-proof connection. Longer peened bolt, permits swivel action for easier installation. Silicon bronze DURIUM™ hardware.

See note LIGHTNING PROTECTION INFO. on page A-2

TYPE KVS-A ALUMINUM OKLIP™

All Combinations of Copper, Aluminum†, ACSR†, AAAC and 5005

Three-piece, high-conductivity, non-copper bearing aluminum alloy connector with thick spacer and aluminum hardware. Hardware in KVS26A and KVS28A is stainless steel. Recommended for heavy duty dissimilar metal applications. Spacer separates conductors and provides long contact length. Belled entrances prevent chafing, permit easier assembly of conductors. Longer peened bolt permits swivel action for easier installation. Neoprene ring prevents loss of shorter bolt. PENETROX™ joint compound recommended with aluminum and ACSR.

THESE CONNECTORS CAN ACCOMMODATE ACSR CONDUCTORS OVER ARMOR ROD WITHIN THE DIAMETER RANGE INDICATED.

APPLICATION OVER ARMOR ROD

† Accommodates compressed conductors within diameter range.

VERSITAP™ Parallel Clamps

TYPE QPX VERSITAP™

for Copper

The VERSITAP™ Type QPX is recommended for Tee, Cross, Parallel, Butt and Tap connections. Range-taking, only 10 connectors required to accommodate conductor sizes from #6 Str. to 1000 kcmil. Edges are rounded for easy taping. Made of high strength, high-conductivity copper alloy and silicon bronze DURIUM™ hardware.

* For various configurations, see page with TYPE QPX-Y

▲ Listed torque values are for maximum conductor combinations accommodated. Consult UL486 Tables 21, 22, 23 (found in Section O of this catalog) for smaller conductor combinations.

See note LIGHTNING PROTECTION INFO. on page A-2

Universal VERSITAP™ Parallel Clamps

TYPE QPX-Y UNIVERSAL VERSITAP™

Universal Parallel Clamp For Copper and Aluminum

High copper alloy cast connector, tin-plated for use with copper or aluminum cable. Makes parallel, tap, tee, cross or end-to-end connections. Edges rounded for easy taping. PENETROX™ joint compound recommended.

▲ Listed torque values are for maximum conductor combinations accommodated. Consult UL486 Tables 21, 22, 23 (found in Section O of this catalog) for smaller conductor combinations.

Insulation Piercing Connectors with Shear Bolt

TYPE BIPC Insulation Piercing Connector for Copper and Aluminum

cULus Listed 90° C, *600 Volt

BURNDY® declares that the BIPC Connectors are suitable for use on the line side of service equipment, as determined by ANSI C119.5 testing performed in an ISO 17025 accredited laboratory.

The Type BIPC, BURNDY® Insulation Piercing Connector is ideally suited for splicing, tapping and dead-ending aluminum and copper conductor wire sizes: #14 AWG to 750 kcmil. Utilizes shearing installation technology, 6-point socket impact driver for easy installation and removal; no torque wrench required.

Fig. 1

Fig. 2

* Not cULus Listed

**Max run conductor size can only be achieved in TAP orientation with end cap removed

Insulation Piercing Connector with Shear Bolt

TYPE BIPC Continued

Features & Benefits

- Suitable for use on the line side of service equipment
- Flexibility! One connector allows for tap, splice or dead-end configurations
- Time Savings! Requires no cable stripping, conductor brushing, inhibitor application or after installation taping
- Engineered shear bolt technology applies consistent torque for efficient and reliable connectors
- Easy installation and removal - only requires 6-point socket impact driver
- cULus Listed Splicing Wire Connector, AL9CU Rated, for copper and aluminum conductor combinations up to 90°C, *600 Volt applications
- Insulation piercing design for use in multiple applications - overhead covered and bare taps, service and metering connections, and lighting system work
- Range taking design reduces the number of SKUs necessary to cover from #14 AWG up to 750 kcmil

* Not cULus Listed

**Max run conductor size can only be achieved in TAP orientation with end cap removed

BURNDY Catalog Numbers with suffix S come with red spacer component, to be left in

BURNDY Catalog Numbers with suffix SC come with red spacer component as well as end caps installed; end caps can be rearranged to meet install requirements (tap, splice, or dead-end)

SCRULUG™ Terminals Tin-plated / Unplated

TYPE KPA SCRULUG™

Copper Cable

High copper alloy tin-plated terminal for joining a wide range of cable to equipment pads or terminal blocks. Especially good in light industrial applications. The tongue and body are a one-piece design. The pressure bar equalizes pressure over the conductor and prevents the screw from cutting into the cable.

Fig. 1

Fig. 2

NOTE: For unplated version add "UNPL" suffix.

TYPE KPA-UP SCRULUG™

Copper Cable

High copper alloy terminal for joining a wide range of cable to equipment pads or terminal blocks. Plain copper finish.

Fig. 1

Features & Benefits

- One piece design for superior torque and pull out performance
- Convenient range taking design reduces number of SKUs needed to carry in stock; one catalog number accommodates several conductor sizes
- High conductivity copper alloy for a long lasting, reliable connection
- Compact, easy to use design
- Slot Robertson screw, hex head, hex socket bolt require no special installation tools and eliminates over-torquing and potential conductor damage

NOTE: For tin plating drop "-UP" suffix and add "-TP" suffix (example: KPA4CTP).

For use in grounding applications with a green screw, contact factory. Listed for grounding per UL467.

SCRULUG™ Terminal; Offset Tongue Unplated / Tin-plated

TYPE KLU SCRULUG™

Copper Cable with Offset Tongue; Non-Plated

High copper alloy terminal with offset tongue for joining a wide range of cable to equipment pads or bar. Easy to install with screwdriver or wrench. Connector is reusable. Plain copper finish.

Features & Benefits

- Convenient range-taking design reduces catalog numbers required in inventory; one connector accommodates several conductor sizes
- High conductivity copper alloy for long lasting reliable contact
- Compact design, easy to install, reduces labor time
- Slot Robertson screw, hex head, hex socket bolt require no special installation tools and eliminates over-torquing and potential conductor damage

QIKLUG™ Lay-In Style Terminals

TYPE CL501 & CL501TN COPPER LAY-IN QIKLUG™

Copper

The Lay-In QIKLUG™ is manufactured from high strength pure electrolytic copper to ensure maximum strength and conductivity. UL467 Listed for direct burial in earth or concrete. The open-faced design allows for fast lay-in of the conductor without the need for cutting or breaking. Stainless steel screws used for excellent corrosion resistance.

Catalog Number	Conductor Range	Stud Hole
CL501	14 AWG-4 AWG	#10
CL501TN	14 AWG-4 AWG	#10

Photo above shows a typical solar panel installation using CL50-1 connectors.

TYPE CL COPPER LAY-IN QIKLUG™

Copper

Manufactured for maximum strength and conductivity, these lay-in lugs allow for continuous runs of conductor and are well suited as terminations as well. Tin-plated, set screw style connectors, three sizes cover a range from #14AWG to 250 kcmil. CL3/0-516TN and CL250-516TN are UL Listed and CSA Certified. CL1/0-14TN UL Listed for grounding and CSA Certified. 90° C rated. Suitable for copper conductors only.

Catalog Number	Wire Range Copper	H	W	L	T	K Dia	Hex Size

CL250516TN	#6 AWG - 250 kcmil	1.79	0.80	2.20	0.30	0.33	9/16-18 (0.25 Hex)

QIKLUG™ Lay-In Style Terminals

TYPE BGBL LAY-IN QIKLUG™

UL LISTED 90° C, 600 V

The Lay-In QIKLUG™, Type BGBL is manufactured from high strength 6061-T6 aluminum, and is ideally suited for grounding and bonding applications accommodating both copper and aluminum conductor sizes #14 AWG to 250 kcmil. The BGBL4SS with Stainless Steel screw is UL 467 Listed for grounding and bonding.

Features & Benefits

- UL 486B Listed, AL9CU Rated for copper and aluminum conductor combinations up to 90° C, 600 Volt applications
- UL Recognized for grounding and bonding to ensure reliability
- Electro-tin plating provides low contact resistance
- Lay-in feature eases installation

* Suitable for copper conductors only.

QIKSHEAR™ Shear Bolt Connectors 1-Hole, 2-Hole Lugs; Splices

TYPE K-SB QIKSHEAR™ Mechanical Shear Bolt Connectors

Copper and Aluminum

The K-SB Shear Bolt connector family allows for terminating or splicing of aluminum or copper conductor without the need of a torque wrench or compression tools and dies. The connectors are designed with shear bolts to break off at the correct torque using a 3/8" hex key. Range taking options available in most sizes to keep the number of SKUs low. From 2/0 AWG up to 1250 kcmil we have you covered with one and two hole terminals as well as splices.

Features & Benefits

- Dual Rated AL9CU for both copper and aluminum conductor
- cULus Listed Wire Connector to UL486A-486B
- Up to 35kV voltage rating
- Easy installation with shear bolt technology, no crimp tools necessary
- 3/8" Hex Key for all sizes
- Tin Plated aluminum connectors and screws
- Range-taking on most sizes

Universal Terminals, 1-4 Conductor Designs, NEMA-spacing

TYPE K-A-U2N UNIVERSAL TERMINAL

Aluminum and Copper Conductors (One to Four Conductors; NEMA-Spaced Tongue)

These panel board terminals allow multiple conductors to be terminated to equipment pads, bus bars, or other electrical equipment. Conductor ports are in a stacked arrangement to save space. They are made from high strength aluminum alloy and are tin-plated for low contact resistance.

Features & Benefits

- Dual rated AL9CU for both copper and aluminum conductor
- 600 Volt Rated
- UL Listed UL486A-486B; CSA Certified C22.2 No. 65
- Range taking conductor ports
- Each size can accommodate up to 4 conductors
- 1/2" diameter stud holes spaced 1-3/4" apart (NEMA-spacing)

Stacked, Lay-In Style Universal Terminals

TYPES KK-A-U-S, KK-A-U-L UNIVERSAL TERMINAL

Aluminum and Copper Conductors
Stacked Style - Type KK-A-U-S (figure 1)
Lay-In Style - Type KK-A-U-L (figure 2)

The Stacked Style configuration accommodate #2 AWG - 750 kcmil conductor. The stacked style is ideal for limited space applications. Up to 12 conductors can be accommodated, each port is range taking and the terminals accept aluminum and/or copper conductor. Mounting holes are NEMA-spaced with a 1/2" bolt hole.

The Lay-In Style configuration accomodate 1/0 AWG - 1000 kcmil conductor. The lay-in style makes cable insertion a breeze. Each size can accommodate up to 8 conductors. Mounting holes are NEMA-spaced with a 1/2" bolt hole.

Features & Benefits

- Fabricated from 6061-T6 aluminum alloy for conductivity and strength
- Clear plated for low-contact resistance
- For use with both copper and aluminum conductor
- Stacked configurations are ideal in limited space applications
- Lay-In configurations offer ease of conductor insertion

Transformer Lug Kits

TYPE KAU-KIT

TRANSFORMER LUG KIT

These dual-rated lugs are constructed from high strength aluminum alloy and electro tin-plated to provide low contact resistance. Lugs and mounting hardware packaged together in these kits.

Features & Benefits

- UL Listed and CSA Certified, AL9CU dual rated set screw terminals to ensure the transformer feeders and taps are terminated properly
- Plated steel cap screws and hex nuts with captive conical washers or individual Belleville washers
- Terminal to bus connections are made using proper hardware resulting in true torque to pressure performance - compensates for dissimilar metal expansion and contraction
- Hardware packed in plastic bag to prevent lost hardware prior to installation
- Larger 800 kcmil lugs in KIT3 and KIT4 accommodates common 750 kcmil tap conductors in larger transformers

Pin Adaptors; Center, Off-centered Pin Designs

TYPES KAP / KAPO MECHANICAL PIN ADAPTORS

Aluminum and Copper Conductors

Five range taking sizes accommodate from #6 to 750 kcmil. Each size is offered in a center and off-centered pin design. The off-centered pins can be rotated to prevent interference when installing conductors side-by-side in limited space applications. Insulated covers are provided with each connector to prevent contact between it and uninsulated live parts of opposite polarity or grounding metal.

UL Listed for use with Flex (fine stranded) conductor; four smaller sizes utilize a disc-pad screw preventing damage to the fine strands as the conductor is compressed during installation.

Features & Benefits

- AL9CU Dual rated for both copper and aluminum conductor; 600 Volt Rated
- UL Listed to UL Wire Connector Standard UL486A-B
- Rated for use with Flex (fine stranded) conductor
- Range taking conductor port
- Off-centered pin available to reduce center-to-center distance between adjacent pins
- Easy installation with the use of a torque wrench - no crimping tool and/or die required
- Plastisol insulated covers provided with each connector
- Covers are molded to fit around set screws protruding from connector

Splice/Reducer

TYPE AMS DUAL RATED SPLICER/ REDUCER

Copper and Aluminum Cable

All splicer/reducers are dual rated for use with aluminum and copper conductors and are constructed from high strength, tin plated aluminum. PENETROX™ oxide inhibiting joint compounds are recommended for all aluminum applications.

Features & Benefits

- All connectors are tin-plated to provide low contact resistance and prevents galvanic corrosion
- Connectors feature rounded bottoms which facilitates taping
- Solid center barrier prevents contact of dissimilar metals
- Large screw diameters ensure greater surface contact with wires for maximum pullout force
- Large cable range accommodated; each splice is also an effective reducing connector

✓ Complies with NFPA 78-86.

* Slotted Screws. H2 measured with maximum conductors, reference only.

POLYTAP™ Insulated Gutter Taps; Riser Tap with Cover

TYPE KPU-TC POLYTAP™

Insulated Gutter Tap for All Copper and Aluminum Combinations

Wide range-taking tin-plated aluminum parallel and perpendicular clamp and insulating cover for industrial and multiple story structure applications. Covers having flexible fingers that conform to the conductor, fully insulating the connection - eliminating the need for taping. Connector and Cover can be ordered separately.

600 Volt Max. 90° C

Features & Benefits

- 600 Volt Rated
- AL9CU dual rated for use with aluminum or copper conductor
- UL Listed to UL486A-B; CSA Certified to C22.2, No. 65
- Manufactured from high strength 6061-T6 aluminum alloy
- Electro tin plated for low contact resistance and protection against corrosion
- Tap parallel or perpendicular to run conductor
- Connectors are re-useable

UCU28AC	#2 Str. - 4/0 Str.	#10 Sol. - #2 Str.	2-1/4	1-13/16	2-5/8	120

▲ Listed torque values are for maximum conductor combinations accommodated. Consult UL486 Tables 21, 22, 23 (found in Section O of this catalog) for smaller conductor combinations.

Splice Kits; Above Grade, Watertight/Underground

TYPE AGSKIT ABOVE GRADE SPLICE KITS

Aluminum or Copper/Aluminum Combinations

Type AGS Above Grade Splice Kit consists of a standard AMS splice/reducer and a heavy wall heat-shrink sleeve. The AMS Splice is dual rated for use with aluminum and copper conductors and are constructed from high strength, tin plated aluminum that provides low contact resistance and reduces the effects of galvanic corrosion. Connector is installed with common installation tools. The heavy wall heat shrink sleeve is lined with adhesive material, providing a positive seal against moisture egress. Heat shrink sleeve is installed with standard propane torch, or electric heat gun.

Fig. 1

Fig. 2

Catalog Number	Figure Number	Wire Range
AGSKIT2	1	8 AWG-2 AWG
AGSKIT250	2	1 AWG-250 kcmil

TYPE UGSKIT WATERTIGHT/UNDERGROUND SPLICE KITS

Aluminum or Copper/Aluminum Combinations

Type UGS Watertight Underground Splice Kit consists of a standard AMS splice/reducer and two heavy wall heat-shrink sleeves. The AMS Splice is dual rated for use with aluminum and copper conductors and are constructed from high strength, tin plated aluminum that provides low contact resistance and reduces the effects of galvanic corrosion. Connector installed with common installation tools. Both heavy wall heat shrink sleeves are lined with adhesive material, providing a watertight splice that can withstand abrasions that may occur during direct burial applications. Heat shrink sleeve installed with standard propane torch, or electric heat gun.

Splice Kit, Submersible Splice/Reducer

TYPE UGSKIT8

UF DIRECT BURIAL SPLICE KIT

Type UGS UF Splice Kit consists of a UF splice connector and a heavy wall heat-shrink sleeve. The UF splice connector can accommodate up to four UF conductors and is installed with common installation tools. The heavy wall heat shrink sleeve is lined with an adhesive material, providing a water-tight splice that can withstand abrasions that may occur during direct burial applications. Heat shrink sleeve installed with standard propane torch, or electric heat gun.

TYPE UGS350ULDB IN-LINE SPLICE/REDUCER

For Direct Burial

Features & Benefits

- EPDM rubber covered 6061-T6 aluminum connector
- Dual rated AL9CU for copper or aluminum conductor
- UL Listed and CSA Certified for Direct Burial
- Broad range taking capability
- Low installation cost
- Submersible rated
- For use in wet or damp locations excluding Freezing Conditions; ensure products are installed below frost line (where applicable) when used in wet conditions

Catalog Number	Wire Range	Length	Height	Hex Size	Torque (In. Lbs.)

The MOLE™ Weathertight Splice/Reducer

BURNDY UNITAP™ THE MOLE™

For Direct Burial, 600V, 90° C

Designed specifically for direct burial applications, the MOLE™ in-line splice/reducer is made with a specialized plastisol material that forms a rugged weathertight connection.

Features & Benefits

- UL486D UL Listed for Direct Burial
- AL9CU Dual-rated for copper and aluminum applications; 600 Volts, 90°C
- Plastisol covered AL 6061-T6 aluminum body saves time by eliminating the need for heat shrink
- Oxide inhibitor pre-installed prevents moisture and contaminants from entering the contact area
- Range-taking capability reduces the number of connectors in inventory

BISR-DB = BURNDY Inline Splice/Reducer Direct Burial.

UNITAP™ rated for code conductor only.

Insulated Multiple Tap Submersible Connectors

Direct Burial UNITAP™ Connectors

Dual Rated Multiple Tap Connector

These rubber insulated, dual rated connectors are for use in networks up to 600V. Suitable in light fixture pole bases in commercial, industrial, or residential markets. Distribution within strip malls, for use in any multi-tenant facility. No taping or heat shrink required.

Features & Benefits

- Dual rated for aluminum or copper conductors
- Each unit is individually marked for ease of identification
- Supplied with aluminum set-screws
- Covering is the highest quality EPDM rubber
- Supplied with oxide inhibitor pre-installed
- Submersible rated and suitable for Direct Burial
- Meets ANSI C119.1 and C119.4 requirements
- Rated 600V and 90°C; UL Listed and CSA Certified
- For use in wet or damp locations excluding Freezing Conditions; ensure products are installed below frost line (where applicable) when used in wet conditions
- Silicone provided for conductor insertion

UNITAP™ Clear Insulated Multi-Tap Connectors for Code

UNITAP™ Clear Insulated Multi-Tap Connectors for Code Conductor

Clear Insulated Multiple Tap Connectors

Tap connections and in-line splice/reductions are made quickly and easily with the UNITAP™ line of clear insulated connectors for code conductor. UL486B Listed. Dual-rated AL9CU for any stranded copper or stranded aluminum applications. 600 Volt, 90° C. Featuring multiple configurations suitable for most any application.

Features & Benefits

- Clear Plastisol covered AL6061-T6 aluminum body saves time, lowering installation costs and eliminates taping
- Clear Plastisol allows visual confirmation that the conductor is properly inserted
- Oxide inhibitor pre-installed inhibits moisture and contaminants from entering the contact area
- Range-taking capability reduces number of connectors necessary to carry in inventory

UNITAP™ Clear Insulated, Mountable, Single-Sided Entry

UNITAP™ Clear Insulated Multi-Port Connectors for Code Conductor; Mountable; Single-Sided Entry

Clear Insulated Multiple Tap Connectors

Type BIBS-MT Multi-Port, Single-Sided Tap connectors offer the same features as the standard Type BIBS UNITAP™ connectors except these -MT types are provided with two isolated mounting holes, one at each side of the connector for direct mounting to trough, gutter, or wireway. They will accommodate up to standard 1/4" hardware. UL486B Listed. Dual-rated AL9CU for any stranded copper or stranded aluminum applications. 600 Volt, 90° C.

UNITAP™ Clear Insulated Multi-Tap UL Listed for Code and Flex

UNITAP™ Clear Insulated Multi-Tap Connectors for Code and Flex Conductors

UL Listed 486A-486B

UNITAP™ Clear Insulated Multi-Tap is UL Listed to the UL Wire Connector Standard UL486A-486B and CSA Certified for use with flexible (fine stranded) conductor - **with no ferrules required!** Featuring color coordinated conductor port and screw port caps making it easy to identify the maximum conductor size accommodated by the connector.

A disc-pad screw has also been incorporated to prevent damage to the fine strands as the conductor is compressed during installation. The connectors are shipped with the 'pad' attached to the screw by a thin stem; during installation the pad is sheared from the stem as it makes contact with the conductor and remains stationary as the screw continues to rotate until the recommended installation torque is achieved.

The color coordinated conductor port caps display the wire range and classes of conductor accepted by the specific connector. The screw port caps show the installation torque information for quick and easy reference during installation. (Excluding the Heavy Duty 750 Series.)

The Heavy Duty 750 Series features two screws per conductor. Conductors **cannot** be installed from opposite sides of the same port using only one screw per conductor.

Features & Benefits

- 600 Volt Rated
- Fully Insulated Aluminum 6061-T6 connector body saves time and lowers installation costs by eliminating the need for taping
- Listed to UL486A-B (File E9498)
- CSA Certified to C22.2, No. 65 (File 042860_c_00)
- Rated for use with flex conductor (No Ferrules Required!)
- AL9CU dual rated for use with copper and aluminum conductors
- Range taking designs will accommodate wire sizes from #14-750 kcmil Class B & C, and #14-777 DLO Flex
- Configurations include Taps, In-Line Splice Reducers, Single-Sided Entry, and Double-Sided Entry with the number of ports from 2 to 14
- Clear Plastisol Insulation allows visual confirmation that conductor is properly inserted into port
- Operating temperature from -40°C to 135°C
- Conductor ports are pre-filled with oxide inhibitor
- Screw Port and Conductor Port caps provided to protect against contamination and accidental contact of energized parts
- Caps are color coordinated to quickly identify maximum conductor size accommodated
- Screw Port caps contain recommended installation torque values for quick and easy reference
- Conductor Port caps contain the accommodated wire range and allowable conductor classes

UNITAP™ Clear Insulated, Code & Flex, Mountable, Double-Sided

UNITAP™ Clear Insulated Multi-Port Connectors for Code and Flex Conductor; Mountable; Double-Sided Entry

Multiple Port Mounted Tap
Double Sided Entry
Figure 7
(BIBD6004FXMT)

Clear Insulated Multiple Tap Connectors

Type BIBD-FXMT Multi-Port, Double-Sided Tap connectors offer the same features as the standard Type BIBD-FX UNITAP™ connectors except these -FXMT types are provided with two isolated mounting holes, one at each side of the connector for direct mounting to trough, gutter, or wireway. They will accommodate up to standard 1/4" hardware. UL486B Listed. Dual-rated AL9CU for any stranded copper or stranded aluminum applications. 600 Volt, 90° C.

UNITAP™ UV Rated Black, Class B & C Conductor Only

UV Rated Black UNITAP™

UV Rated Black Insulated Multiple Tap Connectors and Splice Reducers

Tap connections are made quickly and easily with the UNITAP™ line of connectors. UL486A-B Listed. Dual-rated for any stranded copper or stranded aluminum applications. UL Listed 600 Volts, -40° C to 135° C Operating Temperature.

Features & Benefits

- UV Rated covering over AL6061-T6 aluminum body saves time, lowering installation costs and eliminates taping
- Oxide inhibitor pre-installed inhibits moisture and contaminants from entering the contact area
- Range-taking capability reduces the number of connectors necessary to carry in inventory
- AL486B Listed, AL9CU, 600 Volts, 90°C
- Operating temperature -40°C to 135°C

VERSIPOLE™ Configurable Power Distribution Blocks

VERSIPOLE™

UL Listed 1953; Finger-Safe IEC 60527; IP-20 Rating

The VERSIPOLE™ Configurable Series Power Distribution Blocks are used for splicing and distributing power from primary run(s) to secondary/branch circuits. They are offered in standard one, two, or three pole configurations. The configurable series can also be designed to accommodate an infinite number of made-to-order combinations.

Features & Benefits

- 600 Volt rated; Listed to UL1953; Rated for use with both code and flex conductor without requiring ferrules
- AL9CU dual rated for use with copper and aluminum conductors
- Range taking designs accommodate wire sizes up to 535 DLO and can support 1 or 2 run conductors and up to 12 taps for secondary circuits
- Allow for panel mounting; medium and large sizes also allow for DIN rail mounting
- Finger-Safe style are provided with translucent polycarbonate top covers and end plates to permit easy visual inspection and provide IEC 60529 IP-20 Rating
- High Short-Circuit Current rating up to 100kA with proper fusing
- Bases and side barriers of glass-reinforced nylon 6/6 for extra durability and excellent insulating properties; carry a UL94 flammability rating of V0

Ordering Information & Footnotes:

Finger-Safe Kits include translucent top cover and end plates only. Order 1 kit per pole. The kits are used in conjunction with Open style distribution blocks. (Distribution blocks are not included.)

† To achieve Finger-Safe style Adder order Open style Adder and Finger-Safe Kit

Optional Hinged Covers are available for use with Open style blocks and are ordered 1 cover per pole.

Optional Hinged Covers:

VERSIPOLE™ Configurable Power Distribution Blocks

VERSIPOLE™

Double-Wide, Box-to-Stud, and Stud-to-Stud Styles

These styles offer additional splicing and tapping options over the standard Open and Finger-Safe styles.

Double-Wide
BDBLCS7X1DW shown

Features & Benefits

- 600 Volt Rated
- Listed to UL1953
- Rated for use with code and flex conductor without requiring ferrules
- AL9CU dual rated for use with copper and aluminum conductors
- Range taking conductor ports can accommodate wire sizes up to 535 DLO and can support up to 5 run conductors and up to 24 tap conductors
- High Short-Circuit Current Rating up to 100kA with proper fusing

Box-to-Stud
BDBLCS55K1 shown

Stud-to-Stud
BDBLCS55S1 shown

VERSIPOLE™ Configurable Power Distribution Blocks

VERSIPOLE™ Configurable Power Distribution Blocks, Double-Wide

VERSIPOLE™

Double-Wide Lay-In Style

These blocks feature a Lay-In channel that allows for continuous Run conductors, perfect for multi-level and/or multi-unit applications. Double-Wide boxes are provided with covers.

Features & Benefits

- 600 Volt Rated; Listed to UL1953
- Allows for continuous Run conductors
- Acceptable for panel mounting or DIN Rail mounting for medium and large sizes
- Rated for use with code and flex conductor without requiring ferrules
- AL9CU dual rated for use with copper and aluminum conductors
- Multiple configurations feature range taking conductor ports that accommodate wire sizes up to 1000 kcmil run and up to 12 tap conductors max. 500 kcmil
- High Short-Circuit Current Rating up to 100kA with proper fusing
- Supplied with Black Cover

Performance

The terminals and splices in this catalog are approved, per SAE-AS7928 and/or UL486, where indicated. Table 1 shows the performance requirements for terminals used in military and commercial equipment. The voltage drops listed are maximum allowable values taken at currents well above rated current for the wires. Tensile values assure that the wires will not become separated from the terminals under reasonably expected stresses. UL tensile values are chosen to reflect the severest expected duty. MIL Specification tensile values apply only to crimp terminations and reflect minimum values that are obtained in good crimp joints. Actual performance of BURNDY terminals exceeds the requirements of Table 1. Typical values are shown in Figures 1-5. For High Temperature applications BURNDY® YAV series with nickel plating “-NK” suffix provide for continuous operation to 650° F and 750° F intermittent service.

Table 1

Performance Requirements — Terminals for Copper Wire					
Wire Size	Per SAE-AS7928			Per UL 486

Notes:

For factory cage code numbers, please contact your local BURNDY® sales representative or the Headquarters at the phone number shown on cover, or go to website below for contact information.

SAE stands for the Society of Automotive Engineering, which has replaced the Military Specifications.

Uninsulated Compression Ring Tongue

TYPES T AND YAD HYLUG™

The Type T uninsulated terminals are constructed of pure electrolytic copper. Designed with a long brazed seam barrel, standard neck, deep V groove inner serrations and electro-tin plated. The terminals are ideal for control wiring and other standard duty applications.

The ring tongue provides a secure termination under the screw head that cannot be removed without the complete removal of the screw. Two or more terminals can easily be stacked on a common stud.

Features & Benefits

- Constructed of pure electrolytic copper for maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Long brazed seam barrel and deep V groove inner serrations provide optimum conductivity reliability and holding power after crimping
- Electro-tin plating to provide durable, long-lasting corrosion resistance
- Wire range is clearly marked on terminal for easy identification
- Inspection hole for an easy visual check of wire insertion
- Long neck terminal permits easy bending and stacking of several terminals on a common stud

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Mylar-mounted connectors may be available, please see the mylar-mounted catalog pages at the end of this section for more information.

Uninsulated Compression Terminal

TYPE YAD HYLUG™

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Mylar-mounted connectors may be available, please see the mylar-mounted catalog pages at the end of this section for more information.

The YAD uninsulated OEM lug terminal is constructed of electrolytic copper. Designed with a brazed seam barrel, standard neck, V-groove inner serrations and electro-tin plated. The round ring tongue provides a secure termination under the screw head that cannot be removed without the complete removal of the screw. Two or more terminals can easily be stacked on a common stud. These terminals are ideal for use with code or flex cable.

Features & Benefits

- Terminals utilize a brazed seam
- Provide excellent high conductivity connections
- Electro-tin plated for durable long lasting corrosion resistance
- Vibration resistance and tensile strength is well within the limits of commercial specifications

Polyvinylchloride Insulated Compression Ring Tongue Terminal

TYPES TP AND BA VINYLUG™

600 Volts Max., 105° C Max.

VINYLUG™ Type TP is designed for commercial and light duty industrial control and power circuit applications. Supplied with an expanded polyvinyl chloride (PVC) insulation shroud, many tongue variations and rated 600V makes TP terminals versatile and economical.

Features & Benefits

- Expanded insulation support accepts standard and large wire diameters lowering inventory requirements and permitting greater flexibility along with insulation support
- Funnel entry for easy wire insertion
- Manufactured of pure electrolytic copper providing maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Deep V groove serrations in the inner barrel for added holding strength
- Electro-tin plating for durable, long-lasting corrosion resistance

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Mylar-mounted connectors may be available, please see the mylar-mounted catalog pages at the end of this section for more information.

Nylon Insulated Compression Ring Tongue

TYPES TN AND YAES INSULUG™

600 Volts Max., 105° C Max

INSULUG™ type TN Nylon-insulated terminals are designed for heavy duty industrial, utility and military power and control-circuit applications for wire sizes 26 AWG through 10 AWG. They offer high dielectric strength and stability in oily conditions and meet military CLASS 1 and CLASS 2 requirements per SAE-AS25036 and the requirements of military specifications SAE-AS7928.

Features & Benefits

- Integral one-piece copper barrel / insulation grip and wire strain relief design for improved physical strength characteristics over a multi-piece design
- Manufactured of pure electrolytic copper for maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Brazed seam provides a stronger barrel design, minimizes any possible splitting and eliminated folding
- Deep inner barrel serrations and smooth funnel entry for excellent conductivity and pullout strength values along with easy wire insertion
- Insulation is locked in place, will not twist off, maintaining proper dielectric values
- Electro-tin plated for durable, long lasting resistance to corrosion
- Color-coded and clearly marked for quick, easy wire size identification
- Ring tongue provides a secure termination under the screw head that cannot be removed without complete removal of the screw, allowing two or more terminals to be stacked on a common stud

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Mylar-mounted connectors may be available, please see the mylar-mounted catalog pages at the end of this section for more information.

Nylon Insulated Compression Ring Tongue, Multi-Finger Insulation Grip

TYPE YAE-G INSULUG™

300 Volts Max., 105° C Max.

INSULUG™ Type YAE-G nylon insulated terminals are designed with a multi-finger insulation grip for paper, EPR and other elastic or hard to grip insulations. The metal fingers firmly grip the insulation providing superior holding characteristics, cable support and strain relief. Type YAE-G terminals are rated 105° C and meet military standard AS25036 Class 2 and SAE-AS7928 requirements.

Features & Benefits

- Multi-finger insulation grip for superior holding characteristics, especially on EPR and other elastic-type insulations
- Brazed seam for stronger, more durable termination
- Manufactured of pure electrolytic copper providing maximum conductivity, low resistance, and ductility for excellent crimp forming properties
- Deep V groove, inner barrel serrations for optimum conductivity, reliability, and holding power
- Smooth funnel entry provides easy wire insertion

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Mylar-mounted connectors may be available, please see the mylar-mounted catalog pages at the end of this section for more information.

Nylon Insulated Compression Ring Tongue, Multi-Finger Insulation Grip

TYPE YAE-N INSULUG™

600 Volts Max., 105° C Max

INSULUG™ Type YAE-N nylon insulated terminals are designed with a multi-finger insulation grip for paper, EPR and other elastic or hard to grip insulations. The metal fingers firmly grip the insulation providing superior holding characteristics, cable support and strain relief. Type YAE-N terminals are rated 105° C and meet military standard AS25036 Class 2 and SAE-AS7928 requirements.

Features & Benefits

- Multi-finger insulation grip provides superior insulation holding characteristics, especially on EPR and other elastic-type insulations
- Brazed seam for a stronger, more durable termination
- Manufactured of pure electrolytic copper for maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Deep V groove, inner barrel serrations for optimum conductivity, reliability, and holding power
- Smooth funnel entry for easy wire insertion

Heat Shrink Insulated Compression Ring Terminals

TYPE YHSA HYDENT™

Copper Conductor: -55° through 110° C

Standard crimp terminals leave the wire exposed allowing in moisture or other contaminants which can result in corrosion. Corrosion reduces the amount of current the wire can carry safely. The integrity of the electrical system can be compromised when unsealed electrical connections are utilized. Heat shrink terminals provide a durable seal blocking out contaminants ensuring a better connection.

Features & Benefits

- Made from pure copper, annealed for maximum strength
- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro-tin plated for corrosion resistance

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Radiation Resistant Insulated Compression Ring Terminals

TYPE YAES-K INSULUG™

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

KYNAR - is a registered trademark of the Pennwalt Corp. for Polyvinylidene Fluoride (PVF₂)
 HYPALON - Is a registered trademark of the E.I. DuPont deNemours & Co., Inc.

200 Megarads., -60° through 150°C, 600 Volts

Type YAES-K, radiation resistant insulated terminals are designed and have been tested to meet the requirements for class 1E critical circuits as set by the Nuclear Regulatory Commission (NRC). Additional testing for compatibility under loss of coolant accident (LOCA) conditions with cross-link polyethylene (XLP) and HYPALON® insulations was completed successfully. Compatibility with ethylene propylene rubber (EPR) insulation was determined by analysis. Each terminal is manufactured of pure electrolytic copper per QQ-C 576 and bright tin-plated per MIL-T-10727 and meets or exceeds MIL-T-7928 using stranded copper AWG wire. The KYNAR® insulation offers 200 megarad radiation resistance.

The Type YAES-K radiation resistant insulated terminals are suitable for class 1E critical circuits and non-critical nuclear associated applications.

Features & Benefits

- Insulation provides 200 megarad radiation resistance plus successfully tested for insulation compatibility
- An integral one-piece copper barrel/insulation grip and wire strain relief design provides improved physical strength characteristics over a multi-piece design
- The insulation is locked in place and will not move or twist off, thereby maintains proper dielectric values
- Manufactured from pure electrolytic copper to provide maximum conductivity, low resistance and ductility for excellent crimp forming properties.
- Bright tin-plated per MIL-T-10727 for durable long-lasting resistance to corrosion
- Deep inner barrel serrations provides excellent electrical conductivity and tensile strength values
- Brazed seam gives a stronger barrel design to minimize any possible splitting and eliminates folding
- Smooth funnel entry for easy wire insertion
- Color coded terminals provides easy wire size identification and inspection
- Coded raised dots in the die area of the connection after compression for visual identification that the correct tool and die were used for proper installation
- Inspection hole gives an additional visual check to ensure proper wire insertion
- Ring tongue design provides a secure termination under screw head that cannot be removed without the complete removal of the screw
- Multiple terminals may be stacked on a common stud easily providing flexibility and versatility

Nickel Plated, SAE AS20659 Green Banded Ring Tongue Terminals

TYPE YAV HYLUG™

HYLUG™ type YAV is a seamless, heavy duty uninsulated compression ring tongue terminal manufactured from pure electrolytic copper tubing and is for use on copper commercial (code) cable, type AN aircraft cable and extra flexible conductors. Because of its seamless design, the YAV HYLUG™ also accommodates solid conductors.

The seamless tubing produces a double thick tongue and a strong terminal for demanding applications that require high reliability. Applications include industrials, hospitals, electric utilities, aircraft, shipboard and marine, computers, steel mills, mining equipment and other equipment that is subject to vibration or requiring dependable electrical performance. The YAV HYLUG™ terminals meet the requirements of SAE-AS7928.

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Features & Benefits

- Nickel plated for high temperature applications up to 650° F continuous service and 750° F intermittent service
- Provided with green band per AS20659 Revision F
- Manufactured from seamless pure electrolytic copper tubing to provide maximum conductivity, low resistance, and excellent ductility for crimping
- Double thick tongue provides a structurally strong terminal tongue
- Produced from tubular copper, extra copper material assures the compression terminal will operate cooler than the conductors it connects
- Internally beveled barrel for easy cable entry, especially for flexible conductors
- Inspection hole provides easy visual check for proper conductor insertion

Seamless Uninsulated Compression Heavy Duty Ring Tongue

TYPES YAV / YAV-BOX HYLUG™

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

HYLUG™ type YAV is a seamless, heavy duty uninsulated compression ring tongue terminal manufactured from pure electrolytic copper tubing and is for use on copper commercial (code) cable, type AN aircraft cable and extra flexible conductors. Because of its seamless design, the YAV HYLUG™ also accommodates solid conductors.

The seamless tubing produces a double thick tongue and a strong connector for demanding applications that require high reliability. Applications include industrials, hospitals, electric utilities, aircraft, shipboard and marine, computers, steel mills, mining equipment and other equipment that is subject to vibration or requiring dependable electrical performance. The YAV HYLUG™ terminals meet the requirements of SAE-AS7928.

Features & Benefits

- Manufactured from seamless pure electrolytic copper tubing to provide maximum conductivity, low resistance and excellent ductility for crimping
- Seamless tubular crimp barrel design — No seams to split resulting in a very high quality electrical connection, also can be used on solid conductor
- Double thick tongue structurally a very strong terminal tongue
- Produced from tubular copper, extra copper material assures the compression connector will operate cooler than the conductors it connects
- Internally bevelled barrel for easy cable entry, especially for flexible conductors
- Inspection hole provides easy visual check for proper conductor insertion
- Electro-tin plated for a long lasting durable corrosion resistance

#8-4/0 Str. Copper Uninsulated Seamless Compression Ring Tongue

TYPES YAV-L / YAV-LBOX HYLUG™

HYLUG™ Type YAV is a seamless, heavy duty uninsulated compression terminal manufactured from electrolytic copper and is for use on Type AN aircraft cable, extra flexible conductors and commercial (code) conductors. The seamless tubing produces a double thick tongue and seamless barrel design provides a strong connector for demanding applications requiring high reliability.

Applications include aircraft, industrials, hospitals, electric utilities, marine, computers, and other equipment subject to vibration or requiring dependable electrical performance. The YAV HYLUG™ terminals meet the requirements of SAE-AS7928 and are listed per AS20659 for use with copper aircraft cable constructed in accordance with SAE-AS29606.

The benefits of YAV-L connectors are the same as YAV connectors for stranded conductors

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Seamless Uninsulated Compression Ring Tongue with Shroud

TYPES YAV-H / YAV-H BOX HYLUG™

The Type YAV-H HYLUG™ is a seamless heavy duty uninsulated compression ring tongue terminal with a shroud for an insulation grip and cable support. They are manufactured from pure electrolytic copper tubing for use on copper commercial (code) cable, Type AN aircraft cable and extra flexible conductors.

The seamless design produces a double thick tongue and the seamless barrel provides a strong highly reliable connection. Meets the requirements of SAE-AS7928. The benefits of the Type YAV apply to the YAV-H HYLUG™.

Features & Benefits

- Shroud/insulation grip cable support and strain relief protects the wire against breaking under vibration or flexing conditions
- Electro-tin plated to provide long-lasting corrosion resistance

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Nylon Insulated Compression Ring Tongue

TYPES YAEV / YAEV-L INSULUG™

600 Volts Max., 105°C, Max.

The INSULUG™ type YAEV is designed for very demanding high vibration applications encountered in aircraft and aboard ships as well as motor lead applications in hospitals, industrials and generating plants. The nylon insulated seamless, electrolytic copper barrel with double thick tongue provides an extra strong insulated connection. The terminal is rated 105°C and meets SAE-AS7928 requirements.

Features & Benefits

- Double thick tongue for maximum reliability and electrical capacity plus an extra strong terminal tongue
- Manufactured from one-piece pure electrolytic copper — high conductivity, low resistance with no seams to split plus ductility for excellent crimp forming properties
- Electro-tin plated to provide long-lasting corrosion resistance
- Nylon insulation is locked in place — Insulation will not move or twist off
- 300 volt nylon insulation providing high dielectric strength and stability in demanding oily environmental conditions
- Color Coded providing quick, easy wire size connector selection

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Heavy Duty Right Angle Compression Terminals

TYPES YAV-R, YAV-RS HYLUG™

Factory formed right angle HYLUG™ connectors made of seamless pure copper tubing. These rugged terminals withstand the most severe applications. Inspection hole in barrel permits visual check of wire insertion. Tin plated to resist corrosion. Meets requirements of SAE-AS7928.

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Nylon Insulated Right Angle Compression Terminals

TYPE YAEV-RS INSULUG™

600 Volts Max.; 105° C Max.

Factory formed right angle INSULUG™ connectors made of seamless pure copper tubing. These rugged terminals withstand the most severe applications. Inspection hole in barrel permits visual check of wire insertion. Meets requirements of SAE-AS7928.

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Uninsulated Compression Fork Tongue Compression Terminals

TYPES T-F / YAD-F HYLUG™

Type T-F is constructed in the same manner as the type “T” and employs a fork tongue. The fork permits rapid installation of the terminal under a screw head without completely removing the screw. Two or more terminals may be stacked easily on a common stud.

Features & Benefits

- Fork tongue design for faster installation
- Screw needs only to be loosened (not completely removed) for termination

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Seamless Uninsulated Fork Tongue Compression Terminals

TYPES YAV-T-F / YAV-T-F BOX HYLUG™

The Type YAV-T-F HYLUG™ is a seamless heavy duty uninsulated compression fork-tongue terminal manufactured from electrolytic copper for use on copper commercial (code) cable, Type AN aircraft cable and extra flexible conductors.

The seamless design produces a double thick tongue and the seamless barrel provides a strong highly reliable connection.

All the benefits of the Type YAV apply for the same wire sizes.

Features & Benefits

- Fork tongue allows installation of compression terminal under screw head without complete removal of the screw

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Polyvinylchloride Insulated Fork Tongue Compression Terminals

TYPES TP-F / BA-EF VINYLUG™

600 Volts Max.; 105° C Max.

The Type TP-F is a fork tongue variation of the TP design and makes installation easier.

Features & Benefits

- Fork tongue design for faster installation
- Screw needs only to be loosened (not completely removed) for termination

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

MRE1022NV Ergonomic Hand Tool perfect for use with the TP-F; suitable for most nylon and vinyl insulated small terminals. MRE1022B is designed for use with bare (uninsulated) terminals. Part of the BURNDY Engineered System of coordinating connectors, tools and dies for a quality, reliable, repeatable connection.

See the Tooling section for more information on this and other BURNDY Tools.

Nylon Insulated Fork Tongue Compression Terminals

TYPES TN-F / YAES-F INSULUG™

600 Volts Max.; 105° C Max.

The Type TN-F, nylon insulated fork tongue terminal has the same high quality as the TN. It is designed to meet the heavy-duty requirements of industrial and utility applications.

Used on both power and control circuits for wire sizes #26 AWG through #10 AWG. The TN-F provides high dielectric strength and stability in oily conditions.

The TN-F is identical to the TN with the addition of a fork tongue which allows installation without complete removal of its supporting screw.

Features & Benefits

- Fork tongue design for faster installation
- Screw needs only to be loosened (not completely removed) for termination

NOTE:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Nylon Insulated Fork Tongue, Multi-Finger Insulation Grip

TYPES YAE-N-F / YAE-N-F BOX INSULUG™ 600 Volts Max.; 105° C Max.

INSULUG™ type YAE-N-F nylon insulated terminals are designed with a Multi-Finger Insulation grip, are rated 105° C and are supplied with a fork tongue for easy terminal insertion and removal.

Features & Benefits

- Fork tongue design for faster installation
- Screw needs only to be loosened (not completely removed) for termination

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Mylar-mounted connectors may be available, please see the mylar-mounted catalog pages at the end of this section for more information.

▲ Only with #2-#20 AWG Wire

Heat Shrink Insulated Fork Tongue Compression Terminals

TYPE YHSA-F HYDENT™ Heat Shrink Fork Tongue Terminals

For Copper Conductor; -55° through 110°C

Standard crimp terminals leave the wire exposed allowing in moisture or other contaminants which can result in corrosion. Corrosion reduces the amount of current the wire can carry safely. The integrity of the electrical system can be compromised when unsealed electrical connections are utilized. Heat shrink terminals provide a durable seal blocking out contaminants ensuring a better connection.

Features & Benefits

- Made from pure copper, annealed for maximum strength
- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro-tin plated for corrosion resistance

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Uninsulated Locking Fork Tongue Compression Terminals

TYPE T-LF HYLUG™

Type T-LF employs a locking fork tongue for fast installation and security.

Features & Benefits

- Locking fork tongue design allows fast installation - screw only has to be loosened for termination
- Internal configuration of the fork prevents the terminal from coming off the screw without applying a pulling force
- Locking fork is made from a copper alloy, permits many installations while maintaining proper spring retention of forks

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Mylar-mounted connectors may be available, please see the mylar-mounted catalog pages at the end of this section for more information.

Polyvinylchloride Insulated Locking Fork Tongue Terminals

TYPES TP-LF / BA-EL VINYLUG™

600 Volts Max., 105° C Max.

Type TP-LF is a variation of the Type TP design and employs a locking fork tongue for fast installation and security.

Features & Benefits

- Locking fork tongue design; allows fast installation; screw only has to be loosened for termination
- Internal configuration of the fork prevents the terminal from coming off the screw without applying a pulling force
- Locking fork is made from a copper alloy and permits many installations while maintaining proper spring retention of forks

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Mylar-mounted connectors may be available, please see the mylar-mounted catalog pages at the end of the section for more information.

Nylon Insulated Locking Fork Tongue Compression Terminals

TYPE TN-LF INSULUG™

300 Volts Max., 105° C Max.

The Type TN-LF, nylon insulated fork tongue terminal has the same high quality as the TN. It is designed to meet the heavy-duty requirements of industrial and utility applications.

Used on both power and control circuits for wire sizes #26 AWG through #10 AWG. The TN-LF provides high dielectric strength and stability in oily conditions.

The TN-LF is identical to the TN with the addition of a fork tongue which allows installation without complete removal of its supporting screw.

Features & Benefits

- Locking fork tongue design allows fast installation - screw only has to be loosened for termination
- Internal configuration of the fork prevents the terminal from coming off the screw without applying a pulling force
- Locking fork is made from a copper alloy, permits many installations while maintaining proper spring retention of forks

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Nylon Insulated Locking Fork Tongue with Shroud

TYPE YAE-N-LF INSULUG™

300 Volts Max., 105° C Max.

The YAE-N-LF Locking Fork is nylon insulated with an insulation grip and accepts a 22-10 AWG wire. The spring-like tongue locks into place around the stud even when the mount screw is not tightened.

Features & Benefits

- Locking fork tongue design; allows fast installation; screw only has to be loosened for termination

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Mylar-mounted connectors may be available, please see the mylar-mounted catalog pages at the end of this section for more information.

Heat Shrink Insulated Locking Fork Tongue Compression Terminals

TYPE YHSA-K-LF HYDENT™ Heat Shrink Fork

For Copper Conductor; -55° through 110°C

Standard crimp terminals leave the wire exposed allowing in moisture or other contaminants which can result in corrosion. Corrosion reduces the amount of current the wire can carry safely. The integrity of the electrical system can be compromised when unsealed electrical connections are utilized. Heat shrink terminals provide a durable seal blocking out contaminants ensuring a better connection.

Features & Benefits

- Made from copper, annealed for maximum strength
- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro-tin plated for corrosion resistance

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Uninsulated Fork Tongue with Seamless Shroud

TYPES YAV-H-F / YAV-Z HYLUG™

The type YAV-H-F HYLUG™ is a seamless heavy duty uninsulated compression fork tongue terminal with a shroud for an insulation grip and cable support. Manufactured from electrolytic copper tubing for use on copper commercial (code) cable, Type “AN” aircraft and extra flexible conductors.

The seamless tubing produces a double thick tongue while the seamless barrel design provides a very strong connector for very demanding applications that require highly reliable connections.

In addition to the benefits described for the YAV box series of connectors the YAVH-F Box and YAV-Z terminals provide the following benefits:

Features & Benefits

- Flanged fork permits installation of compression terminal under screw head without complete removal of the screw while also aiding to maintain the terminal on the stud should the screw loosen slightly

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Mylar-mounted connectors may be available, please see the mylar-mounted catalog pages at the end of the section for more information.

TYPES TP-Z / BA-EZ VINYLUG™

600 Volts Max., 105° C Max.

VINYLUG™ Type TP-Z is a variation of the Type TP and employs a flanged fork tongue for fast installation and security.

Features & Benefits

- Flange fork tongue design allows fast installation as screw only has to be loosened for termination
- The flanges on the end of the fork terminal aid in preventing a slightly loose terminal from becoming fully disconnected from the screw
- Flanges make re-securing a loose terminal easier

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Mylar-mounted connectors may be available, please see the mylar-mounted catalog pages at the end of this section for more information.

Nylon Insulated Flanged Fork, Multi-Finger Insulation Grip

TYPE YAE-Z / YAE-Z BOX INSULUG™

600 Volts Max., 105° C Max.

INSULUG™ Type YAE-Z is identical to Type YAE-N and employs a flanged fork tongue for faster installation while maintaining security if supporting screw becomes loose.

Features & Benefits

- Flanged fork permits rapid, easy installation of the terminal under the screw head without complete removal of the screw
- Additionally, it may not be removed with only a slight loosening of the screw

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Uninsulated, Rolled Compression Butt Splice

TYPE YSV-B HYLINK™

HYLINK™ Type YSV-B rolled splice connectors are used to splice stranded and solid copper conductors in virtually all heavy duty industrial and general purpose applications.

Features & Benefits

- Constructed of pure electrolytic copper to provide maximum conductivity, low resistance and ductility provided excellent crimp forming properties
- Electro-tin plated for durable long-lasting corrosion resistance

NOTES:

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Uninsulated Seamless Compression Butt Splice

TYPE YSV HYLINK™

HYLINK™ Type YSV seamless splice connectors are used to splice stranded and solid copper conductors in virtually all heavy duty industrial and general purpose applications.

Features & Benefits

- Manufactured from seamless tubing; a high quality design with no seams to split
- Electrolytic copper provides maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Electro-tin plated provides durable long lasting resistance to corrosion
- Positive center wire stops for proper depth of wire insertion
- Marked with wire size providing easy wire size identification
- The HYLINK™ splice connectors feature inspection holes providing easy visual inspection of proper wire insertion

Uninsulated Butt Splices #8 through 4/0 Copper

TYPE YSV-L HYLINK™

HYLINK™ Type YSV-L seamless splice connector is used to splice AN type aircraft cables plus commercial stranded and solid AWG conductors. Suitable for aircraft, light duty industrial and general purpose applications.

Features & Benefits

- Manufactured from seamless tubing; A high quality design with no seams to split
- Electrolytic copper provides maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Electro-tin plated to provide durable long lasting resistance to corrosion
- Wire stop provides proper depth of wire insertion
- Marked with wire size provides easy wire size identification
- The HYLINK™ splice connectors have inspection holes to provide easy visual inspection for proper wire insertion

Uninsulated Seamless Butt Splice with Cable Strain Relief

TYPE YSV-H HYLINK™

The Type YSV-H HYLINK™ seamless splice connectors have the added benefit of an insulation support and cable strain relief.

Features & Benefits

- Manufactured from seamless tubing
- High quality design with no seams to split
- Electrolytic copper provides maximum conductivity, low resistance, and ductility for excellent crimp forming properties
- Electro-tin plated to provide durable long lasting resistance to corrosion
- Positive center wire stops provide proper depth of wire insertion

Polyvinylchloride Insulated Compression Butt Splice

TYPE SP VINYLINK™

600 Volts Max., 105° C Max.

Type SP VINYLINK™ butt splices are PVC insulated, seamless and designed to accommodate a broad range of 600 volt cables.

Features & Benefits

- Manufactured from seamless electrolytic copper tubing to provide maximum conductivity and tensile strength in a high quality design with no seams to split
- Funnel entry for easy wire insertion
- Electro-tin plated providing durable, long lasting resistance to corrosion
- Expanded insulation support to lower inventory requirements
- Red wire range of 22-16 also assists to lower inventory requirements
- Vinyl insulation provides an economical means of providing high dielectric values and cable insulation support

Nylon Insulated Butt Splice

TYPE SN INSULINK™

600 Volts Max., 105° C Max.

The Type SN INSULINK™ is a high quality nylon-insulated butt splice designed to meet heavy duty application requirements.

Meets the functional requirements of SAE-AS7928 and conforms to the requirements of NAS1388.

Features & Benefits

- Manufactured from seamless tubing — a high quality design with no seams to split
- Pure electrolytic copper for maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Electro-tin plated provides durable long-lasting resistance to corrosion
- Positive center wire stops for proper depth of wire insertion
- Color-coded in red, blue and yellow — provides easy wire size identification
- Manufactured from one-piece tin-plated seamless copper tubing with an integral barrel/insulation grip — provides maximum tensile strength, plus excellent cable support and strain relief and eliminates failures due to vibration
- Smooth funnel entry provides easy wire insertion
- Window position locator for full cycle ratchet tool crimp — provides proper tool/connector alignment for correct crimp
- Nylon insulation offers high dielectric strength and stability in oily environmental conditions — maintains a high quality connection in demanding applications
- The nylon is locked into position; the connector will not move

Nylon Insulated Splices for Aircraft and Commercial Flex Cables

TYPES YSE / YSE-H BOX INSULINK™

600 Volts Max., 105° C Max.

Types YSE and YSE-H INSULINK™ splices are high quality nylon insulated splices designed for splicing aircraft and commercial flexible cables.

Features & Benefits

- Manufactured from tin plated, seamless electrolytic copper tubing with integral barrel/insulation grip – providing maximum conductivity and tensile strength along with excellent cable support and strain relief
- Split heavy wall insulation grip for stronger insulation grip and strain relief
- Smooth funnel entry for easy wire insertion
- Transparent nylon insulation for easy wire inspection

Heat Shrink Insulated Compression Butt Splices

TYPE YSE-HHS HYDENT™

For Copper Conductor; -55° through 110°C

Heat shrink butt splices are color-coded to industry wire standard range. Heat shrink protects against corrosion.

Features & Benefits

- Manufactured from tin plated, seamless electrolytic copper tubing with integral barrel for maximum conductivity and tensile strength, plus excellent cable support and strain relief
- Smooth funnel entry provides easy wire insertion
- Transparent heat shrink insulation provides waterproofing and weather resistance

Heat Shrink Insulated Butt Splices for Copper Conductor

TYPE YHSS HYDENT™

For Copper Conductor; -55° through 110°C

Standard crimp terminals leave the wire exposed, allowing in moisture or other contaminants which can result in corrosion. Corrosion reduces the amount of current the wire can carry safely. The integrity of the electrical system can be compromised when unsealed electrical connections are utilized. Heat shrink terminals provide a durable seal blocking out contaminants ensuring a better connection.

Features & Benefits

- Made from pure copper, annealed for maximum strength
- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro-tin plated for corrosion resistance

Radiation Resistant Insulated Compression Butt Splices

TYPE YSES-K INSULINK™

Polyvinylidene Fluoride (PVF2) Insulated 200 Megarads; 60°C through 150°C; 600 Volts

Type YSES-K radiation resistant insulated splices are suitable for class 1E applications plus non critical nuclear associated applications. The splice is manufactured from pure electrolytic copper seamless tubing which eliminates potentially splitting of seams. A color code stripe is used for wire size identification and a window is provided for inspection of proper wire insertion.

Features & Benefits

- These insulated splices are suitable for class 1E applications
- Pure electrolytic copper seamless tubing eliminates potential splitting of seams
- Color coded stripe identifies wire size
- Window is provided for inspection of proper wire insertion
- Suitable for 200 Megarads Rated 60°C through 150°C; 600 Volts

Uninsulated Compression Parallel Splice

TYPE YSM HYLINK™

HYLINK™ Type YSM seamless parallel splice connector permits wires to be laid parallel inside the connector and spliced together with the BURNDY family of HYTOOL™ installation tooling. Each YSM connector accommodates a wide combination of round, square, and rectangular copper conductors that have a total combined circular mil area listed in the table below. The conductors to be spliced must physically fit within the splice without being forced.

Features & Benefits

- Seamless tubing
- Beveled barrel for ease of wire entry
- Tin plated
- Parallel design results in only one crimp necessary
- Uninsulated barrel provides an economical termination solution when insulation is not specified

Color-Coded Uninsulated Compression Parallel Splice

TYPE YSCM HYLINK™

ELECTRO-TIN PLATED

Type YSCM HYLINK™ seamless parallel splice connectors permit stranded wires to be laid parallel inside the connector and spliced together with BURNDY® compression tools. Each YSCM connector accommodates a wide range of conductors and is color-coded to ensure proper tool and die match. YSCM connectors are cULus Listed Wire Connectors per UL 486A/B. Additionally, they are cULus Listed for Grounding and Bonding per UL 467 and rated for direct burial in Earth and Concrete.

Notes:

Material: Copper per ASTM B75.
 Finish: Tin plated. For nickel plating, add suffix "NK" to the Catalog Number.
 Dimensions in brackets [] are in millimeters rounded off to the nearest millimeter, unless otherwise noted, and are for reference only.
 †Recommended strip length. Strip length dependent on size, no. of wires and insulation thickness.
 ‡Refer to Circular Mil Table per ASTM B8 for total Class B Circular Mil calculations.
 *YSCM231 can also be installed with MY29-3 and retain Listings.

Add the circular mils of the wires you wish to splice; that sum would be used to determine the correct splice using the Min/Max columns on the table above.

The tables to the right are for reference only.

Uninsulated Compression Reducing Butt Splice

TYPES YSV / YRV-L HYREDUCER™

The HYREDUCER™ is a connector for splicing two different size wires. The larger conductor is inserted first and butts against the center of the connector where the smaller barrel begins. Constructed of pure electrolytic copper tubing for maximum conductivity, tin plated to resist corrosion, the HYREDUCER™ accommodates a wide range of cable sizes.

Dimensional information may be found in Table 1.

Table 2 is a comprehensive tooling for these connectors.

Uninsulated Tin-Plated Brass Male/Female Quick Disconnects

TYPE Q-M FINGRIP™ Non-Insulated Male Quick Disconnects

Non insulated quick disconnects allow for quickly connecting or disconnecting a terminal. The front end of the terminal has a male-type blade which slides into a female-type receptacle.

Features & Benefits

- Butted seam
- Chamfered barrel opening for quick and easy wire insertion
- Mates with dimpled female socket detent for a firm grip

Vinyl Insulated Tin-Plated Brass Male/Female Quick Disconnects

TYPE QP-M FINGRIP™ Vinyl Insulated Male Quick Disconnects

600 Volts Max., 105° C Max.

Vinyl insulated quick disconnects allow for quickly connecting or disconnecting a terminal. The front end of the terminal has a male-type blade which slides into a female-type receptacle.

Features & Benefits

- Butted seam
- Funnel entry barrel opening for quick and easy wire insertion
- Mates with dimpled female socket detent for a firm grip

Nylon Insulated Tin-Plated Brass Male/Female Quick Disconnects

TYPE QN-M FINGRIP™ Nylon Insulated Male Quick Disconnects

300 Volts Max., 105° C Max.

Nylon insulated quick disconnects allow for quickly connecting or disconnecting a terminal. The front end of the terminal has a male-type blade which slides into a female-type receptacle.

Features & Benefits

- Sleeved barrel
- Funnel entry barrel opening assures quick and easy wire insertion
- Mates with dimpled female socket detent ensuring firm grip

TYPE YHSQ-M HYDENT™ Heat Shrink Insulated Male Quick Disconnects

For Copper Conductor; -55° through 110°C

Standard crimp terminals leave the wire exposed allowing in moisture or other contaminants which can result in corrosion. Corrosion reduces the amount of current the wire can carry safely. The integrity of the electrical system can be compromised when unsealed electrical connections are utilized. Heat shrink terminals provide a durable seal blocking out contaminants ensuring a better connection.

Features & Benefits

- Made from pure copper, annealed for maximum strength
- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro-tin plated for corrosion resistance

Heat Shrink Insulated Female / Fully Insulated Female Disconnects

TYPE YHSQ-F HYDENT™ Heat Shrink Insulated Female Quick Disconnects

Tin Plated Brass; -55° through 110°C

Standard crimp terminals leave the wire exposed allowing in moisture or other contaminants which can result in corrosion. Corrosion reduces the amount of current the wire can carry safely. The integrity of the electrical system can be compromised when unsealed electrical connections are utilized. Heat shrink terminals provide a durable seal blocking out contaminants ensuring a better connection.

Features & Benefits

- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro-tin plated for corrosion resistance

Uninsulated, Heat Shrink Insulated Male/Female Combo Disconnects

TYPE PG Male / Female Combination Quick Disconnects

Tin-plated brass piggy-back connectors are designed to allow for additional terminals to be connected.

Features & Benefits

- Sleeved barrel
- Combination connector allows for more than one connection to a circuit
- Funnel entry barrel opening assures quick and easy wire insertion
- Dimpled female socket detent ensure firm grip

Vinyl Insulated Tin-Plated Brass Pin Terminals

TYPE PTV VINYLUG™

Insulated Pin Terminals are electrical connectors used to terminate stranded wires, creating a quality, reliable connection by ensuring each wire strand conducts current when properly crimped. This is especially useful when multiple reconnections could be necessary within terminal blocks or other similar devices. No breakage of wire strands when wire is bent, under stress or in a vibration environment.

Features & Benefits

- Vinyl insulation
- Color-coded barrels
- Provides an easy and effective way to terminate stranded wire into European/metric-style terminal blocks

Bare Ferrules for Copper Conductor

TYPE YF-UIL Bare Ferrules

For Use on Copper Conductor

Wire ferrules are also known as cord end terminals or bootlace ferrules. These are electrical connectors used to terminate stranded wires. Made of electrolytically tin plated copper, uninsulated ferrules are designed to form neat end terminations to multi-strand cables or wires. Smooth funnel entry assists in wire insertion.

Features & Benefits

- Made of electrolytic copper, tin plated
- Seamless barrels
- Smooth funnel entry to make wire insertion easier
- RoHS compliant

Covered Ferrules for Copper Conductor Series W, D, & T

TYPE YF-I-L Series W, D, & T Covered Ferrules

Offered in Series D, T, & W

Ferrules are electrical connectors used to terminate stranded wires, creating a quality, reliable connection by ensuring each wire strand conducts current when properly crimped. Especially useful when multiple reconnections could be necessary within terminal blocks or other similar devices. No breakage of wire strands when wire is bent, under stress or in a vibration environment. Twin ferrule designs allow two individual stranded conductors to be connected to the same termination, most beneficial in jumpering or similar applications. Both styles (single and twin) offer the same features and benefits.

Features & Benefits

- Made of electrolytic copper, tin plated
- Smooth funnel entry to make wire insertion easier
- Secure contacting even after multiple reconnections
- Long-term contact resistance
- No fraying of strands
- No breakage of wire strands when wire is bent, under stress, or in vibration environment
- RoHS compliant

Covered Twin Ferrules for Copper Conductor Series D

TYPE YFTW-IDL Series D Covered Twin Ferrules

For Use on Copper Conductor

Ferrules are electrical connectors used to terminate stranded wires, creating a quality, reliable connection by ensuring each wire strand conducts current when properly crimped. Especially useful when multiple reconnections could be necessary within terminal blocks or other similar devices. No breakage of wire strands when wire is bent, under stress or in a vibration environment. Twin ferrule designs allow two individual stranded conductors to be connected to the same termination, most beneficial in jumpering or similar applications. Both styles (single and twin) offer the same features and benefits. RoHS compliant.

Features & Benefits

- Made of electrolytic copper, tin plated
- Smooth funnel entry to make wire insertion easier
- Secure contacting even after multiple reconnections
- No fraying or breakage of wire strands when wire is bent, under stress, or in vibration environment

Small Terminal Kits Packaged Kits of Various Types of Small Terminals

Small Terminal Kits Packaged Kits of Various Types of Small Terminals

For Use on Copper Conductor

Small terminal kits are packaged in reusable plastic cases with secure compartments of each type of connector. Clearly marked on the inside front cover with part numbers and descriptions, the kits contain some of the most common terminals needed on everyday installations.

Features & Benefits

- Quality terminals of various types packaged together for convenience
- Color-coded barrels
- Reusable, refillable case
- Clearly marked with part numbers and descriptions on inside cover

Small Terminal Kits with Installation Tools

Small Terminal Kits Packaged Kits of Terminals with Installation Tool

Small terminal kits are packaged in durable, dual-latched metal cases with secure compartments for each connector. Inside label clearly identifies the part number and description of the connector associated with each compartment. The kits contain some of the most common terminals needed for everyday installation.

Features & Benefits

- Terminals include rings, forks, splices, quick disconnects, and pin styles
- Color-coded barrels
- Reusable, refillable case
- Kit available with MRE1022NV full cycle ratchet installation tool

Heat Shrink Insulated Connectors and Installation Tool Kit

TYPE HSKIT Packaged Kit of Heat Shrink Connectors with Installation Tool

For Use on Copper Conductor

Standard crimp terminals leave the wire exposed, allowing in moisture or other contaminants which can result in corrosion. Heat shrink terminals provide a durable seal, blocking out contaminants, ensuring a better connection.

Features & Benefits

- Made from pure copper, annealed for maximum strength
- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro-tin plated for corrosion resistance
- Wire strip length 5/16"

Mylar-Mounted Ring Terminals

Mylar Mounted Ring Terminals

Most Mylar-Mounted terminals are 2000 pieces per reel. This list is subject to change.

For more information and availability for Mylar-Mounted Terminals, please contact Customer Service.

Features & Benefits

- Terminals banded together on mylar carrier strip for high volume crimping
- Meets IEA-468-B standard
- Can be integrated with fully autonomous wire harness machines
- Packaged 2000 per reel

Compression Connectors - General Information

Compression Connectors

BURNDY® compression connectors are designed for reliable and controllable electrical connections. The complete installation is fully inspectable. They are high conductivity copper and operate cooler than the wire on which they are installed. The connectors withstand a wide range of electrical and environmental conditions, including current surges, temperatures, corrosion and vibrations, for a wide variety of applications. These features mean a consistently high quality connection at a low installed cost.

Copper compression connectors are manufactured from high-conductivity electrolytic copper. The connectors are normally tin-plated, lead-plated, or plated with proprietary BURNDY® brite finish to provide durable long-lasting corrosion resistance. The connector design has been matched to the cable size to provide the necessary physical strength requirements for reliable electrical performance.

Aluminum compression connectors are manufactured from high conductivity, high purity wrought aluminum. They are designed with sufficient mass and are electro-tin plated to minimize corrosion due to galvanic action between dissimilar metals. The connector barrels are pre-filled with PENETROX™, BURNDY oxide inhibiting compound.

PENETROX™ contains homogeneously suspended metallic particles which penetrate the wire's oxides to establish excellent continuity between the individual strands and the connector barrel for a low-resistance connection. PENETROX™ maintains an air-tight connection. Each barrel end is covered with a color-coded plastic dust cap which prevents foreign matter from entering the connector before it is used. The connector design has been engineered to match the cable size to provide the necessary physical strength requirements for reliable electrical performance.

Connector Ampacity Rating

Per NEC 110.14(C) Provision (2) installed pressure connectors shall be used with conductors at the ampacities not exceeding the ampacity at the listed and identified temperature rating of the connector. Most BURNDY connector temperature ratings in this section, are rated 90°C, therefore the connector is rated to accommodate the ampacity of a conductor operating at or below 90°C.

Selection and Use

Copper compression connectors are recommended for use on copper conductors. Aluminum compression connectors are recommended for use on aluminum conductors. Dual-rated aluminum compression connectors may be used on both copper and aluminum conductors.

Two basic compression designs are available: Circumferential and indent. After compression, virtually all the air is removed leaving a tight homogeneous mass of connector and conductor.

Circumferential compression is solid and symmetrical. No sharp flash.

Indent Compression. The connector is swaged to the conductor.

The circumferential crimp design is recommended for color coded connectors in low and high voltage applications. Die index number

embossment provides an easy inspection where required to verify the use of the proper connector/die combination. It is also recommended for insulated connectors and for terminating flexible and welding cables.

The circumferential crimp design dies compress cable strands into polygonal shapes forming intimate contact with each other and the connector barrel. This compression forms a tight homogeneous mass with virtually no air pockets. The circumferential crimp provides an excellent electrical connection with high pull-out values. The circumferential crimp is ideal for high voltage applications leaving the connector barrel symmetrical, which is easier to insulate.

The indent type crimp can be used in virtually any application except polyvinylchloride (PVC) insulated terminals and splices. It is an excellent means of terminating flexible, extra flexible and welding cables. The indentor compresses the cable strands to form intimate contact with each other and the connector barrel. The result is an excellent electrical connection with high pull-out strength. Laboratory work testing curves established the proper depth and shape of indent for each type of connector and wire combination.

Tooling

Tooling systems are essential for proper installation of a compression connector. Since connectors and dies are designed as a unit for specific wire sizes, only the recommended tools and dies should be used. Most aluminum and copper HYLUG™ terminals and HYLINK™ splices are marked with a die index number and are color-coded to identify the correct installation die. Dies marked with the matching die index number and color can be used to install the connector.

BURNDY® tooling installs a wide range of connectors, is reliable, cost effective, and precision engineered for durable, long-lasting service and quality connections. The tools include small plier types, full cycle ratchet designs and hydraulically-powered HYPRESS™ heads and new Battery Actuated Tools. Some have permanent die grooves or adjustable dies, while others require a change of die sets or nest die for each connector size. BURNDY recommended tools achieve crimp performance consistent with UL and other industry standards. Since several tools are suitable for most connectors, the most economical and practical tool can be chosen for each application.

Installation Hardware

See the Hardware Section or Reference Section of the BURNDY Master Catalog for information on Recommended Hardware Materials and Tightening Torque Values.

Industry Standards

BURNDY compression terminals, splices, and tap connectors requiring third party testing and approval are listed by Underwriters Laboratories, Inc. (UL), and/or Canadian Standards Association (CSA), and all conform to the applicable sections of the National Electrical Code (NEC).

Per UL486A-486B - Wire Connectors (1.3) standard, this standard is intended for connectors suitable for currents not exceeding the ampacity of insulated conductors rated 75°C or 90°C in accordance with the rating of the connector, if provided.

BURNDY® also offers connectors and splices which meet the (LOCA Seismic and Aging) requirements of IEEE standards 323, 383 and 344 for class 1E critical circuits for use in Nuclear Utility Applications. Certification to 10CFR50 and 10CFR21 available.

Detail catalog listings should be consulted to obtain the appropriate standards for each connector and splice.

Telecommunication Connectors - General Information

Telecommunication Compression Connectors

The industry's first choice in compression connectors...

BURNDY® provides a complete selection of one and two hole compression's terminals, H-taps, C-taps, and other compression connection products specifically engineered to meet the demanding applications of both the Central Office and Wireless communications markets.

All of the BURNDY compression products are designed for reliable and controllable electrical connections. All connectors are made from high conductivity electrolytic copper and operate at cooler temperatures than the conductor on which they are installed. The connectors are normally tin-plated, lead-plated, or plated with a proprietary BURNDY® brite finish to provide the industry standard in long-lasting corrosion resistance.

The complete installation is fully inspectable and UL Listed when installed with BURNDY® dies. Every die in the system is color-coded and provides die index embossment for complete inspectability.

BURNDY® Tooling... the right choice for the job!

BURNDY® tooling installs a wide range of connectors, is reliable, cost effective, and precision engineered for durable, long-lasting service and quality connections. BURNDY compression tooling system ranges from full cycle ratchet hand tools to 12 and 15 ton hydraulically-powered HYPRESS™ heads. Hydraulic tools are available in self-contained, battery powered, and AC service electrically powered pump and remote head designs to meet all possible installation situations.

The Circumferential Crimp...

The BURNDY® circumferential crimp provides a solid, homogenous connection, with high pull out values and is rated for high voltage applications, more than sufficient for the 48V DC operating voltage common in the telecom market. In addition the circumferential crimp doesn't require the removal of the copper flash produced by other die systems. This not only saves time in installation but removes a potential safety hazard from the job.

All of the dies in the system are color-coded to match the connectors and feature die index and die number matching to the connector for ease of installation.

Circumferential compression is solid and symmetrical. No sharp flash.

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Wire Definitions; Plating Objectives

Wire Definitions

- Copper Code Stranded Wire, as listed in this section refers to: Class B (Concentric, Compressed, Compact) or Class C
- Copper Flexible Wire, as listed in this section refers to: Listed by Nominal Wire followed by the designated wire classes (G, H, I, K, M, and DLO)
- Aluminum Stranded Wire, as listed in this section refers to: Class B (Concentric, Compressed, Compact)
- Copper Clad Aluminum (CCA) Stranded Wire, as listed in this section refers to: CCA stranded wire

Objective	Plating			
	Electro-tin	Hot Tin Dip	Nickel	Silver*
Reduce galvanic corrosion (bimetallic)	X	X	—	—
Resist corrosive elements	X	X	—	—
Increase conductivity/lower contact resistance	—	—	—	X
Provide high, continuous service temperatures (maximum)	X (347°F/175°C)	—	X (650°F/343°C)	X (500°F/260°C)
<p>*Note: Never connect an aluminum surface to a silver plated surface. Aluminum in contact with silver results in a highly corrosive joint, which will further result in a high resistance connection.</p>				

Code Connectors Accommodating Flexible Wire - 444S/644 Dieless

Code Connectors Accommodating Flexible Wire with Dieless Tools

The following code connectors can accommodate flexible wire when using the 644 or 444S series dieless platform of installation tools ONLY. See table for specific connector to wire combinations.

Example: YA2CN code connector that accommodates #2 AWG Class B,C, can also accommodate a #3 Class G, H, I, K, M, DLO flexible wire when using a 644 or 444S series tools with the number of crimps identified in the table below.

Catalog Number Designation		Wire Sizes		# Crimps*	
Terminal	Splice*	Copper Code Wire	Copper Flexible Wire and DLO (if applicable)	Standard Barrel	Long Barrel
YA1C-	YS1C-	#1 AWG	#2 FLEX G,H,I,K,M,DLO	1	1

Copper, Code, 1-Hole; Standard Barrel, Inspection Window

TYPES YA-L, YA-L-TC HYLUG™

Uninsulated Copper Compression Terminal, UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the strands
- Short/Standard length barrel is recommended for installations with limited space requirements
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, 1-Hole, Narrow, Standard Barrel, Inspection Window

TYPE YA-L-NT HYLUG™

Uninsulated Copper Compression Narrow Tongue Terminal, UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Narrow tongue/tang is designed for limited space applications
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the strands
- Short/Standard length barrel is recommended for installations with limited space requirements
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Code, 2-Hole, Standard Barrel, Inspection Window

TYPES YAV-2TC, YA-2LN, YA-L-2TC-HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the strands
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, 2-Hole, Narrow, Standard Barrel, Inspection Window

TYPE YA-L-2NT HYLUG™ Uninsulated Copper Compression Terminal

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Narrow tongue/tang is designed for limited space applications
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the strands
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

Copper, 2-Hole, Narrow, Standard Barrel, Inspection Window

TYPE YA-L-2NT (Continued)

Notes: All dimensions shown are for reference only.

*Use PUADP1 adapter with the use of U dies in 46 Series Crimp Tools

**P-RT die sets are for use in 46 Series ONLY, no adapter required

***Y122CMR tool for use on 10 AWG - 2 AWG wire sizes ONLY

†Due to the handle force requirements to crimp a connector, this die is not recommended for manual crimp tools

● The MM² conductor sizes listed are the recommendations for Class 2 conductor

Copper, Code, 1-Hole, Long Barrel, No Inspection Window

TYPES YA, YA-TC HYLUG™ Uninsulated Copper Compression Terminal

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the strands
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Code, 1-Hole, Long Barrel, No Inspection Window

TYPES YA, YA-TC (Continued)

Notes: All dimensions shown are for reference only.

*Use PUADP1 adapter with the use of U dies in 46 Series Crimp Tools

**P-RT die sets are for use in 46 Series ONLY, no adapter required

***Y122CMR tool for use on 10 AWG - 2 AWG wire sizes ONLY

‡Due to the handle force requirements to crimp a connector, this die is not recommended for manual crimp tools

● The MM² conductor sizes listed are the recommendations for Class 2 conductor

† The MM² conductor sizes listed are the recommendations for Class 2 and Class 5 conductor

Copper, Code, 2-Hole, Long Barrel, Inspection Window

TYPES YAZ-2N, YAZ-2TC HYLUG™ Uninsulated Copper Compression Terminal

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the strands
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Code, 2-Hole, Long Barrel, No Inspection Window

TYPES YA-2N, YA-2TC, YA-4N HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the strands
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Code, 2-Hole, Long Barrel, No Inspection Window

TYPES YA-2N, YA-2TC, YA-4N (Continued)

Notes: All dimensions shown are for reference only.

*Use PUADP1 adapter with the use of U dies in 46 Series Crimp Tools

**P-RT die sets are for use in 46 Series ONLY, no adapter required

***Y122CMR tool for use on 10 AWG - 2 AWG wire sizes ONLY

‡Due to the handle force requirements to crimp a connector, this die is not recommended for manual crimp tools

● The MM² conductor sizes listed are the recommendations for Class 2 conductor

† The MM² conductor sizes listed are the recommendations for Class 2 and Class 5 conductor

Copper, Code, 2-Hole, Narrow, Long Barrel, No Inspection Window

TYPE YA-2NT HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Narrow tongue/tang is designed for limited space applications
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the strands
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

Copper, Code, 4-Hole, Long Barrel, No Inspection Window

TYPES YA-4N, YAB-4N HYLUG™

Uninsulated Copper Compression Terminal

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

YA-4N

YAB-4N

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the strands
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Four hole tongue/tang is recommended when space permits as the 4-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

Notes: All dimensions shown are for reference only.

*Use PUADP1 adapter with the use of U dies in 46 Series Crimp Tools

**P-RT die sets are for use in 46 Series ONLY, no adapter required

***Y122CMR tool for use on 10 AWG - 2 AWG wire sizes ONLY

±L-RT Dies require 60 Series crimp tools not identified in table

● The MM² conductor sizes listed are the recommendations for Class 2 conductor

*Catalog Number with suffix "FX" denote connectors that accommodate Copper Flexible Wire

Copper, Flex, 1-Hole, Standard Barrel, Inspection Window

TYPES YA-L, YA-L-FX, YAV, YAV-L-FX HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the strands
- Short/Standard length barrel is recommended for installations with limited space requirements
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section.
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Flex, 1-Hole, Narrow, Standard Barrel, Inspection Window

TYPE YAV-L-NTFX HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Narrow tongue/tang is designed to allow for parallel terminations of wire in limited space applications
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the strands
- Short/Standard length barrel is recommended for installations with limited space requirements
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section.
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

Copper, Flex, 1-Hole, Standard Barrel, No Inspection Window

TYPE YAG-L-TC HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the strands
- Short/Standard length barrel is recommended for installations with limited space requirements
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section.
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

Copper, Flex, 1-Hole, Standard Barrel, Belled, Inspection Window

TYPE YA-LB HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with a “belled” end opening at the wire entry, to ensure smooth insertion of highly flexible stranded wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section.
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Flex, 1-Hole, Standard Barrel, Belled, Inspection Window

TYPE YA-LB (Continued)

Notes: All dimensions shown are for reference only.

* 644 and 444 Series Tools for use on CODE WIRE ONLY.

◆ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications. BURNDY will not be liable for the connection.

Copper, Flex, 1-Hole, Long Barrel, Inspection Window

TYPES YAZ, YAZV HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section.
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

Copper, Flex, 1-Hole, Long Barrel, Belled, No Inspection Window

TYPES YA-TC-FXB, YAV-TC-FXB HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with a “belled” end opening at the wire entry, to ensure smooth insertion of highly flexible stranded wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section.
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Flex, 2-Hole, Standard Barrel, Inspection Window

TYPES YA-L-2TC, YA-L-2TC-FX, YAV-L-2TC-FX HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section.
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Accessories

- Hardware - Section F

Copper, Flex, 2-Hole, Narrow, Standard Barrel, Inspection Window

TYPE YAV-L-2NT-FX HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Narrow tongue/tang is designed to allow for more parallel terminations of wire in limited space applications
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section.
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Flex, 2-Hole, Long Barrel, Inspection Window

TYPE YAZ-FX HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section.
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Flex, 2-Hole, Long Barrel, No Inspection Window

TYPE YAV-2TC-FX

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

Copper, Flex, 2-Hole, Long Barrel, No Inspection Window

Copper, Flex, 2-Hole, Belled, Long Barrel, No Inspection Window

TYPES YA-2TC-FXB, YAV-2TC-FXB HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with a “belled” end opening at the wire entry, to ensure smooth insertion of highly flexible stranded wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section.
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Flex, 2-Hole, Narrow, Long Barrel, Inspection Window

TYPES YAZ-2-NTFX, YAZV-2NTFX HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Narrow tongue/tang is designed to allow for more parallel terminations of wire in limited space applications
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section.
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Flex, 1-Hole, Std. Barrel, Tin-Zinc Plated, No Inspection Window

TYPE YAG-L-FXTZ HYTIN-ZCLAD™

Uninsulated Copper Compression Terminal, Tin-Zinc Plated, UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- 45° and 90° angular lugs are available; please contact Customer Service
- Tin-Zinc plated for battery connectors or other heavy duty equipment, to reduce the corrosion from lead/acid batteries
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Flex, 2-Hole, Std. Barrel, Tin-Zinc Plated, No Skive

TYPE YAG-2L-FXTZ HYTIN-ZCLAD™

Uninsulated Copper Compression Terminal, Tin-Zinc Plated UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact Customer Service to order: 1-800-346-4175

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Tin-Zinc plated for battery connectors or other heavy duty equipment, to reduce the corrosion from lead/acid batteries
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 250 kcmil accommodate both Flex and Code Wire. See Tables on each page for specific details
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Copper, Flex, 2-Hole, Std. Barrel, Tin-Zinc Plated, No Skive

TYPE YAG-2L-FXTZ (Continued)

Notes: All dimensions shown are for reference only.

* Use PUADP1 adapter with U dies in 46 Series Crimp Tools

** P-RT die sets are for use in 46 Series ONLY. No adapter required

***Y122CMR tool for use on 10 AWG - 2 AWG wire sizes ONLY

****Y1MRTC tool for use on 8 AWG - 1 AWG wire sizes ONLY

† Due to the handle force requirements to crimp a connector, this die is not recommended for manual crimp tools

● The MM² conductor sizes listed are the recommendations for Class 5 conductor

† The MM² conductor sizes listed are the recommendations for Class 2 and Class 5 conductor

Copper, Code, Blank Tongue, Long Barrel, No Skive

TYPES YA-2NU, YA-4NU, Blank Tongue HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

The Blank Tongue line of copper code HYLUG™ terminals are designed to provide maximum field flexibility. Scored lines prevent the drill from walking when trying to drill in this area. This innovative design allows the installer to customize the tongue drilling to fit their specific application while maintaining UL Listing and CSA Certification.

Features & Benefits

- Manufactured from seamless high conductivity electrolytic copper tubing with heavy duty wall thickness
- Internally beveled barrel end
- Proper compression systems form a highly efficient electrical connection
- Dimples located at each end of the scored line represent the location of the NEMA standard hole spacing
- Scored line locates the center of the tongue and prevents the drill from walking when trying to drill in this area
- Offered a wide range of code conductor sizes
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

*Notes: All dimensions shown are for reference only.
 * Use PUADPI adaptor with U dies in 46 Series Tools
 ** Minimum bolt size must be maintained for UL & CSA
 ***The MM² conductor sizes listed are the recommendations for Class 2 conductor
 † Requires Y60BHU HYPRESS™
 ♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.
 Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications. BURNDY will not be liable for the connection.*

Copper, Code / Flex, Slotted, Standard Barrel, Inspection Window

TYPES YA-L2TC-SL, YAV-L2TC-FXSL HYLUG™

Uninsulated Copper Compression Terminal UL Listed 90° C, Up to 35 kV ♦

Compression slotted lugs connect copper or tinned copper conductors to bus bars, CPI racks, cabinets or cable runway. Slotted and 90° slotted lugs have one round and one oblong hole to match hole spacing on equipment mounting rails on CPI racks and cabinets and on some bus bars.

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during installation
- Short/standard length barrel is recommended for installations with limited space requirements
- One hole with slotted second hole tongue/tang offers additional flexibility over a standard 2-hole tongue/tang as the slot provides the installer with multiple mounting hole alignments options. The 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

Notes:

All dimensions shown are for reference only.

* Denotes 90° angle

** Use PUADPI adaptor with U dies in 46 Series tools

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications. BURNDY will not be liable for the connection.

Copper, Code, Slotted, Long Barrel, No Skive

TYPE YA-2TC-SL HYLUG™

Uninsulated Copper Compression Terminal
UL Listed 90° C, Up to 35 kV ♦

Compression slotted lugs connect copper or tinned copper conductors to bus bars, CPI racks, cabinets or cable runway. Slotted and 90° slotted lugs have one round and one oblong hole to match hole spacing on equipment mounting rails on CPI racks and cabinets and on some bus bars.

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during installation
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- One hole with slotted second hole tongue/tang offers additional flexibility over a standard 2-hole tongue/tang as the slot provides the installer with multiple mounting hole alignments options. The 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

Notes:

All dimensions shown are for reference only.
 ** Use PUADP1 adaptor with U dies in 46 Series tools
 Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications. BURNDY will not be liable for the connection.

Copper, Code, Split Tongue, Standard Barrel, Inspection Window

TYPES YA-L-4TC, YAV-L-4TC-FX HYLUG™

Uninsulated Copper Compression Terminal
UL Listed 90° C, Up to 35 kV ♦

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Split feature in the tongue/tang is used when connecting two separate terminal blocks for the same phase; the slot provides the needed equipment gap while allowing the proper mounting hole alignment
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during installation
- Short/standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

Notes:

All dimensions shown are for reference only.
Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications. BURNDY will not be liable for the connection.

Copper, Code, Split Tongue, Long Barrel, Inspection Window

TYPES YAZ-4TC HYLUG™

Uninsulated Copper Compression Terminal
UL Listed 90° C, Up to 35 kV ♦

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Split feature in the tongue/tang is used when connecting two separate terminal blocks for the same phase; the slot provides the needed equipment gap while allowing the proper mounting hole alignment
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during installation
- Long barrel allows for an increased number of crimps which will increase the mechanical strengths of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

Notes:

All dimensions shown are for reference only.

** Use PUADP1 adaptor with U dies in 46 Series of tools

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications. BURNDY will not be liable for the connection.

Copper, Code, 1-Hole, Standard Barrel, Metric Lugs, Inspection Window

TYPE YAV-M HYLUG™

Uninsulated Copper Compression Terminal Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro-tin plated. Wire range is from 2.5 mm² to 630 mm² Class 2. Compatible to IEC61238-1.

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during installation
- Short/standard length barrel is recommended for installation with limited space requirements
- Electro-tin plated unless specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

Notes:

All dimensions shown are for reference only.
Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications. BURNDY will not be liable for the connection.

TYPE YAV-2M HYLUG™

Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro-tin plated. Wire range is from 2.5 mm² to 630 mm² Class 2. Compatible to IEC61238-1.

Electro-Tin Plated

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during installation
- Short/standard length barrel is recommended for installations with limited space requirements and meet the exact UL testing requirements as long barrel connectors so performance of the connection is not compromised
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- Electro-tin plated unless specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

Copper, Code, 2-Hole, Long Barrel, Metric Lugs, No Skive

TYPE YALB-2M HYLUG™

Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro-tin plated. Wire range is from 10 mm² to 630 mm² Class 2. Compatible to IEC61238-1.

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during installation
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- Electro-tin plated unless specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

Copper, Flex, 1-Hole, Standard Barrel, Metric Lugs, Inspection Window

TYPE YAV-FM HYLUG™

Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro-tin plated. Wire range is from 50 mm² to 630 mm² Class 5. Compatible to IEC61238-1.

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during installation
- Short/standard length barrel is recommended for installations with limited space requirements
- Electro-tin plated unless specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

Electro-Tin
Plated

Notes:

All dimensions shown are for reference only.

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications. BURNDY will not be liable for the connection.

* Use equivalent AWG setting on tool for installation

** PUADP1 Adaptor is required to use U Dies in 46 Series Tools

† P-RT Die Sets for use in 46 Series Tools only, PUADP1 Adaptor not required

Copper, Flex, 2-Hole, Long Barrel, Metric Lugs, Inspection Window

TYPE YAV-F2M HYLUG™

Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro-tin plated. Wire range is from 50 mm² to 630 mm² Class 5. Compatible to IEC61238-1.

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during installation
- Short/standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- Electro-tin plated unless specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

Electro-Tin
Plated

Notes:

All dimensions shown are for reference only.

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications. BURNDY will not be liable for the connection.

* Use equivalent AWG setting on tool for installation

** PUADP1 Adaptor is required to use U Dies in 46 Series Tools

† P-RT Die Sets for use in 46 Series Tools only, PUADP1 Adaptor not required

Copper, Flex, 2-Hole, Long, Metric Lugs, No Skive

TYPE YALB-F2M HYLUG™

Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro-tin plated. Wire range is from 50 mm² to 630 mm² Class 5. Compatible to IEC61238-1.

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during installation
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- Electro-tin plated unless specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping

HYPLUG™ Adapters for Copper Conductor

TYPES YE-V-P-FX, YE-P-FX HYPLUG™

Wire Connector Adapter Rated for 90° C,
Up to 35 kV ♦

WIRE
CONNECTOR
ADAPTER

Types YE-V-P-FX and YE-P-FX copper compression adapters are designed for reliable termination of copper conductor when the current capacity of the conductor is downsized, but larger conductor is utilized. Typical applications are for voltage drop protection when oversized conductors are used or flex conductor is used. These adapters facilitate the termination into existing mechanical set screw connectors for various stranded copper cables.

Features & Benefits

- Connector: Uninsulated copper compression pin adapter
- Connection: irreversible and maintenance free
- cULus Listed Wire-Connector Adapters; Tested in accordance to UL 486A-486B Wire Connector Adapters, CSA C22.2 No. 65 Wire Connectors
 - For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief applications
- Connectors without covers: Temperature and voltage rating 90°C, up to 35kV
- Accommodates a variety of conductor types and sizes (see tables for specifics)
 - Code Copper Wire Class B (Concentric, Compressed, Compact), Class C
 - Flexible Wire Classes
- Pin Adapters are tin plated unless otherwise specified; other plating options available (add suffix applicable)
 - Nickel (-NK), Silver (-SV), Tin-Zinc (-TZ), Unplated Bare (-BR)
- Pin adapters are clearly marked with wire size, color code, and crimp location bands
- Barrel designed with an internal chamfer at the wire entry to ensure smooth wire insertion
- Long barrel lengths allow for an increased number of crimps, increasing the mechanical strength of the connection
- In order to obtain a UL Listing and CSA Certification BURNDY certified its products using the BURNDY Engineered System. BURNDY connectors can receive a UL Listing and CSA Certification with other crimp tool manufacturers installation tools
- Solid pin design is rated to carry the equivalent ampacity of the incoming wire being terminated
- Covers are supplied with the connectors
 - Material types include: Santoprene or PVC
 - UL Listed and CSA Certified; Temperature and voltage rating up to 90°C and 600 Volts
- For installation instructions, see the product sales drawing that can be found on our website

Copper / Aluminum HYSTACK™ Terminal Stacking Adapters

TYPE CUSA HYSTACK™ Terminal Stacking Adapter

The HYSTACK™ adapter is specially designed to get terminals to the back end of a bus bar or other areas that require terminals to be elevated off the mounting surface. These HYSTACK™ adapters are made from high conductivity copper and tin-plated to provide optimum corrosion resistance. It will accommodate #10 AWG through 750 kcmil HYLUG™ terminals.

Features & Benefits

- For use on terminals made from copper
- Designed specifically for stacking standard terminals; uses include:
 - Place the stacking adapter on the mounting plate and a terminal on top of the stacking adapter and bolt down
 - Placing a stacking adapter on a terminal pad that will be mounted to a bus bar or mounting plate and a terminal on top of the stacking adapter, and bolt down
- May be used with standard NEMA two and four hole terminals; to stack four hole NEMA terminations use two stacking adapters assembled side-by-side
- Stacking adapters are clearly marked

Catalog Number	Stud Hole Size	Stud Hole Spacing	Length (L)	Width (W)	Height (H)
CUSA442TC38	3/8	1	1.75	1.12	1.50
CUSA442NTC	1/2	1-3/4	3.00	1.12	1.50

Note: All dimensions shown are for reference only.

Reference: Catalog Number TMH332

This TMH332 Kit has just the right hardware when using the CUSA442TC38 HYSTACK on a 1/4 bus bar with a 4/0 through 750 kcmil HYLUG™.

TYPE ASA-U HYSTACK™ Terminal Stacking Adapter

UL Listed 90° C, Up to 35 kV ♦

The HYSTACK™ adapter is specially designed to allow standard terminals to be stacked on two or four hole NEMA transformer or equipment terminal pads. HYSTACK™ adapters are tin-plated, high conductivity aluminum to provide optimum corrosion resistance. Only three sizes accommodate terminals from 250 kcmil through 1000 kcmil to help keep costly inventories to a minimum.

Features & Benefits

- For use on terminals made from copper or aluminum material
- Designed specifically for stacking standard terminals; uses include:
 - Place the stacking adapter on the mounting plate and a terminal on top of the stacking adapter and bolt down
 - Placing a stacking adapter on a terminal pad that will be mounted to a bus bar or mounting plate and a terminal on top of the stacking adapter, and bolt down
- May be used with standard NEMA two and four hole terminals; to stack four hole NEMA terminations use two stacking adapters assembled side-by-side
- Only three sizes necessary to accommodate terminals from 250 kcmil through 1000 kcmil, minimizing inventory requirements
- Stacking adapters are clearly marked

Accommodates Copper and Aluminum Compression Terminals		Catalog Number	Width (W)	Height (H)
Conductor Max.	Insulation O.D.			
250 kcmil	0.87	ASA250U	1.00	0.77
800 kcmil	1.37	ASA800U	1.00	1.13
1000 kcmil	1.49	ASA1000U	1.25	1.25

Notes:

All dimensions shown are for reference only.
 To stack 4-hole NEMA drilled terminals, use 2 adaptors assembled side by side.
 ASA-U stacking adaptors are recommended for use with any BURNDY UL Listed compression terminal, 2 or 4-hole NEMA pad aluminum and copper lugs, types YA, YA-L, YA-A, and for all 2-hole NEMA spaced lugs in the OVERHEAD and UNDERGROUND catalog sections.

Color-Coded Parallel Splice

TYPE YSCM Color-Coded HYLINK™ Uninsulated Parallel Splice

Type YSCM HYLINK™ seamless parallel splice connectors permit stranded wires to be laid parallel inside the connector and spliced together with BURNDY® compression tools. Each YSCM style splice accommodates a wide range of conductors and is color-coded to ensure proper tool and die match. Type YSCM connectors are cULus 486A-486B Listed Wire Connectors and UL 467 for Grounding and Bonding, and UL 467 rated for Direct Burial in earth and concrete.

Features & Benefits

- Copper seamless barrel uninsulated parallel splice
- Designed to accommodate a wide range of stranded wires to be laid parallel inside the barrel and spliced together
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Barrel is color coded to ensure proper die and installation tooling is selected
- Type YSCM Uninsulated Parallel Splices are cULus Listed Wire Connectors per UL 467 for Grounding and Bonding
- UL 467 Rated for Direct Burial in earth and concrete
- UL 486A-486B Listed and CSA Certified
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

TYPE YSCM (Continued)

Notes:

1. Material: Copper per ASTM B75.
2. Finish: Tin plated. For nickel plating, add suffix "NK" to the Catalog Number.
- * Recommended strip length. Strip length dependant on size, no. of wires and insulation thickness.
- † Refer to Circular Mil Table per ASTM B8 for total Class B Circular Mil calculations.
- * YSCM231 can also be installed with MY293 and retain Listings.

Add the circular mils of the wires you wish to splice; that sum would be used to determine the correct splice using the Min/Max on the table above.

The table to the right is for reference only.

Copper, Code, Standard Barrel, Splice

TYPE YS-L, HYLINK™ Splice

UL Listed 90° C, Up to 35 kV ♦

Features & Benefits

- Copper seamless barrel has center stop indentations used to indicate when wire is fully inserted into each side of the barrel
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Short/standard length barrel is recommended for installation with limited space requirements
- Connectors clearly marked with color coding
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

Note: All dimensions shown are for reference only.
 ▲ See tooling section of this catalog for complete tool and die listings.
 * Use PUADP1 adapter with U dies in 46 Series.
 ** P44RT for use with 46 Series only. PUADP1 adaptor not required.
 *** The MM2 conductor sizes listed are the recommendations for Class 2 conductor.
 ■ The maximum size for the Y35 is 400 kcmil insulated code cable.
 ♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.

Copper, Code, Long Barrel, Splice

TYPE YS, HYLINK™ Splice, Long Barrel

UL Listed 90° C, Up to 35 kV ♦

Features & Benefits

- Copper seamless barrel has center stop indentations used to indicate when wire is fully inserted into each side of the barrel
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire,
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Barrel is color coded to ensure proper die and installation tooling is selected
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

Notes:

All dimensions shown are for reference only.

① Not color coded.

* Use PUADP1 adapter with U dies in 46 Series.

** P44RT for use with 46 Series tooling only. PUADP1 adapter not required.

*** The MM2 conductor sizes listed are the recommendations for Class 2 conductor.

- The maximum size for the Y35 is 400 kcmil.
- ▲ See tooling section of this catalog for complete tool and die listings
- ♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.
- † Requires 60 Ton Series with L48RT die set.

Copper, Code, Reducing Adapter

TYPE Y-R, Reducing Adapter for Copper

Up to 35 kV ♦

Type Y-R reducing adapter has been designed to allow large size, long barrel, copper HYDENT™, HYSPLICE™, and HYTEE™ terminals, splices and T-taps to be used on small conductor sizes. To use, simply insert the reducer into the barrel, insert the wire into the reducer adapter and crimp the outer barrel using its recommended tooling.

Features & Benefits

- Reducing adapters fit inside copper long barrel compression terminals (Type YA-), splices (Type YS-), or tap connectors
- The outside diameter of the reducing adapter is equivalent to the terminal or splice accommodating wire size, and the inside diameter of the reducer adapter is reduced to accommodate a smaller wire size
- Use the same installation tooling and die sets or dieless tool recommended for the compression terminal, splice, or tap connector with the reducing adapter
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damage of the wire strands during insertion
- Electro-tin plated, unless otherwise specified, to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Can be field modified to fit short length compression terminals (Type YA-L) and splices (Type YS-L)
- Connectors are clearly marked with stamping
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

Example: Accommodate a 4/0 AWG wire on one end and a #2 AWG wire on the other:

1. Use a YS28 (which splices two 4/0 AWG wires on each end)
2. Select a Y282CR reducing adapter (reducing adapter fits the YS28 barrel with a reduced inside diameter that accommodates a #2 AWG wire size)
3. Fully insert the Y282CR reducing adapter into one end of the YS28 splice barrel
4. Insert the #2 AWG wire into the Y282CR reducing adapter that is inside the YS28 splice barrel
5. Crimp the YS28 barrel side with the Y282CR reducing adapter, using the recommended die and tool combination or dieless tool as specified for use on the YS28
6. Insert the 4/0 AWG wire into the other end of the YS28 barrel and crimp that side of the splice using the recommended installation tooling and your splice reducing connection is complete!

Copper, Flex, Splice, Standard Barrel

TYPES YSV-LFX, YS-LFX HYLINK™

UL Listed 90° C, Up to 35 kV ♦

Types YSV-LFX and YS-LFX standard barrel splices for flex conductor accommodate a wide range of conductor types. Feature an internal chamfer at wire entry site to provide a smooth insertion of wire. UL486A-486B Listed and CSA Certified; UL Listed 90°C, up to 35kV.

Features & Benefits

- Connector: Uninsulated copper compression splice made from seamless copper tubing
- Connection: The connection made is irreversible and maintenance free
- UL486A-486B Listed and CSA Certified
- Temperature and Voltage Rating: UL Listed 90°C, up to 35kV
- Conductor Accommodate Types: *See table for specifics
- Code Copper Wire: Class B (Concentric, Compressed, Compact) or Class C
- Solid Copper Wire
- Flexible Copper Wire Classes
- Metric Class 2: Metric wire stranding
- Connectors are tin plated unless otherwise specified. Other plating suffixes: Nickel (NK), Silver (SV), Tin-Zinc (TZ), Bare (BR)
- Connectors are clearly marked with wire size, die index, color code and crimp location bands
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire
- Short/Standard/Light Duty Barrel is recommended for installations with limited space requirements
- In order to obtain a UL Listing and CSA Certification, BURNDY certifies its products using the BURNDY Engineered System. BURNDY connectors can receive a UL Listing and CSA Certification with other crimp tool manufacturers installation tools

*Some catalog numbers require overlapping crimps when using the 81K or 4PC series of installation tooling. Please refer to the overlapping crimps image below. Overlap each consecutive crimp so that the completed installation of all overlapping crimps covers the entire crimp zone.

Copper Flex Standard Barrel Splice Installation Instructions

Installation Instructions

Installation instructions help the installer understand proper wire preparation, proper insertion requirements, crimp zone location, individual crimp location, crimp order and crimp direction, to ensure safe and reliable wire connections. UL Listing and CSA Certification are only valid when using the BURNDY® Engineered System and following BURNDY Installation Instructions.

Copper Flex Standard Barrel Splice Installation Steps:

- Select the appropriate connector based on:
 - Wire Material
 - Wire Construction
 - Wire Size
- Strip the insulation to the appropriate wire strip length, based on the table's Wire Strip Length recommendation for the selected connector. Due to tolerances in the connector, wire strip length, and insulation stripping tools, this range may be 0" - 1/4". The exposed wire, also known as a "shiner", has no performance impact on the connection and there is no wire exposure requirement by BURNDY.
- As a best practice, wire brush the bare conductor to remove any oxides. DO NOT wire brush tin-plated connectors.
- Insert the conductor into the barrel until flush against the conductor stops halfway into the splice connector.
- Apply the proper number of crimps specified by the appropriate illustration for the side with conductor inserted.
- *Some catalog numbers require overlapping crimps when using the 81K or 4PC series of installation tooling. Please refer to the overlapping crimps image. Overlap each consecutive crimp so that the completed installation of overlapping crimps covers the entire crimp zone.
- Use the same steps 2-6 for the other side of the splice.
- Once all crimps have been completed, the connection can be easily inspected for proper installation with the die/indicia embossment.

NOTE: Illustrations show black bands however this is just a representation of the crimp zones. See individual connector for actual crimp band color.

Example: YSV26LFX

- Go to the YSV26LFX Catalog Number Designation for 2/0 AWG G,H,I,K,M or DLO.
- Confirm the Tool (750 Series for this example).
- Confirm the Die Set Needed (U26RT for this example)
- Confirm the Number of Crimps Necessary (1 each side for this example)
- For proper crimp placement refer to the image on this page corresponding to the number of crimps.

Copper, Code, Tapered Ends, Standard Barrel Splice

TYPES YS-T, YSP-T HYLINK™ High Voltage, Tapered Ends

UL Listed 90° C, Up to 35 kV ♦

Types YS-T and YSP-T seamless high conductivity copper electro-tin plated compression HYLINK™ high voltage splices with standard barrel and tapered ends are ideally suited for higher voltage applications from 5 kV through 35 kV.

Features & Benefits

- Copper seamless barrel is designed with tapered ends per EEI Standard TD160, indicating use on voltages 5kV through 35kV; this aids in preventing corona emission and simplifies taping for lower installation cost
- Barrel also features an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damage of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Short/standard length barrel is recommended for installations with limited space requirements
- Type YS-T barrel has center stop indentations used to indicate when wire is fully inserted into each side of the barrel
- Type YSP-T barrel has a center plug permanently brazed in place; this plug prevents oil within oil filled conductor from passing through the splice connector and is also an indication when the wire is fully inserted into each side of the barrel
- Connectors are clearly marked with color coding to ensure proper die and installation tooling is selected
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Terminals and splices accommodating code wire: Accommodates Code Class B (Concentric, Compressed, Compact) and Class C wire

Note: All dimensions shown are for reference only.

* Use adapter PUADP1 with U Dies in 46 Series. 46 Series uses the same nest indenter and adapter as the 35 and 750 Series, but with the PUADP1 adapter.

** A 0.06 radius at each end is used for sizes 6-27.

■ The maximum size for the 35 Series is 400 kcmil.

▲ See tooling section of this catalog for complete tool and die listings.

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.

Copper, Flex, Splice, Long Barrel

TYPES YSV-FX, YS-FX HYLINK™

UL Listed 90° C, Up to 35 kV ♦

Types YSV-FX and YS-FX long barrel splices for flex conductor accommodate a wide range of conductor types. Feature an internal chamfer at wire entry site to provide a smooth insertion of wire. UL486A-486B Listed and CSA Certified; UL Listed 90°C, up to 35kV.

Features & Benefits

- Connector: Uninsulated copper compression splice made from seamless copper tubing
- Connection: The connection made is irreversible and maintenance free
- UL486A-486B Listed and CSA Certified
- Temperature and Voltage Rating: UL Listed 90°C, up to 35kV
- Conductor Accommodate Types: *See table for specifics
- Code Copper Wire: Class B (Concentric, Compressed, Compact) or Class C
- Solid Copper Wire
- Flexible Copper Wire Classes
- Metric Class 2: Metric wire stranding
- Connectors are tin plated unless otherwise specified. Other plating suffixes: Nickel (NK), Silver (SV), Tin-Zinc (TZ), Bare (BR)
- Connectors are clearly marked with wire size, die index, color code and crimp location bands
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire
- Long barrel allows an increased number of crimps, increasing the mechanical strength of the connection
- In order to obtain a UL Listing and CSA Certification, BURNDY certifies its products using the BURNDY Engineered System. BURNDY connectors can receive a UL Listing and CSA Certification with other crimp tool manufacturers installation tools

Copper Flex Long Barrel Splice Installation Instructions

Installation Instructions

Installation instructions help the installer understand proper wire preparation, proper insertion requirements, crimp zone location, individual crimp location, crimp order and crimp direction, to ensure safe and reliable wire connections. UL Listing and CSA Certification are only valid when using the BURNDY® Engineered System and following BURNDY Installation Instructions.

Copper Flex Long Barrel Splice Installation Steps:

- Select the appropriate connector based on:
 - Wire Material
 - Wire Construction
 - Wire Size
- Strip the insulation to the appropriate wire strip length, based on the table's Wire Strip Length recommendation for the selected connector. Due to tolerances in the connector, wire strip length, and insulation stripping tools, this range may be 0" - 1/4". The exposed wire, also known as a "shiner", has no performance impact on the connection and there is no wire exposure requirement by BURNDY.
- As a best practice, wire brush the bare conductor to remove any oxides. DO NOT wire brush tin-plated connectors.
- Insert the conductor into the barrel until flush against the conductor stops halfway into the splice connector.
- Apply the proper number of crimps specified by the appropriate illustration for the side with conductor inserted.
- Use the same steps 2-5 for the other side of the splice.
- Once all crimps have been completed, the connection can be easily inspected for proper installation with the die/indicia embossment.

NOTE: Illustrations show black bands however this is just a representation of the crimp zones. See individual connector for actual crimp band color.

Example: YSV26FX

- Go to the YSV26FX Catalog Number Designation for 2/0 AWG G,H,I,K,M or DLO.
- Confirm the Tool (750 Series for this example).
- Confirm the Die Set Needed (U26RT for this example)
- Confirm the Number of Crimps Necessary (2 each side for this example)
- For proper crimp placement refer to the image on this page corresponding to the number of crimps.

Copper, Code / Flex, In-Line Splice Kit, Standard, Inspection Window

TYPE YS-TC HYSPLICE™ In-Line Splice Kits, Standard Barrel, with Inspection Window

Type YS-TC kits are for splicing cables and covering the connection with clear heat shrink. Splices are constructed from seamless, high conductivity electrolytic copper tubing for maximum conductivity and tin-plated to resist corrosion. Each YS-TC splice is provided with inspection holes and cable stops. The YS-TC family also features the BURNDY Engineered System of coordinated tools and dies.

Features & Benefits

- Each splice kit includes one YS-TC compression splice connector and heat shrink
- The YS-TC type compression splice connector provided in the kit is UL Listed in accordance with UL 486A-486B - Wire Connectors; UL Listed 90°C up to 35kV
- Barrels have 2 inspection windows on each side to allow for visual verification that the wire has been fully inserted prior to crimping the splice; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Short/standard length barrel is recommended for installations with limited space requirements and meet the exact UL testing requirements as long barrel connectors so performance of the connection is not compromised
- Connectors clearly marked with color coding

Accessories

Copper, Code / Flex, Reducing Splice Kit, Standard, Inspection Window

TYPE YSR-TC HYREDUCER™ In-Line Reducer Splice Kits Standard Barrel, with Inspection Window

Type YSR-TC reducing splice kits provide for splicing two different cable sizes with inspection holes. The larger conductor is inserted first and butts against the center of the connector where the smaller barrel begins. Constructed from seamless, high conductivity electrolytic copper tubing for maximum conductivity and tin plated to resist corrosion. The YSR-TC family also features the BURNDY® color code system.

Features & Benefits

- Each splice kit includes one YSR-TC compression in-line splice reducer connector and heat shrink
- The YSR-TC type reducing compression splice connector provided in the kit is UL Listed in accordance with UL 486A-486B - Wire Connectors; UL Listed 90°C up to 35kV
- Barrels have 2 inspection windows on each side to allow for visual verification that the wire has been fully inserted prior to crimping the splice; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Designed configurations allow for copper code-to-code wire connections, copper code-to-flex wire connections, and copper flex-to-flex wire connections; see table for more complete details
- Barrel is designed with a taper to accommodate a main run wire that is reduced to a smaller tap wire
- Barrel also provided with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Short/standard length barrel is recommended for installations with limited space requirements and meet the exact UL testing requirements as long barrel connectors so performance of the connection is not compromised
- Connectors clearly marked with color coding
- Can be used in place of H-taps; the in-line design saves space in cable trays and other similar applications

Copper, Code / Flex, Reducing Splice Kit, Long, Inspection Window

TYPE YSR-TC HYREDUCER™ In-Line Long Barrel Reducer Splice Kits for Telecommunications Applications with Inspection Window

Type YSR-TC reducing splice kits provide for splicing two different cable sizes with inspection holes. The larger conductor is inserted first and butts against the center of the connector where the smaller barrel begins. Constructed from seamless, high conductivity electrolytic copper tubing for maximum conductivity and tin plated to resist corrosion. The YSR-TC family also features the BURNDY® color code system.

Features & Benefits

- Each splice kit includes one YSR-TC compression in-line splice reducer connector and heat shrink
- The YSR-TC type reducing compression splice connector provided in the kit is UL Listed in accordance with UL 486A-486B - Wire Connectors; UL Listed 90°C up to 35kV
- Barrels have 2 inspection windows on each side to allow for visual verification that the wire has been fully inserted prior to crimping the splice; not recommended in highly corrosive environments as the wire in the barrel would be exposed
- Designed configurations allow for copper code-to-code wire connections, copper code-to-flex wire connections, and copper flex-to-flex wire connections; see table for more complete details
- Barrel is designed with a taper to accommodate a main run wire that is reduced to a smaller tap wire
- Barrel also provided with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Connectors clearly marked with color coding
- Can be used in place of H-taps; the in-line design saves space in cable trays and other similar applications

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

Connector with Clear Heat Shrink Kit

Clear heat shrink UL224 VWI Listed. Passes TELCORDIA GR-347-CORE Abrasion and Cut Test up to 750 kcmil Class B code cable; contact factory for 750 flex cable applications.

Note: All dimensions shown are for reference only.

* Not recommended due to handle force required for proper installation.

Copper, Thin Wall C-Tap

TYPE YC-L Thin Wall Copper C-Tap

UL Listed 90° C, Up to 35 kV ♦

Type YC-L is a thin wall, high conductivity copper connector for making copper taps and parallel connections from #14 to 3/0 AWG.

Features & Benefits

- Material is high conductivity wrought copper providing low resistance for excellent electrical conductivity
- Bare copper ranging taking connector that allows for less inventory
- BURNDY certifies its products using the Burndy Engineered System and select other crimp tool manufacturers in accordance with one or more UL and CSA categories
 - UL Listed UL 486A-486B Wire Connectors
 - UL Listed 467 Grounding and Bonding Equipment (*YC3L12 is not UL Listed for Grounding and Bonding*)
 - CSA C22.2
 - Direct Burial Applications
- Reinforced ribs on the outside of the connector increase the mechanical strength of the connection
- Creates a compact connection that is easy for taping and insulating
- Connectors are clearly marked with color code dot, UL and CSA (when applicable), wire size, die index number and more

Note: All dimensions shown are for reference only.

♦ See tooling section of this catalog for complete tool and die listings.

‡ Refer to website for sales drawing with complete listing with solid/stranded copper conductor

* Use PUADP1 adapter with U dies in 46 Series

For Tin plating add TN suffix (example = YC10L12TN)

** YC3L12 is NOT UL Listed or CSA Certified for Grounding and Bonding.

Copper C-Tap

TYPE YCHC Copper CRIMPIT™ C-Tap

UL Listed 90° C, Up to 35 kV ♦

Features & Benefits

- Range taking C-tap that allows for less inventory as one C-tap can accommodate a multitude of wire combinations
- Accommodates a wide range of run/tap combinations
- Manufactured from high conductivity wrought copper providing low resistance for excellent electrical conductivity
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Each connector has a recommended UL Listed / CSA Certified insulating cover available in both black and clear (see table); clear cover allows for easy inspection of the connection (see separate page for full details on Type CCF-FR and CFR-FR Covers)
- Connectors are clearly marked with stamping
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing

Copper C-Tap

TYPE YCHC (Continued)

Note: To properly use tap 2 and/or tap 3 conductors in YCHC connector a conductor from the tap 1 cable range must be included in the tap 1 groove.

‡ To obtain covers made of polyethylene remove suffix-FR (example: CFO). CFO is not flame retardant.

* Use PUADP1 adaptor with U dies in 46 Series.

▲ See tooling section of Master Catalog for complete tool and die listings.

◆ For applications requiring flame retardant cover, use either a CCFBG-FR (Clear) or CFBG-FR (Black) cover and YH2C2C connector by ordering YH8C8CWCC (Clear) or YH8C8CWC (Black).

Note: All dimensions shown are for reference only.

TYPE YH H-Tap Copper CRIMPIT™

UL Listed 90° C, Up to 35 kV ♦

UL Listed Grounding and Bonding Equipment*

Direct Burial Rated

Features & Benefits

- Connector: Uninsulated compression H-Tap Connectors
- Connection: Compression connectors are made irreversible and maintenance free
- Applicable Standards: Connectors are only UL Listed and CSA Certified when installed with the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more categories
 - Tested in accordance to UL 486A-486B / CSA C22.2 NO 65 Wire Connectors
 - Tested in accordance to UL 467 / CSA C22.2 No 41 Grounding and Bonding Equipment (***YH2929 to YH8C8C ONLY**)
- Temperature and voltage rating: 90°C, up to 35kV; For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions
- Wire Accommodates (see table): H-Tap grooves are designed to accommodate wire ranges
 - Code copper wire (CU): Class B (Concentric, Compressed, Compact) or Class C
 - Flex wire (CU): See table for wire classes
- Connectors are tin-plated
- Connector Design Features:
 - Designs with more than one tap wire groove require installers to utilize a minimum of one Main (Run) and one tap groove; others grooves can be left empty
 - Typical ink markings (as space permits and applicable): Crimp zone indicated by color bands, BURNDY name or logo, UL logo, CSA logo, Wire Size, Die Color Code, Index Number
 - The “third hand” is a string provided with the H-Tap connector used to wrap the wire while being inserted into the run and tap grooves; This feature constrains the wire while the installer applies the recommended number of crimps
- H-Tap connectors can be purchased separately or kitted with covers:
 - YH: H-Tap sold separately without a cover
 - YH-WC: Add “WC” for H-Tap kitted with black cover
 - YH-WCC: Add “WCC” for H-Tap kitted with clear cover

H-Tap Covers, Black Flame Retardant; Clear Flame Retardant

TYPE CF-FR H-Tap Black Flame Retardant Cover

UL Listed 90° C, Up to 600 Volts

Features & Benefits

- Insulation cover that has a one-piece hinge design so not extra hardware is required
- After an H-tap connection is made, the appropriate CF-FR cover can be used to slip over the connection and latches securely shut
- The use of the insulation cover eliminates the need to tape the connection, making this solution a fast and reliable method of insulating
- Flash Barrier; the cover is designed to protect against electrical flashover
- Type CF-FR cover material has a UL94 V-0 Flame rating with a minimum 28 oxygen index that indicate self-extinguishing retardant properties
- Covers are clearly marked with lettering
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing

* Use CFN-FR for single tap installation; use CFR-FR when 2 or more tap conductors are installed.

† Two-piece design packaged together.

Note: All dimensions shown are for reference only.

TYPE CCF-FR Clear H-Tap Flame Retardant Cover

UL Listed 90° C, Up to 600 Volts

Features & Benefits

- Insulation cover that has a two-piece design with positive locking latch to ensure correct installation; prevents opening after installation
- After an H-tap connection is made, the appropriate Type CCF-FR cover can be used to slip over the connection and latch securely shut
- Embedded magnifying lense in the cover provides increased visibility of the H-tap die embossment on the connector made by the require installation tooling; this allows for improved visibility during a connection inspection
- Made of polished clear polycarbonate material that provides:
 - High visibility for inspection of installed H-tap connection
 - Built-in channels on the outside of the covers accommodate and hold cable ties, hook and loop ties, or waxed cord security in place after cover installation
 - Patented highly flexible fingers on each cover are designed to contour around the wire
 - Internal pockets designed to accommodate identification tags (4 ID tags included)
 - UL94 V-0 Flame rating indicating self-extinguishing retardant properties
- The use of the insulation cover eliminates the need to tape the connection making this solution a fast and reliable method of insulating
- Molded barrier prevents installed H-tap connectors from electrical flashover
- Covers come with two (2) clear halves, two (2) cable ties, and four (4) identification tags
- Covers are clearly marked with lettering
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing

* Use CCFNFR for single tap installation; use CCFRFR when 2 or more tap conductors are installed.

Note: All dimensions shown are for reference only.

Copper, Code / Flex, Split Compression Wye Tap

TYPE YSH H Copper CRIMPIT™ Split Compression Wye Tap Connector

Type YSH heavy duty connectors are designed for insulated underground wye splices. The split H copper CRIMPIT™ connector is longer than our standard H copper CRIMPIT™ and is suitable for use on high voltage (15kV) power cables with copper conductors. The connectors cannot be used with oil filled or mass impregnated cables since no oil stop is provided. The connector is installed with standard BURNDY® HYPRESS™ tools and is made of tin-plated electrolytic copper.

Features & Benefits

- Range taking H-tap that allows for less inventory as one H-tap can accommodate a multitude of wire combinations
- Accommodates a wide range of run / tap combinations
- The tap grooves act independently; the use of one run and one tap wire is required when using this connector for making a connection
- Manufactured from high conductivity wrought copper providing low resistance for excellent electrical conductivity
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Color coded to ensure proper die and installation tooling is selected
- Insulation is not provided; insulation may be obtained from Raychem (800-272-9243) Type HVSY Splice Kits for 15kV installations; a complete IEEE 404 15kV installation is provided

* Use PUADP1 adaptor with U dies in 46 Series. P dies result in a smooth crimp surface and is recommended for voltages above 600 V.

▲ See tooling section of this catalog for complete tool and die listings.

† Number of crimps per connector. U dies require double crimps.

Note: All dimensions shown are for reference only.

TYPE YST Uninsulated Copper HYTEE™ T-Coupler

UL Listed to 90° C, Up to 35 kV ♦

Type YST copper compression tee is designed for connecting a run conductor with a perpendicular tap conductor. Type YST connectors are commonly used in junction boxes and manholes to make a radial tap off a main run. They are needed in many industrial, utility generation, and commercial applications. The most common cable combinations are listed below. The Type Y-R reducers can also be used to accommodate most cable combinations.

Features & Benefits

- Manufactured from high conductivity electrolytic copper tubing with heavy wall thickness, Type YST T-couplers provide low resistance for excellent electrical conductivity
- Featuring long barrel length for all three wire wire accommodating barrels allows for an increased number of crimps, in turn increasing the mechanical strength of the connection while allowing the connection to operate at a lower temperature rating; additionally, the long barrel permits the use of the Type Y-R reducing adapters
- Accommodates a wide range of run / tap combinations
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing

Notes:

- * Use adapter PUADP1 with U Dies in 46 Series.
 - The maximum size for the Y35 is 400 kcmil.
 - Contact factory for conductor combinations not shown.
 - ▲ See tooling section of this catalog for complete tool and die listings.
 - ♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.
- All dimensions shown are for reference only.

Aluminum / Copper, 1-Hole, Uninsulated Aluminum Terminals

TYPE YA-A HYLUG™

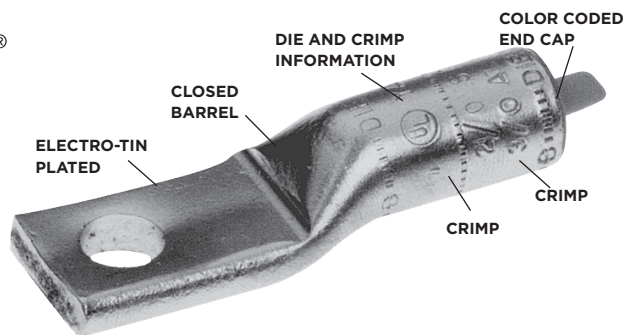

UL Listed 90° C, Up to 35 kV ♦

AL9CU

Type YA-A aluminum tin-plated compression HYLUG™ terminals are dual-rated and designed for use on both aluminum and copper conductors from #12 solid through 2000 kcmil.

Features & Benefits

- UL486A-486B Listed and CSA Certified
- Aluminum terminals are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector:
 - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
 - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- 45° and 90° angular lugs are available, please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with wire size, die index, color code, and crimp location bands
- Factory pre-filled with PENETROX™ Type A13 oxide inhibitor
- Color coded end caps are factory inserted in the barrels to match the die color code and prevent foreign materials from entering the barrel
- Aluminum oxidation is not easily detected but causes resistance in a connection; it is imperative the proper preparation takes place prior to making an aluminum-to-aluminum connection
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Connectors have been tested with expanded wire ranges when installed with specified dieless tools. See Beginning of Section C for Expanded Ranges Tables.
- Conductor Accommodate Types:
 - Aluminum Code Wire: Class B (Concentric, Compressed, Compact)
 - Copper Code Wire: Class B (Concentric, Compressed, Compact or Class C)
 - Copper Clad Aluminum: Noted in the conductor accommodates as CCA

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications. BURNDY will not be liable for the connection.

Type YA-A Installation Tooling Table Installation Instructions

Installation Instructions

Installation instructions help the installer understand proper wire preparation, proper insertion requirements, crimp zone location, individual crimp location, crimp order and crimp direction, to ensure safe and reliable wire connections. In order to obtain a UL Listing BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more UL categories.

Aluminum Installation Steps:

- Select the appropriate connector based on:
 - Wire Material
 - Wire Construction
 - Wire Size
- Strip the insulation to the appropriate wire strip length, based on the table's Wire Strip Length recommendation for the selected connector. Due to tolerances in the connector, wire strip length, and insulation stripping tools, this range may be 0" - 1/4". The exposed wire, also known as a "shiner", has no performance impact on the connection and there is no wire exposure requirement by BURNDY.
- Wire brush the bare conductor to remove any oxides. DO NOT wire brush tin-plated connectors.
- Apply PENETROX™ A13 oxide inhibitor to the bare conductor.
- Insert the conductor into the barrel for the full length. The connector barrel is filled with PENETROX™ A13, so be aware of the following:
 - Oxide inhibitor may discharge from the barrel when wire is fully inserted.
 - Oxide inhibitor may cause resistance that could feel like the wire is fully inserted. Ensure you insert the wire with enough force to penetrate the oxide inhibitor barrier until you reach the full wire insertion distance.
- Apply the proper number of crimps based on the installation tooling requirements. Use the illustrations as a guide on crimp placement and direction for the proper number of crimps.
- Remove excess PENETROX™ A13 that may discharge during installation.

*For simplicity, the images show a 1-hole connector, however, connectors are available in 1-hole, 2-hole or more hole patterns.

Aluminum / Copper, 2- and 4-Hole Uninsulated Aluminum Terminals

TYPE YA-A HYLUG™

UL Listed 90° C, Up to 35 kV ♦ ♦

AL9CU

Type YA-A terminals in 2- and 4-hole designs inhibit connector rotation and increase area contact. These aluminum terminals have the same design features and benefits as the 1-hole YA-A with an added stud hole for a more secure termination to various types of equipment pads. They are dual-rated for use on both aluminum and copper conductors.

Features & Benefits

- UL486A-486B Listed and CSA Certified
- Aluminum terminals are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector:
 - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
 - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- 45° and 90° angular lugs are available, please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with wire size, die index, color code, and crimp location bands
- Factory pre-filled with PENETROX™ Type A13 oxide inhibitor
- Color coded end caps are factory inserted in the barrels to match the die color code and prevent foreign materials from entering the barrel
- Aluminum oxidation is not easily detected but causes resistance in a connection; it is imperative the proper preparation takes place prior to making an aluminum-to-aluminum connection
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Connectors have been tested with expanded wire ranges when installed with specified dieless tools. See Beginning of Section C for Expanded Ranges Tables.
- Conductor Accommodate Types:
 - Aluminum Code Wire: Class B (Concentric, Compressed, Compact)
 - Copper Code Wire: Class B (Concentric, Compressed, Compact) or Class C
 - Copper Clad Aluminum: Noted in the conductor accommodates as CCA

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Aluminum / Copper, 2- and 4-Hole Uninsulated Aluminum Terminals

Aluminum Transformer Lug Kits

TYPE YAAKIT Transformer Lug Kit

Each kit contains the UL Listed and CSA Certified AL9CU rated aluminum compression connectors and tongue mounting hardware needed to terminate aluminum or copper cables in “dry type” transformers. The KVA rating gives an approximate cross reference to the appropriate kit.

Features & Benefits

- UL Listed AL9CU dual rated compression terminals and CSA Certified; ensure the transformer feeders and taps are terminated properly
- Plated steel cap screws and hex nuts with captive conical washers or individual Belleville washers
- Terminal to bus connections are made using proper hardware resulting in true torque to pressure performance, compensates for dissimilar metal expansion and contraction
- Hardware packed in plastic bag; no lost hardware prior to installation
- Conductor Accommodate Types:
 - Aluminum Code Wire: Class B (Concentric, Compressed, Compact)
 - Copper Code Wire: Class B (Concentric, Compressed, Compact or Class C)
 - Copper Clad Aluminum: Noted in the conductor accommodates as CCA

Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Accessories

- Hardware - Section F
- PENETROX™ Oxide Inhibitor - Section F
- Heat and Cold Shrink Tubing - Section D
- WIREMIKE™ Wire Micrometer - Section F
- Wire Management (Cable Ties) - Section G

Aluminum Compression HYPLUG™ Adapters

TYPES AYP, AYPO HYPLUG™ Adapters

UL Listed 90° C, Up to 35 kV ♦

Types AYP and AYPO aluminum compression adapters are designed for reliable termination of aluminum and copper conductor in mechanical connectors. Typical applications include mechanical connectors in molded case circuit breakers, panel board equipment, and meter sockets.

TYPE AYP

Features & Benefits

- Aluminum pin terminals are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector:
 - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
 - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Short pin length design permits easy installation in limited space applications; rated for the full ampacity of the incoming conductor
- Smooth surface on the pin allows for greater contact area and electrical connectivity
- Solid pin design eliminates “how tight is tight” torque requirement problem and eliminates over torquing on stranded pin adapters that can result in damaged strands increasing resistance
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with wire size, die index, color code, and crimp location bands
- Factory pre-filled with PENETROX™ Type A13 oxide inhibitor
- Color coded end caps are factory inserted in the barrels to match the die color code and prevent foreign materials from entering the barrel
- Aluminum oxidation is not easily detected but causes resistance in a connection; it is imperative the proper preparation takes place prior to making an aluminum-to-aluminum connection
- Covers are supplied with connectors:
 - EPDM rubber covers are UL Listed/CSA Certified and rated up to 600 Volts and 90°C
 - Santoprene rubber covers are also UL Listed/CSA Certified and rated up to 600 Volts and 90°C
- The connector is offered with an in-line pin (Type AYP) and offset pin (Type AYPO) design
- Offset pin design provides added flexibility in limited space applications as the connectors can be rotated preventing wire interference when installing cable side-by-side to a mechanical connector
- Only 5 dies sets are necessary to install the complete line of HYPLUG™ adapters from #6 AWG up to 750 kcmil
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Conductor Accommodate Types:
 - Aluminum Code Wire: Class B (Concentric, Compressed, Compact)
 - Copper Code Wire: Class B (Concentric, Compressed, Compact or Class C)
 - Copper Clad Aluminum: Noted in the conductor accommodates as CCA

TYPE AYPO

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.

Aluminum / Copper Compression HYLINK™ Aluminum Splices

TYPE YS-A HYLINK™ Aluminum Splices

UL Listed 90° C, Up to 35 kV ♦

Type YS-A is a high conductivity aluminum tin-plated compression butt splice for use on all combinations of aluminum to aluminum, aluminum to copper, and copper to copper conductor combinations.

They are designed to accommodate conductors from #12 stranded through 1000 kcmil in standard and heavy duty applications. Prefilled with PENETROX™ oxide inhibiting compounds and assembled with color-coded end caps, the connectors provide a permanent trouble-free electrical splice with flexibility and low installed cost.

Features & Benefits

- Aluminum splices are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector:
 - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
 - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with wire size, die index, color code, and crimp location bands
- Factory pre-filled with PENETROX™ Type A13 oxide inhibitor
- Color coded end caps are factory inserted in the barrels to match the die color code and prevent foreign materials from entering the barrel
- Aluminum oxidation is not easily detected but causes resistance in a connection; it is imperative the proper preparation takes place prior to making an aluminum-to-aluminum connection
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing
- Conductor Accommodate Types:
 - Aluminum Code Wire: Class B (Concentric, Compressed, Compact)
 - Copper Code Wire: Class B (Concentric, Compressed, Compact or Class C)
 - Copper Clad Aluminum: Noted in the conductor accommodates as CCA

Aluminum / Copper HYREDUCER™ Aluminum Reducing Splices

TYPE YRB HYREDUCER™ Aluminum Reducing Splice

UL Listed 90° C, Up to 35 kV ♦

HYREDUCER™ Type YRB reducer butt splices are designed to splice two different conductor sizes and is UL Listed for aluminum to copper and aluminum to aluminum applications. The outside diameter is held constant to minimize installation dies and is factory prefilled with PENETROX™ oxide inhibitor.

Features & Benefits

- Aluminum splice reducers are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector:
 - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
 - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Barrel features an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with crimp location bands
- Factory pre-filled with PENETROX™ Type A13 oxide inhibitor
- Color coded end caps are factory inserted in the barrels to match the die color code and prevent foreign materials from entering the barrel

- The barrels are designed to accommodate larger run conductor and smaller tap conductor so the inside diameters on each end of the barrel are different but the outside diameter is held constant minimizing number of installation dies necessary
- Aluminum oxidation is not easily detected but causes resistance in a connection; it is imperative the proper preparation takes place prior to making an aluminum-to-aluminum connection
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing

Aluminum Compression Tin Plated Aluminum H-Tap

TYPES YFD, YFN, YFO, YFR H-CRIMPIT™ Aluminum Compression Tap Connector

UL Listed 90° C, Up to 35 kV ♦

H-CRIMPIT™ compression tap connectors Types YFD, YFN, YFO, and YFR are for use with aluminum to aluminum and aluminum to copper connections.

The H-CRIMPIT™ taps are ideal for making both parallel and tap compression connections in risers and gutters. It should only be installed with hydraulic tools.

DIE AND COLOR CODE AND CRIMP INFORMATION

Features & Benefits

- Aluminum H Taps are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector:
 - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
 - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Each connector is factory sealed in polyethylene to ensure connector is delivered free of foreign materials prior to being installed
- Post crimp, the connector is easy to tape
- Connectors are clearly marked
- Factory pre-filled with PENETROX™ Type A13 oxide inhibitor
- Aluminum oxidation is not easily detected but causes resistance in a connection so it is imperative that the proper preparation takes place prior to making an aluminum-to-aluminum connection
- BURNDY certifies its products using the BURNDY Engineered System and select other crimp tool manufacturers in accordance with one or more of the UL categories in order to obtain a UL Listing

▲ See tooling section of this catalog for complete tool and die listings.

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.

* CSA Listed

Battery Terminals Straight Style Post

TYPE YAEBA-S Straight Style Battery Post Terminals

#6 - 4/0 AWG Solid and Stranded Copper

BURNDY straight style battery post terminals are made from pure copper alloy and tin plated to prevent corrosion. They adhere to SAE, JIS, and DIN stud standards. Typical applications are automotive, marine, transportation, petrochemical, and OEM markets.

Features & Benefits

Barrel:

- Color coded for easy identification
- Chamfered end
- Made of copper alloy, tin plated for corrosion resistance and RoHS compliance
- Supplied standard with stainless steel hardware installed

Post:

- Clamp color coded by polarity; red is positive, black is negative
- Not UL Listed but tested and met UL486A-486B pullout requirements

Compression Cable Pulling Heads Type YCP-L

TYPE YCP-L Compression Cable Pulling Heads

Before using this product, it is required to read, understand, and comply with the Safety Operation Maintenance & Installation manual provided with the product.

Features & Benefits

- Range-taking; only 7 compression pulling heads are required to pull #8 AWG through 1000 kcmil wire
- Accommodates:
 - Copper Class B (Concentric, Compressed, Compact) or Class C wire
 - Aluminum Class B (Concentric, Compressed, Compact)
- Easy to install with the 644 or 444S Series of dieless installation tools (PAT644 / Y644 or PAT444S)
- Parallel installation; each of the 7 compression pulling heads come in multiple lanyard lengths for staggering when pulling multiple wires
- Knurl crimp bands on the compression pulling head barrels clearly indicate the crimp zone location
- Each lanyard has a protective sleeve for comfort and safety
- A UPC tag is affixed to each part for ease of identification and ordering

PAT644 Series

PAT444S Series

Please Note: Sold packaged in quantities of 6 pieces; must order in multiples of 6.

Aluminum Insulation Piercing Compression Connector

TYPE YIPC H-Tap Aluminum HYPIERCE CRIMPIT™

UL Listed sealed wire connector product family designed to deliver value while meeting the required solar electrical, mechanical, and environmental performance standards.

Features & Benefits

Connector & Cover Assembly:

- Product is sold as a kit: connector, cover, and installation instructions
- UL Listed Sealed Wire Connector System with Raintight Rating and Sunlight Resistance. Category ZMWQ tested in accordance with UL 486D
- Voltage Rating: 1.5 kV
- Dead-end 2kV Cold Shrink End Cap for Main/Run conductor is sold separately, to use in dead-end application, see next pages for more information

CAUTION: BURNDY certifies and ONLY warrants the use of this product with the BURNDY Engineered System

Connector:

- Uninsulated tin-plated aluminum compression insulation piercing connector
- Compliant with UL 486A-486B
- Piercing Features: Main / Run groove has three (3) insulation piercing teeth and two (2) insulation piercing legs to maintain connectivity and thermal stability
- Main / Run Wire Accommodates: Intended to be used with compact stranded aluminum PV cable, rated 2 kV and 90°C. Tap wires cannot be used in combination. *Example:* Using 8 AWG tap wire, all four tap wires must be 8 AWG. See table below for Insulation OD range.
- Installers are required to use one (1) to four (4) tap wire ports per crimp. Unused ports can be left empty
- Tap wire requires stripping (see next pages for information on RIPLEY® Collar and Stripping Bushings - sold separately)

Cover:

- Two-piece insulation cover allowing wires to enter and exit from both sides
- Snaps together with eight (8) locking features that require a tool to open, deterring continuously opening and closing the cover
- One time use cover. Any warranty is void if cover is reused. If cover removal is necessary, a new cover is required.
- Voltage Rating: 1.5 kV
- Polycarbonate material: UL 94 V-0 flame rating and sunlight / UV resistant
- Main/Run and Tap wire alignment guides ensure wires seat in the gel properly
- Strain relief locking arms provide stress and tension relief at the connection and help constrain assembly during installation
- Connector placement guide for proper seating of connector
- Full perimeter raintight gel-seal when covers are mated
- Tap wires may be used in reverse direction inside the cover. If you intend to use this feature, installers are required to use the other two (2) tap ports of the connector

Connector & Cover Assembly:

Wire Stripping Tool: *Tap Wires

- RIPLEY® Collar and Stripping Bushings - sold separately (see next pages for more information)

Aluminum Insulation Piercing Compression Connector

TYPE YIPC INSTALLATION TOOLING

Installation instructions help the installer understand proper wire preparation, proper insertion requirements, crimp zone location, individual crimp location, crimp order, and crimp direction to ensure safe and reliable wire connections.

Installation instructions help the installer understand proper wire preparation, proper insertion requirements, and proper installation methods to ensure safe and reliable wire connections.

Upper Die:

- “M” shaped profile designed to curl the two (2) piercing legs through the main/run conductor insulation
- Die will emboss the BURNDY “Bug” logo and wire size in the insulation for post-crimp inspection

Lower Die Designed with 2 Key Features:

- Ribs: two (2) parallel ribs crimp the tap wire(s) evenly during installation
- Backstop: Intended to rest and properly align the connector in the dies for crimping

YIPC Connector as Dead-end; Cold Shrink End Cap, Wire Stripper

TYPE YIPC H-Tap Aluminum HYPIERCE CRIMPIT™ with Type CSEC Cold Shrink End Caps

The YIPC H-Tap connectors used in conjunction with the Type CSEC Cold Shrink End Caps are suitable for Dead-end applications.

Cold shrink applied end cap sealing products are made of specially formulated EPDM Rubber (Ethylene Propylene Diene Monomer) providing excellent moisture, acids, alkalis and weather resistance. End caps provide a constant pressure on the conductor to contract and expand as needed along with the cable. Installs quickly and easily, no special tools required. Operating temperature range: -40°C to 105°C.

CSEC3 - Cold Shrink End Cap
1.02"-1.94" min/max diameter application range, rated up to 2kV

Clear Cold Shrink Silicone Rubber

TYPE CCSC Clear Cold Shrink

Material: Silicone Rubber

Clear Cold Shrink tubing provides a clear way to inspect connections after installation. The clear cold shrink tubing allows inspectors to verify die index embossments on compression connections. No installation tools required. Installs quickly and easily. Operating temperature range: -40°C to 105°C.

Features & Benefits

- Length of tube is consistent before and after application
- Clear shrink tube for inspection purposes
 - Verify BURNDY die embossment
 - Verify correct number of crimps
 - Verify location of crimps
 - Verify proper strip length with no wire exposed
- Rip and Grip! Does not require heat gun or any installation tools
- Passes TELCORDIA GR-347-CORE Abrasion and Cut Test up to 750 kcmil
- cULus insulating cover for wire connectors tested in accordance to UL 486A/B
- Passes UL 746C Glow Wire Test
- Ripcord is recyclable

Inspectability to verify correct tool/die combination

Black Cold Shrink Material: Silicone Rubber

TYPE BCSC Black Cold Shrink

Material: Silicone Rubber

Cold applied shrink products are made of specially formulated silicone rubber and offer excellent insulation and moisture sealing for in-line cable connector systems. The rubber sleeves are factory expanded over a removeable, plastic rip cord housing. Installs quickly and easily. Operating temperature range: -40°C to 105°C

Features & Benefits

- Length of tube is consistent before and after application
- Easy safe installation
- Suitable for a wide range of cable sizes
- UV resistance, thermal stability
- No special tools or training required
- Forms a moisture proof seal
- Superior, time-saving insulation technology
- Indoor and Outdoor applications
- Rip and Grip does not require heat gun or any installation tools
- Passes TELCORDIA GR-347-CORE Abrasion and Cut Test up to 750 kcmil
- cULus insulating cover for wire connectors tested in accordance to UL 486/B
- Passes UL 746C Glow Wire test
- Ripcord is recyclable

Cold Seal Splice Kits Types CSB (for Low-Voltage), CSJ (with mastic)

TYPES CSB, CSJ

Cold Seal Splice Kits

These cold applied splice sealing products are made of specially formulated silicone rubber and offer excellent insulation and moisture proof sealing for in-line cable connector systems or elbow to cable jacket applications. The rubber sleeves are factory expanded and held over a removable, plastic rip core housing. Installs quickly and easily. Type CSJ also includes a mastic seal. Operating temperature range: -40°C to 105°C. Meets ANSI C119.1-1986.

Features & Benefits

- Easy, safe installation
- Suitable for a wide range of cable sizes
- UV resistance, thermal stability
- No special tools or training required
- Forms a moisture proof seal
- Superior, time-saving insulation technology
- Indoor and outdoor applications

In-Line Splice Sealing Kits Type CSB - Low Voltage conductor only

Black Cold Shrink Material: EPDM Rubber

TYPE BCSE Black Cold Shrink

Material: EPDM Rubber

Cold applied shrink products are made of specially formulated EPDM rubber and offer excellent insulation and moisture sealing for in-line cable connector systems. The rubber sleeves are factory expanded over a removeable, plastic rip cord housing. Installs quickly and easily. Operating temperature range: -55°C to 105°C. Meets ANSI C119.1-1986.

Features & Benefits

- Length of tube is consistent before and after application
- Easy safe installation
- Suitable for a wide range of cable sizes
- UV resistance, thermal stability
- No special tools or training required
- Forms a moisture proof seal
- Superior, time-saving insulation technology
- Indoor and Outdoor applications
- Rip and Grip does not require heat gun or any installation tools
- Ripcord is recyclable

Cold Shrink End Caps Type CSEC (Low-Voltage Conductor)

Type CSEC

Cold Shrink End Caps

These cold applied end cap sealing products are made of specially formulated EPDM Rubber (Ethylene Propylene Diene Monomer) providing excellent moisture, acids, alkalis and weather resistance. End Caps provide a constant pressure on the conductor to contract and expand as needed along with the cable. The rubber end caps are factory expanded and applied over a removable plastic rip core housing. Installs quickly and easily with no tools needed. Operating temperature range: -40°C to 105°C.

Features & Benefits

- Easy, safe installation
- Resists abrasive conditions
- Suitable for a wide range of cable sizes
- UV Resistance, thermal stability
- No special tools or training required
- Water resistant
- No heat or torches required
- Superior, time-saving insulation technology
- Resists acids and alkalis
- Indoor and Outdoor applications
- No training required for installation
- Easily removed with a utility knife

Overview Cold Shrink Termination

Simplifying Performance with Serious Engineering

BURNDY® HYSEAL integrated, all-in-one design ushers in a new era of medium voltage cable termination with reliability, efficiency, safety and performance.

Built-in Endseal Mastic (01)

Installed at both ends of the termination, high-performance mastic is applied at the top and bottom of the installation to help streamline installation and operation.

HYZINC Stress-Grading Mastic (02)

Greater surface coverage of our proprietary Zinc-Oxide (ZnO) formulation fills voids between the rubber body and cable substrate to deliver exceptional discharge and impulse performance. This helps mitigate issues surrounding poor cable prep - the most common cause of cable failures.

Durable Silicone Rubber Body (03)

The BURNDY® HYSEAL body is tough enough for any industrial or utility environment. Engineered to be both UV-resistant and hydrophobic, the body helps prevent moisture and airborne contaminant accumulation to maintain surface resistivity and resist current leakage.

HYZINC: The Key to Superior Stress Management

HYSEAL is the only medium voltage cable termination that uses HYZINC - a proprietary Zinc-Oxide (ZnO) silicone technology that controls electrical stress more efficiently and delivers smoother potential distribution. HYZINC is a stress-grading mastic that is applied at the semi-conductive cut-back area (in direct contact with the semi-conductive shield). Its non-linear, resistive-field grading design is based on ZnO microvaristors that can be “tuned” to a certain switching voltage. It’s made by mixing ZnO particles with an inert carrier to make a “flowable” material with the ZnO electrical properties. The result? Potential distribution that’s more linear for better overall system performance.

Silicone Cold Shrink Jacket (04)

Protecting the system for indoor or outdoor work, the HYSEAL silicone cold shrink jacket means reliable system installation without the skilled manpower demands or risk that comes with applied heat - not to mention the hot-work permits.

Single Spiral Ripcord (05)

Anyone can install the HYSEAL Medium Voltage Cable Termination. One reason? The system features an enhanced spiral ripcord design using smooth edges that make unwinding during the installation much easier on all types of cable. The ripcord pulls in seconds, securing the unit for solid, stable installation no matter what the operating environment.

MV Cold Shrink Termination Kits Industrial Series; Indoor / Outdoor

TYPE CSGO

Medium Voltage Cold Shrink Termination Kits Indoor/Outdoor Industrial Series Applications up to 35kV

Material: Silicone Rubber

To be used with Single Shielded Conductor, XLPE and EPR copper tape, drain wire shield, single shield or lead sheathed power cables for the Electrical/Industrial/Construction market.

Burndy CSGO Kit Series contains (3) one-piece, Skirted (Indoor/Outdoor) silicone rubber terminations that meet IEEE Standard 48 Class 1 for indoor and weather-protected applications. These kits are designed for terminating solid dielectric shielded power cables rated 5-35 kV.

Cold shrink cable terminations provide a quick, easy, safe and cost effective installation. No installation tools required, spiral rip cord design unwinds easily and enables quick removal of the hold-out core. Type CSGO series suitable for Indoor/Outdoor Industrial applications. Conforms to IEEE-48-1996, Class 1 and ISO/IEC 17025 Standards. Test reports available upon request.

Each kit contains sufficient quantities of material to make three terminations.

CSGO Series

Shown with BURNDY terminal lug

Features & Benefits

- Quick, consistent and easy to install
- Incorporates sealants at bottom and top of termination, saving time and effort during installation
- Unique stress control system based on microvaristor (ZnO) technology that delivers exceptional discharge and impulse performance
- More craft friendly and greater installation efficiency for easier training of field crew
- Two less steps on Shielded cable and three less steps on JCN cable versus leading competitor lowering total installed cost
- Length of tube is consistent before and after application
- Spiral rip cord design provides for easy installation with effortless unwinding providing for fast removal of the hold-out core; Rip cord is recyclable
- Insulation Level: 100%,133%
- Variations available such as kit supplied with terminal or pin connector; customer would crimp onto conductor during installation (terminal/pin connector do require proper installation tooling)

Kit Contents:

- (3) Silicon Rubber Terminations
- (3) Ground Straps
- (3) Copper Foil Tape
- (3) Constant Force Springs
- (1) Roll of PVC Tape
- (3) Mastic Strips
- (3) Cable Prep Kits
- (1) Instruction Manual

MV Cold Shrink Termination Kits Renewable Series

TYPE CSUDO-J

Medium Voltage Cold Shrink Termination Kits Renewable Series - Jacketed Concentric Neutral Sleeve Only Applications up to 35kV

Material: Silicone Rubber

To be used with single core XLPE and EPR concentric neutral underground distribution cables commonly found in the renewables and utility markets.

Type CSUDO-J (for indoor/outdoor jacketed applications) Series of Jacketed Concentric Neutral Termination Kits.

Termination kits feature a geometric stress cone for exceptional performance. Kit includes cold shrink termination, center endseal termination, and installation guide. Conforms to IEEE-48-2009, Class 1 and ISO/IEC 17025 Standards. Test reports available upon request.

Kit Contents:

- (1) Silicone Rubber Termination
- (1) Red Sealant Mastic
- (1) Roll of PVC Tape
- (1) Cable Prep Kit
- (1) Instruction Manual
- (1) Cutback Template

Features & Benefits

- All-in-one integrated body incorporating stress control and sealant mastics
- Unique stress control system based on microvaristor (ZnO) technology that delivers exceptional discharge and impulse performance
- Quick and easy installation. Offering fewest number of steps to install
- Improved spiral rip core assembly uses smooth edges for simpler installation with less effort. Heat tacked spiral core prevents unravelling during shipping and handling
- Excellent UV Resistance and hydrophobic characteristics
- Silicone rubber body provides excellent track and erosion resistance

MV Cold Shrink Termination Kits 3 Conductor Conversion Series

TYPE CS3CO-B

Cold Shrink Medium Voltage Termination Kits 3 Conductor Conversion Series - Indoor/Outdoor Sleeves with Boot

Applications up to 35kV Applications

Material: Silicone Rubber

To be used with BURNDY® Single Conductor Terminations on Three-Conductor Cables, for 35kV applications. (Terminations sold separately.)

The Type CS3CO-B Series of 3 Conductor Conversion Kits with Breakout Boot are designed to be used with single conductor, Indoor and Outdoor Cable Accessories on three-conductor (3/C) cables. The Breakout Kit is easy and quick to install, even in confined spaces - with no special tools, torch/flame or hot permits required. The BURNDY® Type CS3CO-B series with breakout boot conforms to IEEE-48-2009, Class 1 and ISO/IEC 17025 Standards. Test reports available upon request. Please order one kit per three conductor cable application.

Kit Contents:

- (1) Cold Shrink Silicon Rubber Breakout Boot
- (4) Strips of Mastic Tape
- (3) Silicone Rubber Re-jacketing Sleeves
- (1) Long Tail Tinned Copper Ground Braid with Solder Block (for Armored Cable Only)
- (1) Large Constant Force Spring
- (1) Roll Black Electrical Tape
- (1) Roll Electrical Shielding (Mesh) Tape
- (1) Cable Tie
- (1) Cable Prep Kit
- (1) Instruction Manual

* Shown with Termination Kit

Features & Benefits

- Grip and Rip! Does not require heat gun or any installation tools
- Spiral rip cord design provides for easy installation with effortless unwinding providing for fast removal of the hold-out core; Rip cord is recyclable
- All kits supplied with cold shrinkable tube (unprinted), 3-leg boot, seal, cable tie, and installation guide
- Quick, easy, cost effective installation utilizing one-piece terminator design

Medium Voltage Cold Shrink Termination Kits Accessories

TYPE BCFS

Constant Force Springs for securing solder-sealed ground braids in termination and splice kits

The Type BCFS Constant Force Springs are for use in grounding and earthing applications and suitable for use on lead and aluminum cable sheaths, steel or aluminum armor cables. Easy application by rolling onto core or outside diameter creating radial pressure.

TYPE BMESH

Tinned Copper Shielding Mesh

The Type BMESH Tinned Copper Shielding Mesh provides continuity of shielded power cables in termination kits.

Catalog Number	Width	Length
BMESH2015	2.25"	15'

TYPE BRAID-GA

Solder Blocked Braid

The Type BRAID-GA for ground or earth cable terminations provide a continuous ground for power cable shielding termination kits. Ideal for grounding shielded cable and accessories. Made of tin plated copper, compatible with common solvents, adhesives and cable oils.

Catalog Number	Conductor Equiv.	Width	Length
BRAID GA 8 SLDR BLOCKED 16"	#8	.50"	16"
BRAID GA 6 SLDR BLOCKED 16"	#6	.75"	16"
BRAID GA 4 SLDR BLOCKED 16"	#4	1"	16"

Medium Voltage Cold Shrink Termination Kits Accessories

TYPE 290-SEALANTS

The Type 290-SEALANTS offer excellent adhesion and sealing characteristics to metals, rubbers, synthetic cable insulations and jackets. Type 290-SEALANTS also provide UV resistance and are designed for outdoor conditions and sealing out moisture.

Catalog Number	Size	Width	Length
290-SEALANTS13	0, 1, 2	20mm	155mm
290-SEALANTS14	3, 4	20mm	200mm

290-SEALANTS25	5	25mm	210mm

TYPE CS-TAPE

CS34BLKTAPE is a premium grade, 8.5 mil, all-weather vinyl tape used for insulating electrical terminations or splices on high voltage repairs or cable harnesses. CS34BLKTAPE is lead free and flame retardant. Manufactured with a polymeric backing construction as well as a specialized method of bonding the adhesive to the vinyl backing, creating a highly conformable tape that delivers a moisture-tight seal in temperatures ranging from 0° F to 220° F.

CS34REDTAPE is professional grade, 7.0 mil, all-weather vinyl tape used for color-coding and phase identification in electrical applications in temperatures ranging from 0° F to 220° F. CS34REDTAP colored electrical tape is lead free and flame retardant. Manufactured with a polymeric backing construction as well as a specialized method of bonding the adhesive to the vinyl backing, creating a highly conformable tape that delivers a moisture-tight seal, even in extreme temperatures.

Catalog Number	Width	Length
CS34BLKTAPE	3/4"	60'
CS34REDTAPE	3/4"	60'

Medium Voltage Cold Shrink Termination Kits Accessories

TYPE BCPK

Multi-purpose solvent wipes; Abrasive paper

Type BCPK kit includes Solvent and Dry Wipes, and Abrasive Paper for the cleaning and preparation of electrical wires, terminations, and equipment. Available as single of each item or package with 3 of each.

Catalog Number	Qty of each	Contents
BCPK0306	3	Solvent Wipes Dry Wipes
BCPK0102	1	Strips of Abrasive Paper

TYPE BCFGK

Kit with Constant Force Spring, Copper Foil Tape, and 36" long Tinned Copper Braid

The Type BCFGK kit for grounding or earthing cables in the Medium Voltage Termination kits. Includes: Braid to be applied directly to the conductor, constant force spring to apply pressure to the ground braid and conductor, and copper foil to be applied to copper tape shield.

Catalog Number	Qty of each	Contents
BCFGK1X36	1	Constant Force Spring, Copper Foil Tape, #8 Tinned Copper Braid 36"
BCFGK2X36	1	Constant Force Spring, Copper Foil Tape, #6 Tinned Copper Braid 36"
BCFGK3X36	1	Constant Force Spring, Copper Foil Tape, #4 Tinned Copper Braid 36"

Thin Wall Heat Shrink Tubing Cross-Linked Polyolefin

TYPE HS-T-PF

Thin Wall Heat Shrink Tubing, 6 Inch Lengths

Type HS-T-PF is a flexible thin wall, flame retardant heat shrink tubing made of cross-linked polyolefin. The 2:1 shrink ratio allows for faster shrink recovery, covering wire sizes: #18 AWG to 300 kcmil. Operating temperatures from -55° C to 125° C with a shrink temperature of 120° C.

Thin Wall Heat Shrink Tubing Cross-Linked Polyolefin

TYPE HS-T-PF

Thin Wall Heat Shrink Tubing, 4 Foot Reels

Type HS-T-PF is a flexible thin wall, flame retardant heat shrink tubing made of cross-linked polyolefin. The 2:1 shrink ratio allows for faster shrink recovery, covering wire sizes: #18 AWG to 300 kcmil. Operating temperatures from -55° C to 125° C with a shrink temperature of 120° C.

Thin Wall Heat Shrink Tubing Cross-Linked Polyolefin

TYPE HS-TP (Heat Shrink - Thin Wall Polyolefin)

Thin wall heat shrink tubing

Features & Benefits

- Material: Thin wall cross-linked polyolefin
- Provides mechanical protection for terminal strain relief and wire bonding
- Ideal for industrial and automotive markets as well as for covering copper and aluminum tubular connections
- 2:1 shrink ratio for faster shrink recovery**
- -55° C to 125° C (-67° F to 275° F) Continuous Operating Temperature
- Shrink temperature of 90° C min
- Rated up to 600 Volts
- Resistant to common fluids and solvents
- Colors are flame retardant and UV resistant
- Product is available in 6 inch and 4 foot precut multi packaged lengths and a variety of reel sizes (1000, 500, 250, 200, 100, 50, and 25 feet)

Standards:

- ROHS compliant
- UL 224, 125°C (colors)
- UL224, VW-1 Flame Rated (colors)
- CSA C22.2 No. 198.1, 125°C
- AMS.3636, 3637 and 3587
- UL/CSA approval applies to black and colors
- Approved to automotive OEM specifications

**Yellow/Green heat shrink has a 3:1 shrink ratio

Typical Applications:

- Electrical Insulation of wire splices and terminals
- Strain Relief of wire terminations
- Protection against abrasion, fluids and environmental conditions

Heavy Wall Heat Shrink Tubing Cross-Linked Polyolefin

TYPE HS-H-PF

Heavy Wall Heat Shrink Tubing, Cut Lengths and 4 Foot Sticks

Type HS-H-PF is a heavy wall, heat shrink tubing made of cross-linked polyolefin. The shrink ratio is 3:1, and the inside diameter is coated with an adhesive sealant to protect against moisture and corrosion. UL486D Listed for direct burial applications. Accommodates #14 AWG - 500 kcmil conductors. Operating temperatures from -55° C to 110° C with a shrink temperature of 120° C. Rated 1000V (1kV).

Available in black only.

Heavy Wall Heat Shrinkable End Caps, Flame Retardant

TYPE HSIC-FR

Heavy Wall Heat Shrinkable End Cap

UL Listed to 600V

Type HSIC-FR, Heat Shrink Insulating End Cap Fire Retardant is a heavy wall, fire retardant end cap made of cross-linked thermally stabilized black polyolefin. Used to insulate exposed conductors in energized applications. The 3:1 shrink ratio offers greater range, accommodating copper wire sizes, #8 AWG thru 2500+ kcmil. Performs effectively over lead, aluminum, steel, polyethylene, EPR, and PVC jacketed materials. Blue thermal chromatic lines disappear indicating correct installation temperature and provide inspectability. I.D. adhesive provides superior moisture and weather resistant characteristics.

Features & Benefits

- Minimum 28 Oxygen index, UL94 V-0 Rated with self-extinguishing flame retardant properties
- 3:1 Shrink Ratio; minimum inventory required
- Thermal chromatic lines indicate proper installation
- Low shrink temperature, 150°C, only requires common hot air gun to apply
- Meets sealing requirements for ANSI-C119.1, UL486D
- Weather and moisture resistant

1. Slide the HSIC-FR end cap onto the cable and hold in place using forefinger or thumb.

2. Beginning at closed end apply heat, blue thermochromatic lines will begin to disappear at 150° C. Gradually, move heat source to open end and around cap. Once lines are no longer visible and adhesive flows out of open end, discontinue heating.

3. HSIC-FR end cap installed on cable.

Clear VISI-SHRINK™ Heat Shrink Tubing Flame Retardant

TYPE HSC-FR

VISI-SHRINK™ Fire Retardant Clear Heat Shrink Tubing

UL Recognized to 600V

Type HSC-FR is a flexible polyvinyl chloride clear heat-shrink tubing. Excellent flame retardant properties and a 2:1 shrink ratio, the VISI-SHRINK tubing enables inspectors to read die index embossments on installed connectors easily. UL Recognized, 105° C, 600V, the operating temperature from -20° C to 105° C with a shrink temperature of 135° C.

Features & Benefits

- UL 224, VW-1 Rated, self-extinguishing flame retardant properties
- Clear tubing allows inspection of die index embossment and shiner after installation is complete; should any corrosion occur it will be visible during inspection
- Low shrink temperature only requires common hot air guns to apply
- Meets MIL-M-23053/Z-206C

NOTES:

Shrink temperature is 135° C (275° F).

For best results move heat gun along the length of heat shrink to avoid concentrations.

To extend useful life, store material below 70°F.

Thin Wall Heat Shrink Tubing, Flame Retardant, Polyvinyl chloride

TYPE HS-FR

Thin Wall Heat Shrink Tubing, 25, 50, 100, and 250 Foot Reels

UL Recognized to 600V

Type HS-FR is a flexible polyvinyl chloride thin wall heat shrink. Offering insulating, color identification and strain relieving properties for terminations and splices. The 2:1 shrink ratio, allows for faster shrink recovery, covering wire sizes: #16 AWG to 1000 kcmil UL Recognized, 105° C, 600V, the operating temperature from -20° C to 105° C with a shrink temperature of 135° C.

How to Order:

Example: HSB18FR

B	-	Black
BLU	-	Blue
G	-	Green
R	-	Red
W	-	White
Y	-	Yellow

Features & Benefits

- UL 224, VW-1 Rated, self-extinguishing flame retardant properties
- Multi-use tubing; insulate, strain relief
- Easy identification available in a wide range of colors
- Low shrink temperature only requires common hot air guns to apply
- Meets MIL-M-23053/Z-206C

Heat Guns, Battery Operated, Coded

TYPE MCHSG102218V

Heat Gun

High Temperature 1022°F

Cordless battery operated (battery sold separately) 18V LXT high temperature heat gun. Features fixed LED light to illuminate the work area, trigger switch with lock-on, lock-off functions. Built in hook allows for hanging of tool. Tool case and 4 nozzle accessories included.

TYPE MHSG1202

Heat Gun

122° - 1202° F

Variable temperature corded heat gun kit with LCD digital display. Push-button temperature control ranges from 122° - 1202° F. Slide switch sets 3 air flow settings. Features a rubberized handle and integrated rear stand. Tool case and 4 nozzle accessories included.

Lightning Protection Information

Basic rules for selection are:

1. Must be like material to the conductor.
2. Two bolts to ground rod—minimum, for mechanical.
3. Cable to cable connections can be installed with one bolt, two bolt, or compression means.
4. Cable to steel structure must have 8 in.² contact with steel.
5. Heavy duty stacks—mechanical only.
6. On all connectors with heavy duty stack rating, we must offer 1/16" thick lead plating as an option. The reason is closest 25 ft. to stack opening must use lead coated product.
7. UL 96 Listing.

Most frequently ordered catalog numbers are highlighted in BLUE

HYGROUND® Compression System - Legend

The HYGROUND® Irreversible Compression System

BURNDY® has developed an irreversible compression ground system which meets the most stringent safety and performance requirements, including those of OSHA and nuclear power plant design. Performance excellence and long life expectancy are the system's basic design guidelines. It is a complete system which consists of connectors for grid cross connections, taps, splices, cable to ground rod, ground plates and terminations.

Our irreversible compression ground connectors employ well-proven design principles and technology that have been in existence for over 60 years.

Connectors are just one component of our Irreversible Compression Ground System. Installation tooling is also an integral part of this system. BURNDY® pioneered the compression connector principle and continues today to be the leader in compression technology. Our tooling package is the most extensive in the industry and affords the user many options.

Features and Benefits / Product Offering Table by Application

The HYGROUND® Irreversible Compression System (Continued)

Features & Benefits

- Irreversible compression system; meets NEC code, section 250
- Pure wrought copper extrusions, rod, and seamless tubing (identical material to the conductor), completely eliminates the possibility of galvanic corrosion due to dissimilar metals
- Heavy duty connector designs; all connectors will carry the equivalent or greater current carrying capacity of the conductor while maintaining high mechanical strength and electrical integrity
- Range take designs for a minimum number of connector combinations required to install a conductor range of #6 solid to 500 kcmil plus 1/2", 5/8", 3/4", and 1" ground rods, and rebar; inventories are kept to a minimum and product selection is simplified
- System engineered tooling; each tooling recommendation ensures reliability of the connection
- Irreversible compression connectors can be installed in all kinds of weather, eliminating costly delays and enables the installer to better schedule the job
- May be installed without special training or special tools, the 750 Series of tools crimps the entire range providing a low installed cost with simplified installation
- Each connection can be made in less than 3 minutes
- Each connector is clearly marked with catalog number, conductor size, and installation die information for easy and accurate identification
- Inspection ports are provided to assure proper insertion of the conductor for built-in quality assurance
- The die index number is embossed on the connector after completion of the crimp facilitating speedy inspection of installed connectors to ensure consistently reliable and sound connections
- Most HYGROUND® irreversible compression elements are prefilled with PENETROX™ oxide inhibitor and individually sealed to keep all contact surfaces in the proper condition for installation as well as ensuring the electrical integrity of the finished connection by inhibiting moisture and contaminants from entering the contact area
- All HYGROUND® irreversible compression connectors are Listed in conformance with Underwriters Laboratories Standard UL467 and conform to applicable sections of the National Electrical Code; HYGROUND® connectors may be used in direct burial or concrete embedded grounding applications
- All HYGROUND® irreversible connectors (with the exception of Types YGA and YGS) have been tested successfully according to requirements of Standard IEEE 837 meeting tough industry performance requirements
- UPRECRIMP dies give added mechanical strength; UPRECRIMP34 is recommended for 3/4" rod; UPRECRIMP12 for 1/2" rod; and UPRECRIMP58 for 5/8" rod (now includes undersized U.S. marketplace rods)
- HYGROUND® connectors allow connection to most sizes of structural steel with no drilling, tapping, or welding — safely installed at low cost and hot work permits are not required to install in hazardous areas

Please contact Customer Service for applications requiring IEEE-837 2014.

HYTAP™ Type YGHC-C Figure C Connector

HYTAP™ Type YGHC-C Figure C Connector

Irreversible compression ground tap figure “C” connectors. Accommodates all cable combinations from #6 solid through 500 kcmil. “C”- shaped opening permits placing two continuous parallel cables into conductor groove. UL 467 Listed. Acceptable for direct burial in earth or concrete. Prefilled with PENETROX™ compound and strip sealed. Certain sizes are also UL467 Listed and CSA Certified for wire to ground rod.

IEEE-837*

✓ UL96 Listed for Lightning Protection.

Dimensions in brackets { } represent lightning protection conductors.

① 45 Series tools require PT6515 adapter to use "U" or "PU" die

② 46 Series tools require PUADPI adapter to use "U" or "PU" die

③ When attaching connector to ground rod, ground rod must be embossed with appropriate PRECRIMP die. For connectors that must meet IEEE 837 requirements, UPRECRIMP-type precrimp dies must be used for maximum clamping retention.

No precrimp needed if using S1012, P1011 or U1011 die sets.

④ Ground rod to copper cable is UL467 Listed for direct burial in earth and concrete

⑤ These connectors cannot be installed with the 35 Series

NOTES:

Listed under UL486A for copper wire connectors
For connectors without PENETROX™ oxide inhibitor, add suffix "NP" to the end of the catalog number (example: YGHC2C2-NP)

*Please contact Customer Service for applications requiring IEEE-837 2014.

Type YGHC-CN Concentric Neutral Grounding Connector

Type YGHC-CN Concentric Neutral Grounding Connector

Type YGHC-CN irreversible compression grounding figure "C" connectors are used to ground concentric neutral used in medium voltage cable. Primarily used in wind and solar farm applications, the YGHC-CN connectors accommodate common sizes of flat strap and round concentric neutral strands. For inspection purposes, these connectors are clearly marked with the wire range, catalog number, and die set necessary for proper installation.

Features & Benefits

- Type YGHC-CN connectors provide a grounding solution for medium voltage concentric neutral commonly used at wind and solar farms
- Irreversible and maintenance free connection
- Connectors are clearly marked with wire size range, catalog number and necessary die set for proper installation
- Die embossment will appear on connector after proper installation for inspection purposes
- Accommodates both flat and round concentric neutral strands
- Type YGHC-CN connectors can be installed using the standard tools and dies similar to the traditional YGHC type connectors
- Add suffix -NP for connector without PENETROX™ oxide inhibitor

For Round Concentric Neutral

Add suffix -NP (example: YGHC26C26CNNP) for connector without PENETROX™ oxide inhibitor

HYGRID™ Type YGL-C Cross Connector

HYGRID™ Type YGL-C Cross Connector

An irreversible compression ground grid cross connector which allows adjustment of the compression elements prior to installation. Only six connectors and four dies are required to install all combinations from #6 solid through 500 kcmil. UL467 Listed. Acceptable for direct burial in earth and concrete. Prefilled with PENETROX™ compound and strip sealed.

3/4"	UPRECRIMP34	

⑧ When attaching connector to ground rod, ground rod must be embossed with appropriate PRECRIMP die. For connectors that must meet IEEE 837 requirements, UPRECRIMP-type precrimp dies must be used for maximum clamping retention. No precrimp needed if using S1012, P1011 or U1011 die sets.

HYTAP™ Type YGHP-C Ground Rod Tap Connector

HYTAP™ Type YGHP-C Ground Rod Tap Connector

Type YGHP-C irreversible compression ground tap figure 6 can be used as a ground rod tap connector for both continuous run and tapping applications. An open groove allows ground rod to be connected to a continuous run or tap. The second groove is for a tap only. Prefilled with PENETROX™ E and strip sealed. UL467 Listed for direct burial in earth or concrete. *For applications requiring IEEE-837 2014, please contact Customer Service.

Features & Benefits

- Tap A accepts a continuous run or tap conductor; Tap B accepts a tap conductor only; one connector style can be used for many applications reducing the number of connectors required in inventory
- Material is high conductivity wrought copper extrusion, identical material to the conductor, minimizing resistance and voltage drop; additionally eliminates the possibility of corrosion due to dissimilar metals
- System engineered tooling has been designed to ensure a reliable, dependable connection every time
- Die index number is embossed on connector after completion of crimp facilitating inspection of installed connectors and ensures consistently reliable and dependable connections
- Prefilled with PENETROX™ E compound and individually sealed in clear polyethylene sheet ensuring electrical integrity of the finished connection by inhibiting moisture and contaminants from entering the contact area
- UL467 Listed and may be used in direct burial or concrete embedded grounding applications providing quality assurance to recognized industry NEC standard from an independent party
- “Third Hand” constrains conductors while installer completes crimp is included with each connector simplifying installation and reducing installed cost

SINGLE TAP

CONTINUOUS RUN

CONTINUOUS RUN AND TAP

Catalog Number	Ground Rod Dia. ①	Tap Conductor ②	Dimensions			Installation Tooling Die Number ③ (# of Crimps)		Die Index
			H	L	W	35, 750 Series	④ 46 Series	
YGHP58C2W-2	1/2" - 5/8"	#2 Sol. - #6 Sol. Copper (1) Continuous Run and (1) Tap or up to (2) Taps may be connected	1.90"	0.75"	0.94"	U997 (1)	U997 (1)	997
YGHP58C2W-2TN								

① Ground rod must be precrimped with die U2CABT (Index 348); for greater rotational resistance use UPRECRIMP die; Galvanized Steel Rods require YGHP58C2W-2TN

② Either tap position may be left void when fewer than (2) conductors are used

③ See Tooling Section in Master Catalog for complete tool and die listing

④ Use PUADP1 adapter when using "U"-dies in 46 Series tools

NOTE:

A 12" bend radius is recommended for the conductor

HYTAP™ Type YGHHC-C Double Figure C Connector

HYTAP™ Type YGHHC-C Double Figure C Connector

Irreversible compression ground tap figure “C” connectors. Accommodates all cable combinations from #6 solid through 500 kcmil. “C”- shaped opening permits placing two continuous parallel cables into conductor groove. The YGHHC-C series is qualified to IEEE-837 2014. Prefilled with PENETROX™ compound and strip sealed.

HYTAP™ Type YSHG Double H-Tap Connector

HYTAP™ Type YSHG Double Figure H Connector

Type YSHG Double H-Tap grounding series is comprised of five connectors designed to accommodate wire range sizes #14 through 500 kcmil, including ground rod sizes: 3/4", 1", and rebar sizes: #6, #7, #8 and #9. Prefilled with PENETROX™ E2 and strip sealed.

Features & Benefits

- UL467 Listed, suitable for direct burial in earth or concrete
- Material is high conductivity copper extrusion to minimize resistance and eliminate corrosion due to dissimilar metals
- Grooves are prefilled with PENETROX™ E2 oxide inhibitor and individually sealed to inhibit moisture and contaminants ensuring electrical integrity

NOTES:

The catalog numbers shown are for unplated copper connectors for use on copper clad or stainless steel ground rod. To order electro-tin plated connectors for use on galvanized steel ground rod add suffix "-TN" to the catalog number. The ground rod hole diameter is larger for galvanized steel ground rod in the tin plated connector.

Complete die catalog numbers do not always appear on the connector, sometimes it is the die index.

*Please contact Customer Service for applications requiring IEEE-837 2014.

HYTAIL™ Type YGHR-C Ground Rod Tap Connector

HYTAIL™ Type YGHR-C Ground Rod Connector

Type YGHR-C irreversible compression grounding connector is engineered specifically for the Telecommunications Industry for (1, 2 or 3) #2 solid, tinned or bare conductor taps. UL467 Listed. Acceptable for direct burial in earth or concrete. BURNDY® has designed this connector to meet the stringent requirements of OSHA, the National Electric Code (NEC), UL, and the Telecommunications Industry. Performance and long life are this connector's basic design guidelines.

Features & Benefits

- Tap side: 1, 2, or 3 conductors; one connector style can be used for many applications
- Material is high conductivity wrought copper extrusion, identical to conductor material, eliminating the possibility of corrosion due to dissimilar metals, additional minimizes resistance and voltage drop
- System engineered tooling has been designed to provide a reliable dependable connection
- Die index number embossed on connector after crimp completion facilitating inspectability and ensure consistently reliable and dependable connections
- Prefilled with PENETROX™ compound and individually sealed in clear polyethylene sheet ensuring the electrical integrity of finished connection by inhibiting moisture and contaminants from entering the contact area and maintaining long-term high conductivity
- UL 467 Listed, acceptable for direct burial or concrete embedded grounding applications providing quality assurance to recognized industry NEC standards from an independent party

Catalog Number	Ground Rod ③ Diameter	Tap Conductor ⑦	Installation Tools, Die Set Catalog Number (# of Crimps)		Die Index

GROUNDTAB for metal structure grounding (welding req'd)

GROUNDTAB for Metal Structure Grounding (requires welding)

The BURNDY® GROUNDTAB offers a convenient attachment point for terminations of ground wires to steel structures or steel supports. The tabs are easily welded to steel, with two mounting pattern options available. The tabs are made of steel, 1/4" thick, and can be used to attach 1-hole or 2-hole terminals. Compression terminals, mechanical terminals, or SERVIT® Posts can be used to attach ground wires to steel tabs. All connection options and necessary hardware are sold separately. Often used when traditional connection methods are not practical, or when temporary grounds are required. Common applications include large generators, mobile construction site modules, housing structures built in permafrost areas, and in any metal structure requiring a permanent or temporary ground option.

Features & Benefits

- Convenient
- Can be used to attach 1-hole or 2-hole terminals
- 1/4" thick steel
- Easily welds to steel
- Offers many connection options
- Used when traditional options are not practical

GROUNDTAB with Type YGA HYGROUND® compression terminal and hardware.

Type YGF Grounding Plate

Type YGF Grounding Plate

The irreversible compression ground plate is designed to withstand the rigors of concrete construction. The ground plates are made of high strength, high-conductivity cast copper alloy body with a pure wrought copper compression element. In addition to the tapped NEMA size holes and spacing on the face, the plate comes with a tapped hole on the underside for ease of positioning prior to pouring the concrete. UL467 Listed. Acceptable for direct burial in earth or concrete. Prefilled with PENETROX™ compound and strip sealed.

Fig. 1

IEEE-837*

Fig. 2

NOTES:

① This tapped hole may be used to position the grounding plate on a threaded rod prior to placement of the concrete. 3/8-16 thread with 1.00 EFF. Thread is standard. If other thread is required, add appropriate suffix code to catalog number. -50 (1/2-13, .94 EFF. Thread), -62 (5/8-11, .94 EFF. Thread) and -75 (3/4-10, .81 EFF. Thread) Example: YGF34-4N-50 is YGF34-4N with 1/2-13 Thread

② Plastic plugs are provided to keep dirt out of the threaded holes until the attachment of grounding terminals

① 45 Series tools require PT6515 adapter to use "U" or "PU" die

② 46 Series tools require PUADPI adapter to use "U" or "PU" die

③ These connectors can only be installed using the 750, 45, or 46 series of tools.

*Please contact Customer Service for applications requiring IEEE-837 2014.

GROUNDLINK™ Type YGIB for Structural Steel Beam

GROUNDLINK™ Type YGIB for Structural steel angled or parallel beam

An irreversible compression ground connection which allows attachment to a structural steel standard (angled) or wide flange (parallel) beam. Installed with a required 5-piece die set, Catalog PIBEAMKIT or UIBEAMKIT. See table below for more detail. Die index 1105. GROUNDLINK™ connectors are made of high-conductivity wrought copper and come pre-filled with PENETROX™ E compound and strip sealed. Order terminal mounting hardware separately.

IEEE-837*

Connector shipped with thread protection studs only. Order TMHG kits separately.

NOTES:

Terminal connector to be ordered separately. When I-beam connector is used with type YGHA terminal, the connection meets IEEE 837. YGA-2N, YA-2N and other BURNDY 2-hole NEMA copper terminals are suitable.

Order TMHG Terminal Mounting Hardware Kit separately. Kit consists of 2 studs, 2 flat washers, 2 lockwashers and 2 hex nuts.

Using the 1/4 hex key wrench, screw the stud into the connector until stud bottoms out in connector. Install a YGHA terminal, flat washer, lockwasher and hex nut onto stud. Tighten and torque to 480 pound-inches.

Dimensions shown in I-Beam Flange Thickness column reflect the minimum dimensions required on a beam to properly install the I-Beam connector.

To correctly determine the appropriate YGIB connector to use based on flange thickness, order either YGIBGAUGE1 or YGIBKIT1 (KIT1 contains WIREMIKE).

Tooling Recommendations:

PAT750 Series tool required for I-Beam flange thickness ranging from 0.250"-0.338" with UIBEAMKIT

PAT46 Series tool required for I-Beam flange thickness ranging from 0.690"-1.06" with PIBEAMKIT

VERSITAIL™ Structural Steel Grounding Connector

VERSITAIL™ Type GSTUD-HY Structural Steel Grounding Connector

INSTALLATION

1. Weld the VERSITAIL™ to the steel member
2. Select the proper connector for your specific application

FOR COMPRESSION CONNECTORS

Select the proper HYGROUND® Type YGHP connector. Clean the conductor, join the VERSITAIL™ and the grounding conductor together with the recommended tool and die set, then crimp the connector over the knurled area of the VERSITAIL™ connector.

FOR MECHANICAL CONNECTORS

Select the properly sized BURNDY® mechanical connector. Clean the conductor, apply PENETROX™ E oxide inhibiting compound on the contact area for increased effectiveness and service life. Put the connector over the knurled area of the VERSITAIL™ connector and apply the recommended torque value for correct installation.

Features & Benefits

- The VERSITAIL™ may be welded to steel surfaces quickly and easily with normal construction equipment
- The VERSITAIL™ eliminates costly disk grinding and the need to expose virgin metal, the welding process burns through the oxidation and “scale” to establish excellent electrical grounding continuity
- The VERSITAIL™ may be installed by the welder in the field or at the steel fabricator based on customer preference
- The VERSITAIL™ pure copper coating over low carbon, hot rolled steel is compatible with standard welding processes, no toxic gasses are generated
- The VERSITAIL™ has a knurled surface, copper plated and specifically designed to ensure excellent mechanical gripping and electrical integrity for BURNDY® compression and mechanical connectors in all grounding applications
- The VERSITAIL™ may be installed in all weather conditions, eliminating costly construction delays
- Low installation cost
- No drilling
- No cleaning
- No special preparation
- Low carbon, hot rolled steel

Catalog Number	Nom Rod Size	A	B	L	T	Electrical Equivalent Copper Conductor Size (AWG)*
GSTUD14HY	1/4"	0.25	0.26	4.81	0.19	#6
GSTUD38HY	3/8"	0.38	0.39	5.81	0.25	#3
GSTUD916HY	9/16"	0.56	0.57	5.68	0.38	1/0
GSTUD34HY	3/4"	0.75	0.76	5.81	0.51	4/0

* This is the equivalent rating for continuous service.

Large conductors may be connected using both compression and bolted connectors in potential ground fault applications.

Type YG-B Connector for Structural Steel or Bus Bar

Type YG-B Connector for Structural Steel or Bus Bar

The BURNDY® YG-B series of compression connectors are ideally suited for bus bar, cell tower structures, structural steel, and steel infrastructure such as equipment supports, steel railings and ladders.

These high conductivity copper connectors allow attachment of a ground conductor to structural steel, rail or bus bar, with just one crimp using a BURNDY® 750-style HYPRESS™ head. The exclusive design allows the user to attach tap conductor(s) to 1/8" to 9/16" thick rail, bus bar, or flat steel.

Most connectors are suitable for 1 or 2 conductors for power or grounding and bonding applications. Prefilled with PENETROX™ compound with the addition of a grit material and strip sealed.

Fig. 1

Fig. 2

Fig. 3

Catalog Number	Figure #	Steel / Bar Thickness	Tap Conductor(s) Accommodated	Tooling	Installation Die	# of Crimps
YG14B2TC2C6C ①	1	1/4"	#2 Sol. and/or Str. Copper #6 Sol. and/or Str. Copper	750 Series	U1105	1
YG14B2TC2C2C ②	2	1/4"	#2 AWG - #2 AWG Copper	750 Series	U1105	1
YG14BTC28 ③	3	1/8" - 1/4"	4/0 AWG Str. to 1/0 AWG Str. Copper	750 Series	U1105	1

For Tin Plating add the -TP suffix.

① UL Listed, CSA Certified, Rated for Direct Burial; can accept 1 or 2 conductors

② U-shaped tap groove can only be used with #2 Solid wire; can accept 1 or 2 conductors; suitable for continuous uncut conductor applications

③ cULus Listed, Rated for Direct Burial; can accept only 1 conductor

HammerTap Ground Rod Clamp

HammerTap Ground Rod Clamp

The Burndy HammerTap offers an irreversible ground rod connection. This durable design is UL 467 Listed for wire to ground rod. No special tools or training are needed for installation. The connection can be made easily using just a hammer.

Features and Benefits

- Irreversible connection option without having to weld and does not require special tooling
- Minimal training required
- Provides a visual verification that the connection is safely installed correctly
- Fast, easy, and safe connections that can be made in any environment using just a hammer
- Can be used as a termination or a “T” (pass-through) ground rod connection

Catalog Number	Ground Rod Size	Wire Range Accommodated	Number of Conductors
HT6C58	5/8"	#6 Solid - #4 Solid	1
HT2C58	5/8"	#4 Stranded - #2 Stranded	1

Compression Solution for Flexible Bus Bar Applications

Type BFB Industry-exclusive Compression Solution for Flexible Bus Bar Applications

The BFB terminals lugs are an innovative compression solution for connecting the ends of flexible bus bar. Offering a faster, safer, and cleaner alternative to methods used today, these lugs are compatible with most sizes of flexible bus bar. Installed with the 750 Series of 12-ton crimp tools with specifically designed UBFB-style dies.

Typically used in panel boards, switchboards, transformers and similar applications, flexible bus bar is gaining popularity. After the flexible bus bar has been shaped and customized for the application at hand, it must be connected to the structure. Typical installation methods rely on drilling (time consuming with a risk of inaccuracy of customized stud holes), punching (which can distort the shape of the conductor), and welding (can be hazardous and requires specific training). Utilizing the new BFB terminals lugs requires No Drilling, No Punching, and No Welding for proper, inspectable installation.

Figure 1

Figure 2

Features & Benefits

- Industry Exclusive! Only offered by BURNDY®
- Eliminates the need to drill through copper sheets, ensuring a cleaner, faster installation
- Full inspectability with the BURNDY® Engineered System
- 1-hole and 2-hole options available to accommodate spacing requirements
- Most flexible bus bar sizes accommodated
- Locator lines on terminals provide for accurate and consistent crimping
- UL Recognized to UL67 for Panelboard Equipment

SERVIT POST™ Connectors Type KC, K2C

Mechanical Grounding Connectors Overview

More than 60 years of technological innovation has made BURNDY® mechanical grounding connectors one of the most widely used and highly respected lines in the industry. There is virtually no grounding application challenge that this diversified line cannot help solve.

All BURNDY mechanical grounding connectors have been designed for easy installation and outstanding durability. Only the finest high copper alloys are used in their manufacture, ensuring top performance under the most extreme environmental conditions.

Types KC, K2C SERVIT POST™ Connectors for copper cable to flat

SERVIT POST™ connectors are used to ground one or two cables to steel structures, fence posts, and transformers amongst other things. Also these connectors can be used to tap one or two cables from bus bar. One-wrench installation.

UL467 Listed for the US and Canadian markets.

Note:

Use KF or K2F designation for female SERVIT POST™

Add suffix -NSP to catalog numbers to have connector supplied with split lockwasher and nut

Bulkhead Ground Connector Type KCKF

Type KCKF Bulkhead Ground Connector

The “Bulkhead” connector is designed to allow a ground wire to be connected from the inside of a box or enclosure to the outside of a box or enclosure.

This new connector is supplied in kit form with a male SERVIT POST™, female SERVIT®, (2) stainless steel washers, split lock washer and sealing washer.

The available “Application Guideline” document helps describe the application with visuals and installation examples.

Features & Benefits

- Provides an easy way to connect ground wires “through” an enclosure wall
- Includes Male SERVIT POST™, Female SERVIT®, (2) Stainless Steel Washers, Split Lock Washer, Sealing Washer
- Split Lock Washer allows adjustment of conductor orientation
- Made of Silicon Bronze material (connectors) and Stainless Steel Hardware, Sealing Washer
- Meets NEMA 4X requirements when installed correctly
- Application Guideline document available
- Industry-proven split bolt/SERVIT POST™ technology
- UL467 Listed for the US and Canadian Markets

	Qty	Description
1	1	Male Servit Post
2	1	Stainless Steel Split Lock Washer*
3	2	Stainless Steel Flat Washer*
4	1	Sealing Washer*
5	1	Female SERVIT*

*One flat washer and sealing washer to be installed on outside of box or, where applicable, to side of wall exposed to atmospheric or contaminated conditions. Remaining hardware to be mounted to opposite side of the wall as shown.

Type KS SERVIT® Split Bolt Connector for Copper

Compact, high strength, high copper alloy SERVIT® split bolt has free-running threads and easy to grip wrench flats. Highly resistant to season cracking and corrosion, the SERVIT® connectors provide maximum pressure and assure a secure connection on all combinations of run and tap conductors.

*Rated for Direct Burial in earth or concrete

Ground Rod Clamps; High Strength; Range taking

Type GRC High Strength Ground Rod Clamp for Copper Cable to Rod

High copper alloy ground connector for joining a range of cable to copper clad, galvanized steel, and stainless steel ground rods. Slips over end of rod, one-wrench installation. UL467 Listed for direct burial in earth and concrete.

Rated for Direct Burial in earth or concrete

UL467 Listed for the US and Canadian Markets

Copper Cable to Bar; Two Copper Cables to Bar

Types GB, GBM, GBH Ground Connector for Copper Cable to Bar

High copper alloy ground connector for joining a range of cable to 1/4" thick bar.* Type GB separates cable from bar, GBM clamps cable directly on bar surface. The high copper alloy cast body and DURIMUM™ silicon bronze bolts, nuts, and lockwashers make the GB, GBM and GBH suitable for direct burial in concrete or ground. Types GBH area heavy duty connectors qualified to IEEE837-2014. See Note at the bottom of the page.

Copper Lay-In QIKLUG™ Connectors Types CL50-1, CL50-1TN, CL

Types CL50-1, CL50-1TN Copper Lay-in QIKLUG™ for Copper

The Lay-In QIKLUG™ is manufactured from high strength pure electrolytic copper to ensure maximum strength and conductivity. The open-faced design allows for fast lay-in of the conductor without the need for cutting or breaking. Stainless steel screws used for excellent corrosion resistance.

Rated for Direct Burial in earth or concrete

UL467 and UL2703 Listed for the US and Canadian Markets*

† Stainless Steel Mounting Hardware; Hex Head Self Tapping Screw and Washer

‡ Stainless Steel Mounting Hardware; Slotted Hex Head Machine Screw, Washer, Nut

Photo above shows a typical solar panel installation using CL50-1TN connectors.

Type CL Copper Lay-in QIKLUG™ for Copper

Manufactured for maximum strength and conductivity, these lay-in lugs allow for continuous runs of conductor and are well suited as terminations as well. Tin-plated, set screw style connectors, three sizes cover a range from #14 AWG to 250 kcmil.

CL3/0-516TN and CL250-516TN are UL 486A-B Wire Connectors and CSA Certified. CL1/0-14TN UL Listed for grounding and CSA Certified. 90° C rated. Suitable for copper conductors only.

Type GC-CT Cable Tray Ground Clamp

This unique connector incorporates features which are unmatched. Made of tin-plated cast copper alloy, it accommodates either one or two conductors, copper or aluminum cable. In addition to a low profile head with a deep Phillips recess, the galvanized steel bolt has a ribbed neck which prevents rotation during installation when installed in a 0.44 diameter hole.

Rated for Direct Burial in earth or concrete

UL467 Listed for the US and Canadian Markets with copper conductor only

For aluminum conductor, the cable must be scratch brushed and PENETROX™ A joint compound must be applied on the cable and connector

NOTE:

The bolt head is mounted on the inside wall of cable tray to avoid damage to the cable insulation. May be used with aluminum or galvanized steel cabletray.

Types BTCGC, BTCGC-SS Cu/Al Conductor to Al/Steel Cable Tray, Solar PV Module Frames or Galvanized Steel Purlins

Made of tin-plated aluminum, the BTCGC and BTCGC-SS cable tray and flange clamps accommodate aluminum or copper conductor #14 AWG through 250 kcmil. SS version is suitable for outdoor applications. The BTCGC clamp may be used with most types of cable tray with an inside or outside flange design or surfaces with flat flanges.

Quick and easy installation requiring no drilling or special tools; use with 1/2" maximum straight rail, aluminum and steel cable trays. Tin plated for durability and corrosion resistance.

Features & Benefits

- Tin plated aluminum for durable, long lasting corrosion resistance
- UL2703 Listed for solar applications within the US and Canadian Markets*
- UL467 Listed for the US and Canadian Markets
- Accommodates most common styles of cable tray with inside or outside flange
- Quick and easy installation; no drilling or special tools required
- Set screw bonds clamp to the mounting surface while another set screw securely fastens the grounding conductor to the clamp providing vibration resistance and outstanding pull-out values
- Grounding Green Stainless Steel Hardware*
- BTCGC4SS UL 2703 approved for Solar PV Module Frames up to 1/4" thick

Ground Connector to Steel The CONSTRUCTOR®; Type GCS-HEX

Type GCS-HEX; The CONSTRUCTOR® Ground Connector to Steel

The Type GCS-HEX series of connectors are used to ground cable to steel, I-beam, storage containers, or other flanged surfaces, in applications where drilling is either not possible or unwanted. Installation of the GCS-HEX type connectors requires no power tools and is suitable for applications where a removable connection is desired. The CONSTRUCTOR® GCS-HEX series of grounding connectors are UL Listed for Grounding and Bonding and Direct Burial Rated for installation in earth and concrete.

Features & Benefits

- ★ Easy and simple hex tooling installation
- ★ No hot work permit or drilling required
- Versatile; allows parallel or perpendicular conductor orientation
- Accepts 1 or 2 conductors
- Accepts beam thickness .125 - 1.000" (1/8 to 1")
- Conductor range from #6 AWG to 500 kcmil
- UL467 Listed
- Rated for Direct Burial in earth or concrete

Tower Ground Clamps 1-Hole Clamp (with WEEB® Washer)

Types GCSYA-WEEB, GCS2YA Tower Ground Clamps

The GCSYA-WEEB and GCS2YA series of connectors are used to terminate the equipment grounding conductor (EGC) to the tower structure, in applications where drilling or hot work permits are either not possible or unwanted. Installation requires no power tools and is simple to install. The GCSYA-WEEB single hole version is assembled with a WEEB® Washer to reduce one-hole lug rotation. These connectors can also be used in a variety of other applications as it is suitable to bond steel from 1/8" - 5/8" thick.

Features & Benefits

- Provides proper grounding of towers
- Easy and simple hex tooling installation
- No hot work permit or drilling required
- Includes compression lug and anti-rotation WEEB® Washer for one-hole applications
- Accommodates steel 1/8" to 5/8" thick
- Conductor range from #8 AWG to #2 AWG
- UL467 Listed
- AT&T Approved

Parallel or 90° Copper Cable Connection to Rod or Pipe

Type GAR for Parallel or 90° Copper Cable Connection to Rod or Pipe with the same connector

High copper alloy ground connector for joining a range of cable, parallel, or at right angles, to rod or tube. Especially good for fence posts. High copper alloy cast body with DURIUM™ Silicon Bronze U-bolts, nuts, and lockwashers, permit entire connection to be buried in earth or concrete without danger of corrosion.

Features & Benefits

- Wire to Rebar
- Fence Post Grounding Connector
- Wire to Pipe
- One-wrench installation
- Rated for Direct Burial in earth or concrete
- UL467 Listed for US and Canadian Markets
- Select connectors qualified to IEEE-837-2014

Ground Connectors Types GAR-BU, GAR3902

Types GAR-BU, GAR3902 Ground Connectors

Type GAR-BU is a high-conductivity copper ground connector for connecting a small to medium range copper ground conductor to water pipe as well as structural and reinforcing rod shapes. Universal acceptance of several sizes of cylindrical shapes makes this suitable for industrial construction and maintenance work as well as cathodic protection. Cable clamp swivels to permit parallel grounding of one pipe or 90° degree cable run for grounding several parallel pipes. Single wrench installation. UL467 Listed and CSA Certified.

Features & Benefits

- Cable clamp swivels at 90°; permits parallel grounding of one pipe on a 90° cable run for grounding several parallel pipes
- One-wrench installation for simplified installation
- DURIMUM™ silicon bronze hardware (-BU Series)* provides long lasting corrosion resistance and acceptable for direct burial in earth of concrete
- Rated for Direct Burial in earth or concrete
- UL467 Listed for the US and Canadian Markets; provides quality assurance to recognized industry NEC standards from an independent party

① Type GAR-BU is supplied with DURIMUM™ silicon bronze hardware and is Listed for direct burial

② Standard Type GAR-3900 series supplied with galvanized U-bolt and hardware

** Refer to Section O for tube dimensions.

Water Pipe Ground Connector with Pad Type GAR-TC

Type GAR-TC Water Pipe Ground Connector

Type GAR-TC is a high-conductivity copper ground connector that features a pre-drilled pad, allowing a 2-hole compression terminal to be directly connected to water pipe as well as structural and reinforcing rod shapes. Universal acceptance of several sizes of cylindrical shapes makes this suitable for industrial construction and maintenance work as well as telecommunications grounding. Terminal may be mounted parallel, 45° or 90° degrees to the pipe. Acceptable for direct burial.

Features & Benefits

- Large, smooth connector contact area between pipe and ground clamp to maximize contact area between connector and pipe
- Type GAR-TC mounting pad permits parallel, 45°, or 90° angle connections to pipe for maximum flexibility for field installation
- Pre-drilled pad for (2) 3/8" bolts on 1" centers to allow for direct mounting of 2-hole compression terminals up to 750 kcmil to pipe
- DURIMUM™ silicon bronze hardware for long lasting corrosion resistance; acceptable for direct burial in earth or concrete
- One-wrench installation
- UL467 Listed for the US and Canadian Markets; provides quality assurance to recognized industry NEC standards from an independent party; Type GAR-TC is acceptable for Direct Burial in earth or concrete

PATENTED

GAR3909TC	2	12	12.75	14.00	3/8	15.25	240

NOTES:

** Refer to Section O for tube dimensions.

Clean pipe surface beneath saddle until virgin metal is exposed, install GAR-TC ground connector and for maximum conductivity, apply PENETROX™ E oxide inhibiting compound around perimeter of saddle.

Add suffix "-TNET" for electro-tin plated connector and electro-tin plated DURIMUM™ silicon bronze hardware. Tin plated catalog number includes mounting hardware for second bolt hole.

OPTIONAL MOUNTING HARDWARE

TMH-289 includes (1) 38X125HEB bolt, (1) 38CHEN nut, (1) 38SW split washer and (2) 38FW flat washers, ordered separately.

Two Copper Cables to Rod or Tube; Type GD Ground Connector

Type GD Two Copper Cables to Rod or Tube

High copper alloy ground connector for joining a range of two parallel cables to rod or pipe. Especially good for grounding fence posts. High copper alloy cast body with DURIUM™ silicon bronze U-bolts, nuts, and lockwashers make the Type GD ground connectors are UL 467 Listed, suitable for direct burial in earth or concrete. One-wrench installation.

Features & Benefits

- Rated for Direct Burial in earth or concrete
- UL467 Listed for the US and Canadian Markets
- One-wrench installation

NOTE:

** Refer to Section O for tube dimensions.

Complies with NFPA 78-86 HEAVY DUTY stacks; use suffix "-LD" for lead plating for HEAVY DUTY stack applications

Two Copper Cables to Rod, Pipe, or Column, Type GP

Type GP Two Copper Cables to Rod, Pipe or Column

High copper alloy ground connector for joining a range of two parallel cables perpendicular to rod, pipe or column. Also used with one groove for run, the other for tap to equipment. High copper alloy cast body and DURIMUM™ silicon bronze U-bolts, nuts, and lockwashers make Type GP connectors UL467 Listed and suitable for direct burial in the ground or concrete. One-wrench installation. UL467 Listed. Acceptable for direct burial in earth or concrete.

Features & Benefits

- Rated for Direct Burial in earth or concrete
- UL467 Listed for the US and Canadian Markets
- One-wrench installation

Three Copper Cables to Rod or Pipe, Type GK Ground Connector

Type GK For Three Copper Cables to Rod or Pipe

High copper alloy ground connector for joining three equal cables to rod or tube. Cable grooves take a wide range of cable. High copper alloy cast body and DURIMUM™ silicon bronze U-bolts, nuts, and lockwashers make the GK suitable for direct burial in soil or concrete. One-wrench installation. UL467 Listed. Acceptable for direct burial in earth or concrete.

Features & Benefits

- Rated for Direct Burial in earth or concrete
- UL467 Listed for the US and Canadian Markets
- One-wrench installation

Ground Connector for Copper Bar, Strap, Braid, Cable to Rod or Tube

Type GG For Copper Bar, Strap, Braid, or Cable to Rod or Tube

High copper alloy ground connector for joining bar, strap, braid or cable to rod or tube. High copper alloy cast body, DURIMUM™ silicon bronze U-bolts, nuts and lockwashers make the GG particularly effective for use with braid for ground rods, switch handles, fence posts and gates.

Rated for Direct Burial in earth or concrete

UL467 Listed

One wrench installation

Ground Connectors with Breakaway Nuts

Types GAR-BU, GAR-TC, GG, GB with Breakaway Nuts

Convenience and safety are important factors for projects. These grounding connectors with breakaway nuts create both a secure and easy way to install connectors.

In areas with high foot traffic or where theft is an inherent issue, BURNDY® offers connectors with the Tamper Resistant Nut (-TR suffix). The TR Nut consists of a conical body and a standard hex nut connected by a shear section. The standard hex nut shears off when the torque exceeds the specified value. The conical body remains providing resistance to connector removal.

For ease of installation, the Double Torque Nut (-BA suffix) allows for repeatable installations without specialized tools. The BA Nuts consist of two standard hex nuts connected by a shear section. The upper hex nut shears off when the torque exceeds the specified value. The lower hex nut remains, allowing for connector removal.

Per NEC 110.14D, "shear bolts or breakaway-style devices" are an approved means to achieve specified torque values. As part of a torque compliance audit program all electrical fasteners should have a torque indicating mark after installation to provide evidence of proper installation and long term vibration secureness. Easy and simply hex tooling installation, no specialized tools required.

Features & Benefits

- TR suffixed connectors are tin-plated for further anti-theft protection and corrosion resistance
- Bronze breakaway nuts and silicon bronze bolts/washers for better conductivity and installation performance
- Suitable for Direct Burial
- Reach out to a Burndy Territory Manager for additional Burndy mechanical connectors with breakaway nuts

BA Suffix

TR Suffix

Breakaway Nuts	Description
Double Torque Nut (BA Suffix)	Consists of two standard hex nuts connected by a shear section. The upper hex nut shears off when the torque exceeds the specified value. The lower hex nut remains, allowing for connector removal.
Tamper Resistant Nut (TR Suffix)	Consists of a conical body and a standard hex nut connected by a shear section. The standard hex nut shears off when the torque exceeds the specified value. The conical body remains, providing resistance to connector removal.

Ground Connectors with Breakaway Nuts

Connectors with Breakaway Nuts (continued)

NOTES:

Refer to Main Catalog Page (Type GB, Type GAR-TC, Type GAR-BU, and Type GG) for additional offerings

Type GB

Ground connector for joining a range of cable to 1/4" thick bar or surface

Catalog Number	Description	Accommodates		
		Cable Range	Bar Thickness	Stud Size
GB26BA	GB26 Connector with Double Torque Nuts	4 AWG-2/0 AWG	up to 1/4"	3/8"
GB26TR	GB26 Connector with Tamper Resistant Nuts			

Type GAR-TC

Ground connector that features a predrilled pad allowing a 2-hole compression terminal to be directly connected to water pipe, tube, post and reinforcing rod shapes

Catalog Number	Description	Accommodates			
		IPS	O.D. Size	Lug Pad	Max. Conductor Size
GAR3903TCBA	GAR3903TC Connector with Double Torque Nuts	1-1/4" - 2"	1.66 - 2.38	2-hole lug - 3/8" bolts on 1" centers	Up to 750 kcmil
GAR3903TCTR	GAR3903TC Connector with Tamper Resistant Nuts				
GAR3904TCBA	GAR3904TC Connector with Double Torque Nuts	2-1/2" - 3-1/2"	2.88 - 4.00		
GAR3904TCTR	GAR3904TC Connector with Tamper Resistant Nuts				

Type GAR-BU

Ground connector for connecting a copper ground conductor to water pipe, tube, post and reinforcing rod shapes

Catalog Number	Description	Accommodates		
		Cable Range	IPS	O.D. Size
GAR3903BUBA	GAR3903BU Connector with Double Torque Nuts	#4 - 4/0 AWG	1-1/4" - 2"	1.66 - 2.38
GAR3903BUTR	GAR3903BU Connector with Tamper Resistant Nuts			
GAR3904BUBA	GAR3904BU Connector with Double Torque Nuts	#4 - 4/0 AWG	2-1/2" - 3-1/2"	2.88 - 4.00
GAR3904BUTR	GAR3904BU Connector with Tamper Resistant Nuts			
GAR3905BUBA	GAR3905BU Connector with Double Torque Nuts	#4 - 4/0 AWG	4" - 5"	4.50 - 5.56
GAR3905BUTR	GAR3905BU Connector with Tamper Resistant Nuts			

Type GG**

Ground connector for joining bar, strap, braid or cable to water pipe, tube, post and reinforcing rod shapes

Catalog Number	Description	Accommodates		
		IPS	O.D. Size	Braid Width
GG171BA	GG171 Connector with Double Torque Nuts	1-1/2"	1-5/8" - 1-7/8"	1"
GG171TR	GG171 Connector with Tamper Resistant Nuts			
GG181BA	GG181 Connector with Double Torque Nuts	2"	2" - 2-3/8"	1"
GG181TR	GG181 Connector with Tamper Resistant Nuts			

SUPER-CLAMP™, Raised Floor / Rebar / Fence Post Ground Connector

Type GXP1828RF SUPER-CLAMP™

Raised Floor / Rebar / Fence Post Ground Connector

Raised Floor Pedestal / Rebar / Fence Post Ground Connector. The GXP1828RF is a versatile, easy to install, range taking ground connector. This grounding clamp accepts a wide range of pedestals and conductors. Accepted pedestal / fence post range is 3/4" through 2" (7/8" - 2" round; 3/4" - 1-1/2" square). The wire range is #6 solid to 4/0 stranded. The wires can be arranged in a parallel or cross grid configuration - accepts 1 or 2 wires.

The high copper alloy body ensures excellent conductivity and the hardware is made of stainless steel. The connector is rated for Direct Burial in earth or concrete and UL467 Listed for the US and Canadian Markets. The versatility of the connector makes it an excellent choice for applications requiring multiple conductor sizes and/or configurations.

Features & Benefits

- Fits a wide range of raised floor pedestals / fence posts, from 3/4" to 2" (7/8" to 2" round; 3/4" to 1-1/2" square)
- Accepts a wide range of wire sizes, #6 solid to 4/0 stranded
- Can be used for rebar sizes ranged from #7 to #12 size (7/8" to 1-1/2" dia.)
- Accommodates parallel wires or cross grid arrangements; wires can be installed in cross grid configuration
- Accepts one or two wires in any configuration
- Easy to install open design eliminates the need to disassemble before installing
- One socket size fits all hardware (1/2" socket size)
- Made of high copper alloy with stainless steel hardware
- UL467 Listed for the US and Canadian Markets
- Rated for Direct Burial in earth or concrete

UNIGROUND™ Type GRF Raised Floor Grounding Connector

Type GRF UNIGROUND™

Raised Floor Grounding Connector

The BURNDY® UNIGROUND™ is a universal grounding clamp, specifically designed for all raised flooring systems. It can be installed on round or square pedestals and can accommodate one or two grounding wires to make an efficient grid. The underfloor signal reference grid provides the low impedance ground path that attenuates high frequency static and 60 Hz transient noise for cleaner data output. UL467 Listed.

Features & Benefits

- One connector fits all applications
- Ease of specification and installation
- Single bolt design with no need to disassemble
- Single wrench installation
- Accepts 1 or 2 ground conductors
- Requires less connectors to install signal reference grid
- Tin plated cast bronze construction
- Resists corrosion and provides extended life ground connection
- Grounds all pedestals (round or square); will accept up to 7/8" square and up to 1" round
- Serves 3 needs: Signal Reference Grid, Static Ground, and Fault Current Ground
- UNIGROUND™ connector will solve all grounding problems found in computer applications today
- UL467 Listed for the US and Canadian Markets

Catalog Number	Number of Conductors	Conductor Size Sol. & Str.	Pedestal Type		B	H	J	W
			Round	Square

Types GP-G1, GP-RT Raised Floor Grounding Clamps

Types GP-G1, GP-RT

Raised Floor Grounding Clamps

High copper alloy ground connector for raised floor computer grounding applications. These connectors can be installed on round and square pedestal applications and will accommodate one or two grounding wires to make an efficient grid. The underfloor signal reference grid provides the low impedance ground path that attenuates high frequency static and 60 Hz transient noise for cleaner data output. UL467 Listed.

In addition we offer the GP1726RT, which is specifically designed for penetrating epoxy paint on pedestals. This patented connector offers a low impedance, time saving connection between conductors and the pedestal.

Features & Benefits

- Accepts 1 or 2 ground conductors
- Requires less connectors to install signal reference grid
- Made of copper alloy
- DURIUM™ Silicon Bronze U-Bolts, nuts and lockwashers
- Provides a low impedance ground path for maximum performance
- Grounds all pedestals (round or square)
- Accepts from 3/4" to 1" round or square
- Ease of installation
- Serves 3 needs: Signal Reference Grid, Static Ground, and Fault Current Ground
- Connectors solve all possible grounding problems found in computer applications today
- UL467 Listed for the US and Canadian Markets

Fence Fabric Ground Clamps, Type FFGC

Type FFGC Fence Fabric Ground Clamps

Fence grounding systems are designed to provide protection against dangerous “touch” potentials. The Fence Fabric Ground Clamp is an integral component of this personnel safety system.

With its unique design the clamp can form a connection at virtually any angle. Specific uses include connection to both fence fabric and barbed wire. The conductor maintains a path to ground while connected to an object that is parallel, perpendicular or any degree in between.

Tin plated copper clamp includes stainless steel hardware and allows for use on most metallic surfaces including galvanized steel. Other sizes available; please contact factory for information.

Catalog Number	Conductor Size	Recommended Torque (in-lb)
FFGC8	#8	67
FFGC6	#6	67
FFGC4	#4	67
FFGC2 ①	#2	67
FFGC2/0	2/0	67

① Qualified to IEEE837-2014

Features & Benefits

- Clamp can form connections at virtually any angle
- Tin plated copper clamp includes stainless steel hardware
- For use with most metallic surfaces including galvanized steel
- Conductor maintains path to ground while connected to object that is parallel, perpendicular, or any degree in between
- UL467 Listed for the US and Canadian Markets
- Select connectors qualified to IEEE-837-2014

Copper Cable to “H” Beam or Square Fence Post

Type GA-H For Copper Cable to “H” Beam or Square Fence Post

High copper alloy ground connector for joining a wide range of cable parallel to “H” beams or square tube. Hardware is made from DURIMUM™ silicon bronze for superior corrosion protection.

Festoon Grounding System Kits, Variety of lengths available

Festoon Grounding Systems Kits

Includes C-Rail, Coupler Hangers, Tow and Intermediate Trolleys, End Stop, Mounting Clamps

Festoon Grounding Systems include the tracks, hardware, axles, and wheels needed to create a quality, "active" grounding system designed to stand the tests of time. Festoon systems elevate the conductor providing protection from pinch points as well as a theft deterrent.

BURNDY festoon systems are offered in a variety of lengths. Kits include the C-Rail, Coupler Hangers, Tow and Intermediate Trolleys, End Stop, and Mounting Clamps. Grounding cable and connectors are not included.

Features & Benefits

- Galvanized steel C-Rail for durability
- Sealed ball bearings in zinc-plated steel wheels are pre-lubricated for life offering consistent smooth operation
- Tow trolley protects conductor from pinch points
- Cable saddle helps keep conductor in line with track (ensure the cable size in use is accommodated by saddle)
- Festoon system keeps conductor elevated and out of easy reach from potential thieves

Specifications:

Wheels	Zinc-plated steel; smooth running ball bearing
Axles	Zinc-plated steel
C-Rail Track	Roll-formed galvanized steel
Hardware	Zinc-plated steel
Active Travel	Up to 25 ft (7.62m)*
Trolley Loads	Up to 45 lbs/trolley (20.25kg)**
Speed	Up to 250 fpm (75mpm)

*Additional kits are available for longer travel, contact customer service.

**Designed for cable loads only.

Cable (not included) Cable Saddle C-Rail Track Trolley

C-Rail Coupler

Tow Trolley Close-Up

Note: Wheels on trolleys fit inside C-Rail

Festoon Grounding System Kits Variety of lengths available

Festoon Grounding System (Continued)

Catalog Number	Length				Trolley Count (Count only included intermediate trolleys)	Rails (Qty / Length)	Coupler Hanger (Qty)
	Active	Storage	System	Cable (not included)			
BCR02302	10'-10"	1'-4"	12'-8"	17'	2	2 / 6'	3

BCR10302	39'-11"	4'-6"	43'-11"	59'	10	10 / 6'	13

Terminology:

Active Length	maximum distance the first trolley moves from fully stored position to fully extended
System Length	equal to total rail length
Storage Length	minimum distance required to store trolleys when fully retracted (gate open)
Coupler	joins and aligns two sections of C-Rail together
End Stop	prevents trolley from over travelling in C-Rail track

Cable Saddle Close-Up

Note: When choosing your kit, ensure the cable size is accommodated by the saddle

Intermediate Trolley Close-Up

Wheel Close-Up

Note: Sealed ball bearings are pre-lubricated for life for smooth operation and longevity

Ground Connector Cable to Tube; Ground Connector Cables

Type GQ Ground Connector for Copper Cable to Tube

High copper alloy ground connector for cross connecting a wide range of cable. High copper alloy, cast body, DURIMUM™ U-bolts, nuts, and lockwashers make the GQ suitable for burial in earth or concrete.

Rated for Direct Burial in earth or concrete

UL467 Listed for the US and Canadian Markets

CPI™ Connector Products Ground Grid Connectors

CPI™ Ground Grid Connectors

Accommodates .232" - .681" Diameter Range (Vertical) .184" - .575" Diameter Range (Horizontal)

CPI Ground Grid Connectors are a safe, fast, and dependable method of making permanent wire-to-wire and wire-to-rod connections for a variety of grounding applications. Using a special shear-head bolt to drive a wedge into the connector activates the connector. When the proper torque and spring tension is achieved, the bolt head shears off, giving the installer a positive indication of an optimum connection.

Features & Benefits

- No special molds, chemicals, tools, dies or fired-on charges necessary for installation; installed with a common socket, impact or ratchet wrench
- No temperature or weather restrictions for installation; can be installed no matter what environment exists at the job site
- Shear-head bolt ensures consistency of application and positive verification of a completed connection
- Typical applications:
 - Substation ground grids
 - Pole grounds transmission line grounding
 - Industrial/Residential service grounds
 - Pad Mount Transformers
 - Telco distribution / CATV grounds
 - Wind Farms

CPI™ Connector Products Ground Grid Connectors

CPI™ Ground Grid Connectors

Accommodates .679" - .813" Diameter Range (Vertical) .368" - .813" Diameter Range (Horizontal)

CPI Ground Grid Connectors are a safe, fast, and dependable method of making permanent wire-to-wire and wire-to-rod connections for a variety of grounding applications. Using a special shear-head bolt to drive a wedge into the connector activates the connector. When the proper torque and spring tension is achieved, the bolt head shears off, giving the installer a positive indication of an optimum connection.

Features & Benefits

- No special molds, chemicals, tools, dies or fired-on charges necessary for installation; installed with a common socket, impact or ratchet wrench
- No temperature or weather restrictions for installation; can be installed no matter what environment exists at the job site
- Shear-head bolt ensures consistency of application and positive verification of a completed connection
- Typical applications:
 - Substation ground grids
 - Pole grounds transmission line grounding
 - Industrial/Residential service grounds
 - Pad Mount Transformers
 - Telco distribution / CATV grounds
 - Wind Farms

Cast Bronze Clamps for Conduit, Water Pipe, Copper Tube

Type C-JPT Cast Bronze Clamps for Conduit

Pressure bar type conduit hub adjusts for 1/2", 3/4" EMT, or 1/2" rigid conduit. Hub swings 360° for easy alignment. Supplied with Zinc plated hardware.

UL467 Listed for the US and Canadian Markets

Cast Bronze Clamps; for Water Pipe; Lay-In Feature; Die Cast

Type C5; Light Duty Cast Bronze Clamps for 1/2 - 1" Water Pipe

Similar to C-11 clamp but for lighter duty applications.

UL467 Listed for the US and Canadian Markets

Catalog Number	Accommodates Conductor Range		Reference Dimensions			Recommended Screw Torque (Inch Pounds)	
	Water Pipe	Ground	H	L	W	Pipe Clamp	Wire Clamp
C-5	1/2 - 1 [13-25]	10 - 2 Str.	1.56 in [40]	2.25 [56]	0.56 in [14]	50 in.-lb.	50 in.-lb.

Type C-K-D Cast Bronze Clamps with Lay-In Feature

For connecting grounding conductor to water pipe, copper tube, ground rod or rebar. The open face design allows for fast lay-in of the tap conductor without the need for cutting. Simply reverse bottom clamp for smaller size rebar or rod. Connectors are provided with Silicon Bronze hardware.

Rated for Direct Burial in earth or concrete

UL467 Listed for the US and Canadian Markets

Dual Rated Ground Clamp for Copper and Aluminum Type GC-A

Type GC-A

Dual Rated Ground Clamp for Copper and Aluminum Cable

Type GC-A ground clamps are UL Listed for use with either copper or aluminum conductors to copper water pipe, galvanized pipe, or steel conduit. All clamps are constructed from tin plated high-strength extruded aluminum alloy. PENETROX™ oxide inhibiting joining compounds are recommended for all aluminum applications.

Features & Benefits

- Clamps are dual rated for both copper and aluminum conductors providing maximum flexibility of application
- All connectors are tin plated to provide low contact resistance and prevent galvanic corrosion
- All clamps are range taking; only 3 catalog number covers the complete range of applications from 1/2 to 4 inches
- UL467 Listed

Catalog Number	Conduit, Pipe, or Water Tube Size**	Wire Range	Screw Type	W	L	Hex Size
GC15A	1/2 - 3/4 - 1	1/0 - 14	Slotted	11/16	2-1/4	Slot

NOTE:

** Refer to Section O for tube dimensions.

BONDIT® Intersystem Bonding, House/Meter Socket Mounted

Type BDT

House or Meter Socket Mounted BONDIT® Intersystem Bonding Connector

Designed to meet the requirements of NEC Article 250.94 “Bonding for Other Systems”. Corrosion-resistant stainless steel set screws. Accepts main ground wire (#2-#8) and up to 4 intersystem wires (#6-#14). Same design can be mounted directly to the meter socket or mounted to the house. Innovative design does not damage meter socket and will not void warranty.

Catalog Number: **BDT1**

Features & Benefits

- Made in the USA!
- Meets Intersystem Bonding Requirements; NEC 250.94
- One connector does it all
- House mount or meter socket mount
- Incorporates proven BURNDY® SERVIT POST™ design
- Stainless steel set screws
- UL467 Listed
- Accepts main ground wire (#2-#8), up to 4 intersystem wires (#6-#14)
- Easily mounts to meter box during new installation or can be wall mounted
- Easy to follow instructions included
- Does not damage meter socket; no worries about damaging the paint or voiding warranties
- Easily installed with a wrench and screwdriver
- Open design prevents buildup of hornets, bees, spiders

CONFIGURATION 1 - MOUNTED TO ENCLOSURE

1. Punch out a 1/2" or 3/4" knock out on the electrical enclosure.
2. Begin assembly by installing the ground electrode conductor in the SERVIT POST™ inside the electrical enclosure. Torque on SERVIT™ NUT: 275 in-lb max.
3. Install the rest of the connector shown below, it is not necessary for the bus bar to be aligned parallel with the enclosure. (Note: the split washer is not used in this configuration.)
4. Tighten the intersystem ground wires with set screws in the bus bar to a maximum torque of 35 in-lb.
5. Adhere the BONDIT™ location sticker to the front of the electrical enclosure.

CONFIGURATION 2 - MOUNTED TO EXTERIOR WALL

1. Begin by assembling the connector as shown in figure below. Be sure SERVIT POST™ is as tight as it can be while its groove is aligned with the ground electrode conductor. (Note: the flat washer is not used in this configuration.)
2. Use two mounting screws (not included) to secure the connector to the exterior wall so that the set screws in the bus bar face downward.
3. Install the ground electrode conductor into the SERVIT POST™ while turning the nut/pressure bar assembly to a maximum torque of 275 in-lb (use 2 wrenches if necessary).
4. Tighten the intersystem ground wires with the set screws in the bus bar to a maximum torque of 35 in-lb.
5. If hidden from view, use the BONDIT™ location sticker to indicate the location.

BONDIT® Wall Mounted Intersystem Bonding Connector

Type BDTIBB, BONDIT®

Wall Mounted Intersystem Bonding Connector

NEC 250.94 refers to a requirement in the 2008 National Electrical Code. In the past, ground wires from telephone systems or cable systems were allowed to be grounded separately from the GEC (Ground Electrode Conductor from the main electrical service). With the new code, all ground wires from separate systems such as telephone systems, CATV and radio systems must be tied together at one location to the GEC. Hence, the term intersystem refers to tying all of the “system” grounds together in one location. The BONDIT® - Wall Mount is a great solution when the GEC is exposed (not in conduit).

With the new BONDIT® - Wall Mount connector BURNDY provides an economical solution that meets the needs of NEC 250.94.

Features & Benefits

- Meets Intersystem Bonding Requirements; NEC 250.94
- Provides an easy to access grounding point for utilities such as telecom and cable
- Easy to install
- Tin-plated connector body provides long-lasting corrosion resistance
- UL467 Listed for the US and Candian Markets
- Stainless steel set screws
- Accepts main ground wire (#2 to #6), up to (4) intersystem wire (#4 to #14)
- Supplied with a durable cover, easily secured over connector body
- Approved for use with solid stranded conductors

Catalog Number	Figure	Cover Color	Conductor Range		Reference Dimensions

HandyBug™ Connector Type SB, Tap, Splice, or Terminate

Type SB, HandyBug™ Connector

Tap, Splice, Terminate all with the same connector

The HandyBug™ connector is an “all-in-one” electrical connector that can be used for dozens of different power or grounding connection applications. This new connector is the survival tool of electrical connections and can be used as a splice, tap, terminal, wire-to-pipe, wire-to-busbar, and many other applications. The HandyBug™ incorporates the features and benefits of dozens of different products. Available in two sizes, these connectors accommodate from #8 AWG Solid to 1/0 AWG Stranded.

Ideal for emergency repairs, maintenance crews, and technicians, this connector is an essential part of every electrician’s basic supplies. cULus Listed and acceptable for direct burial in earth and concrete.

Features & Benefits

- Power or Grounding and Bonding Applications
- Can be used to terminate wire to bus bars or steel
- Can be used for splicing and tap connections
- No special tooling required
- UL467 and UL486A/B Listed for the US and Canadian markets
- Rated for Direct Burial
- Tin plated
- Industry standard mounting hole configurations

Type BWB680 Series Pool Water Bonding Kits

Type BWB680 Series

BURNDY® Pool Water Bonding Kits

NEC 680.26(C) states: "An intentional bond of minimum conductive surface area of 9" shall be installed in contact with the pool water. This bond shall be permitted to consist of parts that are required to be bonded in 680.26(B)".

In order to comply with this requirement BURNDY is offering the BWB680 Series. Made of non-corrosive stainless steel, the BURNDY water bonding kit maintains constant contact with pool water to ensure that the pool is effectively bonded at all times.

BURNDY BWB680 Series is one of the few and the most user friendly, products on the market that complies with this code. Other products are placed in the plumbing, which is not always in contact with the water and therefore does not meet the code. Since the BWB680 Series is placed in the skimmer, it is always in contact with the water.

Included in the BURNDY BWB680 Series Bonding Kit: One (1) bonding plate; one (1) rubber sealing washer; two (2) flat washers; two (2) lock washers; two (2) nuts; and one (1) BURNDY CL501-TN.

Features & Benefits

- Easy installation
- Mounting hardware included
- UL Listed
- Placed out of the way on the side wall of the skimmer below the basket

Type GIE-G Ground Connectors for Vehicle Grounding; Heavy Duty

Type GIE-G

Ground Connector for Vehicle Grounding, Heavy Duty Construction

High-strength copper alloy ground clamps for grounding gasoline trucks, tank cars, aircraft and other vehicles where danger of explosion due to static electricity exists. Corrosion resistant and supplied with nonsparking, adjustable, replaceable contact grip screws. Automatic safety release disconnects should a vehicle unexpectedly move from the grounded area. Accommodates 4 Str. flexible copper cable.

Ground Connector for Vehicle Grounding, Heavy Duty Construction

Accommodates flexible rubber sheath cable ranging from #6 to #2 conductor.

Catalog Number: **GIE2CG3**

Type BSD BURNDY® Static Discharge Reels

Type BSD

BURNDY® Static Discharge Reels

Static Discharge Reels are an excellent addition to the BURNDY® static discharge line of products. These reels are often used to dissipate static charge buildup developed while filling or dispensing fuel or other combustible liquids from fuel trucks or rail cars. Often used in the petroleum industry but applicable in any area where static discharge creates potential hazard.

These reels are heavy duty, of rugged construction and are supplied with a 100 amp universal jaw-type grounding clamp. The reels are available with 100 ft and 50 ft lengths. All reels come with spring rewind and centrifugal brake. The tension can be adjusted on these reels and installation instructions are included to ensure the most efficient mounting method.

Every reel is Proudly Made in the USA and meets the stringent quality expectations of the BURNDY® portfolio of grounding products.

Features & Benefits

- 100 foot and 50 foot cable lengths available
- Automatic E-Z PULL™ Rewinding
- Rugged Steel Construction
- Compact Enclosed Design (excluding BSD20100)
- Positive Ratchet Lock with Ratchet On/Off Switch (excluding (BSD20100)
- Permanent Ratchet Lock (BSD20100 only)
- Steel Cable Installed
- 100 Amp Universal Jaw-Type Grounding Clamp
- Red Baked-on Finish
- Made in the USA

Static Discharge "C" Clamp; The STUDBUG™

Type BSDCCEE

Static Discharge "C" Clamp

The BSDCCEE is a static grounding "C" clamp used to provide electrical contact between containers used for dispensing liquids and the grounding grid. The reel or grounding cable is crimped onto the provided ring terminal which is then fastened to the clamp at the end of the set screw. The clamp can be used with galvanized or stainless steel cable with a maximum diameter of 1/8 inch. (Cable is not included.) The BSDCCEE has a galvanized steel body and includes the ring terminal, and stainless steel hardware. (Winged Cup Point Set Screw and Dog Point Set Screw.)

Catalog Number: **BSDCCEE**

Features & Benefits

- Easy to install
- Galvanized steel body and stainless steel hardware
- Designed for clamping cable end to containers

Type GCB63T13G1 STUDBUG™

for Static Grounding Applications

GCB63T13G1 is a temporary grounding stud for use on rail cars, chemical trucks, hazardous waste tankers or a petroleum vehicle to allow for static grounding protection, while in operation. It provides a contact point, allowing the rail car, truck or tanker to be grounded to an equipotential grid or ground rod, by using static reel or a ground cable.

Catalog Number: **GCB63T13G1**

Features & Benefits

- Made of bronze; supplied with silicon bronze hardware
- Secured by 1/2" hexagonal nut and split lockwasher
- Can be used with universal clamps and ball stud clamps
- Can be used at various angles to reach inaccessible areas
- Add suffix "SS" for grounding stud with stainless steel hardware

Note:

- ① Can be used with plate, bus bar or structural steel up to 1/4" thick.

Type GSC Temporary Protective Ground Stud

Temporary Protective Ground Studs

The need for higher-rated grounding components and accessories is driven by continuous increases in the national electric grid's power capability. The ASTM F855 standard outlines specifications for temporary protective grounding with updates that reflect these changing requirements.

Temporary Protective Ground Studs are single point ground connections for Temporary Ground Sets. The H-Rated Ground Studs are designed and tested to meet the requirements of ASTM F855 Table 2. The ball stud covers serve as animal mitigation and stud surface protectant.

Features & Benefits

- Constructed of Tin-Plated Cast Copper alloy
- NEMA spaced terminal pad
- Animal mitigation / Stud Protector Cover Available
- Ball and Socket design accommodates industry standard Ground Set Clamps
- Available in Straight, 45°, and 90° variations
- Third-party laboratory test results available

CPI™ Connector Products Running Rail Connectors

CPI™ Running Rail Connectors

Single and Two-Conductor Styles

CPI Running Rail Connectors are designed as a permanent connection for copper conductor to a variety of rails used in Heavy Rail Mass Transit systems. Constructed with a heavy duty aircraft-quality steel spring member, copper cable nest, indenter, hex head bolt and locking nut.

Features & Benefits

- No drilling in rail or need to weld conductor to the rail!
- Rail is not subjected to warping by excessive heat or to weakening by drilling
- Labor saving, installation time can take as little as 10 minutes per connection
- Fewer rail connections required due to large conductor capacity (Single conductors up to 1000 kcmil; Dual conductors up to 750 kcmil)
- Large conductors can be bent away from the rail after installation without the risk of damaging the connector
- The clamp is an active spring applying a consistent force on the conductor ensuring a positive connection through heat cycling and train vibration
- The J-shaped spring member of the connector helps overcoming loosening issues problems associated with harsh train vibration by flexing rather than breaking; a static-type connection doesn't have this resiliency and could crack under prolonged vibration
- Consistent spring pressure prevents moisture and contamination from seeping into the connection
- All copper components are tin plated and steel components are galvanized

CPI™ Connector Products 2000 kcmil Cathode Connector; Cover

CPI™ 2000 kcmil Cathode Connector

“Pot Head” Connector

CPI Cathode Connector (also known as “Pot Head” connector) is designed to connect a single 2000 kcmil conductor from the main feeder directly to the Third Rail. Used in conjunction with the CPI Contact Rail Clamp, a Pot Head connector can replace the need for having 4 separate 500 kcmil connections with one single 2000 kcmil connection.

Features & Benefits

- Constructed of high conductivity copper
- The assembly comes standard with a tin-plated finish (image shows unplated)
- Incorporates the use of stainless steel hardware for increased strength and corrosion resistance
- Optional molded fiberglass cover is also available
- Simple 4-bolt installation
- Eliminates the need for any welding
- Recommended for use with the CPI 2000 kcmil Contact Rail Connector

Catalog Number	Description

Add Suffix "N" to specify a stainless steel nylon insert nut. (Standard is Zinc-plated kept nuts.)

Flexible Copper Braid Jumper General Information

Flexible Copper Braid Jumper

Copper braid is made of tinned, pure copper wire woven and flattened into a rectangular shape for greater flexibility. Seamless, pure copper ferrules are formed and assembled on each end to provide appropriate contact surfaces.

Braid is used extensively to compensate for expansion and contraction of moving parts and for thermal movement of rigid devices; to prevent breakage of insulators or bushings or equipment because of misalignment during settling of substation foundations; to absorb shock and vibration of operating equipment; and to provide flexible current carrying leads between moving parts of heavy machinery or equipment.

Fig. 1
Conventional current have maximum cooling effect with Braid in vertical position.

Current Carrying Capacity

Flexible copper braid has generally better heat dissipation properties than flat bar, cable or other conductors, and therefore can be expected to have a greater current carrying capacity for given cross-sectional area. This is due to its greater surface area resulting from the woven construction of fine strands. However, ventilation, due to the vertical convection current of air, is appreciably better when the long axis of the braid is vertical rather than horizontal, so that the long sides of the braid, rather than the edges, are exposed to the moving air. This is particularly true when spaced braids are used in multiple as can be seen by comparing Figure 1 and 2.

To take full advantage of ventilation, the cooling convection current of air should be permitted to flow freely between the braids. Therefore, if possible, the braids should be spaced apart, rather than bunched together, as illustrated in Figure 3. The effectiveness of spacing is, of course, greater when the braids are in a vertical position.

Fig. 2
Ventilation less efficient with Braid in horizontal position

CLOSELY BUNCHED ARRANGEMENT

OPEN ARRANGEMENT

Cooling due to convection current much more effective with spaced Braid

Fig. 3

Bulk Braid

Bulk braid can be ordered with a minimum order quantity of 10 feet. Specify feet in number of inches.

Example: 10 feet of 190 ampere braid is Catalog No. BB077L120.

INDOOR RATING AMPS	EQUIV CIRCULAR AREA	CAT NO.	APPROX WEIGHT PER FT
75	24,000	BB024L	0.06
95	48,000	BB048L	0.16
110	67,000	BB067L	0.22

Flexible Copper Braid Custom Designs / Variations

Flexible Copper Braid Custom Designs

Flexible copper braid offers an economical and efficient means of protecting electrical equipment from the potentially harmful effects of shock and vibration, terminal expansion, movement of components and misalignment that may occur during the service life of the equipment.

Many varieties of braid are required to meet those needs which we can build to your specifications.

We also offer engineering assistance in the selection of the most appropriate standard or custom braid configuration for your application.

Custom Variations

Drilling

- * Undrilled
- * Elongated (slotted) holes
- * Special hole patterns and location
- * Metric
- * NEMA

① Tongue drilled per (2) hole NEMA Standard

② Certified to CSA C22.2, No. 41 Grounding and Bonding Equipment Standards in addition to the UL467 Listing which all items above are Listed to.

Flexible Copper Braid 1-Hole Ferrule End

Type BB-ML-TN 1-Hole Ferrule End

One-hole extra flexible grounding and bonding braids are designed of flat tinned copper braid with a seamless tin-plated copper ferrule. Each ferrule is pressed into a solid mass to prevent moisture build up inside the connection to help mitigate corrosion issues seen in typical wire and lug jumpers. Additionally, the seamless copper ferrule end prevents fraying and provides extra strength for a robust bonding connection. Burndy one-hole grounding and bonding braids are a convenient solution for a long-lasting connection and are ideal in applications that require flexibility or resistance to vibration.

Features & Benefits

- cULus Listed to UL 467 and CSA22.2 NO. 41 for grounding and bonding
- Electro-tinned copper braids and ferrules for superior corrosion resistance
- Pressed seamless copper ferrules for added durability at the connection point
- Extra fine stranding provides enhanced flexibility
- Convenient single bolt installation
- Ready to install out of the box, no cutting or crimping required
- Ferrules clearly marked with BURNDY braid type and UL markings
- Available in custom lengths and holes sizes to suit all applications*

* Contact your local sales representative for custom lengths or hole sizes

Flexible Copper Braid 1-Hole Connector End

Type BB-LT 1-Hole Connector End

Flexible copper braid jumpers designed to take up linear expansion and contraction, compensate for misalignment and absorb vibratory movement of electrical equipment and devices. Made of flat extra flexible tinned pure copper braid with high quality BURNDY tin plated connectors on each end. Other lengths, plating and connector sizes are available; contact BURNDY for more information.

Flexible Copper Braid Jumper; Undrilled Ferrules Type B

Type B Undrilled Ferrules

Undrilled seamless pure copper ferrules are supplied with scored lines and dimples. Scored lines locate the center of the ferrule and prevent the drill from walking when drilling in this area. Dimples at the end of the scored lines represent the location of the NEMA standard hole spacing. Drill the holes you need, where you need them, using the supplied guide and the cULus Listing is retained. BURNDY undrilled braids offer a field flexible solution for almost any application!

* Add TN to the end of catalog number for tinplated ferrules

Features & Benefits

- cULus **before** drilling – cULus **after** drilling!
- Designed for unparallel field flexibility allowing custom ferrule drilling for specific applications while maintaining UL Listing
- Undrilled seamless pure copper ferrules supplied with scored lines and 'dimples' at the end representing the location of the NEMA standard hole spacing
- Scored lines locate the center of ferrule and prevent the drill from walking when drilling in this area
- Flexible copper braid jumpers take up linear expansion and contraction to compensate for movement of electrical equipment and devices

4-hole NEMA Braid Type B-4N

Type B-4N, For use in Power Distribution Applications Braid with 4-hole NEMA Pad

Designed with a large cross sectional area and stacked layers of flexible braid material, these braids can accommodate high current applications. These braids are often found in substation applications, where they are used as a flexible connection between two rigid bus lengths. Braids are commonly used in applications where thermal expansion and contraction between rigid parts exist, components are misaligned, and in environments that have frequent vibration or shock.

Due to different stranding size and orientation, braid has been found to have a greater amperage rating when compared to typical conductors ratings set forth by the National Electric Code (NEC). The finer stranding in our braid, with more air pockets, allows for better heat dissipation with more surface area exposed to ambient air. Our ferrule-style braids offer a heavy duty contact area for more rigorous grounding and power applications.

Cable Tray Bonding Straps

BURNDY Cable Tray Bonding Straps are used to create an electrical bonding connection between two sections of cable tray to ensure a continuous path to ground.

NEC Article 250.96 requires all metallic cable trays to be grounding regardless of whether or not the cable tray is being used as an equipment grounding conductor (EGC).

Minimum Size Equipment Grounding Conductors for Grounding Raceway and Equipment (excerpt of NEC Table 250.122)

BG12T12	2000	250 kcmil	12	1/2"	Braid

**Other lengths, hole sizes, and AWG sizes or equivalents may be available, contact Customer Service

† Jumpers are manufactured using stranded bare copper code conductor with BURNDY UL Listed compression connectors on each end;

Braid is manufactured of tinned, pure copper wire woven and flattened into rectangular shape for greater flexibility; ends of braids feature seamless copper ferrules.

Bus or Ground Bars Numbering System

Bus or Ground Bars Copper, Tinned Copper, Stainless Steel

cULus Listed bus or ground bars are available in a wide variety of configurations: Hole and slot patterns, unplated copper, tin plated or stainless steel. These bars are available with or without brackets and insulators, Plexiglass cover is also available.

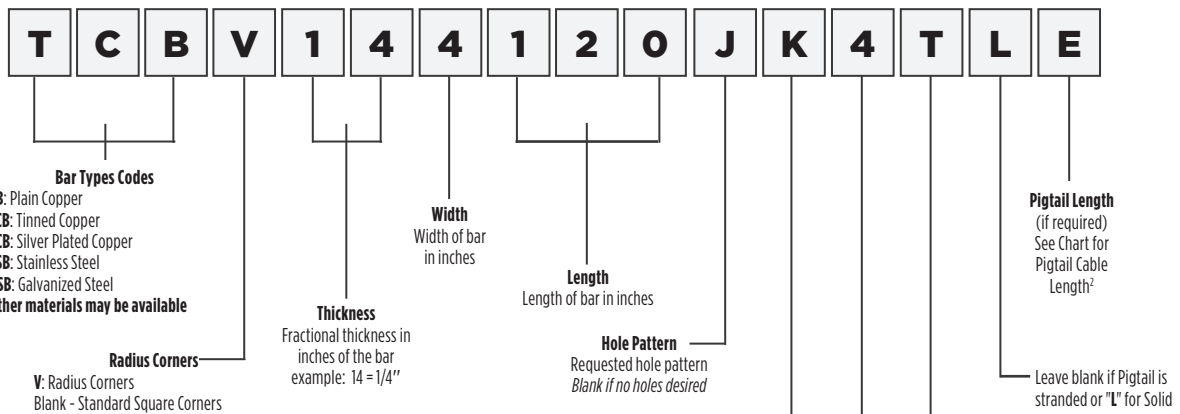

Bus or Ground Bar Numbering System

Below is a guide on how to understand the ground bar numbering system.

Each character of the catalog number represents specific details of our bars.

Please note that other sizes, materials, and options may be available.

Contact Customer Service or your local sales representative for more information.

Bar Types Codes
CB: Plain Copper
TCB: Tinned Copper
SCB: Silver Plated Copper
SSB: Stainless Steel
GSB: Galvanized Steel
Other materials may be available

Radius Corners
V: Radius Corners
 Blank - Standard Square Corners

Thickness
 Fractional thickness in inches of the bar
 example: 14 = 1/4"

Width
 Width of bar in inches

Length
 Length of bar in inches

Hole Pattern
 Requested hole pattern
 Blank if no holes desired

Pigtail Length
 (if required)
 See Chart for Pigtail Cable Length²

Leave blank if Pigtail is stranded or "L" for Solid

Type BBB Copper Busbar

Copper Busbar Type BBB

Bare copper busbar, UL Listed for grounding. Available in many sizes and hole patterns. Brackets and insulators included with most styles.

Also available in undrilled, horizontal and vertical versions. Busbar is used in a variety of applications. Can be used as a common ground point and "power" applications as well.

GRIDMAX[®], Personnel Safety Mats, Equipotential Bonding, Pool/Spa

BURNDY[®] GRIDMAX[®] Grounding, Personnel Safety Mats, Equipotential Bonding, Pool and Spa Grounding

UL Listed Prefabricated Copper Ground Mesh

Prefabricated wire mesh is a simple and cost effective method of enhancing ground systems. Our Prefabricated wire mesh is used in the telecommunication industry to improve grounding and reduce electromagnetic interference. It is also used in power plants and sub-station facilities to reduce potential injury due to electrical discharge.

We manufacture our ground mesh from solid copper or copper clad steel wire. The wire size range from #10 AWG to #4 AWG. We offer ground mesh with no overhang and overlapping ends typical .

Otherwise known as:

Gradient Mesh:	Canadian Standards/US -Pipeline
Equipotential Mesh:	NEC - Swimming Pools
Personnel Safety Mat:	IEEE80
Ground Mesh:	UL467

Overlapping Ends

This configuration is designed to allow for side by side connections of adjoining mats; thus providing the easiest method of joining two mesh sections. Adding 2" to one half the conductor spacing provides the overlapping ends. For example, if the mesh size is 6" square, the overlapping end length is 5".

Without Overhang

With Overhang

"Overlapping" ends

Features & Benefits

- Manufactured from bare solid copper
- Spaced on 4", 6", or 12" centers
- Copper to copper weld with 15% silver
- Furnished in section with lengths from 4' to 100'
- Easily and economically installed using thermOweld[®] exothermic process, HYGROUND[®] Compression system, or our full line of Mechanical connectors
- Sizes of GRIDMAX[®] specifically designed for the Pool and Spa market of 3' x 100' and 3' x 50', but can be used where any large area grounds are required

Example:
GRIDMAX[®]
3' wide in pool area

Example:
GRIDMAX[®]

thermOweld® Exothermic Process

thermOweld® Exothermic Process

The thermOweld® connection process is a simple, efficient method of welding copper to copper or copper to steel. One advantage is that NO outside power is required when using the thermOweld® exothermic process. The thermOweld® process uses high temperature reaction of powdered copper oxide and aluminum. The reaction takes place in a semi-permanent graphite mold. These molds will last for fifty or more welds if proper care is given. The reaction takes place very rapidly, therefore the total amount of heat applied to the conductors or surfaces is considerably less than that of brazing or soldering. It is important to remember this when welding to insulated cable or thin wall pipe.

This system is very field friendly, since it is light and portable and requires no outside power source. It requires very little time or skill to obtain an efficient, maintenance free connection when using the thermOweld® process.

For more information, visit our website at:

www.burndy.com.

The thermOweld® process has been used to weld materials other than copper for electrical purposes. Materials welded include:

Stainless Steel
 Copperweld®
 Nichrome V
 Galvanized Steel
 Silicon Bronze
 Copper Clad Steel
 Columbium
 Plain Steel
 Everdur®
 Kama
 Stell Rail
 Cor-Ten®
 Brass
 Bronze
 Niobium
 Chromax
 Cast Iron
 Monel

When welding to galvanized steel it is recommended to resurface exposed bare steel.

The thermOweld® connection is a molecular weld. The weld metal has the same melting point as copper. These factors along with the increased cross section of the connection, thermOweld® connections:

1. Will not be affected by a high current surge. Tests have shown that the electrical conductor will melt before the thermOweld® connection when subjected to high short circuit current. Consult IEEE Standard 837-1989.
2. Will not loosen or corrode at the point of weld. There are no contact surfaces or mechanical pressures involved. A thermOweld® connection becomes an integral part of the conductor.
3. Have a current-carrying capacity equal to or greater than that of the conductors.

Making a thermOweld® Connection

Making a thermOweld® Connection

Step 1

Position cleaned conductors in mold after make sure mold is dry, by pre-heating or making a test joint.

Step 2

Place metal disc in bottom of mold crucible.

Step 3

Dump powder into crucible, being careful not to loosen all the starting powder.

Step 4

Close lid and place a small amount of starting powder in the ignition pocket.

Step 5

Ignite the starting powder with the Flint Ignitor.

Step 6

Wait 15 seconds, then remove weld and clean mold before making next connection.

thermOweld® EZ Lite® Battery Ignition System; Weld Metal

thermOweld® EZ Lite® Battery Ignition System

The self-contained unit offers a built-in battery life indicator, 6' ignitor cord and separate buttons for power and ignition. Also, no starting powder is used with this system so emissions are greatly reduced. EZ Lite® works with “off-the-shelf” molds and weld metal, so contractors and installers can continue to use the same quality thermOweld® products.

Since the unit operates with standard weld metal and molds, installers also have the option of using a traditional flint ignitor or the new EZ Lite® system. Another feature is the speed of ignition, with virtually no delay between depressing the “push to operate” button and ignition of the weld metal. This instant ignition feature offers quick reassurance to the installer, without the delay.

Features & Benefits

- The EZ Lite® system allows installers to make exothermic connections remotely
- Uses standard exothermic molds and weld metal
- Use the thermOweld® EZ Lite® battery ignition system or use a flint ignitor, making this the most versatile system available
- Installers have virtually 100% confidence that the connection can be completed with no wasted material or weld metal shots
- No starting material required which greatly reduces the amount of emissions generated
- Power is supplied by 4 standard “D” size batteries
- Built-in battery life indicator
- Virtually no delay in ignition after depressing the “push to operate” button
- Separate ON/OFF and Operate buttons
- Comes complete with durable 6 foot heat resistant cord
- Durable, long-lasting design
- EZ Lite® ignitor sticks (38EZLITIG) are conveniently packaged and available separately or packaged complete with standard weld metal

thermOweld® Weld Metal and Steel Discs

thermOweld® Weld Metal

thermOweld® Weld Metal is packed in moisture-resistant plastic cartridges that have tight fitting caps. These cartridges, along with the necessary steel discs, are then packed in boxes that are hermetically sealed. This ensures the powder arriving in good condition, always dry and ready for fast positive ignition. thermOweld® Weld Metal comes in several types; one for welding copper to copper, copper to steel, copper to cast iron and one for welding copper to steel for cathodic protection. The size and weight (in grams) of the cartridge are marked on each individual cartridge.

Weld metal and steel discs are sold only in standard box quantities.

Features & Benefits

- Packed in moisture-resistant plastic cartridges with tight fitting caps
- Cartridges, along with necessary steel discs, are packed in boxes that are hermetically sealed ensuring the powder arrives in good condition, dry and ready for fast, positive ignition

NOTES:
 For sizes not listed, contact BURNDY®
 Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
 For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
 For expedited service, contact BURNDY®
Required Tools:
 Handle Clamps - see chart for correct handle catalog number
Recommended Accessories:
38-0309-00 Flint Ignitor; **38-3922-00** Mold Cleaning Brush; **38-0135-00** Cable Cleaning Brush; **38-0330-00** Cable Clamp

Type CC-14 Molds Horizontal Parallel through Cables

Type CC-14 Molds are used to join horizontal parallel through run cables. Cables run side by side in the mold. Size range is #8 through #6 solid or concentric stranded copper conductors. Contact BURNDY® for information on molds for conductors not listed.

NOTES:
 For sizes not listed, contact BURNDY®
 Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors

① **38-0309-00** Flint ignitor included

NOTES:

For sizes not listed, contact BURNDY®
Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
For heavy duty molds, molds with wear plates or molds for Copperweld™ cable, contact BURNDY®
For expedited service, contact BURNDY®

DO NOT use Type CS-5 molds on Soil Pipe (ASTM A74-82). A test weld should be made on a section of pipe being used to determine the possibility of detrimental metallurgical effects.

Required Tools:

Handle Clamps - see chart for correct handle catalog number

Recommended Accessories:

38-0309-00 Flint Ignitor
38-3922-00 Mold Cleaning Brush
38-0135-00 Cable Cleaning Brush
38-0330-00 Cable Clamp

Molds: Horizontal Parallel Tap to Rebar

Type CRE-1 Molds Horizontal Parallel Tap to Rebar

Type CRE-1 Molds are recommended for parallel, horizontal connections for solid or concentric stranded conductors #6 through 4/0 joined to reinforcing bars #3 through #6 and larger. The high copper content joint has a higher current carrying capacity than the conductors being joined and is impervious to vibration and moisture. Contact BURNDY® for information on molds for conductors not listed below.

	4/0	M-7923	38-4063-00	4	150	B-106-32 ①

① The **B106-32** comes complete with a **B-106** handle clamp and **40-0106-76** vertical chain clamp. Although good for use on all sizes of rebar, vertical chain clamps are strongly recommended on large size rebar as they hold the mold to the rebar securely. If you already have a B-106 handle clamp, you can purchase the vertical chain clamps separately.

Recommended Accessories:

- 38-0309-00** Flint Ignitor
- 38-3922-00** Mold Cleaning Brush
- 38-0135-00** Cable Cleaning Brush
- 38-0330-00** Cable Clamp

thermOweld® Contact - GF No tamping or special tools required

thermOweld® Contact - GF

Contact - GF is an economical solution for areas with very difficult grounding issues. Contact - GF is highly conductive in a wet or dry application and does not require moisture to lower the resistance of your grounding system. Contact - GF contains a corrosion inhibitor which forms a film on copper, creating a barrier against corrosion. Contact - GF can be poured in dry or pumped in slurry form. No tamping required. It is very contractor friendly. No special tools required.

thermOweld® Contact - GF Advantages

- Easy to install
- Electrically conductive
- Environmentally friendly
- Will not leach into the ground
- Positive low resistance, electrical connection to earth
- Does not contain any hazardous chemicals
- Compatible with all copper grounding systems
- Contains a corrosion inhibitor to protect copper
- Will not expand or shrink
- Not affected by freezing
- Excellent shelf life
- Typical resistivity <10 Ohm-cm

To calculate the pounds of material required to fill a trench:

- Determine desired thickness
- Move to the right on the chart above until you are under the known width of the trench - this number will be the weight of the material in lbs/linear ft
- Take this number and multiply by the length of the trench in feet; your answer will be the amount of Contact - GF material required to fill the trench to the desired level in pounds

Example:

Thickness = 6 inches
 Width of trench = 18 inches
 Answer = 54.6 lbs per linear ft (see table above)
 = 54.6 lbs per linear ft x 25 ft trench = 1,365 lbs of thermOweld® Contact - GF
 = Quantity of 55 25-lb bags of Contact - GF

Application Information for Vertical, Horizontal or Grid Construction

thermOweld® Contact - GF Application Information

Vertical Installation

Drill or bore a hole the desired diameter and depth. Suspend ground electrode in center of hole to be filled. Pour Contact - GF until desired level is obtained. No tamping is required.

Dry Volume of thermOweld® Contact - GF vs. Hole Size		Ground Resistance Comparison of Bare Rod vs.	
Hole Size	Lbs. of Contact - GF Per Ft.	Hole Size with 5/8" x 10' Rod in Center of 15' Hole	Percent Resistance Compared to Rod Only (100%)
4"	6.5	4"	52%
6"	14.5	6"	47%
8"	25.8	8"	44%
10"	40.4	10"	42%
12"	58.1	12"	40%

Horizontal or Grid Construction ①

Pour into horizontal trench until level of ground wire is reached. Place ground wire. Pour additional Contact - GF until wire is covered to desired height. Cover with fill. No tamping required.

For grid construction, pour thermOweld® Contact - GF and spread over ground grid until desired thickness is achieved. Cover with fill.

Steady State Leakage Resistance ② Using 4/0 Copper Wire vs. thermOweld® Contact - GF					
Length	0.457" Diameter Wire Only	Percentage of Resistance with 0.457" Wire Plus Contact - GF in Various Diameters Compared to Wire Only (100%)			
		2"	3"	4"	6"
25'	100%	83%	78%	74%	69%
50'	100%	85%	81%	77%	73%
75'	100%	86%	82%	79%	75%
100'	100%	87%	83%	80%	77%
150'	100%	88%	84%	82%	78%
200'	100%	88%	85%	83%	79%
250'	100%	89%	85%	83%	80%
300'	100%	89%	86%	84%	80%

①Entire grounding system should be surrounded by thermOweld® Contact - GF. Conductors should be insulated as they exit Contact - GF column.

②The use of Contact - GF around the grounding system will also reduce surge impedance by increasing the effective contact area of the electrode to soil.

Horizontal Construction

Grid Construction

thermOweld® Handle Clamps, Handle Attachment, Mold Support Clamp

Handle Clamps

thermOweld® Handle Clamps make possible the use of many different sizes and types of molds with only two different clamps. The two handle clamps are catalog numbers **B-106** & **B-107**. These will fit 95% of all standard thermOweld® molds.

1. Use B-106 clamps for all molds having a price key 4, 7, 17, 22 or 24. These molds are a nominal 3 1/8" x 3 1/8" square.
2. Use B-107 clamps for all molds having a price key 5, 6, 8 or 23. These molds are a nominal 4" x 4" square.
3. All molds having a price key 2, 3, 9, 10, 11, 12, 14, 15 or 16 have an attached frame; separate handles are not required.

Handle Attachment

This Handle Attachment is used to hold Price Key 14 molds in position. It easily attaches to the B-106 Handle Clamp. This Handle Attachment can be used with weld types CRE-1 and CRE-4.

Catalog Number: 40-0106-75

Mold Support Clamp

Mold Support Clamp is used to hold a mold in position on a vertical steel column or angle. It is easily attached to the Handle Clamps. The Mold Support Clamp can be used with weld types CS-3, CS-18, CS-23 and CS-27.

Catalog Number: 40-3657-00

Vertical Magnetic Clamps, Horizontal and Vertical Chain Clamps

Vertical Magnetic Clamps

Magnetic Clamps are used to hold a mold in position on a vertical steel surface. The magnetic clamp can be purchased complete with B-106 Handle Clamps or if you already have a set of handle clamps, you can order just the magnetic mounting assembly. The mounting assembly can easily be mounted on the prongs of your existing B-106 handle clamps. A minimum of 10" is required.

Magnetic Clamps with B-106 Handle		
Catalog Number	Fits Molds w/ Price Key	For Use with Weld Types
40-4431-00	4 & 17	CS-3, 4, 7 & 23

Magnetic Clamp Only		
Catalog Number	Fits Handle Clamps	For Use with Weld Types
40-4431-01	B-106 & B-107	CS-3, 4, 7 & 23

Horizontal and Vertical Chain Clamps

Chain Clamps are used to hold a mold in position on horizontal or vertical pipe up to 4" in diameter. For larger pipe a 20" chain extension is available to allow the chain clamps to be used on pipe up to 10" in diameter. The chain clamp can be purchased complete with B-106 or B-107 Handle Clamps or if you already have a set of handle clamps, you can order just the chain clamp and mounting assembly. The mounting assembly can easily be attached to your existing handle clamps.

Chain Clamps

40-0106-76	B-106 & B-107	CS-3, 4, 7, 23 & CRE-6	Vertical
40-0106-78	B-106 & B-107	CS-1, 2, 5, 8 & 9	Horizontal
40-0106-77	B-106 & B-107	CS-6, 18 & CRE-3	Vertical

thermOweld® Accessories

Cable Clamp

The thermOweld® Cable Clamp is recommended for holding a wide range of cables properly in place in molds when welding cables that are under tension. This prevents the cables from pulling out of the mold when the weld is made.

Cable Clamp: 38-0330-00

Cable Cleaning, Card Cloth Brush

The Cable Cleaning Brush is recommended for cleaning heavily oxidized cables. The V-shape brushes permit their use over a wide range of cable sizes. Brush assembly consists of a handle with two stiff wire bristle brushes that are rotatable, for longer life and are replaceable.

The Card Cloth Brush is used for cleaning large conductors and bus bar. It has short stiff bristles. These brushes are for cleaning cable only, not molds.

The Mold Cleaning Brush 38-3922-00 is used to clean the graphite mold without scratching the mold.

Description	Catalog Number
Cable Cleaning Brush	38-0305-00
Replacement Brush	38-0135-01
Card Cloth Brush	38-0306-00
Mold Cleaning Brush	38-3922-00

Mold Cleaners

Mold Cleaners are used to clean the slag from molds that are not split through the crucible.

40-0319-01 for cartridge sizes #15 through #65

40-0319-03 for cartridge sizes #90 through #500

Packing Material

Packing material is used to prevent the molten weld metal from leaking out of the mold. When the cable opening becomes worn from heavy use, the packing material may be used to prolong mold use. It is also used around 7 strand cable to prevent leaking. Packing material comes in a 1 lb. or 5 lb. package.

Description	Catalog Number
1 lb. package	38-4129-00
5 lb. package	38-4129-05

Tool Kit

- 38-0302-00** Tool Kit with Tools Shown except Rasp
- 38-0302-02** Tool Kit with Tools Shown and Rasp
- 38-0303-00** Tool Box only

thermOweld® Tools

The **38-0309-00** Flint Ignitor is used to ignite the starting powder. Each mold that is sold with a frame has a Flint Ignitor included.

For added safety a Flint Ignitor extension is available, catalog number **38-0904-00**, that attaches to the **38-0309-00** Flint Ignitor. This allows installers to stay approximately 36" away from the mold.

To order replacement flints, specify part number **38-0309-01**.

- 38-0309-00** Flint Ignitor
- 38-0304-00** 8" File
- 38-0307-00** Crimping Tool
- 38-3922-00** Mold Cleaning Brush
- 38-0308-00** 6" Screwdriver
- 38-0305-00** Wire Brush
- 38-0101-00** Rasp
- 38-0306-00** Card Cloth Brush

38-0101-00 Rasp

This tempered steel, curved rasp is recommended for removing rust and mill scale from steel and cast iron surfaces. The blade is replaceable. To order replacement rasp blade, specify catalog number **38-0101-01**.

Not recommended for use on galvanized surfaces.

38-0309-00 Flint Ignitor

The **38-0309-00** Flint Ignitor is used to ignite the starting powder. Each mold that is sold with a frame has a Flint Ignitor included. For added safety a Flint Ignitor extension is available, catalog number **38-0904-00**, that attaches to the **38-0309-00** Flint Ignitor. This allows installers to stay approximately 36" away from the mold.

To order replacement flints, specify part number **38-0309-01**.

Ground Rod Driving Sleeves; Shim Stock and Adapter Sleeves

Ground Rod Driving Sleeves

Ground Rod Driving Sleeves are placed over the top of a ground rod while driving it into the ground. This prevents the top from mushrooming or flaring out. Ground rod driving sleeves are available in sizes to fit all standard unthreaded ground rods.

Catalog Number	For Use On
38-3662-01	1/2" Copper Clad or Steel Ground Rod
38-3662-02	5/8" Copper Clad Ground Rod
38-3662-05	5/8" Steel Ground Rod
38-3662-03	3/4" Copper Clad Ground Rod
38-3662-06	3/4" Steel Ground Rod
38-3662-04	1" Copper Clad Ground Rod

Shim Stock and Adapter Sleeves

thermOweld® molds designed for larger cable sizes can be used on smaller diameter cables if copper adapter sleeves or shim stock are utilized. The copper shim stock, .0108" x 1-1/2" x 3", is normally wrapped around cable until the diameter is about equal to the cable opening. A tight fit is not necessary as the shim stock will unwrap slightly and prevent leakage of weld metal.

To order shim stock use part number **38-0329-00**. Shim stock comes 100 pieces per box.

For Use on Cable Size		Part Number	Use in Mold Size	Sleeve Dimensions

Cathodic Protection Horiz. Cable to Horiz. Cast Iron AWG / Metric

Type CS-33 Cathodic Protection Molds

Horizontal Cable to Horizontal Cast Iron Surface for AWG Conductors

Welding to Horizontal Pipe: To weld to 4" to 24" horizontal pipe, add pipe size to mold number. Example: To weld #1 Str cable to 6" horizontal pipe, the mold number would be: M-163-6. To weld pipe 30" and larger, use flat surface mold.

Contact BURNDY® for information on molds for conductors not listed below.

DO NOT use Type CS-33 molds on Soil Pipe (ASTM A74-82). A test weld should be made on a section of the pipe being used to determine the possibility of detrimental metallurgical effects.

Cable Size	Surface	Mold Number	Price Key	Weld Metal	Handle Clamps
#6 Sol †	Flat (30" & Larger Pipe)	M-156	3†	25Cl	Included
#6	Flat (30" & Larger Pipe)	M-157	3†	45Cl	Included
#4 Sol	Flat (30" & Larger Pipe)	M-158	3†	45Cl	Included
#4	Flat (30" & Larger Pipe)	M-159	3†	45Cl	Included
#2 Sol	Flat (30" & Larger Pipe)	M-160	3†	45Cl	Included
#2	Flat (30" & Larger Pipe)	M-161	3†	45Cl	Included
#1	Flat (30" & Larger Pipe)	M-163	3†	65Cl	Included

† - Sold complete with frame If frame not required, specify MOLD NUMBER followed by suffix "-G"
 ‡ - For Wire Size #14 to #10 Solid, 38-0200-00 Sleeve/Weld Required

Required Tools:

Handle Clamps - Included
38-0309-00 Flint Ignitor
 or **38-EZLT-RU** EZ Lite Remote*

Recommended Accessories:

40-0319-01 Mold Cleaner for cartridge sizes #15-#65 (Price Key 3 Molds Only)
38-3922-00 Mold Cleaning Brush
38-0135-00 Cable Cleaning Brush
38-0101-00 Rasp
38-4129-00 Packing Material for 1/0 (50mm²) & Larger Molds

Optional:

40-7202-00 Magnetic Mold Support

Type CS-33 Cathodic Protection Molds

Horizontal Cable to Horizontal Cast Iron Surface for Metric Conductors

Welding to Horizontal Pipe: To weld to 4" to 24" horizontal pipe, add pipe size to mold number. Example: To weld #1 Str cable to 6" horizontal pipe, the mold number would be: M-163-6. To weld pipe 30" and larger, use flat surface mold.

Contact BURNDY® for information on molds for conductors not listed below.

DO NOT use Type CS-33 molds on Soil Pipe (ASTM A74-82). A test weld should be made on a section of the pipe being used to determine the possibility of detrimental metallurgical effects.

Cable Size (mm ²)	Pipe Dia (mm ²)	Mold Number	Price Key	Weld Metal	Handle Clamps

38-0135-00 Cable Cleaning Brush
38-0101-00 Rasp
38-4129-00 Packing Material for 1/0 (50mm²) & Larger Molds

Optional:

40-7202-00 Magnetic Mold Support

Cathodic Protection Field-Made Bond to Cast Iron Surface - AWG

Type CS-49 Cathodic Protection Molds

Field-Made Bond to Cast Iron Surface for AWG Conductors

DO NOT use Type CS-49 molds on Soil Pipe (ASTM A74-82). A test weld should be made on a section of the pipe being used to determine the possibility of detrimental metallurgical effects.

Contact BURNDY for information on molds for conductors not listed below.

Cable Size	Surface - Steel Pipe	Mold Number	Price Key	Weld Metal	Copper Adapter Sleeves	Hammer Die	Handle Clamps
#8	4" to 24" Pipe: Replace P.S. with Pipe Size (Ex. M-7351-4 for 4" Pipe)	M-7351-PS.	3 †	25Cl	38-0201-00	38-6019-00	Included

thermOweld® Cathodic Protection Magnetic Mold Support Assembly

Cathodic Protection Molds

with Magnetic Mold Support

New magnetic mold support is adaptable to all Price Key 3 molds.

- Designed for remote welding use with the EZ Lite Remote® ignition system
- Strong, 48 lb magnet holds mold in place and prevents leakage
- Adjustable height
- Works on both cast iron and steel pipe as well as flat surfaces
- Available as an accessory which can be attached to any existing Price Key 3 mold in your stock, on your truck, or at the jobsite

Catalog Number	Description
40-7202-00	Price Key 3 Mold Magnet Assembly
To order molds complete with Magnet Assembly, add suffix "-M" to mold number. Example: M-100-M	

Cathodic Protection thermOcap PC®

thermOcap PC®

thermOcap PC® is designed to cover your cathodic protection wire connections on metal pipe and tanks.

- Thick outer shell designed to resist puncture
- Folds in plastic allow the cap to conform easier to the pipe
- Butyl rubber filled dome for added corrosion protection for the weld
- Superior resistance to aging shown through accelerated aging testing
- Adheres to Ductile Iron, Steel, Stainless Steel, Copper, Aluminum, PVC, PP, PE, FBE powder coating, natural and synthetic rubbers and Epoxy
- Outstanding shelf life, resistant to dry rot and cracking
- Packaged in boxes of 20
- Works with exothermic and brazed connections
- **Simply peel and stick!** - thermOcap PC® is designed to adhere without spray primer

Information contained in this document is for reference only. Customers are responsible for determination of this product's suitability for their application. No liability for any loss related to the use or misuse of the material contained herein is accepted.

Properties		thermOcap PC®
Part Number		38-6687-02
Dimensions	Overall	4" x 4" (102 mm x 102 mm)
	Dome	1.75" Dia. 0.75" tall (44.5 mm Dia. 19mm)
	Elastomeric Adhesive	0.125" thick (3.2mm)
	Plastic Backing	0.021" thick (0.5mm)
Primer Required?		No
Application Temperature		35°F to 150°F (2°C to 66°C)
Service Temperature		-20°F to 180°F (-29°C to 82°C)
*Adhesion to Steel		15 lb/in (26 N/cm)

* Determined per ASTM D1000/IEC 6045-2, testing method with minor deviations

Solutions for Wire Management, Bonding, or Grounding Applications

Wiley Solutions Not just for Solar Anymore!

Whether installing miles of wire or acres of solar modules, the components no bigger than a few inches can give the project long-term success and provide peace of mind. As PV technology has evolved, BURNDY continues to provide solutions that meet the requirements of the most challenging applications.

The Wiley product offering encompasses varied products to suit the application at hand.

Bonding Jumpers of corrosion resistant, tin-plated copper are available with or without the Wiley WEEB® washer. UL467 and UL2703 Listed.

Clamping Solutions offer reliability throughout the lifetime of the PV system. Mid-Clamp and End-Clamp designs for all types of solar module bonding. UL2703 Listed.

Grounding Lugs available with or without the WEEB® washer require no surface preparation of the mounting surface. UL467 and UL2703 Listed.

WEEB® Washers (Washer Electrical Equipment Bond) eliminate the need for older, more expensive grounding methods, and surface preparation like masking or scratch brushing. The WEEB® teeth pierce through most non-conductive coatings (e.g. anodization and powder coating) and embed into the underlying metal thus creating a bonding connection between the surface and the coated metal component that it is installed on or between (e.g. equipment racks, cabinets, enclosures, cable tray, lugs, etc.). Corrosion-resistant 304 stainless steel construction available in a myriad of styles all providing excellent conductivity without oxidation risk. UL467 and UL2703 Listed.

Wiley Cable Clips simplify wire management and provide a neat and orderly aesthetic to solar PV arrays and other installations. For use with a broad range of cable combinations and sizes. No tools required for installation and compatible on modules and a variety of rails. UL1565 Listed.

Wiley Bundle and Twist Straps manage bundles of wire. UV rated vinyl jacketing is designed to help protect the cable insulation from damage. Stainless Steel ferrule and wire safeguards system longevity. UL62275 Listed.

P-Clips manage bundles of wire and are reusable. Coated steel protects cables from vibration and insulation damage. UL1565 and UL62275 Listed.

Cable Hangers support cables and fuses via module frame mounting holes or secured at the tracker system level. They are easy to install and the round cross section provides cable insulation protection from chafing. UL1565 Listed.

Wiley Cable Clips

High-quality wire management solutions

Engineered for high-quality wire management solutions, Wiley Cable Clips simplify wire management and create a cleaner aesthetic to solar PV arrays. The clips are made of corrosion resistant stainless steel, which makes for a durable, long lasting and reliable solution in all environments and are designed with coined and rolled edges to prevent damage to cable insulation. The designs are easy to install and remove with a flat head screwdriver. The clips can be used in a wide variety of mounting configurations (including 90 and 180 degrees) for module and rail applications. Custom designs are available upon request.

Features & Benefits

- UL 1565 Listed
- Accommodates a broad range of cable combinations and sizes (e.g., USE-2, PV, AC module, and micro inverter cables)
- Environmentally tested - UL 2703 and ASTM B117
- No tools required for installation
- Coined and rolled edges to prevent damage to cable insulation
- Reliability for use throughout the lifetime of the PV system

Wiley Wire Management Straps

Wiley Bundle Straps

304 Stainless Steel Wire Covered with Vinyl Jacket

The Wiley Bundle Strap is made of corrosion resistant 304 stainless steel, which makes for a durable, long lasting and reliable solution for all environments. The vinyl jacket covering the stainless steel wire is designed to protect cable insulation from damage. The Wiley Bundle Strap is easy to install and can be crimped in the field with electrician linesman pliers or standard wire cutters. The crimp sleeve's retention feature allows for a quick, effortless, secure installation. Custom lengths available upon request.

Features & Benefits

- UL 62275 Listed, RoHS compliant
- High quality, long-lasting, labor saving, wire management solution
- UV rated vinyl vinyl jacketed stainless steel wire with 304 stainless steel crimp
- Vinyl jacket designed to protect cable insulation from damage
- 304 stainless steel crimp sleeve allows for quick and easy installation
- Can be crimped in the field with electrician lineman pliers or standard wire cutters
- Retention feature allows for a quick, effortless, securing installation
- Lasts for the lifetime of the PV system
- Custom lengths available upon request

Wiley Wire Management Straps

Wiley Twist Straps

The innovative Wiley Twist Strap (WTS) provides a quick, dependable wire management solution. As easy to use as a cable tie, while offering the durability of a bundle strap. The corrosion-resistant 300 series stainless steel wire core is coated with UV-resistant PVC. The round geometry eliminates the risk of sharp edges cutting into PV cable jackets.

To use, insert the stem into twisted eye loop and fold over for a tested tensile strength of up to 40 lbs. With lengths varying from 8” to 36”, the WTS can be used to secure wires almost anywhere on a PV system, including around the torque tube!

Features & Benefits

- Durable, labor saving solution
- Non-corrosion 300 series stainless steel core
- UV Resistant PVC coating
- Reusable / Repositional
- No tools necessary for installation or removal
- Custom lengths available upon request
- UL62275 pending

Wiley Edge Clip with Cable Tie

Wiley Edge Clip with Cable Tie (ACC-ECT)

High-quality wire management solutions

The WILEY ACC-ECT is the perfect solution to route cable bundles without the need for mounting holes or additional hardware. The ACC-ECT is a nylon-encased plated steel clip that installs onto the module frame flange and allows a cable tie to be routed in both landscape (on the horizontal/perpendicular portion of the module frame) and portrait (on the vertical/parallel portion of the module frame) orientations. The ACC-ECT is available in UV resistant, high impact heat stabilized nylon 6/6 and nylon 12 material; both the 6/6 and 12 have a tensile strength of 50 lb. Nylon 12 makes the ACC-ECT especially suitable in high moisture, corrosive environments or where low temperatures are a factor.

Features and Benefits

- Route cable bundles without the need for mounting holes or additional hardware
- Installs in a vertical/parallel (90°) or horizontal/perpendicular (180°) orientation
- Steel lances securely anchor clips to module frames or purlins
- Offered in various nylon types with 50 lb tensile strength:
 - UV resistant, high impact heat stabilized Nylon 6/6
 - UV resistant Nylon 12 which provides excellent UV, chemical and moisture resistance

Wiley Coated P-Clips

Coated P-Clips

Protect cables from Vibration and Insulation Damage

Wiley coated P-Clips provide a durable, long lasting and reliable solution for protecting wires and cables. The vinyl coating acts as a shield against vibration and cable insulation damage. Wiley coated P-Clips easily install into a mounting hole with 1/4" hardware.

Wiley Coated P-Clips

Wiley Grounding Lug Tin-plated copper, low-profile

Grounding Lugs

Constructed of corrosion resistant, tin-plated copper, the Wiley line of grounding lugs are high quality solutions for your grounding needs. The tin-plated lug assures minimum contact resistance and protection against corrosion. The low-profile of the grounding lug allows it to be installed in a variety of positions with one solid or stranded copper wire (14 AWG to 6 AWG), or two copper wires (12 AWG to 10 AWG). Copper wire is secured by a 1/4-28 stainless steel screw, which is horizontal to the tang.

The WEEB® Grounding Lug is installed using stainless steel mounting hardware – standard hex or T-bolt options available. When the hardware is tightened, the WEEB® washer’s specialized teeth embed into coated (e.g. anodized, powder coated, etc.) metal or any electrically conductive metal to establish a reliable electrical connection.

The Wiley Grounding Lug is available unassembled, without installation hardware, and with standard hole sizes of 1/4” and 5/16” (M8). Perfect for galvanized steel applications or anywhere a WEEB® washer is not required.

WEEB® Lug

Wiley Lug

Features and Benefits

- UL 467 Listed, UL 2703 Listed
- Made of corrosion-resistant, tin-plated copper
- Design ensures a quick and easy installation
- Available:
 - With or without WEEB® washer technology
 - Assembled or unassembled
 - With or without installation hardware
- No surface preparation required on the rail or module with WEEB-LUG
- Custom designs available upon request
- Reliability for use throughout the lifetime of the PV system

Wiley Cable Hanger Family

WCH - Wiley Cable Hanger Family

The Wiley Cable Hanger Family is designed specifically to support cables and fuses via module frame mounting or wire management holes or secured at the tracker system level in a fast, easy one step application. With models oriented either straight-on or at a 90° angle, there are options for both traditional and bi-facial modules. The round cross-section of the hangers ensures the cable insulation is protected from chafing in high wind and tracker movement. Offered in either stainless or galvanized steel construction, both provide a solution made to last. Many of our hanger options are now available in easy-to-use bundle packages. All hanger types except the WCHJ type are UL1565.

WEEB® Washers Washer Electrical Equipment Bond (WEEB®)

WEEB® Washer Washer Electrical Equipment Bond

A revolution in bonding, WEEB® washers eliminate the need for older, more expensive grounding methods while also significantly reducing the amount of labor and materials used installations. No surface preparation or masking required.

Here's how it works: The WEEB® teeth pierce through most non-conductive coatings (e.g. anodization and powder coating) and embed into the underlying metal thus creating a bonding connection between the mounting surface and the coated metal component that it is installed on or between (e.g. equipment racks, cabinets, enclosures, cable tray, lugs, etc.). The result is excellent conductivity without oxidation — in solar it bonds the PV module frame with the metal racking structure. Essentially, the module and rail become one singular piece of metal, creating an electrical path to ground.

The WEEB® washers can be used in various applications like, but not limited to, coated equipment, fence, or cabinet bonding.

Features and Benefits

- UL 467 Listed
- UL 2703 Recognized; UL 2703 Listed with certain systems
- Corrosion-resistant 304 stainless steel construction
- Reliability for use throughout the lifetime of the PV system
- Rated for outdoor use
- Multi-use
- Custom designs available upon request

Telecom WEEB® Washers; 2-Hole

Telecom WEEB® Washer

Washer Electrical Equipment Bond

The Telecom WEEB® Washer design utilizes patented WEEB® Washer teeth eliminating the need to remove nonconductive coatings (e.g. anodization and powder coat) when making bonding connections. The teeth pierce through most nonconductive coatings and embed into the underlying metal creating a bonding connection between the lug and the coated metal component that it is installed on (e.g. equipment racks, cabinets, enclosures, cable tray, etc.). Eliminating the step to remove nonconductive coatings is a huge time savings in addition to creating a cleaner work environment and most important, prevent improper coating removal techniques that can lead to poor connections.

Features and Benefits

- Made from corrosion resistant 304 stainless steel for outstanding durability and performance
- Eliminates the need for surface preparation and oxide inhibitor
- Detailed manual specifying proper hardware, torque, and mounting information is available upon request
- UL 467 Recognized for grounding and bonding equipment
- Custom grounding and bonding solutions available upon request

Telecom WEEB® Washers; Single Hole

Telecom WEEB® Washer; Single Hole

Washer Electrical Equipment Bond

The WILEY Telecom WEEB® (Washer, Electrical Equipment Bond) Washer is a powder coat and paint penetrating, contact-enhancing washer used between connectors and equipment frames, cabinets and other painted metallic surfaces to be bonded.

The WEEB® Washer teeth eliminate the need to remove non-conductive coatings (e.g. paint and powder coat) when making a bonding connection. The WEEB® teeth pierce through most non-conductive coatings and embed into the underlying metal thus creating a bonding connection between the lug and the coated metal component that it is installed on (e.g. equipment racks, cabinets, enclosures, cable tray, etc.). Not having to remove non-conductive coatings will save on installation time, create a cleaner work environment, and most importantly, prevent improper coating removal techniques that can lead to poor connections. WEEB® Washers also help eliminate unwanted rotation of the lug keeping your connections secure and properly bonded.

Features and Benefits

- For bonding lug to underlying coated metal surfaces in various applications (e.g. equipment racks, cabinets, servers, enclosures, cable trays, etc.)
- For use with 1-Hole HYLUG™ or equivalent connectors
- Wire Range: #14 to #6 AWG
- Coating Types: Paint, Powder Coating and similar
- Coating Thickness: Maximum 5 Mils
- WEEB-TC14: 1/4" Stud
- WEEB-TC38: 3/8" Stud
- Refer to detailed manual specifying proper hardware, torque, mounting information, and applicable lugs

Wiley Bonding Jumper, Tin-plated, braided copper

Bonding Jumper

Tin-plated Braided Copper

Constructed of corrosion resistant, tin-plated, braided copper, the Wiley line of bonding jumpers are high quality solutions for your system.

The WEEB® Bonding Jumper is used to create an electrical connection between two pieces of coated (e.g. anodized, powder coated, etc.) metal or any electrically conductive material. This maintains electrical continuity over long spans or air gaps between metal structures.

The Wiley Bonding Jumper is used to create an electrical connection between two pieces of galvanized steel or other uncoated electrically conductive metals.

Features and Benefits

- UL 467 Listed, UL 2703 Listed
- Corrosion resistant, reliability for use throughout the lifetime of the PV system
- Equivalent to #6 AWG copper wire
- Available:
 - With or without WEEB® washer technology
 - Assembled or unassembled
 - With or without installation hardware
- In-stock standard lengths from 6" to 36" (custom lengths available upon request)

WEEB® Bonding Jumpers:		<i>Utilizes proven WEEB® washer technology to bite through any non-conductive coatings.</i>

WEEB® Rope Lay Jumper, Flexible Bonding Jumper Solutions

WEEB® Rope Lay Jumper (WEEB-RLJ)

Flexible Bonding Jumper Solutions

The WEEB® Rope Lay Jumper is the optimal solution for creating a bonding connection between applications involving moving components with coated surfaces. The WEEB-RLJ type jumpers are flexible in all directions and can be mounted to any coated flat surface creating an immediate bonded connection without the need to remove nonconductive coating. The rope lay jumper is made from tin plated copper stranding and crimped into a high-quality BURNDY® lug. It meets the requirements of both UL467 and UL2703. The WEEB Washer's patented WEEB® Washer teeth pierce through most nonconductive coatings and embed into the underlying metal creating a bonding connection between the lug and the coated metal component that it is installed on. Not having to remove nonconductive coatings will save on installation time, create a cleaner work environment and most importantly, prevent improper coating removal techniques that can lead to poor connections.

At a standard size equivalent to 6 AWG conductor, engineers and installers can be confident in meeting and exceeding bonding requirements in most applications.

The WEEB-RLJ is available with a variety of mounting hole sizes and in three standard lengths. Adding flexibility to both the installation process and applications requirements, custom lengths and mounting configurations are available upon request.

Features and Benefits

- Bonding connection between moving and stationary coated components with extremely flexible conductor stranding
- Standard mounting geometry and hardware requirements allow quick and easy installation
- Tin plated copper construction ensures durability against the elements and provides the environmental stability required for installation longevity
- The WEEB® Washer is made from corrosion resistant 304 stainless steel which provides outstanding durability and performance
- Offered in a variety of lengths and mounting hardware sizes - custom configurations available upon request
- UL467 and UL2703 Listed

Wiley Rope Lay Jumper, Flexible Bonding Jumper Solutions

Wiley Rope Lay Jumper (WILEY-RLJ)

Flexible Bonding Jumper Solutions

The Wiley Rope Lay Jumper is the optimal solution for bonding applications involving moving components. The WILEY-RLJ type jumpers are flexible in all directions and can be mounted to any flat surface. Made from tin plated copper stranding and crimped into a high-quality BURNDY lug, the rope lay jumper meets requirements of both UL467 and UL2703. At a standard size equivalent to 6 AWG conductor, engineers and installers can be confident in meeting and exceeding bonding requirements in most applications. The WILEY-RLJ jumpers are available with a variety of mounting hole sizes and in three standard lengths. Adding flexibility to both the installation process and applications requirements, custom lengths and mounting configurations are available upon request.

Features and Benefits

- Bonding connection between moving and stationary coated components with extremely flexible conductor stranding
- Standard mounting geometry and hardware requirements allow quick and easy installation
- Tin plated copper construction ensures durability against the elements and provides the environmental stability required for installation longevity
- Offered in a variety of lengths and mounting hardware sizes - custom configurations available upon request
- UL467 and UL2703 Listed

Wiley Mid-Clamp, 304 Stainless Steel

Wiley Clamping Solutions

Mid-Clamps

Our universal mid-clamp and adjustable end clamp designs accommodate various module thicknesses. The Wiley Mid-Clamp uses proven WEEB® technology for integrated bonding as well as a quick and easy installation.

Features and Benefits

- UL 467 Listed
- UL 2703 Recognized
- Low profile design
- Increased inspectability
- Custom designs and finishes available upon request
- Reliability for use throughout the lifetime of the PV system

Introduction, How to Install Connectors Including PENETROX™

Introduction

BURNDY wiring accessories have been designed to supplement and enhance BURNDY connection selection and use. All have been designed and engineered for easy installation and long life, reflecting

over 90 years of experience and resulting contributions of the electrical industry.

PENETROX™ How to Install Connectors

1. Select the right connector.

Always use an aluminum connector for aluminum or copper conductor. Choose a connector that's marked for the wire size you're using. Never use a copper connector on aluminum conductor.

2. Strip carefully.

Remove the insulation without nicking the wire.

3. Brush thoroughly.

Always wire-brush the stripped portion of the wire. An unplated terminal pad, and the surface to which the terminal will be attached should also be wire-brushed.

4. Apply PENETROX™ Joint Compound

For mechanical connectors, apply PENETROX™ joint compound liberally to the conductor to prevent the formation of surface oxides once the connection is made. Also apply PENETROX™ oxide inhibitor to any terminal pad.

5. Tighten completely.

For mechanical connectors, use wrench or screwdriver to securely tighten the aluminum connectors, as recommended by BURNDY.

6. Crimp.

For compression connectors, choose the right die and the right tool. Insert the wire completely and make the recommended number of crimps.

PENETROX™ Oxide Inhibiting Joint Compound, Types A, A-13, E, and HT

PENETROX™ TYPES A, A-13, E, HT Oxide Inhibiting Joint Compounds

PENETROX™ oxide inhibiting compounds product low initial contact resistance, seal out air and moisture, prevent oxidation or corrosion, exhibit superior weathering characteristics, are usable over wide temperature ranges, and provide a high conductivity “gas-tight” joint. All PENETROX™ compounds contain homogeneously suspended metal particles. The suspended metal particles assist in penetrating thin oxide films, act as electrical “bridges” between conductor strands, aid in gripping the conductor, improve electrical conductivity and enhance the integrity of the connection.

The specially formulated PENETROX™ compounds are for use with compression and bolted connectors providing an improved service life for both copper and aluminum connections. Additionally, the nontoxic compounds are an excellent lubricant for threaded applications, reducing galling and seizing.

PENETROX™ with brush lid

All types of PENETROX™ are available in an 8 oz. bottle with a brush lid for ease of application.

PENETROX™ A

PENETROX™ A is a natural (petroleum) base compound with evenly suspended zinc particles. It is recommended for aluminum to aluminum, aluminum to copper connections and aluminum conduit threads. It is not recommended for use with rubber or polyethylene insulated conductors. UL listed to 600V.

PENETROX™ A13

PENETROX™ A13 is a synthetic base compound with evenly suspended zinc particles. It is recommended for aluminum to aluminum, aluminum to copper connections plus aluminum conduit threads. It is compatible with rubber, polyethylene and other insulating materials. UL Listed for all voltages.

PENETROX™ E

PENETROX™ E is a synthetic base compound with evenly suspended copper particles. It is recommended for copper to copper, copper threads and all grounding applications. UL Listed.

PENETROX™ HT

PENETROX™ HT is a synthetic silicone based compound with evenly suspended zinc particles and nickel-aluminum alloy particles. It is recommended for aluminum to aluminum connections. It is compatible with rubber. Designed for use with High Temperature ACSS and ACCC connectors. **Not UL Listed.**

PENACARTRIDGE

PENACARTRIDGE is a 1 lb. cartridge filled with PENETROX™-A. It's designed to fit standard caulking guns for easy insertion into transmission and distribution connectors. Additionally, this packaging design provides a convenient method for applying PENETROX™ to many different applications.

PENETROX™ A, A-13, E, and HT Technical Information

PENETROX™ TYPES A, A13, E, HT Technical Information

PENETROX™ oxide inhibiting compounds produce low initial contact resistance, seal out air and moisture, prevent oxidation or corrosion, exhibit superior weathering characteristics, are usable over wide temperature ranges, and provide a high conductivity “gas-tight” joint. All PENETROX™ compounds contain homogeneously suspended metal particles. The suspended metal particles assist in penetrating thin oxide films, act as electrical “bridges” between conductor strands, aid in gripping the conductor, improve electrical conductivity and enhance the integrity of the connection.

The specially formulated PENETROX™ compounds are for use with compression and bolted connectors providing an improved service life for both copper and aluminum connections. Additionally, the nontoxic compounds are an excellent lubricant for threaded applications, reducing galling and seizing.

PENETROX™ Type	Aluminum to Aluminum	Aluminum to Copper	Copper to Copper	Aluminum Conduit Threads	Copper Conduit Threads
PENETROX™ A	X	X		X	
PENETROX™ A13	X	X		X	
PENETROX™ E			X		X
PENETROX™ HT	X				

See below for more details on the different types of PENETROX™

PENETROX™ Type A

PENETROX™ A consists of a natural (petroleum) base vehicle in which zinc particles are suspended. For aluminum to aluminum, aluminum to copper applications and aluminum conduit threads. It is not recommended for use with rubber and polyethylene insulated conductors. UL Listed to 600 volts.

PENETROX™ Type A13

PENETROX™ A13 consists of a non-petroleum base vehicle in which zinc particles are suspended. Recommended for aluminum to aluminum, aluminum to copper applications and aluminum conduit threads. Compatible with insulating materials such as rubber, or polyethylene. UL Listed and recommended for all voltages.

Easy to apply:

1. Scratch brush the conductor surfaces until bright and clean.
2. Immediately apply PENETROX™ to the conductive surfaces.
3. For EHV applications, remove all excess PENETROX™ after installation is complete.

PENETROX™ Type E

PENETROX™ E consists of a non-petroleum base vehicle in which copper granules are suspended. Recommended for copper to copper applications, grounding and for use on copper conduit threads. UL Listed to 600 volts.

PENETROX™ Type HT

PENETROX™ HT consists of a non-petroleum base vehicle in which zinc and nickel-aluminum particles are suspended. Recommended for use with aluminum to aluminum High Temperature rated ACSS and ACCC conductors. Not UL Listed.

Shelf Life

When stored in its original container in cool (under 100°F) dry environment, PENETROX™ oxide inhibiting compound will remain workable and functional for 5 years from the Date of Manufacture (MO) marked on the container.

38-0305-00 Wire Brush

PENETROX™ A, A-13, E, and HT, Properties and Ordering Information

PENETROX™ TYPES A, A13, E, HT Properties and Ordering Information

PROPERTIES OF PENETROX™

Property	Value PENETROX™ Definition	PENETROX™ HT	PENETROX™ E & A13	PENETROX™ A
Penetration (Unworked)	The value in accordance to ASTM D217 indicates the consistency of a grease. The higher the number, the softer the grease.	240	250	230
Dropping Point (Minimum)	The temperature at which the grease passes from the semi-solid to a liquid state under test conditions.	>580° F	350° F	230° F
Pour Point (Maximum)	The lowest temperature at which the compound will flow. Pour point is the lubricant's ability to perform in cold conditions.	-58° F	-40° F	-15° F

* MSDS sheets available through customer service.

Recommended Tightening Torque DURIUM™ Silicon Bronze Bolts

Recommended Tightening Torque

The hardware used in connectors must be compatible with the connector material, have high mechanical strength and be corrosion resistant and correspond to NEMA recommendations.

Copper alloy connectors have hardware made of DURIUM™, which is the BURNDY trade name for silicon bronze alloy ASTMB99 type B. This material was first introduced by BURNDY® in 1927 for use in outdoor construction, and today, is the standard throughout the industry.

Aluminum connectors generally have aluminum alloy hardware. The bolts are 2024T4 and anodized to resist corrosion. The nuts are 6061T6, which is resistant to corrosion and does not require anodizing. Both nuts

DURIUM™ and Steel Hardware		Aluminum Hardware	
Bolt Size	Rec. Torque (Inch Pounds)	Bolt Size	Rec. Torque (Inch Pounds)
1/4 - 20	80	1/2 - 13	300
5/16 - 18	180	5/8 - 11	480
3/8 - 16	240	3/4 - 10	650
1/2 - 13	480		
5/8 - 11	660		
3/4 - 10	1,050		

and bolts are lubricated to eliminate galling and to provide consistent clamping forces.

To reduce or greatly exceed the recommended torque can adversely affect the performance of the connector.

DURIUM™ Bolt Silicon Bronze Bolts

BURNDY® introduced silicon-bronze bolts, nuts and other hardware items on outdoor connector applications in 1927. Today the DURIUM™ trademark is a standard for this use. DURIUM™ bolts combine high strength with corrosion resistance. Heads have American Standard dimension and the threads are per American National Coarse Series, Class #2 fit. The silicon bronze is per ASTM B99.

Stainless Steel Bolts, Nuts, and Washers

Stainless Steel Hardware

Stainless steel bolts, nuts, flatwashers and split lockwashers are manufactured from 18-8 non-magnetic material. Nut surfaces and bolt heads have American National Coarse Series, Class #2 fit.

Stainless Steel Belleville Washers

Stainless Steel Belleville Washers

Any bolted “pad to flat” electrical connection should include a bolt, two flatwashers, and the nut. In addition, if any of the flat components is aluminum, a properly designed Belleville washer should be interposed between one of the flatwashers and either the bolt head or the nut, with the hollow of the Belleville washer placed against the flat washer. BURNDY® Belleville washers are designed to maintain substantial force when tightened to NEMA-recommended values and finely finished to avoid galling.

DURIUM™ Silicon Bronze and Stainless Steel Hardware Kits

Type TMH DURIUM™

Silicon Bronze Hardware Kits

Type TMH DURIUM™ silicon bronze hardware kits can be ordered for specific applications ensuring the proper type and amount of hardware for each installation. Packaged in separate sealed bags, they are convenient to use, eliminating mismatched quantities. DURIUM™ silicon bronze material provides long lasting corrosion resistance Grade 2.

Catalog Number	Size	Each TMH Kit Includes:					Working Range (R)	Installation Torque (In-lbs)
		Bolt		Flat Washer	Split Washer	Hex Nut		
		Length	Qty

† For use with CUSA750-2TC38 copper spacer adaptor, (2) terminals and 3/8" thick equipment bus bar. For other combinations contact BURNDY®.

†† For use with all GAR-TC connectors. "R" dimension is allowable pad thickness of terminal

* For other combinations contact BURNDY®

① "L" dimension never exceeds 0.25"

② For use with CUSA442TC38 on 1/4" bus bar and HYLUG™ 4/0 - 750 kcmil

Type TMH-SS

Stainless Steel Hardware Kits

Type TMH-SS are stainless steel hardware kits. Just like the standard TMH kits, these kits can be ordered for specific applications ensuring the proper type and amount of hardware for each installation. They are packaged in separate sealed bags and convenient for use and ordering.

Catalog Number	Size	Each TMH Kit Includes:					Working Range (R)	Installation Torque (In-lbs)

Covers for Transformer Connectors

Type COVERYA

Covers for Transformer Connectors

These plastisol covers are typically used to cover secondary connections inside a 3-Phase pad mounted transformer and are provided in 9-1/2", 12", or 14" lengths to accommodate larger Paddle installations commonly found in Wind, Solar, and Utility applications. The covers are offered in orange or black as standard, but are available in a variety of colors. Multipurposed for use in many different applications covering mechanical and compression connectors. Covers are manufactured of dielectric grade PVC.

Contact the factory for any additional designs or colors that may be necessary for your specific application.

Features & Benefits

- Offered in orange or black as standard, but available in a variety of colors
- Multipurposed for use in many different applications covering mechanical and compression connections
- Labor Saving design features opening on the back end (T-Slit) to fit over Transformer Support Brackets without need for any dangerous "in-field" cutting or manipulation
- .88" diameter hole on the back allows for ground stud to fit through easily
- Hot Stick Adapter on top allows for safer removal when necessary
- Covers are manufactured in Black or Orange dielectric grade PVC

WIREMIKE™ Stainless Steel Wire Micrometer

WIREMIKE™ Stainless Steel Wire Micrometer

Features and Benefits

- Strong, durable, high quality
- Allow for use as both caliper and ruler
- Most formats measurers I.D. and O.D. of tubing, thin-wall and rigid conduit including IPS, ACSR, stranded and solid commercial cables

Catalog # WIREMIKE, WIREMIKED and RK1942 are for use on:

ACSR

#6 to 336.4 (26/7) Stranded

Stranded AWG

#18 to 2000 kcmil

Solid

#20 to 4/0 AWG

IPS Tubing (Cu/Al) and Rigid Conduit:

1/4" to 2-1/2"

Tubing Sizes:

3-1/8" inside maximum; 2-15/16" outside maximum

Thin-wall Conduit:

3/8" to 2-1/2"

WIREMIKE

Variations:

WIREMIKE

Stainless Steel with inch/fraction markings

WIREMIKECI

Stainless Steel, no ruler capabilities but may be used for reference on specific completed crimps (see more detail below on WIREMIKECI)

WIREMIKED

Stainless Steel, decimal markings in place of fraction markings, same capabilities as catalog # WIREMIKE™

RK1942

Convenience packaging of WIREMIKE (with inch markings) in packaging suitable for hanging on a rack; sold in multiples of 10 only

Catalog # WIREMIKECI is for use on:

Compression Connectors and Splices (including Compression Grounding)

- #18 to 2500 kcmil Copper Class B
- #10 to 4/0 Solid Aluminum / Copper
- #18 to 3500 kcmil Concentric Aluminum
- #8 to 1100 kcmil Compact Aluminum
- #14 to 1111 kcmil Copper DLO

Also used for reference only* for inspection of completed crimp when using Butting Copper or Aluminum Dies with the 750, 46, 35, or 39 series of tools.

- Copper Dies U8CRT to U44XRT
- Aluminum Dies U8CABT to U39ART2

Close up for the Die Inspection Section (Used for Reference Only) Catalog # WIREMIKECI only*

*WIREMIKECI tool is to provide measurements for reference only, not to confirm the suitability of connection. Customer is responsible to independently verify suitability of connection.

Material Information; Available Materials; Material Specifications

Available Materials

Nylon 6/6 — General Purpose

General purpose nylon 6/6 features light weight, high strength and a wide temperature range. It is halogen free so it does not release dangerous gases, such as chlorine, bromine, fluorine and iodine when burned. Nylon 6/6 is hygroscopic, and therefore, absorbs or releases moisture depending on its environment. Thus, the moisture level of the material will affect tensile strength, stiffness and elongation of the product.

Nylon 6/6 — Heat Stabilized

With similar properties and benefits as nylon 6/6, products manufactured with heat stabilized nylon 6/6 material have a chemical stabilizer added for higher continuous temperature applications.

Nylon 6/6 — UV Stabilized

Chemical inhibitors are used to give nylon 6/6 material added properties to fight against premature aging of products due to the effects of ultraviolet rays.

Nylon 6/6 — UV Stabilized (2% Carbon Military Specification)

The physical properties of this material include carbon, which acts as a UV stabilizer, prolonging the life of the product under ultraviolet conditions. It also allows cable ties to meet the particular military specification for cable ties.

Nylon 6/6 — V0 Flame Retardant

This material meets UL 94V-0 flammability requirements. Flame retardant additives generally reduce tensile strength when compared to general-purpose nylon 6/6, but this resin has been formulated to minimize such effects.

Nylon 6/6 — Metal Detectable

Metal content blended through cable tie. Meets US FDA food contact material compliance. Used to help prevent possible contamination that may result in recalls. Often used in food processing, beverage, pharmaceutical and cosmetic industries.

Nylon 6/6 — High Impact

Impact modifiers are added to increase flexibility. High impact nylon 6/6 has stable tensile strength due to its reduced influence from moisture. It is excellent for high vibration applications, as within the aircraft and automobile industries and performs better than nylon 6/6 against ultraviolet rays. Good for outdoor use.

Polypropylene

Polypropylene is used in environments where chemical effects on nylon are a concern. It is not affected by inorganic acids (hydrochloric), polyhydric alcohols (ethyleneglycol), neutral salts (sodium chloride) and basic salts (sodium bicarbonate). Polypropylene also resists a number of other chemicals with good results, although it has lower tensile strength than nylon 6/6 (about half). Polypropylene has good UV resistance.

Nylon 12 — UV Stabilized

Nylon 12 is resistant to chemicals and salts. Ideal for solar applications. Weather resistant grade, produced by the addition of stabilizers to the nylon resin.

Stainless Steel

Stainless Steel is used where corrosion, vibration, weathering, and temperature extremes are a concern. May be used for virtually any indoor, outdoor, or underground application. Available in both 304 and 316 Stainless Steel. Also available partially or fully coated with polyester.

TEFZEL® Fluoropolymer

TEFZEL® Fluoropolymer ties feature a low smoke density with excellent flammability rating (UL 94V-0) and tolerates extreme high and low temperatures. TEFZEL® comes in an aqua blue color with an operating temperature of Min. -112°F (-80°C), Max. 338°F (170°C). TEFZEL® is a Registered trademark of E.I. du Pont de Nemours and Company.

* Elevated temperatures, over time, will affect materials' properties such as tensile strength, stiffness, elongation and appearance.

BURNDY® recommends the evaluation of cable ties in the actual application to determine the suitability of the tie for that application.

UNIRAP™ Nylon Cable Ties — Engineering and Performance

UNIRAP™ Nylon Cable Ties

UNIRAP™ cable ties are fabricated of one piece Nylon with no metal parts. The straps are tough, resilient, lightweight and abrasion resistant. They offer high tensile strength and are chemically resistive to solvents, alkalies, oils, grease and diluted acids. Self-locking, they secure without twisting or leaving sharp projections.

Compact heads and pre-bent tips facilitate cable bundling in a minimum of time and space. UNIRAP™ cable ties are designed for both field and production line use and may be installed easily by hand.

BURNDY® cable ties consist of three components: strap, head, and tail. These components are specifically designed to function together to make BURNDY® UNIRAP™ cable ties superior in quality and performance. Shelf life of 5 years, when stored in original packaging.

Component

Precision Engineering

Enhanced Performance

1. Includes load bearing **serrations**.
2. Features **flats** between the serrations.
3. Features the **double outer rail system**.

1. Serrations provide complete adjustability within the fastening range.
2. Flats reduce stress concentrations and help make the tie stronger.
3. Smooth rails promote low drag, as well as minimize chafing.

4. The **pawl** is integrally formed with the head.
5. The **pawl** is stepped in order to wedge against the serrations in the strap to form the lock.
6. The **shoulders**, or the sides of the head, guide the strap and prevent it from disengaging from the pawl during loaded conditions.
7. The **back** supports the strap during the wedging of the lock formation.

4. The locking unit will not disengage. It also promotes low insertion with high pull out force for very easy installation.
5. The tie's ultimate strength achieves optimum levels.
6. Promotes cable tie strength, endurance and longevity.
7. Ensure optimum locking capability.

8. Features a **bent tip**.
9. Includes a **ribbed grip**.

8. Easy pick-up for installers, which leads to fast assembly.
9. Allows for easy, no-slip grip.

Cable Ties Nylon 6/6 Standard

UNIRAP™ Standard Cable Ties Type CT

General purpose nylon 6/6 features light weight, high strength and a wide temperature range. It is halogen free so it does not release dangerous gases, such as chlorine, bromine, fluorine, or iodine when burned. Nylon 6/6 is hygroscopic, and therefore absorbs or releases moisture depending on its environment. Thus, the moisture level of the material will affect tensile strength, stiffness, and elongation of the product.

UV Black / UV Black (Mil. Spec.) are 2% Carbon UV Stabilized.

Cable Ties Nylon 6/6 Identification and Push Mount, Fir Tree

UNIRAP™ Identification Cable Ties Type CT-ID

Identification cable ties are used in both bundling and identifying the wire groups at the same time. Same material, features and benefits as the Nylon 6/6 Standard Cable Ties.

UNIRAP™ Metal Detectable Type CMDT

These ties are perfect for use in consumable products such as food processing applications, beverage, pharmaceutical, and cosmetic industries. The metal detectable ties are an excellent choice and are US FDA food contact material compliant*.

*Metal detectable material complies with the compositional requirements of US FDA regulations for Direct Food Contact; 21 CFR 177.1500 and 21 CFR 184.1375.

Customer is responsible for ensuring the setting on metal detectable machines is adjusted and monitored

for wet or dry products or environments, ferrous and non ferrous metals, type of food/products, packaging material speed, and orientation of scanned product.

UNIRAP™ Heat Stabilized Cable Ties Type CTHS

With similar properties and benefits as nylon 6/6, product manufactured with heat stabilized nylon 6/6 material have a chemical stabilizer added for higher continuous temperature applications. Range up to 225° F.

Features & Benefits

- Good fatigue resistance
- Resistant to chemicals
- Higher temperature range
- Meets the requirements of UL94V-2 flammability rating

Nylon 6/6 Standard Cable Tie Mounting Bases

UNIRAP™ Standard Cable Tie Mounting Bases Type CTB

BURNDY® offers a wide variety of mounting bases suited for many applications. Mounting bases are used in conjunction with cable ties to stabilize and secure wire bundles, both indoors and outdoors. Mounting bases can be secured to a surface using rubber adhesive, acrylic adhesive, or also can be screw mounted.

The Rubber Adhesive has an operating temperature range from 14°F/-10°C to 140°F/60°C; Acrylic Adhesive has a temperature range of 14°F/-10°C to 176°F/80°C. When using the screw mounting option ONLY (not using any adhesive to secure the base) the product has a temperature range of -40°F/-40°C to 185°F/85°C.

These mounting bases are available to accommodate CT18 through CT50 series cable ties. Insertion of ties can be made from all sides. Each mount may be secured with screws, adhesive backing, or both, for ease of application and stability. For applications where higher temperatures, certain chemicals, or UV radiation are a concern and an adhesive is the preferred method for securing, the acrylic adhesive mounting bases are recommended.

Cable Hangers Nylon 6/6; UV Black / Natural

UNIRAP™ Cable Hangers Type CH

Cable hangers provide a contact area range of 1/2" to 3/8" in width. All contact edges have a full radius for product protection, and sizes are clearly marked on each clamp.

Cable hangers are injection molded. Available in Natural and UV Black nylon 6/6.

Cable Ties; Stainless Steel Barb Nylon 6/6; UV Black / Natural

UNIRAP™ Stainless Steel Barb Cable Ties Type CT-SSB

The Stainless Steel Barb cable ties (Type CT-SSB) are nylon 6/6 material featuring self-locking stainless steel barbs and oval low-profile head. There are no sharp edges helping prevent damaged cables. Type CT-SSB ties have a curved tip for faster initial threading and help speed installation. The no slip tail provides an easy grip during tensioning. Type CT-SSB ties are available in Natural and UV Black. These cable ties are cULus Listed for Wiring Positioning devices.

Features & Benefits

- Nylon 6/6 Standard
- Self-locking stainless steel barb
- Available in UV Black and Natural
- Maximum strength and adjustability for versatility
- Chemically resistant to solvents, oils, grease, and diluted acids
- Rounded edges and bent tail for easy installation
- Safe for air handling spaces
- Plenum Rated

Cable Ties; Universal Grade Nylon 6/6; UV Black / Natural

UNIRAP™ Universal Grade Cable Ties Type CT-UG

General purpose nylon 6/6 ties feature light weight, high strength and a wide temperature range. It is halogen free so it does not release dangerous gases, such as chlorine, bromine, fluorine, or iodine when burned. Nylon 6/6 is hygroscopic, and therefore, absorbs or releases moisture depending on its environment. The moisture level of the material will affect tensile strength, stiffness and elongation of the product.

Type 21

Features & Benefits

- Nylon 6/6 Standard
- Available in UV Black and Natural
- One piece injection molded
- Maximum strength and adjustability for versatility
- Chemically resistant to solvents, oils, grease, and diluted acids
- Rounded edges and bent tail for easy installation
- Self-locking

UNIRAP™ Nylon 12 Cable Ties Type CTNT

Nylon 12 cable ties provide excellent UV, chemical and moisture resistance. The ties feature inside serrations and a bent tail for quick and easy installation. Manufactured from polyamide 12 the ties also have a smooth edge to prevent bundle damage. Especially suitable in high moisture, corrosive (zinc chloride and dilute acids) environments or where low temperatures are a factor. Indoor or outdoor applications.

VELCRO® Hook and Loop Straps; TEFZEL® Fluoropolymer Ties

VELCRO® Hook and Loop Straps Type TFV-B

Reusable and flexible, hook and loop straps are a unique self-gripping fastening system. These ties are specifically used on fiberoptic applications.

The TFV-V2 flame retardant straps are UL Listed Wire Positioning Devices (ZODZ), UL94-V2 rated for use in air handling spaces in accordance with the NEC Section 300-22(c) and (d). Perfect for plenum areas.

25 straps are conveniently packaged in each polybag.

Stainless Steel Cable Ties; Grade 304, Uncoated

UNIRAP™ Grade 304 Stainless Steel; Uncoated Type CTSS

BURNDY® 304 Stainless Steel ties are designed to secure hoses, cables, poles, pipes, and more when harsh environmental conditions may adversely affect the bundling application.

Used where corrosion, vibration, weathering, radiation, and temperature extremes are a concern. BURNDY® Stainless Steel ties can be used in virtually any indoor, outdoor, and underground application.

These Stainless Steel ties are made from Grade 304 Stainless Steel. Designed with a low profile clamping bearing head with fully adjustable strap accommodating many bundle diameters.

Features & Benefits

- Meet ABS Requirements
- 304 Grade Stainless Steel
- Suitable for general purpose applications
- Smooth, rounded edges help ensure safe, efficient handling
- Available in a variety of lengths and widths
- Self-locking steel ball design speeds installation and locks into place at any length
- Provides a strong, durable method of cable bundling
- Flame retardant and non-toxic for applications where safety from fire is critical

Stainless Steel Cable Ties; Grade 304, Partially Coated

UNIRAP™ Grade 304 Stainless Steel; Partially Coated; Type CTSS-PC

BURNDY® Stainless Steel Partially Coated cable ties (Type CTSS-PC) are designed with a steel ball self-locking mechanism. There are no sharp edges which prevents damaged cables. These ties have smooth, rounded edges and polyester coating which add to the safety of the installer. High tensile strength along with the shield of the polyester coating offer a reliable and lasting bundling solution. CTSS-PC ties are currently available in black. BURNDY® Stainless Steel Partially Coated Cable Ties can be used in any indoor, outdoor, or underground application.

Features & Benefits

- Meet ABS Requirements
- 304 Grade Stainless Steel
- Available in Black only
- Suitable for general purpose applications
- Smooth, rounded edges along with the polyester coating add to the safety of the installer
- Self-locking steel ball design speeds installation and locks into place at any length
- Provides a strong, durable method of cable bundling
- Available in a wide range of lengths and widths
- Halogen free low smoke polyester coating

Stainless Steel Cable Ties; Grade 304, Fully Coated

UNIRAP™ Grade 304 Stainless Steel; Fully Coated; Type CTSS-FC

The Stainless Steel Fully Coated cable ties (Type CTSS-FC) are designed with a steel ball type locking mechanism. There are no sharp edges which prevents damaged cables. These ties have smooth, rounded edges and polyester coating which add to the safety of the installer. High tensile strength along with the shield of the polyester coating offers a reliable and lasting bundling solution. Type CTSS-FC ties are currently available only in black. BURNDY® stainless steel fully coated cable ties can be used in any indoor, outdoor, or underground application.

Features & Benefits

- Meet ABS Requirements
- 304 Grade Stainless Steel
- Available in Black only
- Suitable for general purpose applications
- Smooth, rounded edges along with the polyester coating add to the safety of the installer
- Self-locking steel ball design speeds installation and locks into place at any length
- Provides a strong, durable method of cable bundling
- Available in a wide range of lengths and widths
- Halogen free low smoke polyester coating

Wiley Wire Management Straps

Wiley Bundle Straps

304 Stainless Steel Wire Covered with Vinyl Jacket

The Wiley Bundle Strap is made of corrosion resistant 304 stainless steel, which makes for a durable, long lasting and reliable solution for all environments. The vinyl jacket covering the stainless steel wire is designed to protect cable insulation from damage. The Wiley Bundle Strap is easy to install and can be crimped in the field with electrician linesman pliers or standard wire cutters. The crimp sleeve's retention feature allows for a quick, effortless, secure installation. Custom lengths available upon request.

Features & Benefits

- UL 62275 Listed, RoHS compliant
- High quality, long-lasting, labor saving, wire management solution
- UV rated vinyl vinyl jacketed stainless steel wire with 304 stainless steel crimp
- Vinyl jacket designed to protect cable insulation from damage
- 304 stainless steel crimp sleeve allows for quick and easy installation
- Can be crimped in the field with electrician lineman pliers or standard wire cutters
- Retention feature allows for a quick, effortless, securing installation
- Lasts for the lifetime of the PV system
- Custom lengths available upon request

Wiley Wire Management Twist Straps

Wiley Twist Straps

The innovative Wiley Twist Strap (WTS) provides a quick, dependable wire management solution. As easy to use as a cable tie, while offering the durability of a bundle strap. The corrosion-resistant 300 series stainless steel wire core is coated with UV-resistant PVC. The round geometry eliminates the risk of sharp edges cutting into PV cable jackets.

To use, insert the stem into twisted eye loop and fold over for a tested tensile strength of up to 40 lbs. With lengths varying from 8” to 36”, the WTS can be used to secure wires almost anywhere on a PV system, including around the torque tube!

Features & Benefits

- Durable, labor saving solution
- Non-corrosion 300 series stainless steel core
- UV Resistant PVC coating
- Reusable / Repositional
- No tools necessary for installation or removal
- Custom lengths available upon request
- UL62275 pending

Wiley Cable Hanger Family

WCH - Wiley Cable Hanger Family

The Wiley Cable Hanger Family is designed specifically to support cables and fuses via module frame mounting or wire management holes or secured at the tracker system level in a fast, easy one step application. With models oriented either straight-on or at a 90° angle, there are options for both traditional and bi-facial modules. The round cross-section of the hangers ensures the cable insulation is protected from chafing in high wind and tracker movement. Offered in either stainless or galvanized steel construction, both provide a solution made to last. Many of our hanger options are now available in easy-to-use bundle packages. All hanger types except the WCHJ type are UL1565.

Wiley Cable Clips

Wiley Cable Clips

High-quality wire management solutions

Engineered for high-quality wire management solutions, Wiley Cable Clips simplify wire management and create a cleaner aesthetic to solar PV arrays. The clips are made of corrosion resistant stainless steel, which makes for a durable, long lasting and reliable solution in all environments and are designed with coined and rolled edges to prevent damage to cable insulation. The designs are easy to install and remove with a flat head screwdriver. The clips can be used in a wide variety of mounting configurations (including 90 and 180 degrees) for module and rail applications. Custom designs are available upon request.

Features and Benefits

- UL 1565 Listed
- Accommodates a broad range of cable combinations and sizes (e.g., USE-2, PV, AC module, and micro inverter cables)
- Environmentally tested - UL 2703 and ASTM B117
- No tools required for installation
- Coined and rolled edges to prevent damage to cable insulation
- Reliability for use throughout the lifetime of the PV system

Wiley Edge Clip with Cable Tie

Wiley Edge Clip with Cable Tie (ACC-ECT) High-quality wire management solutions

The WILEY ACC-ECT is the perfect solution to route cable bundles without the need for mounting holes or additional hardware. The ACC-ECT is a nylon-encased plated steel clip that installs onto the module frame flange and allows a cable tie to be routed in both landscape (on the horizontal/perpendicular portion of the module frame) and portrait (on the vertical/parallel portion of the module frame) orientations. The ACC-ECT is available in UV resistant, high impact heat stabilized nylon 6/6 and nylon 12 material; both the 6/6 and 12 have a tensile strength of 50 lb. Nylon 12 makes the ACC-ECT especially suitable in high moisture, corrosive environments or where low temperatures are a factor.

Features and Benefits

- Route cable bundles without the need for mounting holes or additional hardware
- Installs in a vertical/parallel (90°) or horizontal/perpendicular (180°) orientation
- Steel lances securely anchor clips to module frames or purlins
- Offered in various nylon types with 50 lb tensile strength:
 - UV resistant, high impact heat stabilized Nylon 6/6
 - UV resistant Nylon 12 which provides excellent UV, chemical and moisture resistance

Style A - Vertical/Parallel Installation

Style B - Horizontal/Perpendicular Installation

Cable Tie Installation Tooling; 145PTAG 94V0 Nylon Tag

Cable Tie Tools Types CTTSS

Ergonomics and the prevention of repetitive motion injuries, coupled with the need to continually improve assembly efficiencies and procedures, are a major concern with most cable tie users. BURNDY® cable tie tools effectively address both issues. BURNDY® has world class cable tie tools to complement its line of quality cable ties. These tools are truly state-of-the-art both in design and performance.

BURNDY® tools make it easier for operators to install cable ties, while maintaining correct tension and flush cut-off. Worker safety is further enhanced as the tools can eliminate the sharp edges of a cut-off cable tie.

Catalog Number	Description	For Use On
CTTSS900	Stainless Steel Tie Tool	SS Ties up to 900 lbs

145PTAG 94V0 Rated Nylon Tag

Designed originally for the telecom market, this tag is applicable anywhere the need to mark tags in the field exists. Typically secured to cabling using a multi-ply cord or cable tie, or waxed cord. The tags may be written on in most inks or using a permanent marker. Durable, flame retardant, white nylon tag 94V0 rated.

Mechanical (Bolted) Tap Connectors Installation Information

Mechanical (Bolted) Tap Connectors

The BURNDY line of mechanical tap connectors is the most complete, dependable and economical available. These mechanical connectors consist of service, parallel, and midspan types.

Generally the alloys and hardware used depend on whether the connector is for a strain or current carrying application, and is made of aluminum or copper. Particular alloys and hardware are selected for strength, conductivity, durability, ductility and resistance to corrosion.

In a copper connector, high strength alloys are used in mechanical clamping components and high conductivity alloy in current carrying elements.

Aluminum clamp type connectors are made of alloy 356, which is impervious to stress corrosion. In its heat-treated state, it has high strength and is used for both current carrying and clamping elements.

Hardware is high strength and corrosion-resistant. In copper connectors, DURIUM™, a silicon bronze alloy, is used. Anodized aluminum alloy 2024-T4 bolts and

6061-T6 nuts are used in aluminum connectors. They provide the best combination of strength, resistance to galling and corrosion, and their thermal coefficient of expansion is most suitable for aluminum. To insure dependable connections, bolts should be tightened to the recommended torque values shown in the specific product table or in the table below.

These mechanical tap connectors are mainly used in overhead distribution systems to provide primary service taps and/or secondary service drop connections to the end users.

A few of the key features and benefits of these connectors are:

Features and Benefits

- High strength alloys provides efficient and reliable performance
- Range taking designs accommodate a large range of conductors in either groove; reducing inventory needs to a minimum
- Matched groove designs ensure maximum contact with conductors accommodated
- Hex bolts, nuts, and washers provide high contact pressure and rapid assembly

Recommended Tightening Torque		Standard Wrench Size	
Bolt Size	Recommended Torque (Inch Lbs.)	Bolt	Nut
DURIUM™ Silicon Bronze and Galvanized Hardware

SERVIT® Type KS, KS-3 Split-bolts

SERVIT® Types KS, KS-3 Split-bolt connectors for copper, copperweld

Material: Copper

Compact, high strength, high copper alloy SERVIT® split-bolt has free-running threads and easy to grip wrench flats. Highly resistant to season cracking and corrosion, the SERVIT® connectors provide maximum pressure and assure a secure connection on all combinations of run and tap conductors. Type KS-3 accommodates 3 maximum size conductors.

▲ Listed torque values are for maximum conductor combinations accommodated. Consult UL486 Tables 7-4, 7-5, 7-6 for smaller conductor combinations. See note page A-2

* Not UL Listed or CSA Certified.

† In addition to UL Listed for wire connectors and CSA Certified, these items are also UL rated for direct burial. To ensure proper tightening torque use BURNDY® BTW Torque Wrenches.

SERVIT® Cover, Type SC; Universal SERVIT® Connector, Type KSU

SERVIT® Cover Type SC Split-bolt SERVIT® Connector Cover

Material: Plastic

Used indoors or outdoors this compact, one-piece plastic SERVIT® cover, saves time and material, eliminates costly taping of split-bolts. Positive latch snaps easily and quickly over connector, ideal for tight quarters. Self positioning plastic fingers wrap around wires fully insulating joint. UL Listed for 600 volt indoor application. Three covers accommodate a range of 6 SERVIT® sizes through 2/0 Stranded.

Universal SERVIT® Type KSU Split-bolt connectors for copper, copperweld, AAC, ACSR, AAAC, Steel

Material: Copper (Tin Plated)

Tin-plated, high strength copper alloy SERVIT® connector with spacer. Spacer separates dissimilar conductors and provides long contact length that prevents high pressure point contacts between run and tap conductors. Use of PENETROX™ joint compound recommended with Aluminum and ACSR to limit oxide growth and increase life of connection. To ensure proper tightening torque use of BURNDY® Torque Wrenches Type BTW is recommended.

To ensure proper tightening torque use BURNDY® BTW Torque Wrenches.

Universal OKLIP™, Type KVSU

Universal OKLIP™ Type KVSU Connector for Copper, Copperweld, AAC†, AAAC†

Material: Copper (Tin Plated)

Compact, high strength, tin-plated copper alloy two-piece connector with spacer and tin-plated silicon bronze DURIMUM™ hardware. Recommended for heavy duty connections. Spacer separates dissimilar conductors and provides long contact length. Neoprene ring prevents loss of shorter bolt during installation. Longer peened bolt permits swivel action for easier installation. Use of PENETROX™ joint compound is recommended with aluminum and ACSR conductor.

OKLIP™ Type KVS-A

OKLIP™ Type KVS-A Connector for Copper, Copperweld, AAC†, ACSR†, AAAC

Material: Aluminum

Three-piece, high-conductivity, non-copper bearing aluminum alloy connector with thick spacer and aluminum hardware. Hardware in KVS26A and KVS28A is stainless steel. Recommended for heavy duty dissimilar metal applications. Spacer separates conductors and provides long contact length. Belted entrances prevent chafing and permit easier assembly of conductors. Longer, peened bolt, permits swivel action for easier installation. Neoprene ring prevents loss of shorter bolt. PENETROX™ joint compound recommended with aluminum and ACSR.

WISEIT™ Connectors Type VG

WISEIT™ Type VG Connector for Copper

Material: Copper

Copper WISEIT™ connectors are easy to install and will not swivel. The interlocking parts will not rotate out of the body. Supplied with hex head bolts; VG1 size has a slotted hex bolt.

Features and Benefits

- Single tool installation keeps other hand free to contain conductors
- Compact profile after installation facilitates taping and alignment with conductors
- Accommodates a wide range of conductors and minimizes number of connectors required
- Side installation of conductors eliminates having to separate pieces during installation
- Copper alloy body design provides combination of strength and corrosion resistance

Catalog Number	Conductor Range ①		A	B	C	Bolt Head (Hex.)	Recommended Torque (In-Lb)
	Max. 2 Conductor	Min. 2 Conductor					
VG1 ②	6 Sol.	10 Sol.	0.94"	0.63"	0.75"	3/8" (Slotted)	110 lbs/in
VG2	4 Str.	8 Str.	1.09"	0.70"	0.81"	9/16"	110 lbs/in
VG3	2 Sol.	6 Sol.	0.98"	0.83"	0.94"	9/16"	150 lbs/in

VG5	2/0 Str.	3 Sol.	1.80"	0.98"	1.28"	9/16"	180 lbs/in

① Connectors are capable of accepting any combination of conductors of conductors within specified maximum range (example: VG1 can accept 7 Sol. - 9 Str. combination)

② The VG1 hardware has a slotted hex. The other sizes are unslotted. Hardware is stainless steel.

Type UC-L, Type UCK-UL, Universal Parallel Groove Clamps

Universal Parallel Groove Clamp, Type UC-L For Copper, Copperweld, AAC†, ACSR†, AAAC, Steel

Material: Copper (Tin Plated)

Interlocking finger design accommodates large range of conductor sizes. Tin-plated, cast of high copper alloy, and clamped with plated steel bolt. PENETROX™ joint compound recommended with aluminum and ACSR.

Catalog Number	Copper & Alum. (Either Groove)	ACSR†, 6201, 5005	Copperweld	Steel		Dimensions				Wrench (Cross flats)	Torque in - lb

Type CP-A, Parallel Groove Clamps

Parallel Groove Clamp, Type CP-A For Copper, Copperweld, AAC†, ACSR, AAAC, Steel

Material: Aluminum (Cast), Aluminum Hardware

Type CP-A Parallel Groove Clamps are recommended for tap or parallel connections. High strength, high conductivity aluminum body and hardware provide corrosion resistant assembly. Long contact surface for excellent contact and full conductivity. PENETROX™ joint compound recommended for all combinations.

† Accommodates compact and compressed conductors within diameter range. For other sizes contact factory. Not recommended for copper to copper applications. Use copper connector. To ensure proper tightening torque use BURNDY® BTW Torque Wrenches.

Type VP Parallel Groove Clamp; CLIPIT™ Type UW-R Dead End Clamp

Parallel Groove Clamp, Type VP for Copper

Material: Copper

Multiple V-bolt connector especially suited for flexible or extra flexible conductors. Made of high strength, high conductivity copper. Clamping elements accommodate a range of conductor sizes in either groove. V-bolts provide high pressure and compress the conductor over long contact area. Also recommended for jumper connections.

Catalog Number	Groove A	Groove B	Dimensions			Wrench Size (Cross flats)	Torque in - lb

To ensure proper tightening torque use BURNDY® BTW Torque Wrenches.

CLIPIT™ Dead End Clamp, Type UW-R For AAC†, ACSR†, AAAC

Material: Aluminum (Cast)

High strength aluminum casting with galvanized steel U-bolt, extra long aluminum spacer, and caps that confine strands. Holding strength of installations using two CLIPIT™ deadends exceeds rated breaking strength of conductor. Use of PENETROX™ joint compound is recommended.

RUS Accepted

VERSITAP™ Type QPX

VERSITAP™ Connector, Type QPX for Copper

Material: Copper

The VERSITAP™ Type QPX connector is recommended for Tee, Cross, Parallel, Butt, and Tap connections. Range-taking, only requires 10 connectors to accommodate conductor sizes from #6 Stranded to 1000 kcmil. Edges are rounded for easy taping. Made of high strength, high conductivity copper alloy and supplied with silicon bronze DURIMUM™ hardware.

TAPIT™ Types UCG-R, UCG-RS, UC-R, UC-RS

TAPIT™ Parallel Clamp, Types UCG-R, UCG-RS for Copper, AAC†, ACSR†, AAAC

Material: Aluminum

Multi-purpose parallel groove clamp made of high strength, high conductivity, non-copper bearing aluminum alloy. Properly proportioned to minimize stress corrosion and deterioration by galvanic action.

Interlocking fingers on connect body halves prevent mismatching. Square shank, hex head, round collar, high strength galvanized steel bolt allows one or two-wrench installation. Available pre-filled with PENETROX™ joint compound, and stripealed to limit oxide growth and to increase the life of the connection.

RUS Accepted

OVERHEAD DISTRIBUTION - TAP CONNECTORS
FASTAP™ with Lineman Assist™ Type UCT

FASTAP™ with Lineman Assist™, Type UCT for Copper, AAC, ACSR, AAAC, ACAR, Messenger Guy

Material: Aluminum (Galvanized Steel Hardware)

The BURNDY® FASTAP™ with Lineman Assist™ mechanical connector utilizes a spring system that acts as a third hand to assist in installation. This system helps secure the tap conductor while installing on Primary, Secondary, and service applications. The duck bill handle simplifies installation by providing a handle to easily hold the connector while wearing dielectric gloves. Conductor side entry facilitates installation and also helps keep inhibitor in the connector. Supplied strip sealed and pre-filled with PENETROX™ joint compound to limit oxide growth and increase the life of the connection.

Variations:

- Remove "S" for no PENETROX™*
- Add "SS" for stainless steel hardware*
- Add "C" to include a cover*
- Add "HN" for shear nut*
- Cover may be ordered separately (UCTCOVER)*
- * Not available with cover or shear nut*

— Not recommended for Copper to Copper applications; use Copper FASTAP™ connector (see next page)

Lightning Shield Clamps Type LSC

Lightning Shield Clamp, Type LSC for AAC and ACSR Primary Covered Conductor (Tree Wire)

Material: Aluminum (Cast)

Cast aluminum lightning shield clamp with a galvanized steel eye bolt for use on covered aluminum and ACSR primary overhead distribution conductors (Tree Wire). These clamps are designed to protect the Tree Wire from burn-down causing service interruption during high lightning activity. For further application details, contact the factory.

Conductor groove is pre-filled with PENETROX™ A-13 oxide inhibitor, which is compatible with cable insulation and individually bagged.

① Approx. assembly length over eyebolt with cable clamped. Also approx. eyebolt position when shipped.

② Assembly can be installed using a shotgun hotstick as shown. Assembly instructions are supplied with each connector.

Compression Tap Connectors General Overview

Compression Tap Connectors General Overview

The BURNDY line of compression connectors are wide range-taking; accommodate copper, aluminum and ACSR; are easy to install; and are dependable and economical. They are designed to be installed with BURNDY® “matched” hand, hydraulic, and power-driven hydraulic tooling. The connector line consists of C-shaped, Figure 3, Figure 6-shaped, and HYCRIMP™ tap connectors, disconnectable T-taps, terminals and STIRRUP™ connectors.

The copper CRIMPIT™ is a range-taking, reversible, C-shaped compression tap connector for combinations of copper conductors. Twelve connectors take tap combinations from #10 AWG through 4/0, and all sizes are installed with dies that also install aluminum connectors. Sizes accommodating conductors up to #2 may be installed with the MD6 type tools. All sizes may be installed with the 35 or 750 family of tools. They make “hot” installation easy by permitting the lineman to grip the CRIMPIT™ in the compression tool and then place it on the line. The tap is then inserted and the CRIMPIT™ is compressed. Massive C-shape forces tap and line conductors together to form dependable, low-cost, low-resistance connections.

The CABELOK™ CRIMPIT™ is a range-taking universal and reversible, Figure 3-shaped aluminum compression tap connector with an adjustable spacer which separate the conductors. It accommodates combinations of copper, aluminum, and ACSR conductors from #6 up to 4/0, and is installed with the common O and D3 dies. The broad range capacity of each CABELOK™ CRIMPIT 2 reduces the number of connectors required and simplifies connector selection.

The spacer holds the run or tap in place permitting the lineman either to approach the line with the connector held in the tool and with the tap in the connector, or to assemble the connector and tap on the line and then bring up the tool to crimp.

Each CABELOK™ CRIMPIT™ is pre-filled with PENETROX™ joint compound and individually bagged. These packages are clearly marked with the entire conductor range of the connector as well as pertinent tooling information. The open side of the CABELOK™ CRIMPIT™ makes “hot” installations easy by allowing the connector to be carried to the energized line in the crimping tool (MD6, 35, or 750 families hot-line styles).

The Figure 6-shaped aluminum compression tap connector is one of the widest range-taking compression tap connectors available. It accommodates copper, aluminum, or ACSR conductors in very broad ranges. Only four connectors are required to accommodate a range from #6 to 600 kcmil. This broad range is made possible by the long ram stroke of the 35 and 750 series tools.

HYCRIMP™ compression tap connectors accommodate ACSR, stranded copper or aluminum, solid copper or aluminum, and compact conductors. Seventeen sizes are available to accommodate all conductors from #6 solid to 954 kcmil compact. All HYCRIMP™ connectors can be installed with industry standard O, D, N and R dies. Each connector is factory-filled with BURNDY® PENETROX™ joint compound, and individually boxed for ease of handling, identification, and installation.

The BURNDY® line of disconnectable T-taps and jumper loop slices offer an economical approach to sectionalizing or isolating equipment on energized lines. They combine the best features of compression and mechanical connectors. The pads can be easily assembled or separated from each other with hot-line tools.

The STIRRUP™ combines a compression C-shaped Figure 6-shaped or H-shaped element for the run conductor, and a factory installed bail which accommodates a hot-line clamp. The line element can be gripped in the tool and carried to the line and then crimped.

Note: Aluminum bodied compression tap connectors are not recommended for making copper to copper connections. Two connectors are recommended when feeding a line in both directions.

Large Range Taking COPPER CRIMPIT™ Types YC-C, YP-C

Copper CRIMPIT™ Connector, Type YC-C for Copper, Copperweld

Material: Copper UL Listed 90° C, Up to 35 kV ▲

Range-taking compression tap connector made of pure copper. Designed to be gripped in the jaws or dies of installation tool, then slipped directly over line for easy installation. Also used for deadending applications.

Aluminum CRIMPIT™ Type YC-A

Aluminum CRIMPIT™ Connector, Type YC-A for AAC (Stranded, Compressed, Compact), ACSR, AAAC

Material: Aluminum

Range-taking C-shaped aluminum compression tap or deadending connector designed to eliminate effects of cold flow. Can be gripped in tool and slipped over line for easy crimping. Pre-filled with PENETROX™ joint compound and stripsealed to limit oxide growth and increase the life of the connection.

CABELOK™ CRIMPIT™ Figure 3 Type YP-U

CABELOK™ CRIMPIT™ Connector, Type YP-U for Copper, AAC (Stranded, Compressed, Compact), ACSR, AAAC

Material: Aluminum

Wide range-taking, universal, and reversible, Figure 3-shaped aluminum connector with adjustable overhanging spacer that separates conductors. Spacer holds run or tap in place permitting lineman to either approach the line ready to crimp, or to assemble connector and tap on run and then crimp. Massive aluminum design minimizes conductor corrosion due to galvanic action. Pre-filled with PENETROX™ joint compound and stripealed to limit oxide growth and increase the life of the connection. Conductor range and tooling information clearly printed on both connector and packaging.

* TAKES UP to #2 ACSR maximum in either groove if other wire is #2 solid or smaller.

** TAKES DOWN to #2 ACSR minimum in either groove if other groove wire is 1/0 stranded or larger.

† U Die with adapter PT6515.

‡ U Die with adapter PUADP1.

Not recommended for copper to copper applications. Use a copper connector to increase connection life.

For faster installations use BURNDY® PATRIOT® family of battery tools, dies and cutters.

Universal CRIMPIT™ Type YPC-U

Universal CRIMPIT™ Connector, Type YPC-U for Copper, AAC (Stranded, Compressed, Compact), ACSR, AAAC

Material: Aluminum

Extra wide range universal connector. Two dies and 5 connectors take run sizes from 1/0 to 600 kcmil and tap sizes #6 to 400 kcmil. Wide range acceptance made possible by long ram travel of BURNDY™ HYPRESS™ tools. Figure 6-shape separates run and tap wires, minimizing galvanic corrosion of conductors. Connector can be gripped in tool and slipped over line for easy installation. Pre-filled with PENETROX™ joint compound and stripesealed to limit oxide growth and increase the life of the connection.

① 2/0 Str. Cu Aluminum and 2/0 ACSR may also be installed in run when tap is 3/0 Str. or larger.

② YPC28U4 only may be installed with MD6 HYTOOL™ and the BCT500HS with D3 groove.

† U Die with adapter PT-6515.

‡ U Die with adapter PUADP-1.

Not recommended for copper to copper applications.
Use a copper connector to increase connection life.

For faster installations use BURNDY® PATRIOT® family of battery tools, dies and cutters.

CRIMPIT™ Connector Cover Type CC**CRIMPIT™ Connector Cover, Type CC for all O, D, and N Die Tap Connectors****Material: Polyethylene**

High density polyethylene cover accommodates most industry connectors in the O, D, and N range. Four sizes cover the full #6 to 600 kcmil conductor range. One piece design, no extra hardware needed. Simply slip over connector and snap shut. Supplied in black.

Catalog Number	Maximum Connector Length	Connector Series Accommodated
CCO	2-1/2	O Die
CCD	2-3/4	D Die
CCN	2-1/8	Short N Die
CCNL	5-3/16	Long N Die and YP28U26

Seven Connector Selector for BURNDY® HYCRIMP™ and LOKTAP™

3 Simple Selection Steps for BURNDY® HYCRIMP™ and LOKTAP™ Compression Tap Connectors:

1. Follow down from the smaller wire.
2. Go across from the larger wire.
3. Intersection of the two shows the proper connector.

Example:

#2 ACSR to #1/0 Stranded would fall in Zone 2;
 Catalog Number: YHO150 (HYCRIMP™) or YHO2 (LOKTAP™)

NOTE:
 The PATMD68LI (Lithium-Ion battery) or the MD68 hand-operated tool all feature permanent “O” and “D3” die grooves to crimp all connectors on this page!

Compression Tap HYCRIMP™ Types YHO, YHD

HYCRIMP™ H-Shaped Connector, Types YHO, YHD for Aluminum (Stranded, Compressed, Compact), Copper, ACSR, AAAC, Steel

Material: Aluminum

Wide range, universal, reversible, Figure H aluminum connector. Conductors are separated by the shape of the connector. Bendable tabs secure both run and tap conductors freeing lineman's hands to work with installation tool. Massive aluminum design minimizes corrosion due to galvanic corrosion. Pre-filled with PENETROX™ joint compound and stripealed to limit oxide growth and increase life of the connection. Individually packaged; conductor ranges and tooling information clearly printed on connector and packaging.

* HYCRIMP™ connectors can be installed with competitor R dies.
 ** Die Index ST and SZ may also be used on sizes 700 - 900 only. SKR required for 950 and S-Z.
 For faster installations use BURNDY® PATRIOT® family of battery tools.
 Not recommended for copper to copper applications.
 Use a copper connector to increase connection life.

OVERHEAD DISTRIBUTION - TAP CONNECTORS
Compression Tap LOKTAP™ Types YHO, YHD

LOKTAP™ Connector, Types YHO, YHD for Aluminum, Copper

LOKTAP™ compression connectors are high quality, range-taking devices which accommodate combinations of aluminum to copper, and aluminum to aluminum conductors. BURNDY® seven connector program accommodates a conductor range from #6 Solid to 4/0 ACSR. In addition, LOKTAP™ connectors are designed to be installed with BURNDY® mechanical or hydraulic tools and matching O and D3 die set.

① See page H-27 for Seven Connector Selector Chart.
 ② PERMANENT DIES IN TOOL INSTALL ALL SIZES.
 ③ "C" grooves accommodate #10 Sol.-#14 Sol. range, .116"-.064". No "C" grooves on Cat. #YHO125. When utilizing "C" groove(s) apply PENETROX™ A13 prior to wire installation. If utilizing two (2) "C" groove taps, installation to be made with HYDRAULIC TOOL ONLY. All four (4) grooves CANNOT be utilized if using a hand tool. When hand tool is used, only one (1) "C" groove can be used; connector MUST be positioned as shown in drawing.

† U Die with adapter PT6515.
 ‡ U Die with adapter PUADP1.

Compression T Tap HYTEE™ Types YCT, YOT

HYTEE™ T-Tap Connector, Type YCT for Copper

Material: Tin Plated Copper

One-piece, copper compression tap connector with U-shaped run element and tubular tap for joining hard and medium-hard drawn copper. Preformed run element simplifies installation on larger conductors. Uses same die as equivalent full-tension sleeve.

Compression T Tap Type YTU-R-R

T-Tap Connector, Type YTU-R-R for Copper, AAC (Stranded, Compressed, Compact), ACSR, AAAC

Material: Aluminum

One-piece heavy-wall aluminum compression tap connector for secondary service drop and transformer tap to primary or secondary. Connector can be gripped in tool for easy installation. Pre-filled with PENETROX™ joint compound, stripsealed and capped to limit oxide growth and to increase the life of the connection.

* Multiple crimp die set, makes more than one crimp per tool compression. Figure indicates number of compressions.

† U Die with adapter PT6515

‡ U Die with adapter PUADP1.

Not recommended for copper to copper applications. Use a copper connector to increase connection life.

For faster installations use BURNDY® PATRIOT® family of battery tools, dies and cutters.

Compression Tap (Disconnectable) T Tap with Pad Type YTA-R-2N

Disconnectable T-Tap with Pad, Type YTA-R-2N for Copper, AAC (Stranded, Compressed, Compact), ACSR, AAAC

Material: Aluminum

Aluminum primary T-Tap connector with slotted tap pad designed for easy disconnecting of tap conductor. Tap pad accommodates compression terminals Types YKA-R-2N and YKA-A-2N and has positioning socket for proper alignment. On sizes larger than 336.4 ACSR, the Type YTA-R-2N run element has two piece interlocking key with lifting eye to simplify hotline installations. Catalog number does not include mating terminal.

Types YKA-R-2N, YKA-A-2N

Disconnectable Terminal with Fixed Hardware Types YKA-R-2N, YKA-A-2N for AAC (Stranded, Compressed, Compact), Copper, ACSR, AAAC

Material: Aluminum

Aluminum compression terminal with fixed hardware and positioning pin for making disconnectable tap or jumper connections. Used with slotted YTA-R-2N T-Tap or YSA-R-2N terminal. Supplied with aluminum bolts and washer-face, self locking nuts. Prefilled with PENETROX™ joint compound, capped, and stripsealed to limit oxide growth and to increase the life of the connection.

Disconnectable T-Tap, Type YTA-2N for Copper

Material: Copper

Cast copper primary T-Tap connector with slotted tap pad for easy disconnecting of tap conductor. Tap pad accommodates compression terminal Type YKA-2N. On sizes larger than 4/0, the YTA-2N run element has a two-piece, interlocking key with lifting eye that simplifies hot installations. Catalog number does not include terminal or hardware.

Hot Line Tap Bails STIRRUP™ Type YCB-R

STIRRUP™ Hot-Line Clamp Adapters, Type YCB-R For AAC (Stranded, Compressed, Compact), ACSR, AAAC

Material: Aluminum; Tin Plated Copper Bail

Permanent compression hot-line clamp adapter with aluminum run and copper bail. Accommodates any standard copper hot-line clamp on bail elements. Permits hot-line tapping without arcing or chafing damage to aluminum conductor. Installed with standard tools and dies. Prefilled with PENETROX™ joint compound and stripsealed to limit oxide growth and increase the life of the connection.

CRIMPIT™ STIRRUP™ Types YCB-U, YCB-R-U; Bail Types J990, J1252

CRIMPIT™ STIRRUP™, Types YCB-U, YCB-R-U for AAC (Stranded, Compressed, Compact), ACSR, AAAC

Material: Aluminum

Tension Rating: ANSI C119.4 Class 3 (Non Tension)

Combines Figure 6-shaped aluminum CRIMPIT™ tap connector with tin-plated copper bail. Can be gripped in tool and slipped over line for easy installation. Five sizes accept a range from #4 to 600 kcmil. Prefilled with PENETROX™ joint compound and stripsealed to limit oxide growth and to increase the life of the connection.

Hot-Line Clamp Bails, Types J990, J1252

Material: Tin Plated Copper

Designed to make hot-line clamp adapter using HYCRIMP™, CABELOK™ CRIMPIT™ or Figure 6-shaped CRIMPIT™ connectors. Where hot sticks are used, the CABELOK™ CRIMPIT™ or Figure 6-shaped CRIMPIT™ are recommended. The line can be approached with the connector and bail held in the tool. Bails are tin-plated, hard drawn copper.

Tap with Bail HYCRIMP™ STIRRUP™ Types YHO-J, YHD-J, YHN-J

HYCRIMP™ STIRRUP™ Tap Connectors with Bail, Types YHO-J, YHD-J, HN-J for AAC (Stranded, Compressed, Compact), ACSR

Material: Aluminum; Tin Plated Copper Bail

Utilizes H-Frame Aluminum Tap Connectors along with tin-plated copper bail. Bendable tabs secure run and bail freeing the lineman's hands to work with the installation tool. Conductor grooves are pre-filled with PENETROX™ joint compound and stripsealed to limit oxide growth and increase the life of the connection.

Transformer Connectors Transformer Tap Adapter, Type E-C-G

Transformer and Equipment Tap Connectors General Overview

Transformer and equipment tap connectors are specifically designed to provide single or multi-tap connections from secondary transformer outlets, disconnects, circuit breaker panels, and other equipment pads or bar.

Transformer Tap Adapter, Type E-C-G for Copper

Material: Copper

Tension Rating: ANSI C119.4 Class 3 (Non Tension)

Multi-tap, range-taking cast copper alloy connector designed to take 2, 3, or 4 conductors from a single secondary transformer outlet.

Catalog Number	Number of Conductors	Conductor Size	A dia.	D	H	J	L	W
E2C34G1	2	1/0 -500 kcmil	0.78	3-3/4	3-7/8	1/2 - 13	6 - 1/4	3-1/2
E3C34G1	3							5-1/4
E4C34G1	4							6-7/8

Transformer Connectors Types KC22J12T13, EQC632C; Type YA-2LH

Transformer Ground Connectors, Types KC22J12T13, EQC632C for Copper

Material: Copper

Fits all standard EEL-NEMA distribution transformers as tank grounding terminal.

Type EQC632C

TYPE KC	Ranges
KC22J12T13	8 Sol. - 2 Sol.
KC26	2 Sol. - 2/0 Str.
KC34J12T13	3/0 - 500 Str.
EQC632C	8 Sol. - 2 Str.

Both, one-wrench installation.

Type KC22B2

1/2-13
stud size

HYSEALUG™ Terminal with Shrouded Barrel, Type YA-2LH for Copper

Material: Copper

Tin-plated, pure copper 2-hole NEMA compression terminal with shrouded barrel for terminating insulated copper conductor to transformers and other equipment. Shroud prevents seepage of water or moisture into conductor strands and minimizes taping.

Transformer Pin Terminals Type YE-LH; Types YE-R, YE-W

HYSEALPLUG™ Transformer Pin Terminal, Type YE-LH for Copper

Material: Copper

Tension Rating: ANSI C119.4 Class 3 (Non Tension)

Oil and water-tight terminal with shrouded, tin-plated, copper barrel, and brazed plug. Recommended for terminating insulated copper conductor at cutout, transformer and arrester; or for joining insulated copper riser to overhead conductor. Shroud prevents seepage of water or moisture into conductor strands and minimizes taping. To obtain a tight fit on some insulations in the shroud it may be necessary to either "pencil" the insulation down, or build it up with tape.

HYPLUG™ Pin Terminal, Types YE-R, YE-W for AAC (Stranded, Compressed), ACSR, AAAC

Material: Aluminum

Tension Rating: ANSI C119.4 Class 3 (Non Tension)

In 1989 BURNDY® began shipping an improved pin type connector. A proprietary coating system was developed through intense research efforts which vastly prolongs the life of this type of connection. To help identify the new product, a hex-shaped crimp is now used on the pin interface crimp and overhead color-coded end caps are utilized.

Aluminum HYPLUG™ with tin-plated copper plug for terminating aluminum or ACSR cable at cutout, transformer, and arrester. Plug may be bend to desired angle for easier insertion. Three die sets accommodate #4 Stranded to 500 kcmil. Prefilled with PENETROX™ A13 joint compound and sealed with color-coded end caps.

BURNDY® furnishes many special versions of YE-R including: pin length variations, factory applied pin angles, etc.

Contact your BURNDY® representative for your special needs.

Compression Splices General Overview

Compression Splices General Overview

The BURNDY line of service, full-tension, and jumper sleeves provide a dependable, economical, and easy-to-install method of splicing overhead transmission and distribution lines.

A major part of the Total BURNDY® Compression Program, they are available for copper, aluminum, ACSR, COPPERWELD, ALUMOWELD, Steel, 6201, 5005, ACSR/AW, AWA, and compressed forms for aluminum and ACSR. Each is clearly marked with the installation Die Index number and knurls are provided which show the installer the correct number of crimps and the spacing required. Connections made with BURNDY® INSULINK™ and HYSPLICE™ sleeves have a lower resistance than an equal length of conductor.

HYSPLICE™ sleeves are tapered or chamfered at the ends; externally to provide gradual reduction of pressure on the conductor, and internally to facilitate conductor insertion.

Service Sleeve Design

Service entrance connectors are available insulated (INSULINK™) or uninsulated (LINKIT™). Both are installed with the one-hand OH25 HYTOOL™ or the MD6 HYTOOL™. The INSULINK™ features polyethylene caps which seal out dirt and moisture, and grip the cable insulation leaving both hands free for crimping. The aluminum insert is anchored to the nylon jacket so that it will not move when crimped, ensuring that the insert is always under the die. The jacket is color coded for easy identification of conductor size.

The aluminum LINKIT™ minimizes the effects of galvanic corrosion. It is designed for easy location of crimps, and is color coded.

The service HYSPLICE™ connectors are partial-tension sleeves for splicing the neutral conductor of triplex service. They are installed with MD6 and the OH25 HYTOOL™ on aluminum and ACSR conductors from #6 to 1/0.

Copper HYSPLICE™ Sleeve Design

Full-tension holding strength and high conductivity of BURNDY® copper HYSPLICE™ sleeves are accomplished through the combined action of correct contact length, proper number of circular crimps of precisely controlled depth that perform a current carrying and keying function between the conductor and the sleeve.

Aluminum HYSPLICE™ Sleeve Design

HYSPLICE™ sleeves for aluminum conductor not only satisfy the basic tension requirements, but also deal with the problems of “cold flow” of aluminum and the oxide file which forms on the strands. “Cold flow” is compensated for by carefully coordinating the design of the sleeve and its associated installation die. To offset the effects of the non-conductive oxide film present on the surfaces of aluminum cable, BURNDY® HYSPLICE™ sleeves are pre-filled with PENETROX™ joint compound and capped or stripsealed. A solid center barrier forces the PENETROX™ around the cable strands during insertion.

ACSR HYSPLICE™ Sleeve Design

Two-Piece, Full-tension HYSPLICE™

Two-piece, full-tension HYSPLICE™ for ACSR consists of an inner steel sleeve for joining the steel core, and an outer aluminum sleeve for connecting the aluminum strands. To install the two-piece HYSPLICE™, the cable is cut, the aluminum sleeve slid onto the cable, aluminum strands cut back and the steel sleeve installed. The aluminum sleeve is then centered over the steel sleeve, PENETROX™ joint compound injected (PENETROX™ is brushed on cable prior to centering aluminum sleeve on smaller sizes), and the sleeve is crimped.

Single-sleeve, Full-tension UNISPLICE™

The UNISPLICE™ is as easy to install as aluminum full-tension sleeves. The single, heavy walled aluminum sleeve is filled with a special inhibiting compound containing grit particles which key the steel strand in place. The UNISPLICE™ eliminates cutting back of aluminum strands, the need for a separate steel sleeve, and careful position of the aluminum outer sleeve before crimping.

Since the standard pull-out tests are inadequate for evaluating UNISPLICE™ performance, BURNDY® has developed the sustained-tension test that subjects a connector-conductor assembly to a 168 hour sustained load equal to 90% of the conductor strength. This test simulates a service life of 30-40 years at 60% of the conductor strength.

Jumper Sleeves

Since the holding strength required for jumper sleeves is less than that required for full-tension sleeves, the jumper HYSPLICE™ sleeve is shorter. Aluminum, ACSR, sleeves are pre-filled with PENETROX™ joint compound and installed with the same tools and dies as the full-tension sleeves.

Compression Splices - Service Entrance INSULINK™ Type ES

INSULINK™ Service Entrance Splices, Type ES for AAC (Stranded, Compressed, Compact**), Copper, ACSR, AAAC

Material: Aluminum (Insulated)

Pre-insulated service entrance compression connector installed with OH25 and MD6 HYTOOL™ as well as the 35 and 750 HYPRESS™ tools. Polyethylene caps prevent dirt from accumulating in barrel, grip cable for easy two-hand installation, and seal out moisture. Aluminum connector is anchored to jacket, assuring the connector is under the die when crimping. Nylon jacket insulated connectors electrically and protects against water and weather. Superior color coding. Prefilled with PENETROX™ joint compound and stripsealed to limit oxidation and to increase the life of the connection. Do not use insulated sealed connectors on bare conductors, refer to LINKIT™ connectors.

RUS Accepted

For faster installations use BURNDY® PATRIOT™ family of battery tools, dies and cutters.

- Not for use on bare conductors.
- ▲ Accommodates 1/0 stranded aluminum and copper, concentric, compressed and compact conductors.
- ** Accommodates compact conductors where stated in the table.

Compression Splices - Service Entrance LINKIT™ Type YSU

5/8" LINKIT™ Service Entrance Splices, Type YSU for AAC (Stranded, Compressed, Compact), Copper, ACSR, AAAC**

Material: Aluminum (Uninsulated)

Heavy-walled aluminum tubing with solid barrier minimizes galvanic corrosion of conductors. Accommodates neutral strands of Type SE Service Entrance conductor as well as other conductors. Installed with standard tooling. Color coded, prefilled with PENETROX™ joint compound and stripealed to limit oxidation and increase the life of the connection.

RUS Accepted

- ▲ Accommodates 1/0 standard aluminum and copper concentric, compressed and compact conductors.
- ** Accommodates compact conductors where stated in the table.

For faster installations use BURNDY® PATRIOT™ family of battery tools, dies and cutters.

‡ U Die with adapter PUADP1.

For faster installations use BURNDY® PATRIOT® family of battery tools, dies and cutters.

Single Sleeve Jumper Partial Tension HYSPLICE™ Type YCS-R

HYSPLICE™ Single Sleeve Jumper, Type YCS-R for AAC (Stranded, Compressed), ACSR, AAAC

Material: Aluminum

Tension Rating: ANSI C119.4 Class 2 (Partial Tension)

HYSPLICE™ sleeve designed to withstand jumper loop tensile and vibration stresses. Made of aluminum with staked-in cable stop. Installed with same die as equivalent full tension sleeves. Prefilled with PENETROX™ joint compound, stripsealed and capped to limit oxide growth and increase the life of the connection.

RUS Accepted

* MD6 NON-BOW Dies produce straight sleeves without rotating tool.

† U Die with adapter PT6515

‡ U Die with adapter PUADP1.

††† Accommodates ACSR with aluminized steel core.

For faster installations use BURNDY® PATRIOT™ family of battery tools, dies and cutters.

Jumper Loop and Short Span YCS-A; Jumper Sleeve Reducer Type YCR

HYSPLICE™ Jumper Loop, Type YCS-A for AAC (Stranded, Compressed, Compact)

Material: Aluminum

Tension Rating: ANSI C119.4 Class 1A (Normal Tension)

HYSPLICE™ sleeve designed to withstand jumper loop tensile and vibration stresses up to 60% RBS. Made of aluminum with staked-in cable stop. Installed with same die as equivalent full-tension sleeve. Made from electrolytic grade aluminum. Surface oxides removed at factory and sealed. Pre-filled with PENETROX™ A joint compound, stripsealed and capped to limit oxide growth and to increase life of connection. For ACSR splices use the YCS-R or YCS-RL.

For faster installations use BURNDY® PATRIOT® family of battery tools, dies and cutters.

Reducer - Single Sleeve Jumper Partial Tension Type YCR-R-G

HYSPLICE™ Single Sleeve Reducer Jumper, Type YCR-R-G for AAC (Stranded, Compressed), ACSR, AAAC, Copper

Material: Aluminum

Tension Rating: ANSI C119.4 Class 2 (Partial Tension)

Heavy-walled aluminum sleeve designed to connect all aluminum or ACSR to copper conductors, in all service conditions encountered in transmission and distribution. Sleeve has solid center barrier and is prefilled with PENETROX™ joint compound, stripsealed and capped to limit oxide growth and increase life of connection.

For faster installations use BURNDY® PATRIOT™ family of battery tools, dies and cutters.

Single Sleeve Full Tension HYSPLICE™ Types YDS, YDS-C

HYSPLICE™ Single Sleeve, Types YDS, YDS-C for Stranded Copper

Material: Copper

Tension Rating: ANSI C119.4 Class 1 (Full Tension)

Made of pure copper tubing. Designed to develop the full rated breaking strength of hard drawn or medium hard drawn copper conductor. Installed with standard tooling.

Single Sleeve Full Tension HYSPLICE™ Types YDS-A, YDS-AT

HYSPLICE™ Single Sleeve, Types YDS-A, YDS-AT for AAC (Stranded, Compressed, Compact)

Material: Aluminum

Tension Rating: ANSI C119.4 Class 1 (Full Tension)

Full Tension HYSPLICE™ sleeve made of aluminum tubing with staked-in cable stop. Sizes 1/0 and large tapered for gradual transition of stress. Installed with standard tools and dies. Prefilled with PENETROX™ joint compound, stripsealed, and capped to limit oxide growth and increase connection life.

Single Sleeve Full Tension UNISPLICE™ Types YDS-RL, YDS-LT

UNISPLICE™ Single Sleeve, Types YDS-RL, YDS-LT for AAC (Stranded, Compressed), ACSR, AAAC

Material: Aluminum

Tension Rating: ANSI C119.4 Class 1 (Full Tension)

Single-sleeve aluminum UNISPLICE™ connector is designed to splice ACSR as simply as aluminum. Prefilled with PENETROX™ joint compound, stripsealed, and capped to limit oxide growth and increase the life of the connection. Eliminates strand stripping, installing separate steel sleeve and filling with joint compound. Ends ACSR joint failure due to faulty positioning of sleeve and lack of joint compound. Simplifies hot-line splicing. Electrical and mechanical performance equal to two-piece sleeves.

RUS Accepted

Single Sleeve Full Tension UNISPLICE™ Type YDS-RLNI

UNISPLICE™ Single Sleeve, Type YDS-RLNI for AAC (Stranded, Compressed), ACSR, AAAC

Material: Aluminum

Tension Rating: ANSI C119.4 Class 1 (Full Tension)

Single-sleeve aluminum UNISPLICE™ connectors are designed to splice ACSR as simply as all aluminum. Prefilled with PENETROX™ joint compound, stripsealed, and capped to limit oxide growth and increase life of the connection. Eliminates strand stripping, installing separate steel sleeve and filling with joint compound. Ends ACSR joint failure due to faulty positioning of sleeve and lack of joint compound.

Simplifies hot-line splicing. Electrical and mechanical performance equal to two-piece sleeves.

RUS Accepted

The UNISPLICE™ Type YDS-RLNI connectors are to be installed with the 644 or 444S family of nest and indentor tools only.

Single Sleeve Full Tension (Reduced Bird Caging) Type YDS-RLY

UNISPLICE™ Single Sleeve, Type YDS-RLY For AAC (Stranded, Compressed) , ACSR, AAAC

Material: Aluminum

Tension Rating: ANSI C119.4 Class 1 (Full Tension)

Similar to the single-sleeve aluminum UNISPLICE™ connectors Type YDS-RL in most ways, the Type YDS-RLY are specifically designed to eliminate possible conductor basketing (bird caging) on ACSR. Installed by crimping form end of connector towards center with standard installation tooling. Supplied prefilled with PENETROX™ joint compound, stripsealed, and capped to limit oxide growth and increase the life of the connection. Factory installed tape on pressure relief holes must be in place when conductors are inserted.

RUS Accepted

Replacement Splices - Single Sleeve Full Tension Type YDSR-RL

UNISPLICE™ Single Sleeve Replacement Splice, Type YDSR-RL for AAC (Stranded, Compact), ACSR, AAAC

Material: Aluminum

Tension Rating: ANSI C119.4 Class 1 (Full Tension)

Single sleeve aluminum UNISPLICE™ replacement splices are designed to facilitate the permanent replacement of existing line splices, including automatic type. Utilizing all the benefits of the standard UNISPLICE™ connectors, the extra long Replacement UNISPLICE™ Type YDSR-RL fills the gap of a cutout splice and eliminates the need to find like conductor. It also reduces installation time of the current standard methods by half, reducing the total number of splices necessary from two to one. All splices are prefilled with PENETROX™ joint compound, stripealed, and capped to limit oxide growth and to increase the life of the connection.

- ① U Die with adapter PT-6515.
- ② U Die with adapter PUADP-1.
- * Multiple crimp die set; makes more than one crimp per tool compression. Figure indicates number of compressions.
- ** MD6 NON-BOW Dies produce straight sleeves without rotating tool.
- † Overlap Crimps
- For faster installations use BURNDY® PATRIOT® family of battery tools.

Reducer - Single Sleeve Full Tension UNISPLICE™ Type YDR-R

UNISPLICE™ Reducer Splice; Type YDR-R for AAC (Stranded, Compressed), ACSR, AAAC

Material: Aluminum

Tension Rating: ANSI C119.4 Class 1 (Full Tension)

Single-sleeve aluminum UNISPLICE™ reducer is designed to splice ACSR as simply as all aluminum. Prefilled with PENETROX™ joint compound, stripsealed, and capped to limit oxide growth and increase the life of the connection. Eliminates strand stripping, installing separate steel sleeve and filling with joint compound. Electrical and mechanical performance equal to two-piece sleeves.

Mechanical Deadends Heavy Duty Parallel Clamp, Type UP-R

Deadend Fittings and Accessories General Overview

The deadend method selected for any particular application will depend upon the nature of the application, the size of the conductor, holding strength required, and preference for mechanical or compression devices.

Secondaries are commonly deadended by bending wire around a spool insulator and snubbing with the same connectors used for the secondary to service drop connection. On copper conductor, connectors such as U-bolt deadend Type BC, SERVIT® Type KS, OKLIP™ connector Type KVS or CRIMPIT™ Type YC-C are recommended. These connectors provide high holding strength without damaging conductor strands. On aluminum wires, CLIPIT™ UW-R, mechanical connector is recommended.

The same methods can also be used on primaries. However, the straight line clamp Type CUW-A-E is more popular for this application. They are easier to install on either hot or de-energized lines. They are particularly well suited to hot-line maintenance, and allow easy re-sagging of conductors.

Straight line types are also popular for deadending strain buses. These are normally large, hard to handle conductors that do not lend themselves to snub or “quadrant” types. Types DUW or CUW-E are recommended for copper conductor and DUW-A and DUW-AE for aluminum and ACSR. The pulling eye on the DUW-A-E is in line with the cable to make installation easier.

Heavy Duty Parallel Clamp Type UP-R For AAC (Stranded, Compressed, Compact†), ACSR†, AAAC, Copper

Material: Aluminum

Heavy duty aluminum connector for feeder, subtransmission, and primary distribution. Massive design and large spacer give maximum protection against galvanic action and overload conditions. Spacing of U-bolts, tapered bell mouths, and modified V groove minimize cold flow, eliminate cable damage, and produce wiping action on conductors. Spacer taps confine cable strands to prevent splaying. Captured, heat treated aluminum alloy U-bolts. PENETROX™ joint compound recommended for all combinations.

Deadends 2-Bolt CUW-A-E, CUW-R-E; 3-Bolt DUW-A, DUW-A-E

Deadend Clamp, Types CUW-A-E, CUW-R-E for AAC (Stranded, Compressed[†]), ACSR[†], AAAC

Material: Aluminum

High strength, aluminum clamp for deadending primary distribution lines. Straight-line design with hot stick lifting-eye, pulling-eye, and captured, angled U-bolts, facilitates installation and maintenance, especially on hot-line work. Snub-pocket V-shaped, range-taking conductor groove, and galvanized steel U-bolts provide high holding strength.

Compression Terminals Types YCA-2N, YCAB-4N

Compression Terminals and Accessories General Overview

Compression terminals are used to make convenient and reliable connections to switch pads, transformers, and other electrical equipment. They accommodate either copper, aluminum, ACSR, ACAR, Alumoweld, or steel conductor and come with one, two, or four hole NEMA drilled pads to match the equipment drilling. Standard copper and aluminum terminals are also listed in the compression section (Section C of BURNDY® Master Catalog).

HYLUG™ Terminals, Types YCA-2N, YCAB-4N for Copper

Material: Copper

Compression HYLUG™ terminals designed for terminating copper conductors to switch pads and other substation or switch yard apparatus. NEMA standard mounting holes. Made of pure copper. Installed with same die as equivalent full-tension jumper loop and repair sleeves.

Compression Terminals - Stackable HYLUG™ Terminals Type YAK-A-2G

Stacking HYLUG™ Terminals, Type YAK-A-2G for AAC (Stranded, Compressed)

Material: Aluminum

Cast aluminum HYLUG™ with a special tongue configuration for stacking of conductors on two and four hole NEMA transformer or equipment terminal pads. Up to eight conductors may be stacked on one four hole NEMA pad. These stackable HYLUG™ terminals are prefilled with PENETROX™ joint compound, stripsealed, and capped to limit oxide growth and increase the life of the connection.

Aluminum HYLUG™ Types YCAK-A, YRA

Aluminum HYLUG™ Terminals, Types YCAK-A, YRA for AAC (Stranded, Compressed), ACSR, Copper

Material: Aluminum

Aluminum HYLUG™ terminals for joining aluminum and copper cable to transformer and equipment pads. HYLUG™ terminals are prefilled with PENETROX™ joint compound, stripsealed, and capped to limit oxide growth and increase the life of the connection. Installed with standard tooling, five die sets install fourteen terminal sizes.

Splices, Full Tension EHV Splice Kits for ACSR Type YTS-RT-RS EHV

Type YTS-RT-RS EHV Full Tension EHV Splice Kit for ACSR Conductor

Full tension, two-piece, compression splice for ACSR transmission lines at 345 kV and over. Outer aluminum sleeve has filler hole and plug for PENETROX™ joint compound. Kit includes the outer aluminum and inner steel sleeves.

Splice Kit: Includes aluminum sleeve and steel sleeve.

* Overlap crimps.

‡ Wide dies may be used on aluminum only (no steel), add suffix "W" to part number (example: L725W).

NOTE: Remove "T" from middle of part number for non-EHV <230kV version. (Example: YTS56R59RS)

* Overlap crimps.

‡ Wide dies may be used on aluminum only, add suffix "W" to part number

(Example: L725W).

NOTE: Remove "T" suffix from part number for non-EHV <230kV version.

(Example: YNS58R)

Full Tension EHV Splice Kit for ACSS Type YTS-RT-RSHT

Type YTS-RT-RSHT EHV Full Tension EHV Splice Kit for ACSS Conductor

Full tension, two-piece, compression splice for 250° C ACSS transmission lines at 345 kV and over. Outer aluminum sleeve has filler hole and plug for PENETROX™ joint compound. Kit includes the outer aluminum and inner steel sleeves.

To specify hardware for bolting to corresponding dead-ends add the suffix "H" to the catalog number (example: BYNA52RHHT).

† Wide dies may be used on aluminum only (no steel), add suffix "W" to part number (example: L725W).

* Overlap crimps.

Jumper Sleeve, EHV, for ACSS Type BYNS-RTHT EHV

Type BYNS-RTHT EHV Jumper Loop Sleeve for ACSS Conductor

Jumper sleeve for 250° C ACSS transmission lines up to 345 kV and over. Sleeve is pre-filled with PENETROX™ joint compound and capped.

Compression Terminals for ACAR, Stranded Aluminum Cable

Types YNA-R15, YNA-R Compression Terminal for ACAR, Stranded Aluminum Cable

Compression terminal for ACAR and Stranded Aluminum Cable. Two hole NEMA tongue supplied through 650 kcmil Aluminum for transmission line up to and including 230 kV. Four hole NEMA supplied on sizes above 650 kcmil. When used with YTW Deadends, the 15° angle tongue provides either a 0° or 30° tap. Uses same dies as equivalent full tension sleeve or deadend. Barrel pre-filled with PENETROX™ joint compound and capped. Pad coated with oxide retardant.

Notes:

ACCC is a Registered Trade Mark of CTC Cable Corp.

* Overlap Crimps

- Other styles may be available. Please contact customer service for products or conductor sizes not shown.
- Dual (2) Pad Deadend catalog numbers have "D" in the middle after "E". Example for Drake Dual Pad Kit = YTW451RED15ACCCK4

- Deadend Kit Contains: Aluminum Body, Steel Eye, Terminal with Hardware, and Composite Core Grip Components
- Designed for corona free operation up to 230 kV without accessories. Contact factory for 345 kV and 500 kV operation.
- For stainless steel hardware, contact customer service.

Dimensions in brackets [] denote metric units and are rounded to nearest whole number.

STS46A6NCG1	1.75 [44]	1.75 [44]	1.25 [32]	4.50 [114]	6.50 [165]	6 x 4

NOTES:

1. Dimensions in brackets [] are in millimeters.
2. Catalog number is for one shielding cap only. If more than one is required, specify total quantity.

Bolted Bundled Cable Spacers Spacer; Terminal Tap; Bus Support

**Type S2GPB-A (Spacer);
Type S2GBPA-A (Terminal
Tap); Type SH2GBP-A (Bus
Support) Bolted Bundled
Cable Spacers**

**Material: Cast 356 Aluminum Alloy
Hardware: Aluminum Alloy**

Bolted Cable-to-Cable Spacer (Two Cables), cable spacer with four hole pad, and cable spacer to insulator.

EHV Rated: Self Shielding up to 550 kV

NOTES:

1. Dimensions in brackets [] are in millimeters.
2. For stainless steel hardware add SUFFIX "SS" to catalog number (example: S2GBP41ASS).
3. For variations in cable spacing contact factory.
4. For pad rotated 90° on S2GBPA-A add suffix R90 to the catalog number (example: S2GBPA44AR90).
5. For Bolt Circles other than 5 inch on type SH2GBP-A contact factory.
6. S2GBPA-A connectors rated 550 kV when used with type "STS" Shielding Caps. Ordered separately.

Bolted Bundled Cable Spacers (Three Conductor) Type S3GBP-A

Type S3GPB-A Bolted Bundled Cable Spacers (3 Conductor)

Material: Cast 356 Aluminum Alloy
Hardware: Aluminum Alloy

Bolted Cable-to-Cable Spacer (Three Cables).

WEJTAP™ Connection System General Overview

WEJTAP™ Connection System

The WEJTAP™ System adds further dimension to the existing group of proven, reliable connection systems BURNDY has manufactured for over 70 years.

WEJTAP™ Components

WEJTAP™ Components are designed to provide a reliable system connection. The system consists of WEJTAP™ connectors, installation tooling (including a variety of hotline and lineman accessories) and a unique power booster.

WEJTAP™ Connectors

WEJTAP™ Connectors use an aluminum alloy wedge that is power-driven between the run and the tap cables locking them into a “C” shaped tempered aluminum alloy spring body. The spring body maintains consistent pressure throughout the life of the connection to ensure reliability during severe electrical and climatic conditions. The wedge’s wiping action, combined with factory installed PENTX 1530, provides superior contact integrity. The wedge is automatically locked onto the spring body by a skiving action produced by a lance at the forward end of the WEJTAP™ installation tool.

WEJTAP™ Installation Tooling

The WEJTAP™ Installation Tool is a one-piece assembly that consists of a head and power unit. Two color-coded interchangeable heads accept all WEJTAP™ connectors and STIRRUP™. The design of the tool recognizes the need for simplicity and speed of operation as well as outstanding safety features, such as automatic gas release being vented away from the operator, fast simple breech loading, and fast advance when engaging the connector assembly. No loose parts to drop or misplace along with a booster ejector system that provides further safety to the operator. Fewer, simplified, hotline devices and handy lineman accessories complete the outstanding WEJTAP™ tooling package.

WEJTAP™ Power Booster

The WEJTAP™ Power Booster is a patented, self-contained device that provides the force necessary to drive the wedge into direct contact with the conductors. The booster is activated only when properly positioned in the tool assembly. A power cell in the booster is recessed to guard against premature discharge. The tool/booster system is designed to activate and deactivate the booster automatically should the operator decide to remove the tool from a connector prior to completing the installation. The deactivated booster may be safely removed from the tool.

Features and Benefits

- Large conductor chamfer on ends of wedge provide instant hand or visual identification of large run grooves; also ensure correct wedge orientation
- Color-coded WEJTAP™ connector and booster are packaged together for easy selection by the installer
- Factory inserted PENTX 1530 in grooves maintains low contact resistance, assists in protection against climatic conditions and is compatible with common insulations
- One piece installation tool, no project delays due to dropped or lost tool parts
- Fewer, and improved, hotstick accessories simplifies hotline installation and saves time
- Contained booster ejection system provides safety for the operator against the booster being ejected in the direction of the installer
- Automatic gas release vents away from the operator and eliminates manual gas venting improving safety
- Simplified loading speeds installation; no threading, just depress safety bar, twist and pull open; load by pushing and twisting prior to applying connector
- Features Acme-type threads providing smooth, fast engagement of tool and connector saving installation time

WEJTAP™ Test Data

WEJTAP™ System; Test Data

The WEJTAP™ connectors have been subjected to extensive tests simulating the most severe service and weather conditions. In addition, the WEJTAP™ System meets or exceeds the industry standards of ANSI C119.4 Class 3, NEMA CC3 1973 Class AA, 500 Heat Cycles.

As with all BURNDY® connectors, the WEJTAP™ connectors have been designed to operate cooler than the attached conductors. The WEJTAP™ connectors have also been subjected to the ASTM B117-73 Salt Spray Test.

WEJTAP™ Information

WEJTAP™ C-member bodies are color-coded and marked with nominal conductor run and tap ranges. WEJTAP™ connector packages are labeled with a variety of common conductors with their nominal ranges.

WEJTAP™ connector wedges are marked with nominal ACSR, Aluminum, and Copper concentric standard conductors:

- Red WEJTAP™ connector range is Run: #8-1/0; Tap: #8-2
- Blue WEJTAP™ connector range is Run: #2-300 kcmil; Tap: #6-300 kcmil
- Yellow WEJTAP™ connector range is Run: 266.8-1590 kcmil; Tap: #6-1590 kcmil

All WEJTAP™ wedges contain a clearly defined chamfer on the large end of the run conductor groove to identify the “large run” groove. Installers will appreciate the convenience of visual or hand identification for correct wedge positioning.

WEJTAP™ wedges are driven between the run and tap conductors and activate the spring characteristics of the “C” shaped body. This action maintains contact pressure even when the connection is subjected to severe climatic and electrical conditions.

WEJTAP™ Connection System Ordering Information; WEJTAP™ Covers

WEJTAP™ Connection System

The BURNDY® WEJTAP™ Connection System has a wide variety of connectors available for many different conductor ranges.

Color coded boosters and connectors ensure proper matching during installation.

The BURNDY® Power Booster is designed and engineered for the highest reliability and safety. Proven rimfire design means misfires are almost nonexistent. Close manufacturing component tolerances provide maximum resistance to moisture or submersion.

WEJTAP™ Ordering Information

Power boosters may be ordered separately in boxes of 25.

- Red Boosters: WPBRNBOX25
- Blue Boosters: WPBBNBOX25
- Yellow Boosters: WPBYNBOX25

Select appropriate connector, match with equal number of color coded boosters.

For information about conductors which are not listed, or further information, contact BURNDY® Customer Service at 1-800-346-4175.

WEJTAP™ Cover

BURNDY® WEJTAP™ Covers are installed on WEJTAP™ connectors to prevent them from coming in contact with other taps or exposed ground points. The covers are rugged snap-on devices available in four sizes to cover all connector sizes.

Cover Catalog Number	WEJTAP™ Size	Nominal Conductor Range Run	Nominal Conductor Range Tap	Cover Color

WEJTAP™ for Copper Connection System

WEJTAP™ for Copper, Type WCB-C Connection System for Copper

The BURNDY® Copper WEJTAP™ powder actuated copper connectors are designed for overhead copper-to-copper tap applications.

Features and Benefits

- Expanded range taking capabilities
- Larger size connector for #6 to #2 applications
- Uses standard WEJTAP™ installation tooling
- Meets latest ANSI C119.4 (2011) including optional fault current test annex
- Prefilled with PENETROX™ E to improve the performance over the life of the connection

WEJTAP™ Installation Tooling and Accessories

WEJTAP™ Installation Tooling and Accessories

Type WTB

The WEJTAP™ patented tool body is a one-piece assembly basic drive mechanism used to install WEJTAP™ and STIRRUP™ connectors ranging from #8 AWG through 1590 kcmil ACSR.

Type WTHRB1S

WEJTAP™ tool head operating platform for small and medium range (red/blue coded) connectors.

Type WTHY1S

WEJTAP™ tool head operating platform for medium and large range (yellow coded) connectors.

Type WTOCY

WEJTAP™ removal clip for red type II and medium (blue coded) tap connectors used with type WTHRB tool head.

Type WTOCBR

WEJTAP™ removal clip for large (yellow coded) tap connectors used with type WTHY tool head.

Type WTCK

WEJTAP™ tool cleaning/maintenance kit for use with type WTB tool body.

Type WTBASY1

WEJTAP™ ram replacement assembly.

WEJTAP™ POWERLUG™ 2-Hole, 4-Hole Pads; 4-Hole Flag Style

WEJTAP™ POWERLUG™

WEJTAP™ POWERLUG™ terminals are made of cast aluminum alloy for termination of ACSR and aluminum conductors.

2 Hole POWERLUG™

WCY53PB	Three - 1/0 stranded Diameter = 0.368	One - 3/0 stranded Diameter = 0.464
WCY64PB	Three - 2/0 stranded Diameter = 0.414	One - 4/0 stranded Diameter = 0.522
WCB11PB	Three - #4 stranded Diameter = 0.232	One - 1/0 stranded Diameter = 0.368

* Electrically, the three smaller conductors are the likely taps, however, during installation, they are located in the larger run groove due to their larger aggregate sum.

**Type WHSCWH**

WEJTAP™ hotstick connector clamp used to hold the tap connector spring-body and wedge for installation on energized lines with the shotgun hotstick.

**Type WHSWHADP**

WEJTAP™ hotstick angle wedge holder adapter attaches wedge clamp to universal hotstick for hotline installation.

**Type WHSWB**

WEJTAP™ hotstick wirebrush attaches to the universal hotstick for cleaning the contact surface of the line conductor.

**Type WHSPBC**

WEJTAP™ hotstick dual cable clamp used to hold run and tap conductors in position during hotline installation. Universal for all applications from #8-1272 ACSR.

**Type WCHAWAS**

WEJTAP™ hotstick angle wedge holder adapter attaches wedge clamp to universal hotstick for hotline installation with shotgun stick.

**Type WHSGB**

WEJTAP™ hotstick breech drive. Geared shotgun hotstick adapter easily latches to the breech end of WEJTAP™ installation tool with disassembly for use on energized lines.

**Type WHSSADP**

WEJTAP™ hotstick spring loaded 90 degree adapter, used to attach tool to universal hot-stick for hotline installations.

**Type WHSTA**

WEJTAP™ hotstick tool (actuator) hammer attaches to the universal hotstick for striking the tool actuator button to complete the installation.

**Type WHHWB**

WEJTAP™ hand-held wire brush for cleaning surface contact areas on non-energized conductors.

WEJTAP™ Kit Ordering Instructions

WEJTAP™ KIT ORDERING INSTRUCTIONS

Type WTCC (Carrying Case Only)

WEJTAP™ plastic carrying case. Designed for rugged use in all weather conditions. It accommodates WEJTAP™ installation tool, removal clips, and cleaning kit.

Type WABAG

WEJTAP™ accessories bag is designed for use in carrying installation tool(s), removal clips, and cleaning kit. Hotstick accessories may be accommodated as well. Holders for power boosters are conveniently located on the outside of the bag.

WEJTAP™ In-Line Disconnect

WEJTAP™ In-Line Disconnect

The BURNDY® In-Line Disconnect utilizes proven WEJTAP™ technology in combination with industry standard components to provide reliable performance of switch applications.

- Utilizes WEJTAP™ connectors for securing the switch to the distribution line in tension applications.
- Utilizes industry recognized and proven GST&D Products, LTD. blade components along with dual Advance Rubber Products, Inc., Insulators attached to a BURNDY® designed yoke plate assembly.
- WEJTAP™ In-Line Disconnect designed for use in gloving and hot stick applications in conjunction with an industry standard load break tool.
- Dual insulators minimize the switch movement during opening and closing of the blade.
- Installation steps are minimized. The switch can be snapped directly on the line and secured with our conductor pivot retainer, designed into the switch frame.
- WEJTAP™ tooling is used to secure the “C Member” to the built-in wedge feature of the frame. Providing reliable mechanical and electrical performance.
- The blade is positioned on the switch to simplify cutting the conductor during installation.
- In-Line Disconnect is removable and reuseable.
- Other conductor sizes available. Please contact factory.

WEJTAP™ Bolted Wedge In-Line Disconnect Switch

Type WADM-H Bolted Wedge In-Line Disconnect Switch

Combining the best features of the WEJTAP™ In-Line Disconnect Switch, the WADM-H Bolted Wedge enhances the range taking capabilities with an innovative hybrid bolted connector while maintaining the time savings features.

1. Bolted hybrid connector combines bolted technology with wedge features to make a reliable connection while taking the guess work of knowing when “tight is tight”.
2. Spring loaded pivot retainer snaps onto the conductor freeing the hands of the installer to quickly and safely complete the installation.
3. Dual insulators minimize the switch rotation during opening and closing, especially in mid-span applications.
4. The switch can be easily removed and reused (reconditioning required).
5. The blade can be locked at 90 and 155 degrees.

Bolted WEJTAP™ Connectors - Aluminum

CPI™ Shear Bolt WEJTAP™ Connectors with Captive Interface #4 - 350 Small Series Aluminum Tap

CPI Aluminum Taps are designed for use as a permanent connection for aluminum and copper conductors. CPI wedge connectors use high strength aluminum alloy, pure aluminum and a unique shear head bolt for a mechanically strong, electrically conductive and easy to install connection. The new Captive Interface is now “held” by the connector to facilitate installation and eliminate the risk of the interface falling. The Captive Interface also allows for conductor side entry which simplifies the installation.

Features and Benefits

- The new Captive Interface is contained by the C Body so it cannot fall out during installation
- The new Captive Interface allows conductor side entry which simplifies installation
- Industry-proven spring wedge technology easily installed with common socket or impact wrench - No Special Tools Required!
- “Spring Like” high strength C-Body ensures permanent connection with consistent pressure on the conductors
- Meets or exceeds current carrying capacity of conductors being connected
- Corrosion resistant highly conductive aluminum alloys with a pure aluminum insert between conductors increases conductivity and lowers electrical resistance

- Corrosion inhibitor factory applied for ease of installation
- Remains permanently locked through fault current or power surges
- Easy to remove without damage to conductor
- May be used in non-corrosive environments to connect copper conductors
- Excellent option for emergency restoration where outside crews might not have Shoot-On or compression tooling

Bolted WEJTAP™ Connectors - Copper

CPI™ Shear Bolt WEJTAP™ Connectors #4 - 350 kcmil Series Copper Tap

CPI Copper Taps are designed for use as a permanent connection on copper wire or solid rod. CPI wedge connectors use high strength bronze alloy, pure copper and a unique shear head bolt for a mechanically strong, electrically conductive and easy to install connection.

Features and Benefits

- Industry-proven spring wedge technology easily installed with common socket or impact wrench
- Installed overhead
- Meets or exceeds current carrying capacity of conductors being connected
- “Spring Like” high strength C-Body ensures permanent connection with consistent pressure on the conductors
- Corrosion resistant highly conductive copper and bronze alloys with a pure copper insert between conductors increases conductivity and lower electrical resistance
- Corrosion inhibitor factory applied for ease of installation
- Remains permanently locked through fault current or power surges
- Easy to remove without damage to conductor

CPI™ Tap Cover Fits Connectors 336.4 through 1272 AAC

CPI Aluminum Tap Covers electrically insulate CPI Shear Bolt Wedge Tap connectors from neighboring connectors on adjacent phases, exposed ground conductors, and nearby grounded structures or vegetation. These covers are intended for casual contact only and are not for use as personal protection. Type applications are 600-Volt maximum insulated-conductor overhead applications.

Features and Benefits

- 600-Volt maximum overhead application rating
- One size fits connectors ranging from 336.4 through 1272 AAC
- Easy one hinge design with self-locking closure
- Louvered side panels for ventilation and ease of installation
- Made from UV-inhibited, injection-molded polypropylene for durability and resistance to cold cracking

Catalog Number: 336100

Bolted Wedge Terminals - Aluminum

CPI™ Shear Bolted Wedge Terminals #6 - 795 AAC Expanded Range Taking; Fit 2-hole NEMA pads

CPI Aluminum Bolted Wedge Terminals feature 2-hole NEMA pad with aluminum shear bolt with no interface required. Only 4 sizes cover #6 through 795 AAC.

Features and Benefits

- No interface required
- Simplified installation, no special tools required
- Expanded range-taking design, only 4 sizes needed to cover from #6 through 795 AAC
- Fits 2-hole NEMA pad
- Easily removable

Catalog Number	Conductor		Dimensions		
	Nominal Wire Range	Wire Diameter	L	W	H

TP400	636 AAC - 795 AAC	.918" - 1.027"			

Bolted Wedge Stirrups

CPI™ Shear Bolt Wedge Stirrups Accommodates #6 - 4/0 ACSR; Available with 1/0 or 2/0 Bail

CPI Bolted Wedge Stirrups require no loose interface for connection and an expanded wire range reduces the total number of SKUs from four to one compared with standard product. Available with a 1/0 or 2/0 tin plated copper bail for easy connection with a bronze hot line clamp. Mainly used in utility overhead distribution primary line tapping used with standard bronze hot line clamps (sold separately).

Features and Benefits

- No loose interface required for connection
- Simplified installation, no special tools required
- Expanded range-taking design, only 1 size covers from #6 solid through 4/0 ACSR
- Aluminum shear bolt guarantees proper torque without the need of a torque wrench
- Aluminum triple lead threads reduces the number of turns to install the connector
- Connector is easily removable with a standard wrench

Catalog Number	Nominal Wire Range	Wire Diameter	Bail Size	Dimensions		
				L	W	H
120000	#6 Sol - 4/0 ACSR	.162" - .574"	1/0 Bail	7.0	2.4	5.1
120100			2/0 Bail	6.8	2.4	5.2

Bolted Wedge Stirrups - Aluminum

CPI™ Shear Bolt Wedge Stirrups, Aluminum Accommodates #4 - 397.5 AAC

CPI Aluminum Stirrup Connectors are designed for connecting to aluminum or copper conductors. Stirrups are intended to protect the main line conductor from damage and arcing as hot line clamps are connected and disconnected. During installation, when proper spring tension and torque is achieved, the shear head bolt will break off giving the install a positive indication of a corrected completed connection.

Features and Benefits

- Easy to remove and re-use without damaging the conductor
- Heavy duty tin plated bail has a large loop to allow for multiple connection positions while also eliminating galvanic reaction
- Easy to install with standard socket or impact wrench, requires no special tools
- Easy adaptable to standard hot stick tools
- High-conductivity grit corrosion inhibitor is factory applied for ease of installation and longevity while the connector is in service
- Remains permanently locked through fault current or power surges
- May be used in non-corrosive environments to connect copper conductors
- Excellent option for emergency restoration where outside crews might not have shoot-on or compression tooling

CPI™ Cast Paddle Stirrups Available in Bronze, or Tin-Plated Bronze

CPI Paddle Stirrups are designed to easily attach hot line clamps or grounding clamps onto various system components. Stirrups are used to protect the main conductor as hot line or grounding clamps are installed and removed. Typical applications are to connect hot line taps, lightning arrestors, re-closer connections and pigtails.

Special applications can include installation on equipment such as cut-outs, riser pole disconnect switches and pad-mounted switch gear for safe grounding and maintenance purposes.

Features and Benefits

- CPI Paddle Stirrups are available in longer lengths than traditional versions allowing for multiple connection points on one unit
- Multiple lengths available, contact the factory for availability
- Slotted holes allow connection to terminals or spaces with standard NEMA spacing

Catalog Number	Material	Handle Length
802525	Bronze	5.25"
802525T	Tin-Plated Bronze	
802526	Bronze	3.25"
802526T	Tin-Plated Bronze	

CPI™ Cast Paddle Stirrups Bi-Metallic Construction

CPI Bi-Metallic Paddle Stirrups are designed to easily attach hot line clamps or grounding clamps onto various system components. Stirrups are used to protect the main conductor as hot line or grounding clamps are installed and removed. Typical applications are to connect hot line taps, lightning arrestors, re-closer connections and pigtails. Special applications can include installation on equipment such as cut-outs, riser pole disconnect switches and pad-mounted switch gear for safe grounding and maintenance purposes.

Bi-Metallic construction allows connection between aluminum system components and bronze hot line clamps while preventing galvanic reaction.

Features and Benefits

- Bi-Metallic construction allows connection between aluminum system components and bronze hot line clamps while preventing galvanic reaction
- The stirrup is fault current rated at 10K amps for a 2-second duration
- Standard or slotted hole configuration allows connection to terminals or spades with standard NEMA spacing
- Fully CNC machined from EC grade aluminum and pure 110% copper for maximum conductivity
- Copper rod is tin-plated and coated with corrosion inhibitor before it is threaded and crimped into the aluminum body

Catalog Number	Material	Pad Configuration	Handle Length

801450S		Slotted	

Bolted Wedge Aluminum Pad Tap Connectors

CPI™ Shear Bolt Wedge Pad Tap Connectors Accommodates #2 - 1590 AAC 61

CPI Aluminum Pad Tap Connectors connect aluminum or copper conductor to a variety of 2- or 4-hole NEMA devices. Perfect for use in mounting sectionalizing switches, to connect compression lugs for risers or many different uses in substations. Pad Tap Connectors are extremely beneficial in applications that may need to be disconnected.

Features and Benefits

- Easy to remove and re-use without damaging the conductor
- Available in NEMA standard 2- or 4-hole patterns
- Industry-proven wedge technology for quick and easy installation without the need for special tools
- Easily adaptable to standard hotstick tools
- High-conductivity grit corrosion inhibitor is factory applied for ease of installation and longevity while the connector is in service
- Meets or exceeds the current carrying capacity of the conductors being connected
- Remains permanently locked through fault current or power surges
- May be used in non-corrosive environments to connect copper conductors
- Excellent option for emergency restoration applications where outside crews might not have shoot-on or compression tooling

Bolted Wedge Piggy-Back Clamps - Aluminum

CPI™ Piggy-Back Clamp #8 - 653.9 ACSR

CPI Aluminum Piggy-Back Clamps are designed to temporarily hold the tap conductor in position with the main conductor while a permanent connection is made elsewhere. This versatile temporary clamp assist the Lineman with with the installation of many types of tap connectors, especially in Hot-Stick applications.

Features and Benefits

- Easy to remove and re-use without damaging the conductor
- Main Line can be held in either jaw
- **Temporary Connection Only**, not intended as a permanent connector
- Accommodates wire sizes #8 - 653.9 ACSR
- Aluminum body with stainless steel eye bolt

Catalog Number	For connectors that accommodate wires
	Nominal Wire Range
6002248	#8 - 653.9 ACSR

Bolted Wedge Hotline Tap Connectors - Straight

CPI™ Hotline Tap Connectors HTC Straight Series; #6 Cu - 954 AAC

CPI Hotline Tap Connectors, HTC Straight Series, are designed for use as a permanent or temporary connection on aluminum or copper wire. Featuring the wedge principal, the HTC Series tap connectors maximize connecting force on the conductor with a self-maintaining spring wedge connection.

The elastic spring connecting force created by the connector ensure the HTC connector will stay tight during service by overcoming issues with heat cycling.

Features and Benefits

- Full-current rated connector for use an in-line jumper or a device tap
- Increased conductive path and surface contact area between the main and tap line increases current ampacity rating
- Can be installed directly to the main with no need for bail or stirrup
- Stainless steel eye bolt increases strength and corrosion resistance
- High-conductivity grit type corrosion inhibitor is factory applied for ease of installation and longevity while connector is in service
- Remains permanently locked through fault current or power surges
- Horizontal wedge action prevents the conductor from “sticking” during the removal process
- Easy to remove without damaging cable

Catalog Number	Conductor				Dimensions		
	Main	Main Dia. Range	Tap	Tap Dia. Range	A	B	C

Available options:

Add suffix "R" to add full radius edges for transmission applications

Add suffix "E" to replace tap bolt with 1/2" eyebolt

Add suffix "T" for Tin Plating

Bolted Wedge Hotline Tap Connectors - Angled

CPI™ Bolted Wedge Hotline Tap Connectors HTC Angled Series; #6 - 954 ACSR

CPI Hotline Tap Connectors, HTC Angled Series, are designed for use as a permanent or temporary connection on aluminum or copper wire. Featuring the wedge principal, the HTC Series tap connectors maximize connecting force on the conductor with a self-maintaining spring wedge connection. Angled tap side allows extra clearance of the tap conductor when using a shotgun stick.

Features and Benefits

- Angled tap side allows extra clearance of the tap conductor when using a shotgun stick
- Full-current rated connector for use as an in-line jumper or a device tap
- Increased conductive path and surface contact area between the main and tap line increases current ampacity rating
- Can be installed directly to the main with no need for bail or stirrup
- Stainless steel eye bolt increases strength and corrosion resistance
- High-conductivity grit type corrosion inhibitor is factory applied for ease of installation and longevity while connector is in service
- Remains permanently locked through fault current or power surges
- Horizontal wedge action prevents the conductor from “sticking” during the removal process
- Easy to remove without damaging cable

Add suffix "T" for Tin Plating

Bolted Wedge Hotline Bail Connectors

CPI™ Hotline Tap Bail Connectors HTC B Series; #6 Cu - 954 AAC

CPI Hotline Tap Bail Connectors (HTC B Series), are designed for connecting to aluminum or copper conductors. Stirrups are intended to protect the mail line conductor from damage and arcing as Hot Line Clamps are connected and disconnected.

Features and Benefits

- Incorporates stainless steel eye bolt for increased strength and corrosion resistance
- Copper bail is Tin Plated to prevent galvanic reaction between dissimilar metals
- The bail is locked into the connector using threaded set screws preventing excessive deformation while maximizing surface contact area for maximum conductivity
- High conductivity grit type corrosion inhibitor is factory applied for ease of installation and longevity while the connector is in service
- Remains permanently locked through fault current or power surges
- Horizontal wedge action prevents the conductor from “sticking” during the removal process
- Easy to remove without damaging cables

Automatic Splice Connectors

CPI™ Automatic Splice Connectors Accommodates #6 AAC - 556.5 AAC

CPI Automatic Splice Connectors are designed as a permanent or temporary connection on AAC, ACSR, or AAAC conductor in full or partial tension applications. The unique open design helps overcome the two most common reasons for splice failure: improper installation and corrosion. The window allows the installer to see when the wire is fully inserted properly and prevents water and other contamination from building up inside the connector.

The splice is made of the finest aluminum alloys for optimal conductivity and corrosion resistance.

Features and Benefits

- Only automatic splice available where you can see that the wire is fully inserted and installed properly
- No need to mark and measure the depth of cable insertion
- Open design helps prevent corrosion by allowing water and contamination to drain
- Stainless steel springs resist corrosion
- Tested to ANSI C119.4 specification*
- Minimum 5% tension needed to maintain electrical connection
- Positive center stop for conductor
- Minimal distance lost when sagging conductor
- Chamfered wedge aids cable insertion
- 4:1 surface area vs. cable for optimal conductivity
- Slider handle allows the splice to be released if needed
- Individually packaged in sealed plastic bags to prevent contamination before use

Bolted Distribution Dead Ends

CPI™ Bolted Distribution Dead Ends Accommodates #4 AAC - 556.5 ACSR

CPI Bolted Distribution Dead Ends are used for distribution or transmission construction to terminate on ACSR, AAC, or AAAC conductors. Unlike traditional U-bolt style units, the CPI Dead End features independent bolts that can be fully tightened without having to alternate between bolts. This prevents the possibility of casting breakage due to offset U-bolt over-tightening. Optional torque control shear-head bolts prevent over-tightening that is common with today's impact wrenches.

Features and Benefits

- Body is made of heat-treated aluminum alloy
- Captive stainless steel hardware provided
- Pulling eye rated to 6,000 pounds included in assembly
- Side loading for ease of installation
- Spring-loaded design maintains clearance of conductors during installation
- Unique independent bolts prevents casting beakage by allowing full tightening without having to alternate; this time saving feature also eliminates any lineman confusion
- Optional torque control shear-head nuts available

OPGW Bolted Dead Ends

CPI™ OPGW Bolted Dead Ends Accommodates .354" - .750"

CPI Optical Grounding Wire Spans (OPGW) Bolted Dead Ends are designed as a full tension termination. The patented Left and Right Hand gripper design allows the dead end to hold 95% of the cable's RBS (Rated Breaking Strength). Break-Away shear head bolts are used to ensure the proper gripping force is applied to the cable without attenuating the fibers and optical performance.

Please provide cable specification sheet when ordering.

Features and Benefits

- Rubber grommets suppress Aeolian vibration fatigue at the cable exit point
- Compact length allows for complete installation from the structure
- Shear Head bolts ensure proper torquing necessary to achieve maximum holding strength without damaging the fibers
- Optional Cable Down Guide helps to train the cable down or around the structure without exceeding the minimum bend radius of the cable
- Shorter and easier to install than formed wire dead ends allowing installation directly from the tower
- Standard drilled and tapped grounding lug attachment point eliminates the need for additional bonding accessories
- Unique cable gripper insert system greatly reduces manufacturing lead times - most sizes are typically available in stock directly from the factory
- Design Criteria:
 - Sustained load, 95% of cable RBS
 - Ultimate Mechanical Strength 35,000 lbs
 - Cable Diameter Range .350" - .750"
- Dead ends for larger cable may be available, please contact the factory

XL OPGW Bolted Dead Ends

CPI™ XL OPGW Bolted Dead Ends Accommodates .583" - .871"

CPI Extra Large (XL) Optical Grounding Wire Spans (OPGW) Bolted Dead Ends are designed as a full tension termination. The patented Left and Right Hand gripper design allows the dead end to hold 95% of the cable's RBS (Rated Breaking Strength). Break-Away shear head bolts are used to ensure the proper gripping force is applied to the cable without attenuating the fibers and optical performance.

Please provide cable specification sheet when ordering.

Features and Benefits

- Compact length allows for complete installation from the structure
- Shear Head bolts ensure proper torquing necessary to achieve maximum holding strength without damaging the fibers
- Shorter and easier to install than formed wire dead ends allowing installation directly from the tower
- Design Criteria:
 - Sustained load, 95% of cable RBS
 - Ultimate Mechanical Strength 60,000 lbs
 - Cable Diameter Range .625" - 1.125" overall diameter
- Must be used in conjunction with the CPI Grounding Jumpers
- All OBDE-XL Bolted Dead Ends are supplied with a clevis bolt, hex nut, and cotter pin

OPGW Down Lead Clamps

CPI™ OPGW Down Lead Clamps Available in Lattice Tower or Banding Configurations

CPI OPGW Down Lead Clamps are used to attach Optical Ground Wire (OPGW) to the Tower or Pole as it is guided to and from the splice box.

Features and Benefits

- Will not damage or attenuate optical fibers
- Wide conductor range taking ability
- Only three part numbers are needed to accommodate wires ranging from .25"-1.00"
- Available for both banding and lattice tower applications
- Use of banding adaptors eliminates the need for drilling into steel poles
- Lattice tower adaptors cover the full range of tower steel thickness with only one part number
- Eliminates the need for multiple stock codes
- The torque control shear head bolt prevents over-tightening
- A guide pin prevents installation errors and protects the OPGW by lining up the top bottom of the clamp as it is tightened
- Lattice tower configurations contain a device that prevents rotation, this facilitates one handed installation and locks the clamp to the tower attachment
- Unique design allows for reduced manufacturing delivery times

OPGW Grounding Down Lead Clamp

CPI™ OPGW Grounding Down Lead Clamp Grounding Point for Both Legs of OPGW

CPI OPGW Grounding Down Lead Clamp is designed to connect OPGW to the pole or structure as it is routed down to the splicebox. The grounding lug can be attached to either bolt point and adds an additional layer of safety by grounding out any voltage that may be picked up through the OPGW as it travels through the phases.

Features and Benefits

- Offers a grounding point for both legs of OPGW
- Will not cause signal attenuation
- Through hole accepts 5/8" bolt for direct attachment to Wood or Steel Poles
- Side slots accept band up to 1-1/2"
- Exclusive high-conductivity grit type corrosion inhibitor is factory applied for ease of installation and longevity while the connector is in service
- Constructed of the finest quality aluminum alloy for optimal conductivity
- Stainless Steel hardware for corrosion resistance
- Short manufacturing lead times allow most sizes to be available In-Stock directly from the factory

Side A and Side B can be different diameters
Consult factory for OPGW sizes not listed

Notes:

- Lattice tower attachments are available upon request*
- Please provide Cable Outside Diameter when ordering*
- Customer to supply grounding wire termination lug*
- Side A and Side B can be different diameters*

Universal Download Cushion

CPI™ Universal Download Cushion Attaches OPGW or ADSS cable to tower, pole, structure

The Universal Download Cushion developed by Connector Products, Inc., is designed to attach Optical Ground Wire (OPGW) or ADSS cable to the tower, pole or structure as it is guided to and from the splice box.

Features and Benefits

- Multiple channels to accept most sizes of OPGW or ADSS conductor, cutting down on stock codes and inventory required
- Molded in Urethane to create a weather resistant clamp that is extremely durable yet flexible to accommodate ADSS cable
- Will not damage or attenuate the fibers
- A unique “key” in the molded design is provided to ensure correct channels are used
- Clearly marked ranges on both the outside of the clamp as well as in the channels where the conductor lays
- Through hole molded to accept standard 5/8” mounting hardware
- Optional mounting hardware shown and available upon request

Please consult the factory for custom sizes.

Ground Grid Connectors

CPI™ Ground Grid Connectors Accommodates .232" - .681" Diameter Range (Vertical) .184" - .575" Diameter Range (Horizontal)

CPI Ground Grid Connectors are a safe, fast, and dependable method of making permanent wire-to-wire and wire-to-rod connections for a variety of grounding applications. Using a special shear-head bolt to drive a wedge into the connector activates the connector. When the proper torque and spring tension is achieved, the bolt head shears off, giving the installer a positive indication of an optimum connection.

Features and Benefits

- No special molds, chemicals, tools, dies or fired-on charges necessary for installation; installed with a common socket, impact or ratchet wrench
- No temperature or weather restrictions for installation; can be installed no matter what environment exists at the job site
- Shear-head bolt ensures consistency of application and positive verification of a completed connection
- Fully tested to IEEE standard 837 for:
 - Mechanical Pullout
 - Electromagnetic Force
 - Current-Temperature Cycling
 - Freeze-Thaw
 - Corrosion-Nitric Acid
 - Fault Current, 35 kA rms. sym. at .02 sec.
 - Thermal Shock and Accelerated Corrosion

- Typical applications:
 - Substation ground grids
 - Pole grounds transmission line grounding
 - Industrial/Residential service grounds
 - Pad Mount Transformers
 - Telco distribution / CATV grounds
 - Wind Farms

Running Rail Connectors

CPI™ Running Rail Connectors Single and Two-Conductor Styles

CPI Running Rail Connectors are designed as a permanent connection for copper conductor to a variety of rails used in Heavy Rail Mass Transit systems. Constructed with a heavy duty aircraft-quality steel spring member, copper cable nest, indenter, hex head bolt and locking nut.

Features and Benefits

- No drilling in rail or need to weld conductor to the rail!
- Rail is not subjected to warping by excessive heat or to weakening by drilling
- Labor saving, installation time can take as little as 10 minutes per connection
- Fewer rail connections required due to large conductor capacity (Single conductors up to 1000 kcmil; Dual conductors up to 750 kcmil)
- Large conductors can be bent away from the rail after installation without the risk of damaging the connector
- The clamp is an active spring applying a consistent force on the conductor ensuring a positive connection through heat cycling and train vibration
- The J-shaped spring member of the connector helps overcoming loosening issues problems associated with harsh train vibration by flexing rather than breaking; a static-type connection doesn't have this resiliency and could crack under prolonged vibration
- Consistent spring pressure prevents moisture and contamination from seeping into the connection
- All copper components are tin plated and steel components are galvanized

Single Conductor Connectors		
Catalog Number	Rail Size & Type	Conductor Size Range

Contact Rail Connectors

CPI™ Contact Rail Connectors Single and Two-Conductor Styles

CPI Contact Rail Connectors are designed as a permanent connection for copper conductor to a variety of rails used in heavy rail Mass Transit systems. Constructed using a heavy duty aircraft-quality steel spring member, copper cable nest, indenter, hex head bolt and locking nut.

Features and Benefits

- No drilling in rail or need to weld conductor to the rail!
- Rail is not subjected to warping by excessive heat or to weakening by drilling
- Labor saving, installation time is 1/6 man hours
- Fewer rail connections required due to large conductor capacity (Single conductors up to 2000 kcmil; Dual conductors up to 750 kcmil)
- Large conductors can be bent away from the rail after installation without the risk of damaging the connector
- The clamp is an active spring applying a consistent force on the conductor ensuring a positive connection through heat cycling and train vibration
- The J-shaped spring member of the connector helps overcoming loosening issues problems associated with harsh train vibration by flexing rather than breaking; a static-type connection doesn't have this resiliency and could crack under prolonged vibration
- Consistent spring pressure prevents moisture and contamination from seeping into the connection
- All copper components are tin plated and steel components are galvanized

150-2-500 Nest Configuration

150-1000 Nest Configuration

2000 kcmil Cathode Connector; Cover

CPI™ 2000 kcmil Cathode Connector “Pot Head” Connector

CPI Cathode Connector (also known as “Pot Head” connector) is designed to connect a single 2000 kcmil conductor from the main feeder directly to the Third Rail. Used in conjunction with the CPI Contact Rail Clamp, a Pot Head connector can replace the need for having 4 separate 500 kcmil connections with one single 2000 kcmil connection.

Features and Benefits

- Constructed of high conductivity copper
- The assembly comes standard with a tin-plated finish (image shows unplated)
- Incorporates the use of stainless steel hardware for increased strength and corrosion resistance
- Optional molded fiberglass cover is also available
- Simple 4-bolt installation
- Eliminates the need for any welding
- Recommended for use with the CPI 2000 kcmil Contact Rail Connector

Catalog Number	Description
22000	2000 kcmil Cathode Connector
750336	Fiberglass Insulated Cover

Single Cable Support Spring Rail Clips

CPI™ Single Cable Support Spring Rail Clips Support for Signal Cables Near Rail

CPI Support Spring Rail Clips are designed to support and hold a variety of Signal cables or conductors in close proximity to the rail.

Features and Benefits

- Tempered spring steel wire construction
- All components are plated or galvanized to resist corrosion
- Quick and easy to install
- Removable and reusable
- Available in different configurations to accommodate different size rails and multiple conductor combinations

Underground System Connection and Protection

Underground System Connection and Protection

Nowhere in the distribution of electrical power are the problems of connecting conductors and equipment against the effects of fault currents as complex as in underground systems. For more than 85 years, BURNDY® engineers have worked closely with utilities to develop devices for connecting and protecting conductors and associated equipment in underground systems. These devices, with their inherent dependability and economy, have contributed to the rapid growth of underground systems throughout the country. To assist utility personnel in more effectively selecting and applying these devices, the engineering talent and experience of BURNDY have been pooled to prepare this technical section, and the catalog information that follows.

These devices are designed for use in both radial and network type underground systems. Radial systems (Fig. 1) distribute power economically except in high load density areas where a high degree of service reliability is required.

Network systems (Fig. 2) have become standard for AC power distribution where load density is high and service continuity must be assured under nearly all conditions. The improved equipment and methods which are described in this catalog have been designed to meet these secondary network system requirements and to reduce the cost of installation and maintenance.

Early Problems in Underground Connections

Despite the many advantages of underground distribution, a major problem was that of making connections in congested manholes or junction boxes. The necessary procedure - soldering conductors, taping joints, and wiping lead covered cable - was so complex, that it demanded considerable skill and was time consuming and costly. This involved procedure had to be repeated each time a service was added to a main. When completed, the multiple-branch joints were

excessively bulky and their electrical and mechanical performance suffered from the shortcomings of soldered connections.

The installation of underground distribution made greater strides as those early connection methods gave way to specialized products and techniques developed by BURNDY at the request of, and in close collaboration with, engineers of leading utilities. These specialized connectors were easier and more economical to install, more compact, and more dependable electrically and mechanically.

For installation in conjunction with these connectors, BURNDY also developed products to protect the secondary system from the effects of fault currents. The continuing improvement of these products based on field experience and laboratory research, is contributing to even greater dependability and economy in underground distribution.

Design Objectives in Connectors for Underground

While each of the principal types of equipment described in the following pages has been designed to meet particular service requirements, all have several basic objectives in common:

Reliability: To minimize outages and their serious consequences in the high load density areas serviced by underground systems.

Ease of Installation: Compact for easy installation in the confined space of a manhole and transformer vaults. Mechanical connections that eliminate difficult solder joints.

Economy: By reducing the time and skill required for installation of a dependable, insulated compact connection.

Versatility: For permitting easier changes, expansion, and additional services with a minimum of system shutdown.

Figure 1: Radial Secondary Distribution System

Figure 2: Typical Secondary network Equipped with Limiters

Underground Connectors and Accessories Overview by Type

The MOLE™ and HYCRAB™

The most popular of the engineered connectors developed specifically for underground manholes and transformer vaults are the MOLE™ and HYCRAB™ that provide for multiple connections at a single junction point of main, feeder, and service cables. Pre-insulated to eliminate extensive taping, these connectors are essentially bus bars with several cable outlets: mechanical installation of the MOLE™, and compression installation in the HYCRAB™.

Limiters and Fuses

To prevent “roasting” of cable insulation, resulting from fault current, BURNDY has developed cable limiters that are inserted in each secondary cable at all junction points. Network protector fuses have been designed to back up the protector breaker in the event of a malfunction during a transformer or primary cable fault. By coordinating the time current characteristics of the fuse with those of the cable limiters, the possibility of limiter blowing on primary faults is eliminated, which in turn reduces the fault finding task. Also, limiter, fuse, and cable insulation characteristics must be carefully coordinated to assure isolating a fault on the secondary before it can cause extensive damage or interrupt service in other sections of the secondary system.

High Capacity Limiter 200,000 Amperes at 600 Volts

The BURNDY® High Capacity Limiter is designed to economically protect electrical distribution systems from the destructive effect of high energy faults. The increasing number of 600 volt secondary network installations for industrial and commercial applications demand a cable limiter that can safely interrupt 200,000 amperes (symmetrical available) and one that will also completely coordinate with the higher voltage network protector fuses.

Available fault currents as high as 200,000 amperes rms at 600 volts across the fusible elements have been interrupted during tests on the BURNDY® High Capacity Limiter. The power factor during these tests was less than 15%, thereby imposing the most difficult clearing conditions. No external disturbance is experienced upon clearing fault currents from the “float” value to 200,000 amperes. The quartz filler absorbs the intense energy generated by interrupting the fault current. The quartz fuses into tubular fulgurites, with a high dielectric strength, and forms an insulating barrier between the melted link sections. This action prevents restrike of the internal arc. The rugged glass melamine housing provides a vessel that completely contains the developed energy.

This carefully developed time-current characteristics and rigid manufacturing tolerances assure proper coordination with the network protector fuses and the insulation damage characteristics of 4/0, 250, 350, 500, and 750 kcmil cable.

The High Capacity Limiter is available in four variations to accommodate a variety of installation practices. The Type HYS has cable sockets at both ends, which allow for indenting to the cable ends with a hydraulic BURNDY® HYPRESS™. The HYAO type has an offset lug on one end which permits back-to-back mounting on bus bar.

For those installations where the BURNDY® MOLE™ product is used for manhole junctions or transformer vault buses, the Type HYM permits a replaceable connection of the limiter directly to the MOLE outlet at one end and a compression cable connection at the other.

Modern electrical distribution systems require low cost protection to safeguard costly equipment and quickly isolate faults, so that the undamaged portions of the system may function normally. BURNDY® High Capacity Limiters assure positive, economical protection when installed in properly designed systems.

Compression Connectors

BURNDY® HYDENT™ compression type connectors, and installation tools, have been designed for splicing and terminating copper as well as aluminum underground cables, in both primary and secondary circuits. BURNDY tools and dies are custom designed to produce sound electrical, and mechanical joints on BURNDY connectors. The use of the BURNDY® Engineered System with matched tools, connectors and dies, assures optimum results.

Residential Underground

The trend toward improvement in neighborhood appearances, and the elimination of storm outages, tree trimming, etc. has created the need for residential underground distribution. To meet these needs, BURNDY offers: Mechanical type pre-insulated multi-conductor terminal connectors for submersible transformer locations; and compact multiconductor connectors for above ground transformer and enclosures. For service taps, BURNDY offers: Pre-insulated multi-conductor compression and mechanical connectors; and a range taking compression connector for below grade service. Power pedestals for direct burial, above ground application, and conduit systems are offered. Residential Underground Fuse Block assembly with replaceable fuse for each service cable is also available.

Multiple Outlet Connectors MOLE™ and HYCRAB™

Multiple Outlet Connectors

Connectors for Aluminum

For systems where aluminum is used, connectors especially designed for aluminum conductors are available in bolted and compression types: HYCRAB™, HYPLUG™, HYREDUCER™, and HYSOCKET. Aluminum conductors can be connected to standard MOLE™ connectors by using HYPLUG™ YE-R type adapters in catalog section H. Contact customer service for specific recommendations to connect aluminum conductor to MOLE™ and HYCRAB™ multiple outlet connectors.

Multiple Outlet Connectors

The increasing use in modern electrical distribution systems of junction points where several relatively large cables must be connected, has brought about the development of BURNDY® MOLE™ line equipment to speed up and simplify the making of such connections. The modern tendency toward network systems not only in underground utility practice but also in industrial wiring, has greatly increased the number of multi-connection joints.

The BURNDY® MOLE™ and HYCRAB™ connectors are insulated bus bars with multiple connector outlets for service cables, secondary mains or equipment leads. In the MOLE™, clamping action secures conductors to the connector; in the HYCRAB™, connections are made by indenting with a compression tool. Both lines of insulated connectors offer the following basic advantages:

1. **Ease of Economy and Installations:** The ease and reduction of time required to make and insulate dependable multi-connections greatly reduces the cost of installation. The compact design makes maximum use of space and provides for simplified racking.
2. **Versatility for System Modification:** The MOLE™ and HYCRAB™ are designed to accommodate the secondary main and service cables, and permit easy modification or later additions. The numerous available connector configurations permit a wide variety of arrangements of cables and equipment connections. The 600 volt rating of the MOLE™ and HYCRAB™ insulation provides for efficient operation at all standard utilization voltages.
3. **Efficient, Dependable Performance:** The MOLE™ and HYCRAB™ connectors assure permanent, high conductivity connections, good moisture seal, and insulation that resists the severest condition encountered in underground installations.

MOLE™ and HYCRAB™ Insulation

The location in vaults and manholes often exposes these connectors to immersion in water, chemical, and other contaminants, as well as to heat from overload or fault currents. The MOLE™ and HYCRAB™ insulations provide electrical, mechanical, and thermal properties essential to assure the service continuity of underground distribution systems.

Recognizing the importance of proper connection insulation, BURNDY established performance specifications exceeding those of 600 volt cable insulation.

Multiple Outlet Connectors BURNDY® MOLE™

Multiple Outlet Connectors (Continued)

The MOLE™ and MOLE™ Accessories

The BURNDY® MOLE™ is a multi-cable connectors that consists of a pre-insulated copper bus bar with threaded outlets that permit a minimum of two cables to be connected by means of a socket, nut, and cone assembly (Illustration A). The clamping action of the socket, nut, and cone assembly on the cable develops high contact pressures that maintain joint conductivities greater than 100% of the continuous conductor.

The MOLE™ design affords exceptional versatility in four ways:

MOLE™ outlets can be plugged-off until needed for the addition of cables.

Installed cables can be easily removed.

Cable sizes can be increased by changing the socket, nut, and cone assembly.

The number of outlets may be increased by joining MOLE™ connectors with a MOLE™ coupler.

Insulation

The copper bus bar insert is encased in a molded insulating jacket that eliminates crotch taping. The thickness of the jacket prevents any possibility of the insert weight to cause the insulation at the supports to flow away at the high temperatures of fault conditions.

Ratings

MOLE™ connectors are rated at 1500, 2000, 2500, and 3000 amperes, based on the maximum current the insert cross-section can carry. Each outlet can carry the full rated current of the cable connected to it.

To avoid exceeding the insert rating, the cables should be arranged in such a manner that most current flows directly across the insert. (See Illustration B.)

Illustration A

Installation

Cables are connected to the MOLE™ by means of a socket, nut and compression cone assembly. The socket is threaded into the MOLE™ insert. The stripped cable end is inserted into nut and compression cone, and then into the socket where it is securely clamped by tightening the nut. The joint is then sealed watertight in one of three ways:

Taping;

MOLE™ Outlet Insulating Sleeves, sealed with a minimum of taping;

Tests under flooding and other adverse conditions demonstrate that such joints are impervious to water.

Accessories

A socket, cone and nut assembly is screwed into each MOLE™ outlet to which a cable is to be connected. The socket has a tapered recess into which the clamping nut forces the cable into the compression cone. The cone is slotted to controlled widths and depths for maximum flexibility, and its inside surface is serrated for low contact resistance and high pullout strength.

Plug seal MOLE™ outlets not in use. The MOLE™ is delivered with one-fourth of its outlets sealed with plugs. Additional plugs may be ordered.

MOLE™ couplers facilitate system expansion by joining additional MOLE™ connectors to those already installed. Couplers are easily installed in end or side outlets of the MOLE™, and make connections that are effective both electrically and mechanically.

Illustration B

Multiple Outlet Connectors BURNDY® MOLE™

Multiple Outlet Connectors (Continued)

BURNDY® MOLE™ How to Order

MOLE™ Connector Selection Considerations

Conductor Type:

Copper Stranded - Adapts directly to MOLE™ using Z-NR type socket nut and Z MOLE™ compression cone

Aluminum Stranded - Use type YE-R HYPLUG™ to adapt to Z-NR style socket nut and Z MOLE™ compression cone (contact customer service for recommendations)

Amperes:

Ratings are for maximum current at any point along the cross section of the connector bus

Each outlet is rated for the full current capability of the attached conductor or coupler

This catalog shows 1500, 2500, and 3000A variations; contact customer service for other ampacity ratings

MOLE™ Bus Configuration:

Selection based on desired conductor routing

Determine if multiple MOLE™ connectors will be joined; End connection points (1) / (X) in ZMT, ZML, ZMX, and ZMK style configurations are often used for this purpose

See descriptions in the ordering matrix and illustrations

Contact customer service for ordering tables for configurations not included in this catalog

Number of Outlets:

2 to 18 outlets are available on a single MOLE™ depending on bus configuration

Connect multiple MOLE™ bus together if a greater number of outlets is required

Connection Point Configuration:

See "Connection Point Options" table to determine the size required

End connection point (1) / (X) size can be made different from those on the bus side(s) (2 - n) by changing the part number suffix.

Contact customer service for options to have different size connection points on the side(s) of the MOLE™ bus.

MOLE™ Stud Connector Type ZMLDN

MOLE™ Stud Connector Type ZMLDN For Connecting Copper Cables to Network Protector

To terminate one or more cables at the studs of distribution transformers, network protectors, or other apparatus. The body, except for the clamping element, is completed insulated. A separate clamping cap over the stud is provided that permits easy removal of the MOLE™ Stud Connector. This permits work to be done on the Network Protector without unduly disturbing the cables.

Outlet Plugs — MOLE™ outlet plugs that facilitate sealing outlets not being used are available. Type Z-P and Type K-P, sold separately.

Insulating Sleeves — Taping operations for watertight joints are greatly simplified by the use of BURNDY® Type CM or MOLE™ Insulating Sleeves Type Z-C, sold separately.

Clamping Elements — Outlet Symbols A or B, refer to socket and nut Type Z-NR, and Cone Type Z cable clamping elements accommodated. These must be ordered separately.

MOLE™ to MOLE™ Coupler; MOLE™ Outlet Insulating Sleeve

MOLE™ Coupler, Type ZMS for Connecting Multiple MOLE™ Connectors

A compact, easy-to-tape MOLE™ Coupler for joining multiple MOLE™ end-to-end. Allows for expansion of underground systems by joining more MOLE™ Connectors to existing MOLE™ installations. Easy assembled to the end outlets of MOLE™ Connectors Types ZMT, ZMX, ZML, and ZMK. Can also be used in side outlets for other types of MOLE™ arrangements. The MOLE™ Coupler has a lock nut feature which permits pre-positioning of the added MOLE™ and facilitates training of new cables. Makes an effective electrical and mechanical connection.

OUTLET RANGE: **“A” (5/8”) 6 Str. - 600 kcmil**
 “B” (7/8”) 2 Str. - 1000 kcmil
 “C” (1-1/8”) 500 - 1500 kcmil

MOLE™ Outlet Insulating Sleeve, Type Z-C Aid in insulating MOLE™ Outlets to produce watertight joint with minimal taping

An effective aid in insulating MOLE™ outlets to produce a secure watertight joint with a minimum of taping. Fits over the MOLE™ outlet and over the maximum outer diameter of insulated cable. The difference between the I.D. of the standard sleeve and the O.D. of the cable insulation is taken up by wrapping the cable with several turns of rubber tape. The only external taping required to effectively seal the joint is the small area at each end of the sleeve.

HYCRAB™ Connector Overview Insulated HYCRAB™, Type YM

HYCRAB™ Connectors

One of the most economical devices for connecting several cables to a common junction point is the HYCRAB™, which is essentially a bus bar with a number of compression-type connector outlets, pre-insulated to eliminate taping. Like the MOLE™, the HYCRAB™ fits into a limited space, is simple to rack, and facilitates adding future cables.

Insert and Insulation

Having an insert similar to that of the MOLE™, the HYCRAB™, has connector outlets of the BURNDY® HYDENT™ compression type. These tubular elements are indented to the cable by BURNDY® HYPRESS™ installation tools and dies, designed to compress connector and cable together with indents of controlled depth. HYDENT™ compression connections are made quickly and easily, have relative conductivities of 100% or higher, are electrically stable, and mechanically secure.

The HYCRAB™ is insulated by a jacket of molded rubber to resist prolonged exposure to oil or other contaminants.

Installation

Insulation fingers are rolled back to expose the tubular outlets, sufficiently spaced to allow for the convenient operation of BURNDY® HYPRESS™ compression tools. Cable ends are inserted into the outlets. Each is crimped with one or two indents, and the fingers are rolled forward again to cover the outlets. Installation is completed by taping the short space between the tip of the finger and cable insulation.

Variations and Accessories

Uninsulated HYCRAB™ connectors for joining bare neutral cables are available in the same range of sizes and number of outlets as the insulated HYCRAB™. By using reducing adapters, the HYCRAB™ can accommodate service wires as small as #6, in addition to the 4/0 or 500 kcmil cable sizes for which these connectors are ordinarily used.

Type YM Insulated HYCRAB™

A compact insulated crab joint for connecting underground cables at junction points. Two outlets, one on either side of the HYCRAB™ body, are ready for immediate use. All other outlets are sealed with vulcanized rubber plugs which are easily removed when future installations are made. This unit eliminates bulky, difficult crotch taping. By using Reducing Adapters (Type Y-R), the HYCRAB™ can be installed on cable sizes from #6 to 500 kcmil (e.g.: use Y3428R to install 4/0 into YM4-34).

HYCRAB™ Connector Type ZNM

HYCRAB™ Connector, Type ZNM for Joining Bare Neutral Cables

A compact uninsulated multiple connector for joining bare neutral underground cables. For insulated crab joints, see HYCRAB™, Type YM. Reducing adapters (Type Y-R) permit the HYCRAB™ products listed below to take a full range of cable sizes from #6 to 500 kcmil. For proper installation see table below.

NOTES:

* Bare HYCRAB™ can be furnished to accommodate both 4/0 and 500 kcmil cables.

Network Protection General Information

Network Protection

The primary purpose of network protection is the controlled interruption of fault currents before damage occurs to cable insulations and associated equipment, and the elimination of unnecessary service interruptions. The limiter and fuses for network protection are closely associated with the connectors and are equally vital to the safe, continuous operation of an underground system.

BURNDY has developed protective devices that have played a major role in reducing underground system outages and the subsequent expenses incurred in the loss of service and replacement of damaged cables. A basic objective has been the design of limiter-connector combinations that, in addition to protecting against the effects of fault currents, economize on both space and installation costs.

Limiters are designed to protect underground secondary cable from damage by fault currents of two principal kinds: high energy arcing faults and sustained faults. The arcing fault, usually of shorter duration and lesser intensity, is more common. While this type of fault may sputter briefly and then clear, some may be sustained long enough to “roast” the insulation.

A sustained fault occurs when two conductors come solidly into contact and permit the flow of heavy short-circuit currents. Without suitable protection, these fault currents are heavy enough to damage cable insulation and often produce combustible fumes accompanied by fire and explosion.

Installed at each end of cable sections, limiters have time-current characteristics designed to avoid unnecessary outages. Network protector fuses, installed in the network protector on the load side of the breaker, provide back-up protection against failure of a network protector to open on a primary fault. Coordinated characteristics of limiters and fuses provide for fault currents to be interrupted before they can cause damage, but only under predetermined time-current conditions, and only in those parts of the system where interruption is necessary.

Limiters

Engineered to interrupt the circuit before cables carrying a fault current are usually damaged, limiters act to confine damage to the section of cable where the fault occurred. The limiters are designed to prevent unnecessary clearing and will “hang on” during:

1. Faults with wold clear without damaging cable insulation
2. Overloads from motor starting, load transfer because of primary fault, or temporary overload during fault conditions
3. Overloads from loss of secondary conductors caused by clearing of other limiters
4. Reverse current flow through the network protector on primary faults
5. Faults on other secondary cables

For proper proection BURNDY limiters are designed with time-current characteristics approximating the insulation damage curve of the cable with which they will be used. Figure 4 shows time-current characteristic curves for a range of standard (250 volt) limiters, superimposed on insulation damage curves for several cable sizes. Although the limiter curve crosses the insulation damage curves, in practice the limiters will blow before the insulation can deteriorate. The insulation damage characteristics represent three phases equally loaded in a duct. Since low-current faults seldom affect more than one phase at a time, the rate of heat generated in the conduit is much less than for a balanced 3-phase fault, and the time to reach the damage point is appreciably longer. Practical experience confirms that limiters provide protection during low-current, as well as high-current faults.

Construction

The limiter is essentially a compression-type electrical connector with its center section accurately formed to provide a fusible element. This fusible element is enclosed in a molded ceramic shell and the assembly encased in an insulated sleeve.

Interrupting capacities are as follows:

Standard Limiters: 30,000 amps at 250V

Replaceable-Link Limiters: 20,000 amps at 250V

The protection probably lies in the fact that the fault impedance reduces the actual fault current to a value considerably less than calculated.

Replaceable-Link Limiters

Replaceable-link limiters, which provide faster time-current characteristics (Figure 5), are used in smaller networks, on the fringes of larger networks, at points where radial feeders leave a network, and for fusing service cables. As its name implies, this limiter is also distinctive in that its fusible link is replaceable.

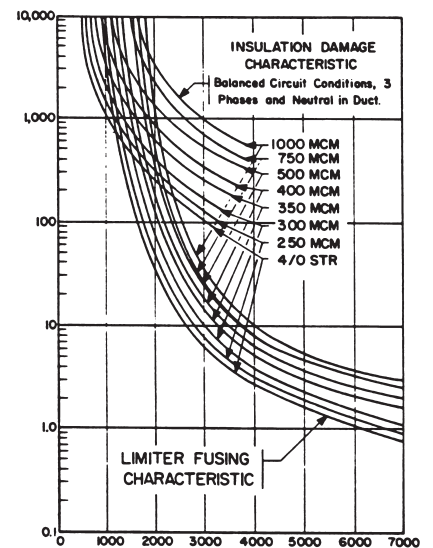

Figure 4: Current - Amperes Standard 250 Volt Limiters

Figure 5: Current in Amperes Replaceable-link Limiters

Network Protection General Information

Limiter Variations

The Limiter Lug provides a fusible connection between a cable and a flat surfaced terminal of a transformer or other apparatus. The Limiter Tap incorporates a Limiter Lug assembly, modified to terminate cable to a ring bus. This straight Limiter is made for installation in a single conductor cable. The Molimiter is a Limiter designed so that one end is crimped onto a cable and the other fits the clamping element of a MOLE™ outlet. The Limiter HYCRAB™ connector is essentially a HYCRAB™ with a fusible section in each of its outlets.

Network Protector Fuses

Type Y and Z Network Protector Fuses provide back-up protection in case the protector breaker fails to operate during a primary fault. The fuse time-current curves (Figure 7), are similar to those of the limiter, thus permitting correct fuse-limiter coordination for complete network protection.

Design and Construction

The fusible element for a Type Y or Type Z Fuse is a tin-plated copper bar with reduced section, encased in an arc-resistant molded ceramic enclosure. One-piece construction eliminates possibility of joint failure and assures maximum reliability.

Limiter-Fuse Coordination

To isolate a fault before it can cause extensive damage, and without interrupting service in other sections of the network, limiters and fuses must clear at the proper time and in proper sequence, depending on the fault's location in the primary or secondary system. When a primary fault occurs, the fuse should clear before any limiters blow. For a secondary fault, limiters should clear the fault before the network protector fuse opens. Failure of limiters and network protector fuses to function in proper sequence could cause cascading of other Fuses, or clearing of secondary faults by Fuses rather than limiters. Premature blowing of Limiters not in the faulted section could cause unnecessary service interruption in sections remote from the fault.

To assure the coordinated functioning of fuses and limiters throughout a system, proper rating must be selected. The four-step "Coordination Study" (Figure 8) used in a 4-parallel cable feed system from the protector to the first secondary junction is a typical example of how to select proper ratings.

1. Plot the damage characteristic curve of the cable insulation in the system. Curves for Class L620 (260° C or 500° F), appear in Figure 5.
2. Plot the time-current characteristic curve of the same limiter in Parallel secondary mains, assuming it carries 40% of total backfeed current. Allowing for the possibility of unequal current distribution of secondary mains, the "40% Cable Limiter Curve" provides a conservative basis for selection of network protector fuses.
3. Select a fuse with its time-current characteristics (Figure 7) lying between the limiter curves plotted in steps 2 and 3.

This procedure avoids the selection of fuses so light that they might overheat the network protector or clear unnecessarily, possibly cascading other fuses in the network; or so heavy that transformer secondaries might be damaged or limiters blow before the fuse. Proper limiter-fuse coordination, facilitated by the use of fuses and limiters that are precisely matched, assures effective protection without unnecessary interruption.

Figure 7: Amperes in Thousands

Figure 8: Current in Amperes

Limiter Assembly Types YFS-CR, YFS-CP

Limiter Assembly, Types YFS-CR, YFS-CP with Ceramic Shell and Rubber Sleeve for Insulated Cables

The Limiter combines the functions of fuse and connector. The fusible element which is an integral part of the connector will clear faults that are great enough to cause damage to the cable insulation. However it will not clear on minor overloads of short duration. Fusing characteristics of the limiter are shown in technical section. For HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

To specify a fast acting limiter in any configuration insert an "F" before the conductor number (e.g., YFSF34CR specifies a 1/2 thick limiter section).

Long Limiter Assembly Type YFS-CPL

Long Limiter Assembly, Type YFS-CPL with Ceramic Shell and Rubber Sleeve for Paper-Lead Cables

The Long Limiter performs the same functions as the Limiter shown, Types YFS-CR and YFS-CP. It differs in that it has extra long cable sockets which are preferred by some for use on paper insulated cable. The end seams are sealed to make the sockets oil tight. Fusing characteristics of the Limiter are shown in technical section. For proper HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

NOTES: To specify a fast acting limiter in any configuration insert an "F" before the conductor number (e.g., YFSF34CR specifies a 1/2 thick limiter section).

Limiter Types YFSR, YFSP

Limiter, Types YFSR, YFSP for Use with Limiter Assembly

The Limiter serves the double function of a fuse and a coupler. The fusible element is an integral part of the coupler and is closely and carefully sized to insure excellent performance. Fusing characteristics of the Limiter are shown in technical section. For proper HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

NOTES: To specify a fast acting limiter in any configuration insert an "F" before the conductor number (e.g., YFSF34CR specifies a 1/2 thick limiter section).

Long Limiter Type YFSP-L

Long Limiter, Type YFSP-L for Use with Long Limiter Assembly

The Long Limiter serves the same purpose as the Limiter shown above but has extra long oil tight cable sockets which may be preferred by some for use on paper insulated cables. Similarly designed to clear on overloads that will damage the insulation of the cable. Fusing characteristics of the Long Limiter are shown in technical section. For HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

Limiter Lug Assembly Types YFA-CR, YFA-CP

Limiter Lug Assembly, Types YFA-CR, YFA-CP with Ceramic Shell and Rubber Sleeve

The Limiter Lug combines the functions of terminal and fuse. The fusible element is an integral part of the connector and is so designed that it will clear overloads which are great enough to cause damage to the cable insulation. Unlike an ordinary fuse, however, it will not clear on minor overloads of short duration. Fusing characteristics of the Limiter Lugs are shown in the technical section. Component parts shown in the table below may be purchased separately. For proper HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

Long Limiter Lug Assembly Type YFA-CPL

Long Limiter Lug Assembly, Type YFA-CPL with Ceramic Shell and Rubber Sleeve for Paper Lead Cables

A Limiter Lug similar to Type YFA-CR or YFACP. In this case, however, we supply an extra long cable socket which is sometimes preferred for use on paper insulated cable. The end seams are sealed to make sockets oil tight. Fusing characteristics of the Limiter Lugs are shown in the technical section. For proper HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

Limiter Lug Types YFAR, YFAP

Limiter Lug, Types YFAR, YFAP for use with Limiter Lug Assembly

The Limiter Lug incorporates an accurately determined fusible section as an integral part with its terminal end. The fusible section is so selected that it will prevent the cable from roasting or damage from a short circuit, although it will not clear on minor overloads of short duration not harmful to cable insulation. For proper HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

Long Limiter Lug Type YFAP-L

Long Limiter Lug, Type YFAP-L for use with Limited Lug Assembly

Similar to Limiter Lug Types YFAR and YFAP, except that this type provides a long oil tight cable socket, preferred by some users of paper-insulated cables. Fusing characteristics shown in technical section. For HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

MOLIMITER™ Assembly Types YFM-CR, YFM-CP

MOLIMITER™ Assembly, Types YFM-CR, YFM-CP

With Ceramic Shell and Rubber Sleeve for Insulated Cables

The MOLIMITER™ is used for fusing underground cables at junction points. The unit is designed for use with the BURNDY® MOLE™ and provides Limiter protection for cables, which terminate at the MOLE™. The cable end is installed in the MOLIMITER™ cable socket (see Installation Information in table below) and then the MOLE™ end is installed in the MOLE™ outlet Socket and Nut assembly. Any MOLIMITER which has burned clear may be quickly replaced. For time current characteristics see the technical section.

For conductor sizes not listed call customer service.

Long MOLIMITER™ Assembly Type YFM-CPL

Long MOLIMITER™ Assembly, Type YFM-CPL with Ceramic Shell and Rubber Sleeve for Paper Lead Cables

The Long MOLIMITER™ differs from the standard MOLIMITER™ only in its extra long cable socket. This socket, with the end seam sealed oil tight, is preferred by some for use on paper insulated cables. Time-current characteristics are shown in the technical section. For proper HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

MOLIMITER™ Limiter Types YFMR, YFMP

MOLIMITER™ Limiter, Types YFMR, YFMP for Use with Long MOLIMITER™ Assembly

The MOLIMITER™ combines an accurately determined fusible section with both a MOLE™ Socket end and a cable socket. Designed to clear on overloads that would injure the cable insulation, the MOLIMITER™ may be easily and quickly replaced. For time current characteristics of MOLIMITER see the technical section. For proper HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

NOTES:

*Paper Insulated Cable - Oil Tight Cable Sockets.

① Y35P3 Indentor Adaptor required for Y34PR Indentor

② Catalog number PUADPI Adaptor is required to use "U" type dies in the 46 series tools

③ Catalog number PT6515 Adaptor is required to use "U" type dies in the 45 series tool

To specify a fast acting limiter in any configuration insert an "F" before the conductor number e.g. YFSF34CR specifies a 1/2 thick limiter section.

Limiter Tap Assembly, Type VYFT; Limiter Tee Tap, Type NYFT

Limiter Tap Assembly, Type VYFT for Insulated Cables

The Limiter Tap is suitable for making Limiter connections to a cable ring bus in a manhole or transformer vault. It can be installed on oil impregnated, paper insulated, or rubber insulated cable. Fusing characteristics of the Limiter are the same as Type YFA shown in the technical section. The rubber sleeve and insulating hood reduce taping to a minimum. Catalog Numbers shown include hoods. If no hood is required, eliminate one "C" from the Catalog Number. Replaceable Link Limiter Taps can be ordered. For proper HYPRESS™ installation, see table below.

Paper-Lead Cables: If a long cable socket is preferred for use on paper insulated cable add "L" to the catalog number (e.g., VYFT3428CCP becomes VYFT3428CCPL).

NOTE:

To specify a fast acting limiter in any configuration insert an "F" before the conductor number (e.g., YFSF34CR specifies a 1/2 thick limiter section).

Limiter Tee Tap, Type NYFT for Rubber or Paper Insulated Cables

The NYFT Limiter is similar to Type VYFT except the run conductor is clamped with a four bolt cap and the Limiter Tap is removable by means of a socket and nut assembly. The Limiter current characteristics are the same as Type YFA shown in the technical section.

Replaceable Link Limiter Type LYS

Replaceable Link Limiter, Type LYS with Ceramic Shell and Rubber Sleeve for Insulated Cables

The Replaceable Link Limiter incorporates the functions of both fuse and coupler. For use with rubber and paper-insulated cable, it is designed to facilitate rapid and inexpensive replacement of Limiter Links upon clearing. It also permits, if desired, the use of a Link rated for a lower ampere capacity than supplied with our standard Limiter. For proper HYPRESS™ installation, see table below.

Catalog Number	Cable Size	** (Max. Cable Dia. Over Insul. Inches) A	Number of Indents in Cable Socket	* Link Supplied		Installation Information

* Fuse link supplied is selected on the basis of a minimum blowing current of approximately twice the NEC rubber insulated cable rating. Refer to Time Current curves shown and specify if another size is desired.

** The standard end bushing supplied is for maximum cable insulation diameters as shown. Compact cable will require a bushing with a smaller inside diameter to accommodate the smaller insulation diameter of the cable. If other than standard bushing is required, contact customer service.

To specify a fast acting limiter in any configuration insert a "F" before the conductor number (e.g., YFSF34CR specifies a 1/2 thick limiter section).

Replaceable Link MOLIMITER™ Type LYM

Replaceable Link MOLIMITER™, Type LYM with Ceramic Shell and Rubber Sleeve for Insulated Cables

The Replaceable Link MOLIMITER™ is used to fuse underground cables at junction points with the BURNDY® MOLE™. The “Replaceable Link” feature permits the selection of one of several links. In addition, the replacement of links that have burned clear is both rapid and inexpensive. For use with both rubber and paper insulated cables. The MOLE™ end of the MOLIMITER™ is installed in the MOLE™ Socket and Nut Assembly, while the cable socket end is HYPRESS™ installed, see table below for proper installation.

Limiter Link Type LF

Limiter Link, Type LF for Use with All Replaceable Limiters

Made of pure copper, the Limiter Link is controlled dimensionally to close tolerances to maintain accurate fusing characteristics. Refer to Time-Current Characteristic curve shown below and specify rating desired. The Limiter Link is supplied enclosed in a shell with heatproof chamber to confine and break the arc created by fusing.

* For use with LYS and LYM.

Current in Amperes Time-Current Fusing Characteristics of Type LF Limiter Links

The nominal current ratings of these Limiter Links are approximately one-half the minimum currents required to clear the fuses. The general slope and shape of the curves are similar to those of the time-current curves of the Limiters. The Type LF Limiter Links are made of pure copper with dimensions carefully controlled in order to maintain accurate fusing characteristics.

Limiters Base, Type LYBASEH; Limiter Sleeve, Type LYS34P2

Limiters Base, Type LYBASEH for Use with All Replaceable Limiters

A heat resisting, high impact, molded phenolic base for mounting HYDENT™ Cable lugs or MOLIMITER™-lugs. The bases are supplied with bolts fitted in place with retaining rings, enabling the lugs to be easily assembled to BURNDY® Replaceable Limiter Links. They may be purchased separately for use with all Replaceable Limiters.

4 BOLTS

HYLUG™ Terminal Type LYS-P5

HYLUG™ Terminal, Type LYS-P5 for Use with All Replaceable Limiters

Fabricated of high copper alloy, this terminal has a sealed cable socket for use with paper insulated, oil-impregnated cables as well as rubber-insulated cables. Tin plated to retard corrosion and prevent discoloration. The HYLUG™ is for use with LYS and LYM.

T-Connectors, Cable Run - Cable Tap Type NYT

T-Connector, Type NYT Cable Run / Cable Tap

A "T" connector designed to provide a clamp type element on the run and a permanent HYPRESS™ connection on the tap. Recommended for use on ring buses or for applications where occasional disconnects from the run conductor are desired without disturbing the tap connection. Tin plated. For proper installation of tap cable, see table below.

High Capacity Limiter 200,000 Amperes at 600 Volts

High Capacity Limiter - 200,000 Amperes at 600 Volts

The BURNDY® High Capacity Limiter is designed to economically protect electrical distribution systems from the destructive effect of high energy faults. The increasing number of 600 volt secondary network installations for industrial and commercial applications demand a cable limiter that can safely interrupt 200,000 amperes (symmetrical available) and one that will also completely coordinate with the higher voltage network protector fuses.

Available fault currents as high as 200,000 amperes rms at 600 volts across the fusible elements have been interrupted during tests on the BURNDY® High Capacity Limiter. The power factor during these tests was less than 15%, thereby imposing the most difficult clearing conditions. No external disturbance is experienced upon clearing fault currents from the “float” value to 200,000 amperes. The quartz tiller absorbs the intense energy generated by interrupting the fault current. The quartz fuses into tubular fulgurites, with a high dielectric strength, and forms an insulating barrier between the melted link sections. This action prevents restrike of the internal arc. The rugged aluminum housing and cast epoxy end seals provide a vessel that completely contains the developed energy.

The carefully developed time-current characteristics and rigid manufacturing tolerances assure proper coordination with the network protector fuses and the insulation damage characteristics of 4/0, 250, 350, 500 kcmil and 750 cable.

The High Capacity Limiter is available in four variations to accommodate a variety of installation practices. The Type HYS cable sockets at both ends, which allow for indenting to the cable ends with a hydraulic BURNDY® HYPRESS™. The HYA has an off-set lug on one end which permits back-to-back mounting on bus bar. They HYA also allows cable to installation with no off-set.

For those installations where BURNDY® MOLE™ connections are used for manhole junctions or transformer vault buses, the Type HYM permits a replaceable connection of the limiter director to the MOLE™ outlet at one end and a compression cable connection at the other.

Modern electrical distribution systems require low cost protection to safeguard costly equipment and quickly isolate faults, so that the undamaged portions of the system may function normally. BURNDY® High Capacity Limiters assure positive, economical protection when installed in properly designed systems.

NOTE: Today's fault currents are growing. If you need higher fault current ratings, please contact the factory.

High Capacity Limiter Table for Selection

High Capacity Limiter 200,000 Amperes at 600 Volts

Notes:

1. For insulated version add suffix "-C" to Catalog Number (example: HYMS34C).
2. High Capacity Limiter. 200kA interrupting capacity at 600V AC.
3. Cable end utilize dies with 35, 46, 45, and 750 series tools (750 kcmil size units cannot be installed with the 35 Series tools).
4. For fast operating limiter use "F"; for slow or standard operating limiter use "S" before conductor number (example: HYMF34 or HYMS34) see Time-Current Characteristics.
5. For other conductor sizes, contact the factory.

Junction with Adapter; URD Al/Cu; URD Street Lighting Tap Al/Cu

For over 85 years, BURNDY has pioneered and produced economical, dependable connectors and protective devices for urban underground distribution systems. This extensive experience has been applied to the development of equipment for low cost underground distribution systems for light commercial and residential areas.

Increasing interest by home buyers and developers has created a need for URD components comparable in cost with those used in overhead systems.

Using connectors designed for other purposes, early URD installations were relatively expensive. Recognizing the need to reduce installation costs, BURNDY developed a line of connectors specifically for URD.

These products are shown in this section. They are the result of a continuing search for new materials and more efficient production methods to bring down cost to meet the requirements of low cost underground construction.

Type RDMD-2858D Stud MOLE™ Junction with Adapter

The RDMD-2858D Stud MOLE™ is identical to the insulated RDMD-28G except an adapter is supplied, allowing MOLE™ to be removed from transformer stud without disconnecting the individual services.

Catalog Number	Number of Outlets	Insulated
RDMD42858D	4	Yes

Type RDM-28 URD MOLE™ for Aluminum or Copper

Type RDM-28 MOLE™ is an economical, insulated, submersible service junction suitable for direct burial or for use in enclosures. Disconnectable joints allow additions of new services without disturbing previous installations. Taping is eliminated, heat-shrink or force-fit rubber sleeves insulate each joint. Rubber is used to insulate the MOLE™ body. Removable sealing covers are supplied on all outlets but two. REA listed Tap Kits, including HYLUG™, hardware and sleeve are ordered separately.

Catalog Number	Number of Outlets
RDM428	4
RDM628	6
RDM828	8

Types RA6UC-SL, RA6UCR-SL URD Street Lighting Tap Kit for Aluminum or Copper

URD tap kit for making street lighting taps from URD MOLE™ types RDM-28 and RDM-28T. Each kit accommodates 6 str. - 12 sol. Kits include connector, mounting hardware and insulating sleeve.

Catalog Number		Conductor
Heat Shrink	Force Fit	
RA6UCSL	RA6UCRSL	6 Str. - 12 Sol.

MOLE™ Tap Kits Types RYA-UC, RYA-AC; RYA-UCR, RYA-ACR

MOLE™ Tap Kits, Types RYA-UC, RYA-AC for Aluminum or Copper with Type RDM-28 URD MOLE™

The kit consists of Universal HYLUG™, mounting hardware and heat-shrink sleeve. The HYLUG™ is pre-filled with PENETROX™ joint compound and sealed. Installed with common installation tools, three die sets install a range of 4 str.- 350 kcmil. The heatshrink sleeve is lined with a mastic material, providing a positive seal. Installed with standard propane torch, or 500°F electric heat gun. Acetylene heat is too intense and is not recommended.

TYPES RYA-UC, RYA-AC

MOLE™ Tap Kits, Types RYA-UCR, RYA-ACR With Force Fit Rubber Sleeve

The kit consists of Universal HYLUG™, mounting hardware and pre-lubricated force fit rubber sleeve. The HYLUG™ is pre-filled with PENETROX™ joint compound and sealed. Installed with common installation tools, three die sets install a range of 4 str.- 350 kcmil. The rubber sleeve has internal sealing rings that provide a positive moisture seal by exerting circumferential force on cable and MOLE™ insulation. Pre-lubricating sleeve makes installation easier. REA listed. No trimming required.

* Overlap Crimps.

** Do not use EEI Die. (11A) to install 4/0 Sol. EC-0.

NOTE: Standard mounting hardware is 3/8" button head socket cap screw with captive conical washer.

For HEX HEAD bolt with captive conical washer add "HEX" suffix.

Example:

RYA4UCR-HEX. For HEX HEAD bolt and captive flat washer add suffix "HEX1".

For HEX HEAD bolt and non-captive flat washer add suffix "HEX2".

For HEX HEAD bolt and non-captive conical washer add suffix "HEX3".

For Stainless Steel HEX HEAD bolt add "HEX355" suffix.

URD Insulated Splice Kit Type YS-CG

URD Insulated Splice Kit, Type YS-CG for All Aluminum or Copper/Aluminum Combinations

Type YS-CG URD insulated splice kit consists of a standard YSU or YSD LINKIT™ and a heat-shrink sleeve. Used to splice URD secondary lines up to 600 volts. It is installed with common installation tools. Heat-shrink sleeve is installed with standard propane torch, or 500° F electric heat gun. Acetylene is not recommended.

HYREDUCER™ Splice Type YRB-U

HYREDUCER™ Splice, Type YRB-U for Aluminum to Aluminum and Aluminum to Copper

Type YRB-U splice is designed for use within underground systems. Aluminum splices are tin-plated and recommended for use on Aluminum-to-Aluminum and Aluminum-to-Copper cables. All splices have solid center stop for use with oil filled and non-oil filled cables. The Outside Diameter is held constant to minimize installation dies and connectors are prefilled with PENETROX™. Rated up to 35 kV.

URD Service Tap, Type K-P-C

URD Service Tap, Type K-P-C for Copper Conductors

These compact, wide-range-taking, multiple outlet connectors are made of high conductivity copper alloy. Spherical point Allen set screws provide even clamping forces on conductors up to 4/0 Str. Each connector is supplied with an insulating cover. The mechanical clamping elements allow individual cables to be disconnected without disturbing adjacent connections.

Catalog Number			Conductor	Number of Outlets	A	B	C
Complete Assembly	Connector Only	Cover Only

Utility Variable Shear Shearbolt Splice Type NSSBA

Variable Shear Shearbolt Splice, Type NSSBA ANSI C119.4

Type NSSBA Variable Shear Shearbolt Splice is specifically designed for underground applications on both copper and aluminum conductors. Eliminating the need for special tooling, installation only requires a 1-inch hex wrench. Tested per ANSI C119.4 Class A current cycle and minimum tension. The Variable Shear feature accommodates a large range of conductor sizes and will typically shear below the surface of the connector every time. The smooth finish allows medium voltage underground insulation kits to be installed without post filing.

The unique BURNDY design has an integrated removability feature which allows the connector to be uninstalled if necessary. The NSSBA Utility Variable Shear Shearbolt provides peace of mind that proper tension is achieved without the need of a torque wrench or other special tooling.

Features and Benefits

- No special tooling required, one-inch hex bolt design
- Variable shearing to accommodate conductor ranges
- Tin plated to reduce galvanic corrosion and oxide build up
- Pre-filled with PENETROX™ oxide inhibitor optimizing electrical performance
- Tested to ANSI C119.4 Class A Current Cycle
- Designed for use with 15kV, 28kV and 35kV medium voltage insulating kits
- Removable with 5/16 Allen Key

Fundamentals of BURNDY Substation Catalog Numbering System

Fundamentals of BURNDY Substation Catalog Numbering System:

Over the years, BURNDY has established an alpha-numeric catalog numbering system/structure to help describe a connector's specific use/application and type or features about the connector. This resource section should be used as a catalog numbering guideline. Over the years there have been many exceptions made to the BURNDY Substation Catalog Number System Structure.

The basic anatomy of a catalog number is dependent on the product family, as each family of connectors has different uses / applications and types / features. Because each product family has different uses and types, each product family's numbering scheme may have different attributes to help describe the connector. Below are a few examples of the basic alpha-numeric catalog numbering structure for six different product families.

Terminal / Tap

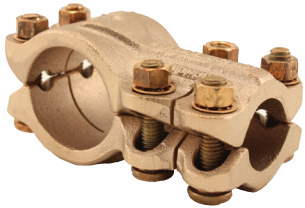

Product Family			
Family	Conductor	Pad	Suffix
NA	19	A4	

Catalog number structure **NA19A4**

T-Connector

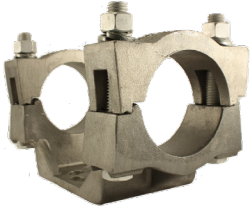

Product Family			
Family	Run	Tap	Suffix
NT	16	34	

Catalog number structure **NT1634**

Bus Support

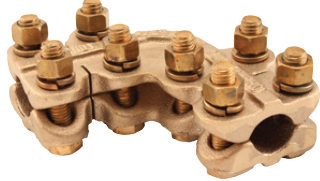

Product Family			
Family	Conductor	Bolt Circle	Suffix
UHG	20A	3	

Catalog number structure **UHG20A3**

Coupler

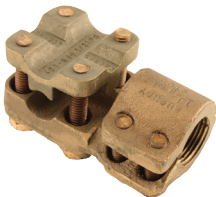

Product Family			
Family	Run	Tap	Suffix
NL	15	15	HC

Catalog number structure **NL1515HC**

Stud Connector

Product Family			
Family	Stud	Conductor	Suffix
NDR	655	34	T12

Catalog number structure **NDR65534T12**

Spacer

Product Family			
Family	Conductor	Spacing	Suffix
CP	40A	L4	

Catalog number structure **CP40AL4**

BURNDY Catalog Numbering Alpha Character Designations

BURNDY Catalog Numbering Alpha Character Designations:

Having a fundamental understanding of the alpha character designations is important when trying to interpret the product family, which typically identifies the connector's "use" and "type". Because some alpha characters are used more than once to represent different meanings or as a place holders for product differentiation, it is important that this section be used as a guideline. Some alpha characters have two meanings, they can represent a connector's "use" or "type". A "use" designation (white background) would indicate the application the connector would be used in. A "type" designation (blue background) would indicate features about the connector to help describe the connector's function. Some catalog numbers have both "use" and "type" letters combined.

Terminal A	Tap B	Center Pad C	Stud Module D	Inline Coupler E	Flat Bar F
Grounding Stud G	Bus Support H	Heavy Duty H	Cable Expansion K	Elbow L	Body & Cap N
Ring shape (for Bus Sup.) O	Coupler P	Range Taking R	Streamlined S	Sliding Expansion S	T-Connector T
U-Shape U	V-Bolt (Clamping Element) V	Vertical Bus Sup. V	Weldment (Compression) W	Expansion X	Compression Y

Catalog Number Conductor Identification

Catalog Number Conductor Identification:

Non-Range Taking Connectors:

Typically, following the product family is the conductor size. Depending on the connector family, some connectors accommodate more than one conductor and may list two conductor sizes in the catalog number.

Range Taking Connectors:

Many substation connectors have range taking features. Range taking features allow a connector to accommodate various sizes of conductors. When a connector has a range taking feature, the catalog number will identify the largest conductor that the connector can accommodate.

Examples:

NT1514 (Non-Range Taking)

N = Cap & Body

T = T-Connector

15 = 1.00" IPS

14 = 3/4" IPS

VV3A4044N (Range Taking)

VV3 = V-Bolt (accommodating 3 conductors)

A = Terminal

40 = 800 kcmil*

44N = 4" pad with 4 hole NEMA drilling

*Range is 500 - 800 kcmil

NAS29N (Range Taking)

N = Cap & Body

A = Terminal

S = Streamline

29 = 250 kcmil*

2N = 2 hole NEMA pad

*Range is 6 AWG - 250 kcmil

NVTT1846 (Range Taking)

N = Cap & Body

V = V-Bolt

TT = T-Connector (2 "T" for 2 V-Bolts)

18 = 2.00" IPS (Non-Range Taking)

46 = 1000 kcmil* (Range Taking)

*Range is 1000 - 1500 kcmil

BURNDY offers Substation connectors that can accommodate aluminum or copper pipe tubing and aluminum or copper cable and in some cases both pipe and cable conductor.

Connector Material Identification

Connector Material Identification:

Following the conductor size in the catalog number is typically the material designation. When the conductor size is followed by the letter "A", this typically indicates that the connector is made from aluminum. When the conductor is not followed by the letter "A", this indicates that the connector is made of copper or bronze material. Note that in some cases the "A" is not used in the catalog number for aluminum. BURNDY offers Substation connectors that can accommodate aluminum or copper pipe tubing and aluminum or copper cable.

Examples:

NA194N - Copper Terminal

N = Cap & Body

A = Terminal

19 = 2.50" IPS

4N = 4 hole NEMA pad

NA19A4N - Aluminum Terminal

N = Cap & Body

A = Terminal

19 = 2.50" IPS

A = Aluminum

4N = 4 hole NEMA pad

NS1414HC - Copper Coupler

N = Cap & Body

S = Streamline

14 = 3/4" IPS

14 = 3/4" IPS

HC = Hex Captured Hardware

NS14A14A - Aluminum Coupler

N = Cap & Body

S = Streamline

14 = 3/4" IPS

A = Aluminum

14 = 3/4" IPS

A = Aluminum

Terminal Pad Configurations and Catalog Number Designations

Terminal Pad Configurations & Catalog Number Designations:

Typically, at the very end of the catalog number is the pad configuration, unless there is a suffix. Terminal pads also have alpha-numeric designations to describe the pad configuration. The standalone or first number describes the number of holes and the second number describes the terminal pad width. The "N" following the number(s) indicates that the pad is a NEMA drilled pad. NEMA is a standard that defines the hole diameters and hole spacing. The table shows the most common terminal pad configurations and the catalog numbering identification alpha-numeric scheme.

Pad description block (regular)	Pad description block (FDs)	Figure	Holes configuration	C - Pad width
2N	B	1	2 holes NEMA	-
4N	-	2	4 holes NEMA	-
34N	C	2	4 holes NEMA	3"
44N	D	3	4 holes NEMA	4"
6N	-	4	6 holes NEMA	-
56N	E	4	6 holes NEMA	5"
66N	F	5	6 holes NEMA	6"

Catalog Number Suffixes Plating, Hardware, Etc.

Catalog Number Suffixes:

Many catalog numbers have a suffix to provide additional information. The suffix could identify plating, hardware, operating voltages for streamlined connectors, etc. Below are tables listing the most common suffixes.

Plating Suffixes:

This table lists the most common plating suffixes found in the BURNDY Substation connector line.

Example: NAS292N vs. NAS292NTN (Tin plated version of the copper connector)

-TN	Electro tin plating
-BRTN	Bright electro tin plating
-W	Heavy duty electro tin plating (incl. hardware)
-SV	Silver plating
-NK	Nickel plating
-Q	Pad is finished on both sides (used in conjunction with other plating suffix)

Hardware Suffixes:

This table lists the most common hardware suffixes found in the BURNDY Substation connector offering. A catalog number with no hardware suffix will include the standard hardware for both copper and aluminum connectors.

Example: NNE14A34A vs. NNE14A34ASS (Coupler with Stainless Steel hardware)

-GS	Galvanized Steel hardware
-SS	Stainless Steel hardware
-BW	Belleville Washer
-CH	Antistatic Chatter Spring
-HC	Hex Captured hardware

Operating Voltage for Streamlined Connector Suffixes:

This table lists the most common operating voltage suffixes found in the BURNDY Substation offering.

Example: SNNE86A445A vs. SNNE86A445AS3 (S3 designates the terminal is rated for 345kV)

-S3	345kV rating
-K	cable versions for expansion items, 345kV
-S7	765V rating

G# and CG# Suffixes:

G# and CG# suffixes are used when a customer requests a connector that is similar to a product in the standard product offering, but deviates to be a standalone product within a particular family. To name these “special” connectors, BURNDY will add a G# or CG# suffix.

Example: NNE14A34AG1 or NNE14A34ACG1

Stud Connector Catalog Numbering

Stud Connector Catalog Numbering:

Stud connectors have a different catalog numbering system in comparison to the other product families previous mentioned.

Examples:

Family	Stud Diameter	Pad Size	Pad thickness (in 1/16 of an inch)	Threads per inch of the stud (if different than 12)
FD	70	D	12	T14
Stud	3" Stud	4"x4" NEMA pad	12/16 = 3/4" thick tongue	14 threads per inch

FD70D12T14

- F = Flat bar
- D = Stud module
- 70 = 3" Stud size
- D = Pad size per Pad Description block
- 12 = Tongue thickness (12/16" = 3/4" thick)
- T14 = 14 Threads per inch

Family	Stud Diameter	Conductor	Threads per inch of the stud (if different than 12)
NDR	63	28	T13
Stud	1/2" Stud	4/0	13 threads per inch

NDR6328T13

- N = Body & Cap
- D = Stud module
- R = Range taking
- 63 = 1/2" Stud size
- 28 = 4/0 (Range 6 AWG - 4/0)
- T13 = 13 Threads per inch

Transformer Tap Adapters

Transformer Tap Adapters, Type FCB for Copper and Aluminum Tap to Pad

Material: Copper

Cast in one piece from copper alloy. Transformer tap adapter designed to accommodate from 1 to 6 NEMA drilled copper or aluminum terminal taps from a single secondary transformer outlet. Tin-plated. Order mounting hardware and tap terminals separately.

Notes :

Plated versions: add the required suffix to the catalog number. -TN for regular tin plating

Please contact factory for other sizes, combinations and availability

NOTE: All pads are NEMA drilled.

Tap Adapters, Type E-C-G for Copper Cable to Tap

Material: Copper Alloy

Multi-tap, range-taking cast copper alloy connector designed to take 2, 3 or 4 conductors from a single secondary transformer outlet.

Notes :

Plated versions: add the required suffix to the catalog number. -TN for regular tin plating

Please contact factory for other sizes, combinations and availability

Bolted Terminals, Copper Pipe or Cable to Pad

Bolted Terminals, Type NBXR for Copper Pipe or Cable to Pad

Material: Copper Alloy

Hardware: DURIMUM™ Silicon Bronze

One of the most versatile products available. Can be used in Terminal or Tap configuration with a large variety of cable and pipes.

Notes :

Plated versions: add the required suffix to the catalog number. -TN for regular tin plating

Please contact factory for other sizes, combinations and availability

Catalog Number	Fig. #	Stranded Copper Cable	Copper Pipe (Std or EH)	B	T	L	C	J Dia.

NBXR15CG1	2					6.25	3.00	

Bolted Terminals, Copper Cable to Pad

Bolted Terminals, Type NAS for Copper Cable to Pad

Material: Copper Alloy

Hardware: DURIMUM™ Silicon Bronze

High copper alloy reversible cap terminal for joining a wide range of cable to pads. Tongue is side formed to provide adequate clearance and terminal is designed for one-wrench installation.

Notes :

Plated versions: add the required suffix to the catalog number. -TN for regular tin plating.

Please contact factory for other sizes, combinations and availability.

See NAH family for heavy duty versions.

Bolted Terminals, Copper Tube to Pad

Bolted Terminals, Type NA for Copper Tube to Pad

Material: Copper Alloy

Hardware: DURIMUM™ Silicon Bronze

High copper alloy terminal for joining copper tube to a flat pad. Letter "N" on end of catalog number indicates pad drilled to NEMA standards. One-wrench installation.

Notes :

Plated versions: add the required suffix to the catalog number. -TN for regular tin plating.

Please contact factory for other sizes, combinations and availability.

VARILUG™ Terminals, Copper Cable to Pad

VARILUG™ Terminals, Type VVA for Copper Cable to Pad

Material: Bronze Alloy

Hardware: DURIMUM™ Silicon Bronze

High copper alloy terminal for joining a wide range of cable to equipment pads or bar. Particularly suitable for use on extra flexible cable. One-wrench installation.

Notes :

Plated versions: add the required suffix to the catalog number. -TN for regular tin plating

VARILUG™ Terminals, Two Copper Cables to Pad

VARILUG™ Terminals, Type VV2A Two Copper Cables to Pad

Material: Copper Alloy

Hardware: DURIMUM™ Silicon Bronze

Twin V elements to secure joint against vibration and flexing. Particularly recommended for use on extra flexible cables. One-wrench installation.

Notes :

Plated versions: add the required suffix to the catalog number.
-TN for regular tin plating

Please contact factory for other sizes, combinations and availability

VARILUG™ Terminals, Three Copper Cables to Pad

VARILUG™ Terminal, Type VV3A Three Copper Cables to Pad

Material: Copper Alloy

Hardware: DURIMUM™ Silicon Bronze

Type VV3A has three V elements to secure joint against vibration and flexing. Particularly recommended for use on extra flexible cables. One-wrench installation.

Notes :

Plated versions: add the required suffix to the catalog number. -TN for regular tin plating

Please contact factory for other sizes, combinations and availability

Items with -90 and -45 have oriented pad, respectively 90° and 45°

Aluminum Terminals, Cable to Pad

Aluminum Terminals, Type NAR for Cable to Pad

Material: Aluminum Alloy

Hardware: Aluminum

Aluminum alloy bolted type terminal for joining aluminum cable to copper or aluminum pads. Drilling in pad conforms to NEMA Standards. PENETROX™ joint compound recommended on contact surfaces.

Notes :

Properly proportioned to minimize conductor corrosion due to galvanic action. When properly used, this item does not require use of bimetallic plates; Please contact BURNDY Technical Support for recommendations

PENETROX™ A joint compound is recommended on contact surfaces

Please contact factory for other sizes, combinations, and availability

Copper Bolted Couplers, Copper Straight Tube to Tube

Copper Bolted Couplers, Type NS for Copper Straight Tube to Tube

Material: Copper Alloy

Hardware: DURIMUM™ Silicon Bronze

High copper alloy coupler for joining equal sizes of tube end to end. Slots between bolts provide independent high pressure areas of contact. One-wrench installation.

Notes :

Plated versions: add the required suffix to the catalog number. -TN for regular tin plating; -W for extra thick tin plating (including hardware)

Items with -HC suffix have hex head bolts; items without the suffix can be either hex head or oval shank head; both head styles are one wrench installation and offer the same clamping force and functionalities

Please contact factory for sizes, combinations and availability

Aluminum T-Connectors, Al and Cu Tube to Tube

Aluminum T-Connectors, Type NNT for Aluminum and Copper Tube to Tube

Material: Aluminum Alloy

Hardware: Aluminum

Aluminum alloy T-Connector for tubing run and tap. Properly proportioned to permit use on copper-aluminum conductor combinations. Captured hex head bolts permit one-wrench installation. PENETROX™ joint compound recommended on contact surfaces.

Notes :

PENETROX™ A joint compound is recommended on contact surfaces

Please contact factory for other sizes, combinations and availability

One-wrench installation

Copper Bus Supports, Supporting Copper Tube to Base

Copper Bus Supports, Type UH for Supporting Copper Tube to Base

Material: Copper Alloy

Hardware: DURIMUM™ Silicon Bronze

High copper alloy bus support for mounting tube on a post or pedestal type insulator. Single bolt allows rotation to any angle. Rotate cap 180° for slip or rigid fit. One wrench installation. Supplied with hardware for mounting to cap of insulator. Specify base mounting hardware, if required, by adding suffix “B” to catalog number.

Notes :

One wrench installation

Specify base mounting hardware, if required, by adding suffix “-B” to catalog number

Aluminum Bus Supports, Fixed or Rigid Pipe to Base

Aluminum Bus Support, Type UHG for Fixed or Rigid Pipe to Base

Material: Aluminum Alloy

Hardware: Aluminum

Aluminum alloy bus support for mounting tube on post or pedestal insulators. Properly proportioned to minimize conductor corrosion due to galvanic action. Caps are reversible for FIX or RIGID fit. One-wrench installation. Supplied with hardware for mounting to cap of insulator.

Notes :

PENETROX™ A joint compound is recommended on contact surfaces

Copper Stud Connectors, Copper Stud to Cable, Tube, Flat Bar

Copper Stud Connectors, Type NDR for Copper Stud to Cable, Tube, Flat Bar

Material: Copper Alloy

Hardware: DURIUM™ Silicon Bronze

High copper alloy reversible and rotatable cap stud connector joins cable, tube and flat bar in-line or at right angles to equipment studs. Accommodates a wide range of cables or tubes. One-wrench installation.

Notes :

Plated versions: add the required suffix to the catalog number. -TN for regular tin plating

Please contact factory for other sizes, combinations and availability

Stud Connectors, Copper Stud to Pad

Stud Connectors, Type FD for Copper Stud to Pad

Material: Copper Alloy

Hardware: DURIIUM™ Silicon Bronze

High copper alloy stud connector allows bolting cable and tubing terminals to equipment studs. Hex head captured bolts provide one-wrench installation. One pad contact surface is on centerline of stud. Pad is finished on both sides. All pads are four hole NEMA drilled.

Notes :

Plated versions: add the required suffix to the catalog number.
-TN for regular tin plating

Pad is finished on both sides

Amperage rating given is for indoor conditions

Please contact factory for other sizes, combinations and availability

One-wrench installation

Stud Connectors, Stud to 3 Cables - Flag

Copper Stud Connectors, Type VV3D-R for Copper Stud to Three Cables - Flag

Material: Copper Alloy

Hardware: DURIUM™ Silicon Bronze

High copper alloy stud connector allows bolting (3) cables to equipment studs. The cables have a flag position to equipment stud axis.

Notes :

Plated versions: add the required suffix to the catalog number. -TN for regular tin plating

Please contact factory for other sizes, combinations and availability

One-wrench installation.

V-bolt clamping element is particularly appropriate for flexible cables

Aluminum Stud Connectors, Stud to Pad

Aluminum Stud Connectors, Type SFD for Stud to Pad

Material: Aluminum Alloy

Hardware: Aluminum

Aluminum alloy stud connector for equipment bushing to conductor terminals. One wrench installation. Unless otherwise mentioned at the item level, this design embeds principles for self-shielding up to 550kV.

Notes :

Properly proportioned to minimize conductor corrosion due to galvanic action. When properly used, this item does not require use of bimetallic plates. Please ask BURNDY® Technical Support for recommendations

PENETROX™ A joint compound is recommended on contact surfaces

Please contact factory for other sizes, combinations and availability

Use shielding caps for high voltage applications (STS family). Shielding caps may be purchased separately

Pad is finished on both sides

Aluminum Spacers, Two Cables, Rigid Spacer

Aluminum Spacer, Type CPR-A for Two Cables Rigid Spacer

Material: Aluminum Alloy

Hardware: Aluminum

Rigid spacer for large range of cables. Particularly appropriate design for short spacing (up to 6" or 8").

Notes :

PENETROX™ A joint compound is recommended on contact surfaces

Please contact factory for other sizes, combinations and availability

One-wrench installation

Catalog Number	Aluminum Stranded	B	J Dia.	U

Bar Clamps, Copper Bar to Bar

Bar Clamps, Type HFBW for Copper Bar to Bar

Material: Copper Alloy

The clamp assembly eliminates the need for drilling the flat bar and may be used in either indoor and outdoor applications. The open web design provides a uniform clamping pressure while minimizing the weight of the connector.

Notes :
Please contact factory for other sizes, combinations and availability.

Bar Clamp Tap Pad Adapters, Type HFB-N for Copper Bar to Pad

Material: Copper

High conductivity copper, tap pad adapter provides a NEMA drilled contact pad when assembled to the HFB-P1 clamps (sold separately). Tap connections can be made from copper bus bar(s) without drilling, by bolting standard mechanical or compression terminal pads directly to the pre-drilled tap pad adapter.

Notes :

HFB-N items are only the flat drilled copper adapter pad, the HFB-P1 clamps and hardware are sold separately

Please contact factory for other sizes, combinations and availability

Introduction and Design Criteria

EHV Substation Connectors Introduction

Connectors for use in EHV Substations must meet essentially the same electrical and mechanical requirements as those for other power connectors. However, operations at extra high voltages imposes an important additional requirement. They must not produce corona discharges that interfere with radio reception and cause energy loss.

Corona forms when the voltage gradient at the surface of a conducting material exceeds a critical value and ionizes the surrounding air. For conductors, the four basic factors that determine surface voltage gradient are distance from ground, conductor diameter, phase spacing and voltage.

In A.C. circuits, there are two basic kinds of corona. Negative corona forms during the negative half cycle, and positive corona during the positive half cycle. Negative corona generally appears as a glow on conventional conductors at about 20 kV rms/cm. Its amplitude is relatively low and cause no significant radio interference. Positive corona appears as a plume at above 30 kV rms/cm. Its amplitude is about 50 times higher than that for negative corona and is the major cause of radio interference.

BURNDY® EHV connectors are designed so that under fair weather operation conditions the voltage gradient at the connector surface will be at a level that will not cause corona and the resultant radio interference (RIV).

BURNDY® Design Criteria

Cable Connectors

For reasons of economy, EHV systems using stranded conductor are generally designed to operate at voltage gradients close to the negative corona onset level. It is essential, therefore, that connectors provide corona-free performance superior to that of the cable. So our design criterion calls for the voltage which corona extinguishes from the connector to be higher than the voltage at which it extinguishes from the cable. This criterion is met by eliminating all protrusions and by providing smooth contours on all surfaces. On compression elements, the ends are especially critical. Carefully designed tapers are provided to keep the voltage gradient at a level lower than that on the conductor. Of course, it is still necessary during installation to smooth crimped elements.

On accessories, like spacers for bundled lines, the critical areas are those at the edges of the bundle. The bundle itself generally shields those parts that fall within it. Many protrusions that would cause corona on a single conductor line are quiet when they fall within the shielding influence of a bundle. However, those parts that fall at the edges are carefully finished at the factory to assure corona-free operation.

Tubular Bus Connectors

Station designers choose tubular bus sizes on the basis of mechanical rather than electrical requirements. For instance, stations that only need 4" IPS to meet electrical and corona requirements often have 6" IPS as main buses. The resultant voltage gradient on these buses is very low, perhaps only 10 kV rms/cm, well below the corona onset level.

It is impractical therefore, to require that connectors operate quieter than the bus regardless of the voltage. Under some circumstances, it might be impossible to meet such criteria. In most cases, it would be prohibitively expensive to do so.

Of course, theoretically optimum connectors could be designed for each application, based on the design voltage gradient for individual stations. However, in most cases even differences as great as that between 345 and 500 kV don't have a meaningful impact on connector costs. So, from a practical point of view, it is feasible to design most connectors for 500 kV operation. This makes it more convenient for the station designers to select and order connectors.

Bus connectors are designed to provide corona-free performance under conditions of actual operation. This is done by calculating the voltage gradient on the surface of the bus at 500 kV, using the phase spacing and ground distance typical for this voltage. Connectors are then designed to operate corona free when the voltage gradient on the bus is 10% above this value.

The exceptions to this rule are the flexible expansion connectors. Those designed for 345 kV are self-shielding. Those for 500 kV have separate shielding rings. Experimental work on self-shielding 500 kV expansion connectors indicates that the margin of safety is too small to justify recommending them for this voltage.

Controlling Corona

Since corona is caused when the voltage gradient at the surface of a conducting material reaches a level that causes the surrounding air to break down, then obviously, the way to prevent corona is to keep the gradient below this critical level.

From this point of view the connector designer, this can be accomplished in three ways:

1. By providing generous radii on all outside surfaces to keep the voltage stresses to a minimum.
2. By providing shielding rings.
3. By placing the connector within the shielding influences of some part of the bus structure.

Since it is impossible for the connector designer to know the exact configuration of every bus system where the connectors might be used, the third approach is not practical. So, for the purposes of developing a standard line, we concentrate on the first two.

Whenever possible, connectors are designed to be self-shielding. This approach leads to less costly and less obtrusive designs. BURNDY® EHV designs only use corona rings in complicated connector configurations. Examples of such applications are disconnectable equipment taps, expansion couplers and equipment terminals which often have configurations that preclude the use of self-shielding designs.

Design Criteria - Nomogram for Determining the Equivalent Height

Nomogram for Determining the Equivalent Height

HEIGHT (he) OF A THREE PHASE LINE

Nomogram for determining the equivalent height of a single conductor line having the same average voltage of gradient as the CENTER conductor of a horizontally spaced three phase line, with the same line to ground voltage and the same conductor size. All dimensions measured in the same units.

Design Criteria - Gradient Calibrator

The use of the laboratory is based on the fact that it is the surface voltage gradient that causes corona. Although most systems consist of 3 phase conductors and a ground plane, it is a rather simple matter to duplicate in the laboratory the conductor surface voltage gradient as it exists on any of these phase conductors with a single conductor and a ground plane.

The formulas and nomograms give this three phase to single phase equivalency. Because this conversion is possible, all EHV testing is done single phase; and there is no necessity for 3 phase testing with its high cost in terms of equipment and space.

Since voltage gradient is the significant factor, the single phase test does not have to be done at the full voltage of an operation system. By setting up the test closer to the ground plane, the operation voltage gradient can be obtained with a lower test voltage. There is a limit, however, below which the height cannot be lowered lest corona onset and flashover occur simultaneously. Generally, the minimum test height should be about 10 times the diameter of the test conductor.

Gradient Calibrator

Normally the conductor surface voltage gradient at the extinction of corona in the laboratory is calculated using the accompanying equations. However, for test setups involving unusual conductor configurations, the conductor gradient cannot be readily calculated. In these cases, a gradient calibrator may be used. This is a small sphere mounted on the conductor. It has previously been calibrated for each conductor size to establish the surface voltage gradient that starts positive corona on the sphere. With it tests can be duplicated in any number of laboratories. The applied voltages and ground distances could all be different. But the voltage gradient on the surface of the conductor when the corona occurs on the sphere will always be the same. The calibrator provides a convenient bench mark for measuring the corona performance of connectors.

In use, the sphere is mounted on the conductor in a connector test setup. The voltage is raised until there is a corona on the sphere. We already know from previous calibration what the voltage gradient on the surface of the conductor is at this point.

Design Criteria - Formula to Determine Voltage Gradient

Formula for Determining Voltage Gradient

The sphere is removed and the voltage raised until there is a corona on the connector. Since the voltage gradient increases directly with increases in applied voltage, the gradient on the conductor at this point can be readily calculated.

It is important to note that the significant parameter is the voltage gradient on the surface of the conductor. It is not necessary to know the gradient on the connector. The conductor gradient in any given substation is controlled by its design parameters and may be calculated using the following formulae and nomograms. Once the gradient is known, it is unnecessary to have any other information to

design connectors. As long as connectors are corona-free at a conductor voltage gradient higher than that planned for the conductor, the connector will be corona-free under fair weather operating conditions.

There may be on occasion be unusual situations where choice of conductor, station geometry or clearance problems cause the need for connectors of special design. Where this is the case, BURNDY is prepared to design corona-free devices to operation under such conditions.

Formula for Determining the Voltage Gradient - Notations Used

h = line to ground distance (cm)
r = radius of the individual conductor (cm)
s = conductor spacing in the bundle (cm)
d - phase to phase spacing of the line (cm)
V = line to ground voltage (kV)
E_a = average gradient at the surface of the conductor (kV/cm)

E_m = maximum gradient on the surface of a single conductor **h_e** = equivalent single phase line to ground distance (cm)
r_e = equivalent single conductor radius (cm) of bundled conductors
n = number of conductors in the bundle

$$E_a = \frac{V}{r \cdot 1n \cdot \frac{2h}{r}} \quad E_m = \frac{h}{h - r} E_a$$

The maximum gradient (E_m) occurs on the side facing the ground plane.

The center conductor has a gradient about 5% higher than the outside conductors. The gradient on the center phase may be calculated using the formula for the single conductor.

Single phase system and substituting (h_e) from the following formula or attached nomograms for the height about the ground (h). For the center phase:

$$E_a = \frac{V}{r \cdot 1n \cdot \frac{2h}{r}} \quad h_e = \frac{hd}{\sqrt{(4h^2 + d^2)}}$$

It should be noted that h_e is somewhat smaller than $\frac{d}{2}$

$$E_a = \frac{V}{n \cdot r \cdot 1n \cdot \frac{2h}{r_e}} \quad \text{in which } r_e = r \left(\frac{s}{r} \right)^{\frac{n-1}{n}}$$

The value of " ℓ " is unity for 1-, 2-, and 3- conductor bundles and 1.12 for 4- conductor bundles.

Bundled Conductor - Three Phase

This case may be reduced to the single bundled conductor case by replacing h with h_e in the equation. The definition of h_e is identical to that given for the single conductor — three phase situation.

Design Criteria

Nomogram for finding the average conductor-surface voltage-gradient from line dimensions and voltage

Radio Interference Voltage

There is serious question as to whether measurement of RIV on connectors makes a meaningful contribution to quieter station operation.

Under test conditions, there is generally no significant indication on the radio noise meter until the onset of visible positive corona. At this point, the RIV reading goes into the hundreds of thousands of microvolts. The effect of this phenomenon is to provide a visibly discernable point at which RIV will be excessive. It eliminates the necessity to make, record and plot RIV measurements. Where there is no corona, there is no RIV. So our test criterion calling for no visible corona assures that there will be no radio interference generated by the connector under operating conditions.

Effect of Conductor Size on Testing

Conductor diameter has a significant effect on potential corona problems. The larger the diameter, the lower the surface voltage gradient for a given test voltage. This means that smaller conductors produce corona at lower voltages than larger ones.

Many connector designs have the same basic configuration for various conductor sizes. The only difference being the size of the attaching elements. This is particularly true for many of the welded type connectors. Where this is the case, it is often sufficient to test the connector only on the smallest conductor, since it yields the lowest corona extinction voltage. When there is any doubt, each size is tested.

Contamination

Much work has been done to establish the relationship between the corona onset voltage for contaminated as compared to clean hardware. Experiments with contaminated hardware in the BURNDY laboratory indicate that corona onset can be reduced to half of the voltage for clean hardware. However, the relationship varies with the kind of contamination, atmospheric condition and type of connector.

There have been a number of attempts to produce artificial contamination and atmospheres in laboratories. However, there is as yet no clearly established relationship between the corona performance of hardware contaminated in the laboratory. Until such a relationship is established, the only testing that provides comparable data is on clean hardware under fair weather conditions.

Conclusion

For more than 90 years, BURNDY has been designing connectors for the industry's most critical applications. Connectors for EHV are an outgrowth of this tradition. Whether your need is for catalog items or special designs, you can count on electrical, mechanical and corona-free performance, commensurate with the application.

TYPICAL CURVE

Welded Terminal Connector Type SWA-R-N

Welded Terminal Connector, Type SWA-R-N for Cable to Two or Four Hole Pad (offset terminal)

Material: Cast 365 Aluminum Alloy

EHV Rated: up to 550 kV (with shielding caps)

NOTES:

1. Dimensions in brackets [] are in millimeters.
2. **DOES NOT INCLUDE SHIELDING CAPS.** For EHV applications, shielding caps are required.
3. Shielding caps may be ordered separately or add suffix '-STS' to catalog number (example: SWA54R-44NSTS), includes one Type STS shielding cap.
4. One surface of pad finished. For finished pad on both sides add suffix '-Q' to the catalog number (example: SWA22A-44NQ).
5. For 45 or 90 degree angle add suffix '-45' or '-90' to catalog number (example: SWA54R-44N90).

Welded Terminal Connector Type SW2A

Welded Terminal Connector, Type SW2A for Two Cables to Two or Four Hole Pad (offset terminal)

Material: Aluminum Alloy

EHV Rated: up to 550 kV (with shielding caps)

Aluminum alloy weld type terminal for joining a range aluminum cables to pad. Drilling in pad confirms to NEMA standards. PENETROX™ joint compound recommended on pad contact surfaces.

NOTES:

1. Welding to be done by customer
2. Before welding scratch brush connector and conductor contact surface dry, then apply an oxide inhibitor.
3. Please contact factory for availability of sizes.

3. Shielding caps may be ordered separately or add suffix '-STS' to catalog number (example: SWA22A44NSTS), includes one Type STS shielding cap.
4. One surface of pad finished. For finished pad on both sides add suffix '-Q' to the catalog number (example: SWA22A-44NQ).
5. For 45 or 90 degree angle add suffix '-45' or '-90' to catalog number (example: SWA22A-44N90).
6. For six hole NEMA pad contact factory.

Welded Terminal Connector Type SWAC-A-N

Welded Terminal Connector, Type SWAC-A-N for Bus to Two or Four Hole Pad (center formed)

Material: Cast 365 Aluminum Alloy

EHV Rated: up to 550 kV (with shielding caps)

NOTES:

1. Dimensions in brackets [] are in millimeters.
2. Conductor smaller than 3 inch bus size not recommended for 550 kV
3. **DOES NOT INCLUDE SHIELDING CAPS.** For EHV applications, shielding caps are required.
4. Shielding caps may be ordered separately or add suffix '-STS' to catalog number (example: SWAC22A44NSTS), includes one Type STS shielding cap.
5. Pad surface finished on both sides of tongue.
6. For six hole NEMA pad contact factory.

Welded Expansion Bus Support Coupler Type SWXHP-A

Expansion Bus Support Coupler, Type SWXHP-A Bus to Bus Expansion Coupler to Insulator

Material: Cast 356 Aluminum Alloy

Corona Rings: Aluminum Alloy

Straps: Laminated Aluminum Strap

EHV Rated: Self-Shielding up to 550 kV

NOTES:

*Conforms to NEMA standards

1. Maximum movement per end equals one-half of total movement specified in table.
2. Dimensions in brackets [] are in millimeters.
3. Cap mounting (galvanized steel) hardware supplied as standard. For Base Mounting hardware add '-B' suffix to catalog number (example: SWXHP20A5B).
4. Conductors smaller than 3 inch bus size not recommended for 550 kV
5. Bus support couplers are supplied without bus end plugs. If end plugs are required, add suffix '-EP' to catalog number (example: SWXHP20A5EP)
6. Table 3" Movement Z Reference is based on 80 ft max. bus run (total) or 40 ft per end
7. Table 4" Movement Z Reference is based on 110 ft max. bus run (total) or 55 ft per end

Introduction

Installation Tools

The BURNDY® Engineered System features the most complete line of installation tools in the electrical industry. Available in various styles: battery actuated, mechanical, full cycle ratchet, self contained hydraulic, remote controlled hydraulic, along with power actuated pumps, hoses and accessories. BURNDY has the options to suit your needs. BURNDY tools are designed to integrate with the complete line of BURNDY connectors. Whether you are a small contractor working with #22 wire or a large utility working with 2500 kcmil conductor, there is a BURNDY tool available to do the job.

The benefits of the BURNDY® Engineered System are many, the most significant benefit being reliability. There is nothing more important to the electrical industry today than reliability.

It represents the one area that leads to economical installations that will endure for the life of the installation.

Tool Center

An important element of the BURNDY® Engineered System is the BURNDY Tool Center®, located at 150 Burndy Road, Littleton, NH 03561, (800-426-8720 or 603-444-6781).

This center provides advice and information on the operation, maintenance and repair of BURNDY tools. The repair center is staffed with specialized technicians who provide the best possible service for all BURNDY tools, pumps and accessories.

BURNDY designed and produced the first self contained hydraulic compression electrical connector installation tool in 1934. In our continuing efforts to provide the highest quality and highest value connection systems, we offer the current BURNDY tool policy.

Limited Warranty

The majority of BURNDY tools are warranted to be free of defects in materials and workmanship for a period of five (5) years from the date of shipment. See specific tool page for length of warranty. If inspection by a certified technician shows the trouble is caused by defective workmanship or material, BURNDY will repair or (at our option) replace the tool.

This Warranty does not apply where:

- Repairs or alterations have been made or attempted by others
- Repairs are required because of normal wear and tear
- The tool has been abused, misused or improperly maintained
- The use of any non-BURNDY product has resulted in damage to the tool

Repair Policy

All non-warranty repaired tools are completely reconditioned, at a maximum cost of 40% of a new tool, and receive a limited 1-year warranty.

If the decision is made not to repair, a handling charge of \$25.00 will be applied plus return freight costs.

Return Procedure

Prior to shipping a tool for repair, please contact the BURNDY Tool Center (1-800-426-8720; 603-444-6781) or an authorized repair center, to obtain a return authorization. An estimate of the repair costs will be sent for approval once the tool is received and inspected. No repair work will begin until written approval and PO are provided. All tools sent to the BURNDY Tool Center or an authorized repair center as a warranty claim must be accompanied by a proof of purchase such as a BURNDY invoice or invoice from any BURNDY distributor.

All tools must be shipped at the owner's expense, prepaid. BURNDY pays for the return freight, same surface freight as received. Airfreight returns will be returned same way, collect for non-warranty repair and prepaid for warranty repairs.

This warranty and repair policy supercedes all previous policies and is in effect as of April 1, 2024.

IMPORTANT NOTES:

Unless noted, product is not recommended for use on energized lines.

Notes for battery operated crimpers and cutters:

It is recommended that the battery be removed when changing jaws, changing dies or storing tool in case.

Weights reflect “without battery”, bare tool only.

PATRIOT SERIES with EP ★ ENHANCED POWER

BURNDY PATRIOT® Tools are designed to accept an expanded range of Makita 18V Lithium-Ion Batteries, identified by Makita Star Power. Multi-Ah Capability provides the user with more choices and flexibility than ever before. Accepts large capacity 6Ah to smaller capacity 2Ah batteries.

More **POWER**, More **FLEXIBILITY**, More **PRODUCTIVITY**

PLEASE NOTE:

Prior models, tools **WITHOUT** the EP Enhanced Power mark, will only accept Makita 18V **3.0Ah** batteries.

Do not force any other size battery into the tool. Damage caused by doing so will void the warranty.

T3 Technology Battery Crimper 11 Ton, Dieless C-Head

PATRIOT® 11 Ton with T3 Technology TRACK TRACE TRANSMIT

Tool Series: PAT444ST3

- **TRACK** crimp locations with onboard GPS - **BURNDY Exclusive!**
- **TRACE** individual crimps with comments, photos, and output force validation
- **TRANSMIT** via Bluetooth® technology and sync data to the cloud
- C-Head style for easy access and increased flexibility
- Dieless System with range taking capability
- 355° Head rotation
- Bright LED Worklight and Red/Green LED to validate output force
- Improved ergonomic design with more balance and better grip to reduce user fatigue

For Use On:

Copper #4 - 1000 kcmil Code & Flex

- Terminals:** YA-L, YA-2LN, YA, YA-2N, YA-L-2TC, YAB-4N, YA-L-TC, YA-2L, YA-4N, YAV, YAZ, YA-L-FX, YA-FXB, YAG
- Splices:** YS-L, YS, YS-T

Copper #4 - 1000 kcmil Code; #2 - 777 kcmil Flex

- HYPLUG™:** YE-P, YE-P-FX, YEV-P-FX

Aluminum #4 AWG - 1000 kcmil

- Terminals:** YA-A, YA-A-TN
- Splices:** YS-A
- HYPLUG™:** AYP, AYPO

ACSR, AAC, AAAC, ACAR #4 AWG - 556.5 kcmil

- Splices:** YDS-RL, YDS-RLNI

Cable Pulling Heads #6 AWG - 1000 kcmil copper & aluminum

- Type:** YCP-L

See Expanded Range details in Reference Section

T3 App and Web Interface

Models:

- PAT444ST3U03A2** with 3.0Ah Li-Ion batteries, hard case
PAT444ST3U05A2 with 5.0Ah Li-Ion batteries, hard case
- PAT444ST3U03A3** with 3.0Ah Li-Ion batteries, pro bag
PAT444ST3U05A3 with 5.0Ah Li-Ion batteries, pro bag

Specifications:

- Output Force:** 11 Tons
- Tool Weight:** 15.20 lbs (without battery)
- Size:** 16.90" x 14.95" x 3.25"
- Die Style:** Dieless
- Operating Voltage:** 18 V-DC Lithium-Ion (Accepts 2.0Ah-6.0Ah Makita)
- Recharge Time:** 30 minutes (3.0Ah)
45 minutes (5.0Ah)
- Warranty:** 5 year limited warranty
Lifetime warranty on INFINITY DRIVE®
3 year on batteries and charger
- Kits Include:** 2 batteries, charger, lanyard, and carrying case

Unique Crimp Embossment

Connections are UL Listed to UL 486A-486B on BURNDY® Copper and Aluminum Terminals and Splices

Complies with ANSI C119.4 on YDS-RL and YDS-RLNI Splices (ACSR, AAC, AAAC, ACAR)

Qualified for use on YCP-L Compression Pulling Heads

Accessories:

- BAT18VLI:** 3.0Ah Li-Ion battery
- BAT18V5AHLI:** 5.0Ah Li-Ion battery
- PATCHGRLLI:** 120V-AC charger
- PATCHGRLLDC:** 12/24V-DC charger
- PT208620:** Lanyard
- FORCEGAUGETI:** Force Test Gauge
- PATPROBAG:** Nylon Pro Bag

See Important Notes page at start of Tooling Section.

T3 Technology Battery Crimper 12 Ton, C-Head

PATRIOT® 12 Ton with T3 Technology TRACK TRACE TRANSMIT

Tool Series: PAT750T3

- **TRACK** crimp locations with onboard GPS - **BURNDY Exclusive!**
- **TRACE** individual crimps with comments, photos, and output force validation
- **TRANSMIT** via Bluetooth® technology and sync data to the cloud
- C-head with 1.65" jaw opening and 355° head rotation
- Used with U dies (sold separately)
- Patented T-Track alignment guide for HYGROUND® as well as other asymmetrical connectors
- Bright LED Worklight and Red/Green LED to validate output force
- Improved ergonomic design with more balance and better grip to reduce user fatigue

ACSR	#4 - 556.5 kcmil

HYGROUND® (Compression Grounding)

Copper	#8 - 500 kcmil
Ground Rods	1/2" - 1" diameter

Models:

PAT750T3U03A2
PAT750T3C03A2
PAT750T3U05A2
PAT750T3C05A2

with 3.0Ah Li-Ion batteries, hard case
with rubber covered head (3.0Ah), hard case
with 5.0Ah Li-Ion batteries, hard case
with rubber covered head (5.0Ah), hard case

PAT750T3U03A3
PAT750T3C03A3
PAT750T3U05A3
PAT750T3C05A3

with 3.0Ah Li-Ion batteries, pro bag
with rubber covered head (3.0Ah), pro bag
with 5.0Ah Li-Ion batteries, pro bag
with rubber covered head (5.0Ah), pro bag

Specifications:

Output Force:	12 Tons
Tool Weight:	14.85 lbs (without battery)
Size:	15.75" x 14.75" x 3.25"
Die Style:	U dies
Jaw Opening:	1.65"
Operating Voltage:	18 V-DC Lithium-Ion (Accepts 2.0Ah-6.0Ah Makita)
Recharge Time:	30 minutes (3.0Ah) 45 minutes (5.0Ah)
Warranty:	5 year limited warranty Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger
Kits Include:	2 batteries, charger, lanyard, and carrying case

Accessories:

BAT18VLI:	3.0Ah Li-Ion battery
BAT18V5AHLI:	5.0Ah Li-Ion battery
PATCHGRLL:	120V-AC charger
PATCHGRLLDC:	12/24V-DC charger
PT208620:	Lanyard
FORCEGAUGE1215:	Force Test Gauge
PATPROBAG:	Nylon Pro Bag

T3 Technology Battery Crimper 15 Ton, C-Head

PATRIOT® 15 Ton with T3 Technology TRACK TRACE TRANSMIT

Tool Series: PAT46T3 C-Head

- **TRACK** crimp locations with onboard GPS - **BURNDY Exclusive!**
- **TRACE** individual crimps with comments, photos, and output force validation
- **TRANSMIT** via Bluetooth® technology and sync data to the cloud
- C-head with 2.00" jaw opening and 355° head rotation
- Used with P dies; U dies with PUADP1 Adapter (sold separately)
- Bright LED Worklight and Red/Green LED to validate output force
- Improved ergonomic design with more balance and better grip to reduce user fatigue

For Use On:

Copper - #8 AWG Str. - 1500 kcmil: Code Cable, Navy Cable, Flexible, Extra Flexible, 1/2" - 1" Ground Rods

Terminals, grounding:
to 500 kcmil; YGA, YGHA, YGF

Terminals, uninsulated:
#8 - 1500 kcmil; YA, YA-2N, YA-L, YA-LB, YA-TC, YA-2LN, YAB-4N, YAV-L, YAV-RS, YA-TC-FX

Terminals, insulated:
#8 - 2/0 AWG; YAEV-L, YAEV-H, YAEV-RS, YAEV-RH

Splices:
#8 - 1500 kcmil; YS, YS-T, YS-L, YS-LB, YST, YSP-T, YGS, YGHS

Taps:
#14 - 1000 kcmil; YH, YCH
to 4/0 AWG; YC-C

Taps, grounding:
to 500 kcmil; YGHC-C, YGHP-C, YGHR-C

Aluminum - #8 AWG - 1250 kcmil Code Cables

Terminals: YA-A, AYP, AYP0

Splices: YS-A, YS-AT, YRB

Taps: YFD, YFN, YFO, YFR

T3 Technology Battery Crimper 15 Ton, Latch Head

PATRIOT® 15 Ton with T3 Technology TRACK TRACE TRANSMIT

Tool Series: PAT46T3 Latch Head

- **TRACK** crimp locations with onboard GPS - **BURNDY Exclusive!**
- **TRACE** individual crimps with comments, photos, and output force validation
- **TRANSMIT** via Bluetooth™ technology and sync data to the cloud
- Latch head with 2.00" ram travel and 355° head rotation
- Used with P dies; U dies with PUADP1 Adapter (sold separately)
- Bright LED Worklight and Red/Green LED to validate output force
- Improved ergonomic design with more balance and better grip to reduce user fatigue

For Use On:

Copper - #8 AWG Str. - 1500 kcmil: Code Cable, Navy Cable, Flexible, Extra Flexible, 1/2" - 1" Ground Rods

Terminals, grounding:
to 500 kcmil; YGA, YGHA, YGF

Terminals, uninsulated:
#8 - 1500 kcmil; YA, YA-2N, YA-L, YA-LB, YA-TC, YA-2LN, YAB-4N, YAV-L, YAV-RS, YA-TC-FX

Terminals, insulated:
#8 - 2/0 AWG; YAEV-L, YAEV-H, YAEV-RS, YAEV-RH

Splices:
#8 - 1500 kcmil; YS, YS-T, YS-L, YS-LB, YST, YSP-T, YGS, YGHS

Taps:

Battery Crimper 15 Ton, C-Head

PATRIOT® 15 Ton, C-Head Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PAT46LWS

- 2" jaw opening
- Used with P dies; U dies with PUADP1 adapter (sold separately)
- Light weight, scoop style C-head with 355° head rotation
- Overmolded, ergonomic handle
- Improved ergonomic balance
- Includes 2 batteries, charger, and case
- **EP Enhanced Power** – tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On:

Copper - #8 AWG Str. - 1500 kcmil

Code Cable, Navy Cable, Flexible, Extra Flexible
1/2" - 1" Ground Rods

Terminals, grounding:

to 500 kcmil; YGA, YGHA, YGF

Terminals, uninsulated:

#8 - 1500 kcmil; YA, YA-2N, YA-L, YA-LB, YA-TC, YA-2LN,
YAB-4N, YAV-L, YAV-RS, YA-TC-FX

Terminals, insulated:

#8 - 2/0 AWG; YAEV-L, YAEV-H, YAEV-RS, YAEV-RH

Splices:

#8 - 1500 kcmil; YS, YS-T, YS-L, YS-LB, YST, YSP-T,
YGS, YGHS

Taps:

#14 - 1000 kcmil; YH, YCHC
to 4/0 AWG; YC-C

Taps, grounding:

to 500 kcmil; YGHC-C, YGHP-C, YGHR-C

Aluminum - #8 AWG - 1250 kcmil

Code Cables

Terminals: YA-A, AYP, AYPO

Battery Crimper 12 Ton, C-Head

PATRIOT® 12 Ton, C-Head Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PAT750

- 1.65" jaw opening
- Used with U dies
- C-head with 355° head rotation
- Patented T-Track alignment guide for HYGROUND® as well as other asymmetrical connectors
- Includes 2 batteries, charger, and case
- **EP Enhanced Power** — tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On:

Tension Sleeves

Copper	#8 sol. - 500 kcmil
Aluminum	#8 sol. - 587.2 kcmil
ACSR	#4 - 556.5 kcmil

Taps

HYGROUND® (Compression Grounding)

Copper	#8 - 500 kcmil
Ground Rods	1/2" - 1" diameter

Models:

PAT750LI with 3.0Ah Li-Ion batteries, hard case
PAT750CLI with rubber covered head (3.0Ah), hard case
PAT750L5 with 5.0Ah Li-Ion batteries, hard case
PAT750CL5 with rubber covered head (5.0Ah), hard case

PAT750LIPB with 3.0Ah Li-Ion batteries, pro bag
PAT750CLIPB with rubber covered head (3.0Ah), pro bag
PAT750L5PB with 5.0Ah Li-Ion batteries, pro bag
PAT750CL5PB with rubber covered head (5.0Ah), pro bag

Specifications:

Output Force:	12 Tons
Tool Weight:	14.25 lbs (without battery)
Size:	15.75" x 13.50" x 3.50"
Die Style:	U dies
Jaw Opening:	1.65"
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes (3.0Ah) 45 minutes (5.0Ah)
Warranty:	5 year limited warranty Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger

Accessories:

BAT18VLI:	3.0Ah Li-Ion battery
BAT18V5AHLI:	5.0Ah Li-Ion battery
PATCHGRLI:	120V-AC charger
PATCHGRLIDC:	12/24V-DC charger
PT208620:	Lanyard
FORCEGAUGE1215:	Force Test Gauge

Wide U-dies (sold separately) can be used with long barrel terminals and splices saving time and labor!

See Important Notes page at start of Tooling Section.

Battery Crimper 11 Ton, C-Head, Dieless

PATRIOT® 11 Ton, C-Head, Dieless Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PAT444S

- C-Head style for easy access and increased flexibility
- Dieless System with range taking capability
- 355° Head rotation
- Ergonomically balanced
- Includes 2 batteries, charger, and case
- **EP Enhanced Power** — tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On:

Copper #4 - 1000 kcmil: Code & Flex

Terminals:

YA-L, YA-2LN, YA, YA-2N, YA-L-2TC, YAB-4N, YA-L-TC, YA-2L, YA-4N, YAV, YAZ, YA-L-FX, YA-FXB, YBA, YAG

Splices:

YS-L, YS, YS-T

Copper #4 - 1000 kcmil Code; #2 - 777 kcmil Flex

HYPLUG™:

YE-P, YE-P-FX, YEV-P-FX

Aluminum #4 AWG - 1000 kcmil

Terminals:

YA-A, YA-A-TN

Splices:

YS-A

HYPLUG™:

AYP, AYPO

ACSR, AAC, AAAC, ACAR #4 AWG - 556.5 kcmil

Splices:

YDS-RL, YDS-RLNI

Cable Pulling Heads: #6 AWG - 1000 kcmil (copper & aluminum)

YCP-L

See Expanded Range details in Reference Section

Unique 444S Crimp Embossment

Connections are UL Listed to UL 486A-486B on BURNDY® Copper and Aluminum Terminals and Splices

Complies with ANSI C119.4 on YDS-RL and YDS-RLNI Splices (ACSR, AAC, AAAC, ACAR)

Qualified for use on YCP-L Compression Pulling Heads

Models:

- PAT444SLI** with 3.0Ah Li-Ion batteries, hard case
- PAT444SL5** with 5.0Ah Li-Ion batteries, hard case
- PAT444SLIPB** with 3.0Ah Li-Ion batteries, pro bag
- PAT444SL5PB** with 5.0Ah Li-Ion batteries, pro bag

Specifications:

Output Force:	11 Tons
Tool Weight:	14.80 lbs (without battery)
Size:	16.9" x 13.7" x 3.2"
Die Style:	Dieless
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes (3.0Ah) 45 minutes (5.0Ah)
Warranty:	5 year limited warranty Lifetime warranty on INFINITY DRIVE® 3 years on batteries and charger

Accessories:

- BAT18VLI:** 3.0Ah Li-Ion battery
- BAT18V5AHLI:** 5.0Ah Li-Ion battery
- PATCHGRLI:** 120V-AC Makita charger
- PATCHGRLIDC:** 12/24V-DC Makita charger
- PT208620:** Lanyard
- FORCEGAUGE11:** Force Test Gauge

See Important Notes page at start of Tooling Section.

Battery Crimper 11 Ton, Latch Head, Dieless

PATRIOT® 11 Ton, Latch Head, Dieless Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PAT644

- Dieless system
- Range taking capabilities
- 355° head rotation
- Ergonomically balanced
- Includes 2 batteries, charger, and case
- **EP Enhanced Power** – tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On:

Copper #4 - 1000 kcmil Code; #2 - 777 kcmil Flex

Terminals: YA-L, YA-2LN, YA, YA-2N, YA-L-2TC, YAB-4N, YA-L-TC, YA-2L, YA-4N, YAV, YAZ, YA-L-FX, YA-FXB, YBA, YAG

Splices: YS-L, YS, YS-T

Battery Crimper 6 Ton, Latch Head, Dieless

PATRIOT® 4-POINT® 6 Ton, Latch Head, Dieless Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PAT81K2

- Dieless system with range taking capabilities
- Unique crimping guides for improved reliability and ease of use
- 360° head rotation
- Mechanical ram release
- Includes guides, 2 batteries, charger, and case
- **EP Enhanced Power** – tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

Shown with large connector guides (included)

For Use On:

Copper #8 - 1000 kcmil

Terminals: YA, YA-L
Splices: YS-L, YS, YS-T, Y-R

Copper Flex #8 - 777.7 kcmil Flex

Terminals: YA-FX, YAV, YA-L-FX
Splices: YS, YSV-FXB

Aluminum #8 - 750 kcmil

Terminals: YA-A, YA-A-TN
Splices: YS-A
HYPLUG™: AYP, AYPO

Battery Crimper 6 Ton, C-Head, Dieless

PATRIOT® 4-POINT® 6 Ton, C-Head, Dieless Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PAT4PC834

- Dieless system
- Range taking capabilities
- 360° head rotation
- Ergonomically balanced
- Includes 2 batteries, charger, and case
- **EP Enhanced Power** – tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On:

Copper

Terminals: YA, YA-L (#8-1000 kcmil)
Splices: YS-L, YS, YS-T, Y-R (#8-500 kcmil)

Copper Flex

Terminals: YA-FX, YAV, YA-L-FX (#8-777.7 Flex)
Splices: YS, YSV-FXB (#8-500 kcmil)

Aluminum

Terminals: YA-A, YA-A-TN (#8-750 kcmil)
Splices: YS-A (#8-350 kcmil)*
HYPLUG™: AYP, AYPO (#8-750 kcmil)

*1.06" barrel diameter maximum for splices due to jaw opening

See Expanded Range details in Reference Section

Models:

PAT4PC834LI	with 3.0Ah Li-Ion batteries, hard case
PAT4PC834L5	with 5.0Ah Li-Ion batteries, hard case
PAT4PC834LIPB	with 3.0Ah Li-Ion batteries, pro bag
PAT4PC834L5PB	with 5.0Ah Li-Ion batteries, pro bag

Specifications:

Output Force:	6 Tons
Tool Weight:	12.50 lbs (without battery)
Size:	15.62" x 13.20" x 3.25"
Die Style:	Dieless
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes (3.0Ah) 45 minutes (5.0Ah)
Warranty:	5 year limited warranty Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger

Accessories:

Battery Crimper 6 Ton, Latch Head

PATRIOT® 6 Ton, Latch Head Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PAT600

- Permanent functional D3 groove (no die needed)
- Uses W and X style dies
- 180° head rotation
- Enhanced clearance for tap connections
- Includes 2 batteries, charger, and case
- **EP Enhanced Power** — tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On:

Copper, Aluminum, ACSR, Steel, Copperweld, Alumoweld, 6201, 5005, Compressed, Compact, Stranded and Solid conductors

Copper #8 - 600 kcmil

Terminals: YA, YA-L
Splices: YS-L, YS, YS-T, Y-R

Copper Flex #8 - 350 kcmil Flex

Terminals: YA-FX, YAV, YA-L-FX
Splices: YS, YSV-FXB

Aluminum #8 - 350 kcmil

Terminals: YA-A, YA-A-TN
Splices: YS-A

WDC4500
(sold separately)

WDA8300
(sold separately)

* When used with UL Listed/CSA Certified YA, YS, YA-A, and YS-A series terminals and splices, connections are UL/CSA. Range taking dies also for use on the YAV and YSV series.

Models:

- PAT600LI** with 3.0Ah Li-Ion batteries, hard case
- PAT600L5** with 5.0Ah Li-Ion batteries, hard case
- PAT600LIPB** with 3.0Ah Li-Ion batteries, pro bag
- PAT600L5PB** with 5.0Ah Li-Ion batteries, pro bag

Specifications:

Output Force:	6 Tons
Tool Weight:	8.65 lbs (without battery)
Size:	14.50" x 13.75" x 3.50"
Die Style:	W and X dies
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes (3.0Ah) 45 minutes (5.0Ah)
Warranty:	5 year limited warranty Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger

Accessories:

- BAT18VLI:** 3.0Ah Li-Ion battery
- BAT18V5AHLI:** 5.0Ah Li-Ion battery
- PATCHGRLLI:** 120V-AC charger
- PATCHGRLLDC:** 12/24V-DC charger
- PT208620:** Lanyard
- WDIETREE:** W die holder
- WDC4500*:** Range taking die for #4 - 500 Cu Str. and #2 - 4/0 Cu Flex
- WDA8300*:** Range taking die for #8 - 300 Al, #6 - 400 Cu Str. and #2 - 4/0 Cu Flex

See Important Notes page at start of Tooling Section.

Battery Crimper 6 Ton, Scissor Action

PATRIOT® 6 Ton, Scissor Action Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PAT500SJ

- Interchangeable scissor action crimping and cutting jaws
- 180° head rotation
- Uses W and X style dies
- Ergonomically balanced tool design
- Includes 2 batteries, charger, and case
- **EP Enhanced Power** – tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On:

Copper, Aluminum, ACSR, Steel, Copperweld, Alumoweld, 6201, 5005, Compressed, and Compact Conductors

Taps:

Copper: #10 sol. to 2/0 str.
Aluminum & ACSR: #14 sol. to 4/0 ACSR

Stirrups:

#6 to 4/0 ACSR

Overhead Full Tension Deadends, Full Tension Splices and Terminals:

#10 str. to 4/0 ACSR

Installs Splices, Taps or Terminations:

#8 to 500 kcmil Copper Stranded (YA, YA-L, YS, YS-L)
#8 to 350 kcmil Copper Flex
#8 to 350 kcmil Aluminum (YA-A, YS-A)

Interchangeable Jaw Assemblies:

PATMD6LWJAW	Crimp jaw with BG and D3 grooves
PATMD68LWJAW	Crimp jaw with 0 and D3 grooves
PATMD66LWJAW	Crimp jaw with D3 groove only
PATMDXPJLWJAW	Crimp jaw with X, P & J grooves
PATMD430LWJAW	Crimp jaw, Dieless, #4 AWG - 3/0 AWG
PATMDCUTLWJAW	Cutting jaw with ACSR blades
PATMDCUTCLWJAW	Cutting jaw with CU/AL blades
PATMDCUTGLWJAW	Cutting jaw with GUY blades

Accessories:

BAT18VLI:	3.0Ah Li-Ion battery
BAT18V5AHLI:	5.0Ah Li-Ion battery
PATCHGRLI:	120V-AC Charger
PATCHGRLIDC:	12/24V-DC Charger
PATMD6LWJWCVR:	Jaw covers for PATMD6 and PATMD68 versions
PATMD66LWJWCVR:	Jaw covers for PATMD66 snub-nose versions
PT10074020:	Wrist strap
W28K:	Cutter Dies (cuts 4-4/0 Cu, Al, ACSR)
WDIETREE:	W-die holder for 6 die sets

Models:

PAT500SJ6LI	BG and D3 grooves, 3.0Ah batteries
PAT500SJ68LI	0 and D3 grooves, 3.0Ah batteries
PAT500SJ66LI	D3 groove only (snub-nose), 3.0Ah batteries
PAT500SJ6L5	BG and D3 grooves, 5.0Ah batteries
PAT500SJ68L5	0 and D3 grooves, 5.0Ah batteries
PAT500SJ66L5	D3 groove only (snub-nose), 5.0Ah batteries

Crimp/Cut Kits:

PAT500SJ6LICUTKITI	Kit includes crimp head with BG & D3 grooves, cutter jaw with ACSR blades, 120V charger and 2 batteries (3.0Ah)
PAT500SJ68LICUTKITI	Kit includes crimp head with 0 & D3 grooves, cutter jaw with ACSR blades, 120V charger and 2 batteries (3.0Ah)

Specifications:

Output Force:	6 Tons
Tool Weight:	10.10 lbs (without battery)
Size:	17.00" X 14.25" X 3.00"
Die Style:	W and X dies (with crimping jaws)
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes (3.0Ah) 45 minutes (5.0Ah)
Warranty:	5 year limited warranty Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger

See Important Notes page at start of Tooling Section.

Battery Crimper 6 Ton, Scissor Action

PATRIOT® IN-LINE®, 6 Ton, Crimper/Cutter Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PATMD-LW

- Light weight, compact and ergonomic design
- Interchangeable scissor action crimping and cutting jaws
- Safety trigger lock and locking jaw tabs
- LED Worklight
- **EP Enhanced Power** — tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

Interchangeable Jaws

Crimp Capacity*		
Connector Type	Conductor Type	Range
Terminals & Splices	Copper	#8 AWG - 500 kcmil
Terminals & Splices	Flex Copper	#8 AWG - 350 kcmil
Terminals & Splices	Aluminum (AAC)	#8 AWG - 350 kcmil

- PATMD68LW5 O and D3 grooves, 5.0Ah batteries
- PATMD66LW5 D3 groove only, 5.0Ah batteries
- PATMD70005A1 XPJ grooves, 5.0Ah batteries
- **PATMD80005A1 **#4-3/0 dieless, 5.0Ah batteries

Specifications:

- Output Force:** 6 Tons
- Tool Weight:** 5.50 lbs (without battery)
- Length:** 17.85" - 18.73" (varies by jaw size)
- Die Style*:** W and X dies (with crimping jaws; excluding XPJ grooves and 430 Dieless)
- Operating Voltage:** 18 V-DC Lithium-Ion
- Recharge Time:** 30 minutes (3.0Ah)
45 minutes (5.0Ah)
- Warranty:** 5 year limited warranty
Lifetime warranty on INFINITY DRIVE®
3 years on batteries and charger

See Important Notes page at start of Tooling Section.

Battery Crimper For Small Terminals #22-1 AWG

PATRIOT® Small Terminal Battery Crimper Mechanically Driven, 18V Lithium-Ion

Tool Series: PAT221

- Scissor action, angled head design
- One-second crimp time with auto retract and calibration
- Connector hold feature for easy wire insertion
- LED Worklight
- Red LED to indicate an incomplete crimp
- Safety Trigger Lock - **BURNDY Exclusive!**
- Emergency Release

Y46LWSBH
Y46CLWSBH

Standard Light Weight C-Head tool
Permanently molded head of 3/16" rubber
included separate molded rubber boot for
lower body and hydraulic coupler
Y46CLWSBH (covered) tool with Female coupler
Y46LWSBH tool with Female coupler
(not rubber covered)

Y46CLWSBH
Y46LWSBH

Specifications:

Output Force:	15 Tons
Tool Weight:	14.5 lbs
Size:	14.68" x 5.06" x 2.88"
Die Style:	P and U dies (with PUADP1)
Operating Pressure:	10,000 PSI
Cycles:	10,000
Warranty:	5 year limited warranty

Accessories:

PUADP1:	U die adapter
P15K:	Cutter Die, max. diameter 1.2"
PT10054094:	Red nylon carry bag (included with tool)

*See Hydraulic Pumps and Hydraulic Hoses;
Pump Accessories

Remote Operated Crimper 15 Ton, Latch Head

15 Ton, Latch Head Remote Operated Hydraulic Tool

Tool Series: Y46LWBH

- 2" ram travel
- Used with P dies; U dies with PUADPI adapter (sold separately)
- Positive push button die locks
- Light weight latch head design

For Use On:

Copper - #8 AWG Str. - 1500 kcmil

Code Cable, Navy Cable, Flexible, Extra Flexible
1/2" - 1" Ground Rods

Terminals, grounding:

to 500 kcmil; YGA, YGHA, YGF

Terminals, uninsulated:

#8 - 1500 kcmil; YA, YA-2N, YA-L, YA-LB, YA-TC,
YA-2LN, YAB-4N, YAV-L, YAV-RS, YA-TC-FX

Terminals, insulated:

#8 - 2/0 AWG; YAEV-L, YAEV-H, YAEV-RS, YAEV-RH

Splices:

#8 - 1500 kcmil; YS, YS-T, YS-L, YS-LB, YST,
YSP-T, YGS, YGHS

Taps:

#14 - 1000 kcmil; YH, YCHC
to 4/0 AWG; YC-C

Taps, grounding:

to 500 kcmil; YGHC-C, YGHP-C, YGHR-C

Aluminum - #8 AWG - 1250 kcmil

Code Cables

Terminals: YA-A, AYP, AYPO

Splices: YS-A, YS-AT, YRB

Taps: YFD, YFN, YFO, YFR

Remote Operated Crimper 12 Ton, C-Head

12 Ton, C-Head Remote Operated Hydraulic Tool

Tool Series: Y35BH

- Lifting eye
- .95" jaw opening
- Uses U dies
- Positive die lock buttons

For Use On:

Copper #8 str. - 500 kcmil code cable

Grounding Terminals:

YGH, YGHA, YGF

Grounding Splices:

YGS, YGHS

Copper #8 str. - 500 kcmil and up to 3/4" ground rod

Grounding Taps:

YGHC-C, YGHP-C, YGHR-C

Copper #8 str. - 750 kcmil code cable, N30 - N500 Navy cable, flexible, and extra flex

Terminals (Bare):

YA, YA-2N, YA-L, YA-LB, YA-2LN

Terminals (Insulated):

YAEV-L, YAEV-H, YAEV-RS, YAEV-RH

Splices to 400 kcmil only:

YS, YS-T, YS-L, YS-LB, YSV-L, YSM

Aluminum #8 str. - 750 kcmil code cable

Terminals:

YA-A, AYP, AYPO

Splices to 350 kcmil only:

YSA, YRB, YS-AT

ACSR - See Overhead Transmission & Distribution Sections H & I

Plier Hand Tool; for #22-10 AWG Nylon/Bare

Hand tool for #22 - 10 AWG Nylon and Bare Connectors

Tool: Y10D

- One tool for both nylon insulated and bare connectors
- Precision machined wire cutter for aluminum and copper
- Heavy duty forged steel, rust resistant finish

For Use On:

#22 - 10 AWG Nylon Insulated Terminals

Types: TN, TN-F, YAE-N, YAE-N-F, YAE-Z, YAEV, YAES, YAES-E

#22 - 10 AWG Nylon Insulated Splices

Types: SN, YSE-HN*, SNM, YSES, YSE-H*

#22 - 10 AWG Bare Uninsulated Terminals

Types: T, YAD, T-F, YAD-F, YAV, YAV-T-F, YAV-H*, YAV-H-F*, YAV-Z

#22 - 10 AWG Bare Uninsulated Splices

Types: YSV, YSV-H*

*Conductor crimp only

Models:

Y10D

Plier tool for #22 - #10 AWG; Nylon & Bare

Specifications:

Size:	9.75" x 5.00" x 1.00"
Weight:	13.5 oz.
Warranty:	5 year limited warranty

Full Cycle Ratchet Tool for Ferrules, Dieless

Dieless, Front and Side Load Ferrule Tool #26 - 8 AWG Covered and Bare Ferrules

Tool: YF268CFSL

- Rotatable die head for front or side loading
- Full cycle ratchet with emergency release
- Ergonomic design with low handle force with non slip comfort grip
- Self adjusting for covered and bare ferrules
- Compact and lightweight
- Hole for safety strap

For Use On:

#26 - 8 AWG Covered and Bare Ferrules

Types: YF-UIL, YF-IDL, YF-ITL, YF-IWL, YFTW-DL
Wire End Ferrules

Models:

YF268CFSL

Front & Side Load Ferrule Crimp tool

Specifications:

Size:	7.10" x 2.70" x 0.90"
Die Style:	Dieless, Rotatable
Weight:	.65 lbs
Warranty:	5 year limited warranty

Close-up of YF268CFSL front load & side load views

Full Cycle Ratchet Tool for Ferrules, Side Load

Side Load Ferrule Tool #26 - 1/0 AWG Covered and Bare Ferrules

Tool Series: YF261CSKIT

- Kit includes ratchet crimping tool and 3 interchangeable dies: YF2610D (#26-10 AWG), YF864D (#8-4 AWG), and YF21D (#2-1/0 AWG)
- Crimps both covered and bare ferrules
- Low handle force reduces hand strain
- Ergonomic design with non-slip handles
- Light weight plastic case with handle for easy transporting
- Micro foam insert to secure tool, dies and die changing tool

For Use On:

#26 - 1/0 AWG **Covered Ferrules**
#20 - 2 AWG **Bare Ferrules**
 Types: YF-UIL, YF-IDL, YF-ITL, YF-IWL, YFTW-DL
 Wire End Ferrules

Models:

YF261CSKIT Kit, ferrule tool, dies for #26-1/0 AWG

Specifications (Kit):

Size:	10.00" x 2.70" x 0.90"
Die Style:	Interchangeable dies
Weight:	1.25 lbs
Warranty:	5 year limited warranty

Full Cycle Ratchet Hand Tool

Hand Tool for #22 - 8 AWG Uninsulated (Bare) Connectors

Tool: Y8MRB1

- Light weight
- Each indenter has unique identifying marks for inspectability
- Fully enclosed, protected ratchet mechanism does not allow the handles to be opened until full ratchet cycle is completed
- Inspection gauges (sold separately) available to check each groove

For Use On:

#22 - 8 AWG Uninsulated (Bare) Terminals:

Types: T, YAD, T-F, YAD-F, YAV, YAV-L, YAV-T-F, YAV-Z

#22 - 8 AWG Uninsulated (Bare) Splices:

Types: YSV, YSV-L

Models:

Y8MRB1

Hand-held tool, #22 - 8 AWG

Specifications:

Weight:	1.2 lbs
Size:	10.56" x 3.50" x 1.04"
Die Style:	Permanent dies
Warranty:	5 year limited warranty

Accessories:

PG3951:	Inspection gauge for #18 groove
PG3961:	Inspection gauge for #14 groove
PG3971:	Inspection gauge for #10 groove
PG3981:	Inspection gauge for #8 groove

Fully Protected Ratchet Mechanism, Full Cycle Ratchet Tools

Fully Protected Ratchet Mechanism Full Cycle Ratchet Tools for Critical Applications

Tool Series: MR8

- Fully enclosed, protected ratchet mechanism does not allow the handles to be opened until full ratchet cycle is completed
- Designed for critical applications such as nuclear-class IE terminations, heavy duty industrial, aircraft
- Light weight aluminum
- Easy groove identification with color-coded dies

For Use On:

- MR81A:** #22 - 10 AN Copper Cable
INSULUG™ terminals/splices
YAE
- MR89Q:** #18 - 8 AN Copper Cable
#22 - 10 AWG Sol. Cable
#22 - 8 AWG Str. Cable
YAV, YSV, T, T-F, YAD, YAD-F
- MR8331T:** #18 - 10 MIL-W-5086 Str.
YSE, YSE-H
- MR8G96:** #22 - 14 AWG
TP, BA

Models:

(See For Use On)

Specifications:

Size:	10.50" x 3.50" x 1.50"
Weight:	1.5 lbs
Die Style:	Permanent dies
Warranty:	5 year limited warranty

Ergonomic Full Cycle Ratchet Tools

Ergonomic Hand Crimp Tool for #22 - 10 AWG; Nylon/Vinyl and Bare

Tool Series: MRE1022

- Ratchet mechanism does not allow handles to open until full cycle is complete
- Stop plate ensures proper location for consistent reliable connection
- Die Inspection Gauges available (sold separately)
- Easy groove identification with color coded dies
- Ratchet release lever in case of misalignment

For Use On:

MRE1022B

#22 - 10 AWG Uninsulated (Bare) Terminals/Splices

Types: T, YAD, T-F, YAD-F, YAV, YAV-H, YAV-R, YAV-T-F, YAV-H-F, YAV-Z, YSV, YSV-H

Full Cycle Ratchet Hand Tool

Full Cycle Ratchet Hand Tool for #9 - 4 AWG; Bare Terminals/Splices

Tool: MR4C

- Reinforced heavy duty back with high strength aluminum body
- Fully protected ratchet mechanism does not allow handles to open until full cycle is completed
- Inspection gauges available to check each groove (sold separately)
- Spring loaded indenter jaw, keeps jaws closed

For Use On:

#9 - 4 AWG Uninsulated (Bare) Terminals/Splices

Types: YAV-L, YA-L, YSV, YS-L

Models:

MR4C

Tool, #9 - 4 AWG, Bare

Specifications:

Length:	11.75" x 3.62" x 1.00"
Weight:	2.3 lbs
Die Style:	Permanent dies
Warranty:	5 year limited warranty

Accessories:

PG1211:	Die Inspection Gauge for #9 - 8 AWG groove
PG1251:	Die Inspection Gauge for #6 AWG groove
PG1331:	Die Inspection Gauge for #4 AWG groove

Rotating Die, Full Cycle Ratchet Tool

Rotating Die, Hand Tool for #8 - #1 AWG Copper HYDENT™ Terminals/Splices and #14 - 4 Thin-Wall C-Taps

Tool Series: Y1MRTC

- Die index embossment
- Rotating die with color coding to match connectors
- Ratchet mechanism with release in case of misalignment

For Use On:

See charts for details

#8 - 1 AWG Uninsulated (Bare) Terminals and Splices

Types: YA, YAV, YS, YSV

#14 - 4 AWG Thin Wall C-Taps

YC10L12, YC8L12, YC6L12, YC4L12

Models:

- Y1MRTC** Standard tool only
- Y1MRKIT** Y1MRTC tool, sturdy metal carrying case and select terminals/splices
- Y1MRTCKIT** Y1MRTC tool, sturdy metal carrying case, selected terminals and YC4L12 Thin-Wall C-Tap

Ergonomic Full Cycle Ratchet Tool

Ergonomic Hand Tool for #12 - 2 AWG; Stranded, Solid, Flex

Tool: Y122CMR

- Overmolded comfort grip handles
- Easy groove identification with color coded dies
- UL Listed/CSA Certified connections when used with recommended BURNDY terminals/splices
- Die index embossment for all 6 wire ranges
- Emergency release mechanism in case of misalignment or mistaken die choice
- Two different kits are also available with a selection of connectors in a sturdy metal carrying case (Y122CMRKIT and Y122CMRCIKIT)

Full Cycle Ratchet Hand Tool

Full Cycle Ratchet Hand Tool for #26 - 8 AWG Terminals/Splices

Tool: M8ND

- Ratchet mechanism does not allow handles to open until full cycle is complete
- Fully protected ratchet mechanism
- Uses standard BURNDY N style dies (sold separately)
- Easy groove identification with color coded dies

For Use On:

#26 - 8 AWG Terminals

Terminal Types: YAD, BA-E, YAD-F, BA-EF, YAE, BA-ES, YAE-F, BA-EZ, YAE-Z, BA-EL, YAES, YAEV-H, YAEV-L, YAV, YAV-F, YAV-H, YAV-H-F

#26 - 8 AWG Splices

Splice Types: YSV, YSM, YSV-H, YRV-L

Models:

M8ND

Tool, #26 - 8 AWG

Specifications:

Weight:	1.8 lbs
Size:	10.88" x 2.00" x .88"
Die Style:	N dies
Cycles:	10,000
Warranty:	5 year limited warranty

M8ND shown with N8CT die set installed. (Dies sold separately.)

Mechanical Rotating Crimp Tool

Mechanical Rotating Crimp Tool for #8 - 4/0 AWG Uninsulated (Bare) Terminals/Splices

Tool Series: MRC840

- Heat treated steel jaws
- Spring loaded mechanism locks die wheel into position
- Multiple crimp selection with rotatable die wheels
- Die index embossment for inspectability

For Use On:

MRC840

#8 - 4/0 AWG Copper Terminals/Splices

Types: YA, YA-L, YS, YS-L

MRC840AL

#8 - 4/0 AWG Aluminum Terminals/Splices

Types: YA-A, YS-A

Models:

MRC840

Tool, #8 - 4/0 AWG Copper

MRC840AL

Tool, #8 - 4/0 AWG Aluminum

Specifications:

Size:	26.00" x 8.00" x 1.50"
Weight:	8.3 lbs
Die Style:	Rotating die wheel
Warranty:	5 year limited warranty

Mechanical Compression Tool, Dieless

Mechanical Compression Tool, Dieless #8 Str. - 250 kcmil Copper; #8 Str. - 4/0 Str. Aluminum

Tool Series: MY28 / MY29

- Easy to adjust nest die with knurled steel knob and machine threads
- Rugged tool design with heavy duty forged steel with reinforced back and handles
- Bench mount adapter (sold separately) available

For Use On:

MY293, MY293C (covered handles),

MY293CF (fully covered)

- #8 Str. - 250 kcmil Copper commercial (code) cable
- 30 Navy - 250 Navy Copper Navy cable
- #8 Str. - 4/0 Str. Aluminum commercial (code) cable
- Types (Copper): YA, YA-L, YS-L
- Types (Aluminum): YA-A, YS-A

MY2911, MY2911C (covered handles),

MY29UNIVERSALKIT (MY2911 tool with select connectors)

- #8 Str. - 250 kcmil Copper commercial (code) cable
- 30 Navy - 250 Navy Copper Navy cable
- #8 Str. - 4/0 Str. Flexible copper mine machine cable
- Types (Copper): YA, YA-L, YS, YAV-FX, YS-L, YAV-L, YSV-L

MY28

- #8 Str. - 4/0 Str. Copper aircraft cable
- Types (Copper): YAV-L, YSV-L

MY284

- #8 Str. - 4/0 Str. Aluminum aircraft cable
- Types (Aluminum): YAV-A-L, YSV-A-L, YAV-A-R

MY286

- #8 Str. - 2/0 Str. Copper aircraft cable (flexible)
- Types (Copper): Nylon Insulated: YAE-L, YAEV-RS, YAEV-H, YAEV-RH

Models:

(See For Use On)

Specifications:

Weight:	8.0 lbs
Size:	22.65" x 4.88" x 1.12"
Die Style:	Dieless
Cycles:	10,000
Warranty:	5 year limited warranty

Close-up of dieless mechanism

Full Cycle Ratchet Tool, Dieless, Service Entrance Splices

Dieless Hand Tool, Installs #10 - 1/0 Str. Service Entrance Splice Connectors

Tool: OH25

- Ratchet mechanism does not allow handles to open until full cycle is complete
- Easy, one-hand operation incrementally closes jaws with each handle stroke
- Spring-loaded comfort grip handles
- Forged steel jaws and stainless steel indenter

For Use On:

Conductor Range: #10 - 1/0 Str.

5/8" Service Entrance Sleeves:
 INSULINK™ Type ES (insulated) #10 - 1/0 Str.
 LINKIT™ Type YSU (bare) #8 - 1/0 Str.

5/8" Neutral Tension Sleeves
 HYSPLICE™ Types:
 YS-S, YCS-R, YDS-AT #4 - 1/0 Str.

HYPLUG™ AYP Type #6 - 1/0 Str.

Models:

OH25

Tool, #10 - 1/0 Str

Specifications:

Handle Force:	50 lbs max.
Force Developed:	6,000 lbs max.
Size:	12.25" x 3.75" x 1.50"
Weight:	2 lbs. 11 oz.
Die Style:	Dieless
Warranty:	5 year limited warranty

Accessories:

PT8504:

Go/No-Go Gauge; used to check crimp dimensions

HYTOOL™ Hand-Operated Crimper

HYTOOL™ Hand Crimper
for #14 AWG - 500 kcmil

Tool Series: MD6

- Uses W & X style dies
- Spring loaded positive lock die retainer buttons
- Multiple variations available

For Use On:

Copper, Aluminum, ACSR, Steel, Copperweld, Alumoweld, 6201, 5005, Compressed, and Compact Conductors

Taps:

Copper: #10 sol. to 2/0 str.
Aluminum & ACSR: #14 sol. to 4/0 ACSR

Stirrups:

#6 to 4/0 ACSR

Overhead Full Tension Deadends, Full Tension Splices and Terminals:

#10 str. to 4/0 ACSR

Terminals & Splices*:

#8 to 500 kcmil Copper Stranded (YA, YA-L, YS, YS-L)
#8 to 350 kcmil Copper Flex
#8 to 350 kcmil Aluminum (YA-A, YS-A)

*NOTE: Sizes 250-500 kcmil are not recommended with MD6 & MD7 Series due to high handle force. Suggest PATMD-LW Series.

Specifications:

Crimp Force:	4.5 Tons
Life Cycle:	Tested over 90,000 cycles with no adjustments or part replacement
Length:	25.50" x 4.50" x 2.00"
Weight:	6.0 lbs
Die Style:	W and X dies
Warranty:	5 year limited warranty

Models:

MD6	Permanent BG (5/8) and D3 grooves; with W0 die (sold separately) can install the CABLELOK CRIMPIT™ and HYCRIMP™ tap connectors
MD68	Permanent O and D3 grooves; with WBG die (sold separately) can install the CABLELOK CRIMPIT™ and HYCRIMP™ tap connectors
MD66	Snub-nose, permanent D3 groove only
MD637	Permanent 161, 162, 163, 171 dies in jaw (J, M & P, T & X)
MD638	Permanent K, BG, C dies in jaw
MD64	Permanent BG (5/8) and D3 grooves; straight fiberglass handles 24" long; fiberglass rated 100kV per foot for 5 min.
MD614	Permanent BG (5/8) and D3 grooves; straight fiberglass handles 19" long with grips; fiberglass rated 100kV per foot for 5 min.
MD612	Permanent O and D3 grooves; straight fiberglass handles 24" long; fiberglass

Accessories:

WBG:	Common die set for MD68, MD612
W0:	Common die set for MD6, MD64, MD614
WDIETREE:	W die holder for 6 die sets

HYTOOL™ Hand-Operated Crimper

HYTOOL™ Hand Crimper for #14 AWG - 500 kcmil

Tool Series: MD7

- Uses W & X style dies
- Ergonomic, one-piece composite polymer handles
- Nickel plated jaws and jaw links

For Use On:

Copper, Aluminum, ACSR, Steel, Copperweld, Alumoweld, 6201, 5005, Compressed, and Compact Conductors

Taps:

Copper: #10 sol. to 2/0 str.
Aluminum & ACSR: #14 sol. to 4/0 ACSR

Stirrups:

#6 to 4/0 ACSR

Overhead Full Tension Deadends, Full Tension Splices and Terminals:

#10 str. to 4/0 ACSR

Terminals & Splices*:

#8 to 500 kcmil Copper Stranded (YA, YA-L, YS, YS-L)
#8 to 350 kcmil Copper Flex
#8 to 350 kcmil Aluminum (YA-A, YS-A)

* **NOTE:** Sizes 250-500 kcmil are not recommended with MD6 & MD7 Series due to high handle force. Suggest PATMD-LW Series.

Specifications:

Output Force:	4.5 Tons
Size:	25.00" x 4.50" x 2.00"
Weight:	7.0 lbs.
Die Style:	W and X dies
Life Cycle:	Tested over 90,000 cycles with no adjustments or part replacement
Warranty:	5 year limited warranty

Models:

- MD7** Permanent BG (5/8) and D3 grooves; with WO die (sold separately) can install the CABLELOK CRIMPIT™ and HYCRIMP™ tap connectors
- MD78** Permanent O and D3 grooves; with WBG die (sold separately) can install the CABLELOK CRIMPIT™ and HYCRIMP™ tap connectors
- MD76** Snub-nose, permanent D3 groove only

Accessories:

- WBG:** Common die set for MD78
- WO:** Common die set for MD7, MD76
- WDIETREE:** W die holder for 6 die sets

POSI-PRESS™ Hand-Operated Crimper

POSI-PRESS™ Hand-Operated Full Cycle Ratchet Tool for #12 - 500 kcmil

Tool Series: MD7 Ratchet

- Full stroke ratchet mechanism
- Ergonomical one-piece composite polymer handles
- Uses W & X style dies

For Use On:

Copper Lugs/Splices #8 - 500 kcmil:

Types: YA, YA-L, YA-L-TC, YA-L-NT, YS-L, YS, YST, YA-TC

Copper Lugs/Splices #8 - 350 kcmil Flex

Types: YAV-L-TC-FX, YA-LB, YA-TC-FXB, YSV-L, YAV-L-NT-FX, YAV-L-FX, YAV-FXB

Copper Battery Lugs #8 - 350 kcmil Flex

Type: YAG-TC-LD

Thin Wall C-Taps #12 - 3/0 AWG

Type: YC-L

Specifications:

Crimp Force:	4.5 Tons
Length:	26.00" x 4.50" x 2.00"
Width:	8.00" at handles; 4.50" at jaws
Die Style:	W and X dies
Handle Material:	Reinforced composite polymer
Warranty:	5 year limited warranty

Models:

MD734R	POSI-PRESS™ Full Cycle Ratchet Tool
MD734RC	MD734R tool with EPDM rubber covering
MD734RKIT1	MD734R tool, metal carrying case and all dies for #8 - 500 kcmil copper HYDENT™ and C-Taps for #12 - 3/0 AWG
MD734	Supplied <u>without</u> the ratchet mechanism
MD734KIT1	MD734 tool (no ratchet mechanism), metal carrying case and all dies for #8 - 500 kcmil copper HYDENT™ and C-Taps for #12 - 3/0 AWG

Accessories:

PT49521:	Metal carry case (sold separately)
PT4925:	Canvas bag (sold separately)
WDIETREE:	W die holder for 6 sets of dies (sold separately)

OEM Pneumatic Press

OEM Pneumatic Press for #8 - 4/0 AWG

Tool Series: OEM840NCP

- Customizable clear safety guard for left, right, or front feed cable entry
- Guarded foot switch
- Adjustable connector locator
- Cycle counter
- Accommodates UM, U and W dies

For Use On:

#8 - 4/0 AWG Copper Terminals

Type: YA, YA-L, YAD-M, YAV, YAV-L

Models:

OEM840NCP OEM Pneumatic Press (press only*)

*Requires U / UM or W Die Holder Assembly for use. Sold separately, see below.

12 Ton U Dies

12 Ton U Dies* For 35 and 750 Tool Series; 46 Series with PUADP1 Adapter

* Non-tension U-type 12 ton dies for YA, YS, YA-A, YS-A style connectors.

** Wide dies are intended for use on long barrel terminals and splices (YA/YS) only.

Die Sets sold separately; U Die Kits also available; see following page.

Note: N/A = not applicable

UDIEKITHYGRD includes 8 dies sets. Seven die sets are used to install the BURNDY® HYGROUND® irreversible compression grounding connectors; the U2CABT die set is for pre-crimping 1/2", 5/8" and 3/4" ground rods for increased rotational resistance. The UDIEKITHYGRD also includes the **CASEUDIES8** die case.

UDIEKITHYGRD includes
UC, UO, U997, PU998, U1011, U1104, U1105, U2CABT (Ground rod pre-crimp die), and **CASEUDIES8** die case

UM-Style Dies

UM-Style Dies For OEM840NCP up to 4/0; 35 and 750 Tool Series; 46 Series with PUADP1 Adapter

UM-style Nest and Indenter dies are specifically designed to work with the YAD lugs. The distinctive “M” crimping profile design straddles the brazed seam of the YAD-M and YAV-L series lugs to provide a consistent, long term, reliable connection. Accepts copper cable sizes from #8 AWG to 600 kcmil for DLO/Flex cable.

CNC machined from stainless steel, these dies are compatible with all BURNDY® tooling that accepts a “U” die envelope.

Sold individually or in a kit (**UMDIEKIT**) which has select dies/indenters covering #8 to 4/0 AWG in a plastic die case.

W Dies For MD/PATMD, 500, and 600 Tool Series

* Sizes 250-500 kcmil are not recommended for use with MD6 & MD7 Series tools due to high handle force, suggest PATMD-LW Series.

** For PAT600 and Y500CTHS only.

*** Use of W249 will not produce a UL Listed connection.

Note: N/A = not applicable

Suitable for use on YA, YS, YA-A, YS-A type non-tension connectors.

Die Sets sold separately; W Die Kits also available; see following page.

W25RT Die Set

Battery Cutter, Scissor Action

PATRIOT® Scissor Action Cutter Copper and Aluminum up to 4.00" O.D. Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PATCUT4

- Extra wide jaw opening
- Scissor action cutting jaws
- 355° head rotation
- Multi-position assist handle
- Includes 2 batteries, charger, and case
- **EP Enhanced Power** — tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On:

Maximum Cutting Capacity:

Copper and Aluminum: up to 4.00" O.D.

Models:

PATCUT4CUALLI with 3.0Ah Li-Ion batteries
PATCUT4L5 with 5.0Ah Li-Ion batteries

Specifications:

Output Force: 11 Tons
Tool Weight: 19.70 lbs (without battery)
Size: 24.31" X 3.26" X 15.33"
Operating Voltage: 18 V-DC Lithium-Ion
Recharge Time: 30 minutes (3.0Ah)
45 minutes (5.0Ah)
Warranty: 5 year limited warranty (excludes blades)
Lifetime warranty on INFINITY DRIVE®
3 year on batteries and charger

PATCUT4QUAL

with multi-position assist handle

Accessories:

BAT18VLI: 3.0Ah Li-Ion battery
BAT18V5AHLI: 5.0Ah Li-Ion battery
PATCHGRLLI: 120V-AC charger
PATCHGRLLDC: 12/24V-DC charger
PT208620: Lanyard

See Important Notes page at start of Tooling Section.

Battery Cutter, Latch Head

PATRIOT® Latch Head Cutter
ACSR up to 2156 kcmil
Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PATCUT2156

- 180° head rotation
- Durable hardened steel blades
- Specialized latch head for mid-span cuts
- Mechanical ram release with no power consumption
- Includes 2 batteries, charger, and case
- **EP Enhanced Power** — tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On:

Copper/Aluminum Cable:	up to 2"
ACSR:	up to 2156 kcmil
Ground Rod:	up to 3/4"
Rebar:	up to 5/8"
Soft Steel Bolts:	up to 3/4"
Standard Guy:	up to 9/16"
EHS Guy:	up to 9/16"

Models:

PATCUT2156LI	with 3.0Ah Li-Ion batteries, hard case
PATCUT2156LS	with 5.0Ah Li-Ion batteries, hard case
PATCUT2156LIPB	with 3.0Ah Li-Ion batteries, pro bag
PATCUT2156LSPB	with 5.0Ah Li-Ion batteries, pro bag

Specifications:

Output Force:	10 Tons
Tool Weight:	14.10 lbs (without battery)
Size:	16.50" x 13.50" x 3.38"
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes (3.0Ah) 45 minutes (5.0Ah)
Warranty:	5 year limited warranty (excluding blades) Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger

Accessories:

BAT18VLI:	3.0Ah Li-Ion battery
BAT18V5AHLI:	5.0Ah Li-Ion battery
PATCHGRLI:	120V-AC charger
PATCHGRLDC:	12/24V-DC charger
PT208620:	Lanyard
CUT200BLMVBL:	Replacement Moving Blade
CUT200BLSTA:	Replacement Fixed (Stationary) Blade

See Important Notes page at start of Tooling Section.

Battery Cutter, Latch Head

PATRIOT® Latch Head Cutter Copper/Aluminum up to 1.29" O.D. Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PATCUT129

- 180° head rotation
- Overmolded handle and ergonomic design
- One-handed operation for advance, retract and hold
- Latch head design for interference free closure for mid-span cuts
- Includes 2 batteries, charger, and case
- **EP Enhanced Power** — tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On:

Copper/Aluminum Cable:	up to 1.29"
ACSR:	up to 1113 kcmil
Ground Rod:	up to 5/8"
Rebar:	up to 1/2"
Soft Steel Bolts:	up to 5/8"
Standard Guy:	up to 1/2"
EHS Guy Strand:	up to 3/8"

Models:

PATCUT129LI	with 3.0Ah Li-Ion batteries, hard case
PATCUT129LS	with 5.0Ah Li-Ion batteries, hard case
PATCUT129LIPB	with 3.0Ah Li-Ion batteries, pro bag
PATCUT129LSPB	with 5.0Ah Li-Ion batteries, pro bag

Specifications:

Output Force:	7 Tons
Tool Weight:	9.85 lbs (without battery)
Size:	14.50" x 13.50" x 3.50"
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes (3.0Ah) 45 minutes (5.0Ah)
Warranty:	5 year limited warranty (excluding blades) Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger

Accessories:

BAT18VLI:	3.0Ah Li-Ion battery
BAT18V5AHLI:	5.0Ah Li-Ion battery
PATCHGRLI:	120V-AC charger
PATCHGRLLDC:	12/24V-DC charger
PT208620:	Lanyard
PT10037388:	Replacement Moving Blade
PT10037384:	Replacement Fixed Blade

See Important Notes page at start of Tooling Section.

Battery Cutter, Latch Head

PATRIOT® Latch Head Cutter
Copper/Aluminum up to 2.45" O.D.
Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PATCUT245

- 180° head rotation
- Cuts up to 2.45" diameter copper/aluminum cable
- Specialized latch style cutting head for interference-free closure for mid-span work
- Ergonomic design, overmolded handle
- Includes 2 batteries, charger, and case
- **EP Enhanced Power** – tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On:

Copper/Aluminum Cable: Up to 2.45" O.D.

For Copper and Aluminum cable only. Do not cut steel, ground rod, rebar or guy wire.

Models:

PATCUT245LI with 3.0Ah battery, hard case
PATCUT245L5 with 5.0Ah battery, hard case

PATCUT245LIPB with 3.0Ah battery, pro bag
PATCUT245L5PB with 5.0Ah battery, pro bag

Specifications:

Output Force:	6 Tons
Tool Weight:	12.20 lbs (without battery)
Size:	18.13" x 13.50" x 3.50"
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes (3.0Ah) 45 minutes (5.0Ah)
Warranty:	5 year limited warranty (excluding blades) Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger

Accessories:

BAT18VLI:	3.0Ah Li-Ion battery
BAT18V5AHLI:	5.0Ah Li-Ion battery
PATCHGRLLI:	120V-AC charger
PATCHGRLLIDC:	12/24V-DC charger
PT208620:	Lanyard
PT10038657:	Replacement Moving Blade
PT10040663:	Replacement Fixed Blade

See Important Notes page at start of Tooling Section.

Battery Cutter, Scissor Action

PATRIOT® Scissor Action Cutter Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PAT500SJCUT

- Interchangeable scissor action crimping and cutting jaws
- 180° head rotation
- Uses W and X style dies with available crimping jaws
- Ergonomically balanced tool design
- Includes 2 batteries, charger, and polymer carrying case
- **EP Enhanced Power** — tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On: Maximum Cutting Capacity:

ACSR:	556.5 kcmil (26/7 Dove)
AAC:	636 kcmil
Copper:	350 kcmil soft drawn copper

Interchangeable Jaw Assemblies:

PATMD6LWJAW	Crimp jaw with BG and D3 grooves
PATMD68LWJAW	Crimp jaw with O and D3 grooves
PATMD66LWJAW	Crimp jaw with D3 groove only
PATMDXPJLWJAW	Crimp jaw with X, P, & J grooves
**PATMD430LWJAW	**Crimp jaw, Dieless for #4-3/0 AWG
PATMDCUTLWJAW	Cutting jaw with ACSR blades
PATMDCUTCLWJAW	Cutting jaw with CU/AL blades
PATMDCUTGLWJAW	Cutting jaw with GUY blades

****Dieless Jaw** only for use on #4-3/0 AWG BURNDY® Overhead Distribution Families: YDS-RL, YDSR-RL, YDS-RLY, YDR-RL, YDRR-RL, YCS-RL, YCA-RL and YSS-R

Accessories:

BAT18VLI:	3.0Ah Li-Ion battery
BAT18V5AHLI:	5.0Ah Li-Ion battery
PATCHGRLLI:	120V-AC charger
PATCHGRLLIDC:	12/24V-DC charger
PATMD6LWJWCVR:	Jaw covers for PATMD6 and PATMD68 versions
PATMD66LWJWCVR:	Jaw covers for PATMD66 snub-nose versions
PT10074020:	Wrist strap
W28K:	Cutter Dies (cuts 4-4/0 Cu, Al, ACSR)
WDIETREE:	W-die holder for 6 die sets

Models:

PAT500SJCUTLI	with ACSR cutting jaw, 3.0Ah battery
PAT500SJCUTLS	with ACSR cutting jaw, 5.0Ah battery

Crimp/Cut Kits:

PAT500SJ6LICUTKITI	Kit includes crimp head with BG & D3 grooves, cutter jaw with ACSR blades, 120V charger and 2 batteries (3.0Ah)
PAT500SJ68LICUTKITI	Kit includes crimp head with O & D3 grooves, cutter jaw with ACSR blades, 120V charger and 2 batteries (3.0Ah)

Specifications:

Output Force:	6 Tons
Tool Weight:	10.10 lbs (without battery)
Size:	17.00" X 14.25" X 3.00"
Die Style:	W and X dies (with crimping jaws)
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes (3.0Ah) 45 minutes (5.0Ah)
Warranty:	5 year limited warranty Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger

See Important Notes page at start of Tooling Section.

Battery Cutter, Scissor Action

PATRIOT® IN-LINE® 6 Ton Crimper/Cutter Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PATMDCUTLW

- Light weight, compact and ergonomic design
- Interchangeable scissor action crimping and cutting jaws
- Safety trigger lock and locking jaw tabs
- LED Worklight
- **EP Enhanced Power** — tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

Shown with ACSR Cutting Jaw

- TOOLBAGMDLI:** Tool bag (included with tool)

Models*: all listed include AC Charger

- PATMD16003A1** BG & D3, GUY Cutter, 3.0Ah batteries
- PATMD36003A1** 0 & D3, GUY Cutter, 3.0Ah batteries
- PATMD26003A1** D3 only, GUY Cutter, 3.0Ah batteries
- PATMD16005A1** BG & D3, GUY Cutter, 5.0Ah batteries
- PATMD36005A1** 0 & D3, GUY Cutter, 5.0Ah batteries
- PATMD26005A1** D3 only, GUY Cutter, 5.0Ah batteries

*Change A to D in catalog numbers for DC charger in place of AC charger.

Specifications:

- Output Force:** 6 Tons
- Tool Weight:** 5.50 lbs (without battery)
- Length:**
 - PATMD6LW** 18.73"
 - PATMD68LW** 18.73"
 - PATMD66LW** 17.85"
 - PATMD60003A1** 19.25"
- Die Style:** W and X dies (with crimping jaws)
- Operating Voltage:** 18 V-DC Lithium-Ion
- Recharge Time:**
 - 30 minutes (3.0Ah)
 - 45 minutes (5.0Ah)
- Warranty:**
 - 5 year limited warranty
 - Lifetime warranty on INFINITY DRIVE®
 - 3 years on batteries and charger

See Important Notes page at start of Tooling Section.

Battery Cutter, Long Reach, Hot Stick, Scissor Action

PATRIOT® IN-LINE® 82" Pole Cutter/ Crimper Hydraulic Self-Contained, 18V Lithium-Ion

Tool Series: PATMDCUT82ALLIF

- Adjustable Angular Head
- ASTM F711 Rated Pole for live line use
- Rocker trigger design for controlled actuation of the tool
- Safety lock to prevent accidental operation
- Includes 2 batteries and charger
- **EP Enhanced Power** — tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On: Maximum Cutting Capacity:

ACSR (26/7):	556.5 kcmil
Aluminum (AAC):	636 kcmil
Copper (soft drawn):	350 kcmil

Interchangeable Jaw Assemblies:

PATMD6LWJAW	Crimp jaw with BG and D3 grooves
PATMD68LWJAW	Crimp jaw with O and D3 grooves
PATMD66LWJAW	Crimp jaw with D3 groove only
PATMDCUTLWJAW	Cutting jaw with ACSR blades
PATMDCUTCLWJAW	Cutting jaw with CU/AL blades
PATMDCUTGLWJAW	Cutting jaw with GUY blades

Accessories:

BAT18VLI:	3.0Ah Li-Ion battery
PATCHGRLL:	120V-AC charger
PATCHGRLLDC:	12/24V-DC charger
WDIETREE:	W-die holder for 6 die sets

Models:

PATMDCUT82ALLIF	Cutter jaw; 82" F711 Pole
PATMD682ALLIF	Crimp Jaws (BG & D3); 82" F711 Pole
PATMD6882ALLIF	Crimp Jaws (O & D3); 82" F711 Pole
PATMD6682ALLIF	Crimp Jaws (D3 only); 82" F711 Pole

Kits with Tool, Crimping and Cutting Jaws, Pole:

PATMD682ALLIFWCJ	Kit includes crimp head with BG & D3 grooves, cutter jaw, 120V charger and 2 batteries
PATMD6882ALLIFWCJ	Kit includes crimp head with O & D3 grooves, cutter jaw, 120V charger and 2 batteries
PATMD6682ALLIFWCJ	Kit includes crimp head with D3 groove, cutter jaw, 120V charger and 2 batteries

Specifications:

Output Force:	6 Tons
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes (3.0Ah)
Warranty:	5 year limited warranty (excludes blades and pole) Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger

See Important Notes page at start of Tooling Section.

Battery Cutter, Mechanically Driven

PATRIOT® Battery Actuated Cable Cutter for Copper & Aluminum Mechanically Driven, 18V Lithium-Ion

Tool Series: PATCUT1500

- Variable speed trigger
- Forward/Reverse switch features a locking position
- Large, strategically placed, non-skid bumper
- LED Worklight
- Large, new cutting blade design
- Includes 1 battery, charger, and case
- **EP Enhanced Power** — tools accept 2.0, 3.0, 4.0, 5.0, and 6.0Ah Makita batteries

For Use On:

Aluminum: up to 1500 kcmil

Copper Flex: up to 1250 kcmil

Copper (soft drawn): up to 1000 kcmil

Copper (hard drawn): up to 750 kcmil

Do Not Cut Steel or ACSR

Models:

PATCUT1500LI with 3.0Ah Li-Ion battery, hard case
PATCUT1500LS with 5.0Ah Li-Ion battery, hard case

PATCUT1500LIPB with 3.0Ah Li-Ion battery, pro bag
PATCUT1500L5PB with 5.0Ah Li-Ion battery, pro bag

Specifications:

Tool Weight:	6.90 lbs (without battery)
Size:	15.5" x 6.0" x 4.38"
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes (3.0Ah) 45 minutes (5.0Ah)
Warranty:	3 year limited warranty (excluding blades) 3 years on battery and charger

Accessories:

BAT18VLI:	3.0Ah Li-Ion battery
BAT18V5AHLI:	5.0Ah Li-Ion battery
PATCHGRLLI:	120V-AC charger
PATCHGRLLDC:	12/24V-DC charger
CASEPATCUT1500:	Polymer carrying case
PT208620:	Lanyard

Hand Operated Cutter, Latch Head

Hand Operated, Latch Head Cuts up to 1.29" Copper and Aluminum Hydraulic Self-Contained Cutter

Tool: YCUT129ACSR

- Rapid advance pump
- Handle trigger drain
- Interference free closure on mid-span cuts
- 180° head rotation

For Use On:

Copper/Aluminum Cable:	up to 1.29"
ACSR:	up to 1113 kcmil
Ground Rod:	up to 5/8"
Rebar:	up to 1/2"
Soft Steel Bolts:	up to 5/8"
Standard Guy:	up to 1/2"
EHS Guy Strand:	up to 3/8"

Models:

YCUT129ACSR	Self-contained cutter
--------------------	-----------------------

Specifications:

Output Force:	7 Tons
Weight:	11.4 lbs
Size:	22.50" x 6.63" x 2.50"
Warranty:	5 year limited warranty (excluding blades)

Accessories:

PT10024162:	Carrying Case (included with tool)
PT10037388:	Moving Blade
PT10037384:	Fixed Blade

PT10024162 Hard Polymer Case for YCUT129ACSR

Remote Operated Cutter, Scissor Action

Remote Operated, Scissor Action Cutter Cuts up to 4.00" Copper/Aluminum Cable

Tool: RHCC4CUAL

- Specialized scissor head design for interference free closure for mid-span cuts
- High strength hardened steel cutting blades
- 360° swivel hose fitting
- Stainless Steel lifting assist eyebolt
- Light weight ergonomic design

For Use On:

Copper/Aluminum Cable: up to 4.00"

Models:

RHCC4CUAL Standard remote cutter

Specifications:

Operating Pressure: 10,000 PSI
Weight: 19.9 lbs
Size: 21.29" x 9.13" x 5.15"
Warranty: 5 year limited warranty (excluding blades)

BAGCNV55X9X24 Canvas Bag available separately
(included with tool)

Accessories:

BAGCNV55X9X24: Canvas Bag (included with tool)
RHCC4CUALBLD: Cutting Blade (one blade; 2 required)
RHCC4CUALGDEBLD: Blade Guide

**See Hydraulic Pumps and Hydraulic Hoses;
Pump Accessories
for other necessary equipment.**

Remote Operated Cutter, Latch Head

Remote Operated, Latch Head Cutter Cuts up to 2156 kcmil ACSR Cable

Tool Series: RHCC2156ACSR

- 180° head rotation
- Durable hardened, precision steel blades
- Specialized latch head for mid-span cuts
- Durable canvas carrying bag stores tool and accessories

For Use On:

Copper/Aluminum Cable:	up to 2"
ACSR:	up to 2156 kcmil
Ground Rod:	up to 3/4"
Rebar:	up to 5/8"
Soft Steel Bolts:	up to 3/4"
Standard Guy:	up to 9/16"
EHS Guy Strand:	up to 9/16"

Models:

RHCC2156ACSR	Standard RHCC2156ACSR remote cutter
RHCC2156ACSRF	RHCC2156ACSR tool with female coupler

Specifications:

Operating Pressure:	10,000 PSI
Weight:	10 lbs
Size:	13.17" x 4.13" x 2.69"
Warranty:	5 year limited warranty (excluding blades)

Accessories:

PT10054094:	Red Nylon Carry Bag (included with tool)
CUT200BLMVBL:	Replacement Moving Blade
CUT200BLSTA:	Replacement Fixed (Stationary) Blade

**See Hydraulic Pumps and Hydraulic Hoses;
Pump Accessories
for other necessary equipment.**

PT10054094 Red Nylon Carry Bag available separately
(included with tool)

Remote Operated Cutter, Latch Head

Remote Operated, Latch Head Cutter Cuts up to 1.29" Copper/Aluminum Cable

Tool: RHCC129ACSR

- Interference free closure for mid-span cuts
- Precision cutting blades for clean cuts
- High strength steel cylinder
- Light weight, ergonomic design
- Durable canvas carrying bag stores tool and accessories

For Use On:

Copper/Aluminum Cable:	up to 1.29"
ACSR:	up to 1113 kcmil
Ground Rod:	up to 5/8"
Rebar:	up to 1/2"
Soft Steel Bolts:	up to 5/8"
Standard Guy:	up to 1/2"
EHS Guy Strand:	up to 3/8"

Models:

RHCC129ACSR Standard remote cutter

Specifications:

Operating Pressure:	10,000 PSI
Weight:	6.2 lbs
Size:	11.41" x 3.65" x 2.33"
Warranty:	5 year limited warranty (excluding blades)

*PT10043890 Canvas Bag available separately
(included with tool)*

Accessories:

PT10043890:	Canvas Bag (included with tool)
PT10037388:	Moving Blade
PT10037384:	Fixed Blade

**See Hydraulic Pumps and Hydraulic Hoses;
Pump Accessories
for other necessary equipment.**

Remote Operated Cutter, Latch Head

Remote Operated, Latch Head Cutter Cuts up to 2.45" Copper/Aluminum Cable

Tool: RHCC245CUAL

- Interference free closure for mid-span cuts
- Precision cutting blades for clean cuts
- Light weight ergonomic design
- Durable canvas carrying bag stores tool and accessories

For Use On:

Copper/Aluminum Cable: up to 2.45"

Models:

RHCC245CUAL Standard remote cutter

PT10054094 Red Nylon Carry Bag available separately
(included with tool)

Specifications:

Operating Pressure:	10,000 PSI
Weight:	8.4 lbs
Size:	14.80" x 4.74" x 2.45"
Warranty:	5 year limited warranty (excluding blades)

Accessories:

PT10054094:	Red Nylon Carry Bag (included with tool)
PT10038657:	Moving Blade
PT10040663:	Fixed Blade

**See Hydraulic Pumps and Hydraulic Hoses;
Pump Accessories
for other necessary equipment.**

Manual Cable Cutters

Manual Cable Cutters for Copper/Aluminum Cable

Tool Series: MCC

- Rugged, high quality steel cutting blades
- Fiberglass handles with soft grips
- Excellent cutting edge performance
- Minimum of cable distortion

For Use On:

MCC600 Copper & Aluminum up to 600 kcmil
21" overall length
1.31" max. insulation diameter
3.5 lbs

MCC1000 Copper & Aluminum up to 1000 kcmil
32" overall length
1.90" max. insulation diameter
9.0 lbs

Models:

MCC600 Manual Cutter, up to 600 kcmil
MCC1000 Manual Cutter, up to 1000 kcmil

Specifications (MCC600):

Weight:	3.5 lbs
Size:	21.00 x 5.00" x 2.00"
Max. Insulation Dia.:	1.31"
Warranty:	1 year limited warranty (excluding blades)

Accessories:

MCC600BLADESET: Replacement blades for MCC600
MCC1000BLADESET: Replacement blades for MCC1000

Ratchet Cable Cutters

Ratchet Cable Cutters for Copper/Aluminum Cable

Tool Series: RCC CU/AL

- Rugged, high quality steel cutting blades
- Excellent cutting edge performance
- Minimal cable distortion

For Use On:

RCC600E:	Copper & Aluminum 600 kcmil 10.50" overall length 1.05" max. insulation diameter 1.2 lbs
RCC750HD:	Copper & Aluminum 750 kcmil 10.35" overall length 1.62" max. insulation diameter 2.6 lbs
RCC1000:	Copper & Aluminum 1000 kcmil 20.00" overall length 2.38" max. insulation diameter 4.5 lbs

RCC600E

Models:

RCC600E	Ratchet Cutter, up to 600 kcmil
RCC750HD	Ratchet Cutter, up to 750 kcmil
RCC1000	Ratchet Cutter, up to 1000 kcmil

Specifications (RCC600E):

Weight:	1.2 lbs
Length:	10.50" x 3.50" x 1.25"
Max. Insulation Dia.:	1.05"
Warranty:	1 year limited warranty (excluding blades)

Accessories:

RPC701302:	Fixed Replacement Blade for RCC1000
RPC701402:	Moveable Replacement Blade for RCC1000

Ratchet Cable Cutters

Ratchet Cable Cutters for ACSR, Aluminum & Copper Cable

Tool Series: RCC ACSR/AL/CU

- Quick release, bi-directional ratchet mechanism
- Rapid blade advance
- Easy cutting with minimal cable distortion

For Use On:

RCC336: ACSR 336 kcmil;
Aluminum 500 kcmil;
Copper 350 kcmil;
10.5" overall length
1.25" max. insulation diameter
1.2 lbs

RCC556: ACSR 556.5 kcmil;
Aluminum 500 kcmil;
Copper 500 kcmil;
21.00" overall length
1.40" max. insulation diameter
4.0 lbs

RCC954ACSR1K: ACSR 954 kcmil;
Aluminum 1000 kcmil;
Copper 1000 kcmil;
22.75" overall length
1.38" max. insulation diameter
6.5 lbs

RCC954ACSR1K

Models:

RCC336 Ratchet Cutter, up to 336 ACSR
RCC556 Ratchet Cutter, up to 556 ACSR
RCC954ACSR1K Ratchet Cutter, up to 954 ACSR

Specifications (RCC954ACSR1K):

Weight: 6.5 lbs
Size: 22.75" x 7.00" x 1.88"
Max. Insulation Dia.: 1.38"
Warranty: 1 year limited warranty (excluding blades)

Accessories:

RPC705501: Fixed Replacement Blade for RCC556
RPC705601: Moveable Replacement Blade for RCC556
RPC902101: Fixed Replacement Blade for RCC336
RPC902201: Moveable Replacement Blade for RCC336

Ratchet Wire Rope Cutters

Ratchet Wire Rope Cutters for Mild and Stainless Steel Cable

Tool Series: RWRC

- Hardened steel blades
- Rapid blade advance
- Reduced handle force compared to scissor or compound action designs

For Use On:

RWRC516: Mild Steel: 5/16" diameter
Stainless Steel: 1/4" diameter
10" overall length
5/16" diameter
1.2 lbs

RWRC916: Mild Steel: 9/16" diameter
Stainless Steel: 1/2" diameter
20" overall length
9/16" diameter
4.4 lbs

RWRC916

Models:

RWRC516 Ratchet Cutter, up to 5/16" dia
RWRC916 Ratchet Cutter, up to 9/16" dia

Specifications (RWRC916):

Weight:	4.4 lbs
Size:	20.00" x 9.00" x 2.00"
Mild Steel Dia.:	9/16"
Stainless Steel Dia.:	1/2"
Warranty:	2 year limited warranty (excluding blades)

1/4" Dia. Wire Rope

Electric Hydraulic Pump

10,000 PSI Light Weight, Space Saving Design

Pump Series: Y10AC9

- Easy to carry and transport
- Factory set relief valve
- 100,000+ life cycles
- Sealed electric pendant switch with 10-foot cord

For Use With:

10,000 PSI Remote Heads:

Y34BH, Y35BH, Y35BH4, Y750BHXT, Y750CBHXT, Y45, Y46LWSBH, Y46LWBH, Y60LW, Y4PC834MBH, Y4445BH, Y81K2MBH, RHCC Series Cutters

Examples of some of the remote crimping and cutting heads for use with Y10AC9 pump

Y60LW

RHCC129ACSR

Y81K2MBH

Models:

- | | |
|------------------|---|
| Y10AC9 | 10,000 psi electric hydraulic pump |
| Y10AC90EM | 10,000 psi electric hydraulic pump with foot switch; pump features "Jog & Hold" |

Specifications:

- | | |
|---------------------------|-------------------------------------|
| Weight: | 28.0 lbs (including oil) |
| Motor: | 115V-AC 50/60 Hz 5/8 HP, 10,000 RPM |
| Height: | 14.38" |
| Base: | 8.25" x 6.50" |
| Max. Current Draw: | 11 amp |
| Reservoir Volume: | 1.61 quarts |
| Warranty: | 5 year limited warranty |

Accessories:

- | | |
|----------------|---|
| YACASE: | Steel carrying case with handle and locking latch |
| YACFC: | Foot control switch |

See Hydraulic Hoses; Pump Accessories for Hose options

Electric Hydraulic Pump

10,000 PSI Light Weight,
Long Service Life

Pump: EPP10

- Lightweight, small size
- 100,000+ life cycles
- Durable remote pendant switch

For Use With:

10,000 PSI Remote Heads:

Y34BH, Y35BH, Y35BH4, Y750BHXT,
Y750CBHXT, Y45, Y46LWSBH, Y46LWBH,
Y60LW, Y4PC834MBH, Y444SBH,
Y81K2MBH, RHCC Series Cutters

Examples of some of the remote crimping and cutting heads for use with EPP10 pump

Y750BHXT

RHCC245CUAL

Y81K2MBH

Models:

EPP10

10,000 psi electric hydraulic pump

Specifications:

Motor:	115V-AC/60 Hz 1/2 HP @ 3450 RPM
Max. Current Draw:	12.5 amperes
Weight:	30.0 lbs
Base:	18.00" x 8.00" x 6.00"
Height:	16.00"
Reservoir Volume:	2 quarts
Warranty:	5 year limited warranty

Accessories:

EPPCASE1:

Steel carrying case with handle, locking latch

PT9711:

Pendant switch

*See Hydraulic Hoses; Pump Accessories
for Hose options*

Electric Hydraulic Pump

10,000 PSI Dual Voltage/Hertz, Large Reservoir

Pump Series: EP10

- Dual voltage / hertz
- Oil level window
- 8 quart reservoir

For Use With:

10,000 PSI Remote Heads:

Y34BH, Y35BH, Y35BH4, Y750BHXT, Y750CBHXT, Y45, Y46LWSBH, Y46LWBH, Y60LW, Y4PC834MBH, Y444SBH, Y81K2MBH, RHCC Series Cutters

Models:

- EP10** 10,000 psi electric hydraulic pump; 1/2 HP 115/230 V-AC; 60 cycle
- EP102** 10,000 psi electric hydraulic pump; 1/2 HP 220/230 V-AC; 50/60 cycle
- EP101HP** 10,000 psi electric hydraulic pump; 1 HP 115/230 V-AC; 60 cycle
- EP101HP2** 10,000 psi electric hydraulic pump; 1 HP 220/230 V-AC; 50/60 cycle

Y750BHXT

RHCC245CUAL

Y81K2MBH

Specifications:

- Motor:** 1/2 HP 115/230V-AC, 60 Cycle; 1/2 HP @ 3450 RPM
- Max. Current Draw:** 10 amperes
- Reservoir Volume:** 8 quarts max; 2 quarts min.
- Height:** 17.50"
- Base:** 11.75" x 18.50"
- Dry Weight:** 68.0 lbs (86.0 lbs with max. fluid)
- Warranty:** 5 year limited warranty

Accessories:

See Hydraulic Hoses; Pump Accessories for Hose options

Electric Hydraulic Pump

10,000 PSI Large 8 Quart Reservoir, Roll Cage

Pump: EPAC10

- Roll cage
- 3 position switch and control box
- Full automatic or manual “Jog and Hold” cycles
- Windows allow easy inspection of proper oil level

For Use With:

10,000 PSI Remote Heads:

Y34BH, Y35BH, Y35BH4, Y750BHXT,
Y750CBHXT, Y45, Y46LWSBH, Y46LWBH,
Y60LW, Y4PC834MBH, Y444SBH,
Y81K2MBH, RHCC Series Cutters

Examples of some of the remote crimping and cutting heads for use with EPAC10 pump

Y60LW

RHCC129ACSR

Y81K2MBH

Models:

EPAC10

10,000 psi electric hydraulic pump

Specifications:

Motor:	1/2 HP 115/230V-AC, 60 Cycle; 1/2 HP @ 3450 RPM
Max. Current Draw:	10 amperes
Reservoir Volume:	8 quarts max; 2 quarts min.
Height:	17.50"
Base:	11.75" x 18.50"
Dry Weight:	68.0 lbs (82.0 lbs with max. fluid)
Warranty:	5 year limited warranty

Accessories:

See Hydraulic Hoses; Pump Accessories for Hose options

Manual Hydraulic Pump

Manual Hand and Foot Style Pumps 10,000 PSI, Also Available in 6,000 PSI

Pump Series: HP10 and FP10

- Solid base with broad leg stabilizers
- Quick disconnect hydraulic fitting
- Built in handle for easy transport
- Factory set pressure release valve with audible click
- Quality, heavy duty foot pad with diamond plate steel (FP10)

HP10 Hand Pump

For Use With:

HP10

Used with: Y34BH, Y35BH, Y35BH4, Y750BHXT,
Y750CBHXT, Y45, Y46LWSBH, Y46LWBH,
Y60LW, Y4PC834MBH, Y444SBH, Y81K2MBH,
RHCC Series Cutters

FP10

Used with: Y34BH, Y35BH, Y35BH4, Y750BHXT,
Y750CBHXT, Y45, Y46LWSBH, Y46LWBH,
Y60LW, Y4PC834MBH, Y444SBH, Y81K2MBH,
RHCC Series Cutters

FP6

Used with: Y29BH

Models:

HP10	10,000 psi hand pump
FP10	10,000 psi foot pump
FP6	6,000 psi foot pump

Specifications:

Weight:	18.0 lbs
Size:	24.75" x 6.75" x 3.00"
Height (open):	20.00"
Reservoir Volume:	1-1/8 quarts
Warranty:	5 year limited warranty

Accessories:

*See Hydraulic Hoses; Pump Accessories for
Hose options*

Gas Driven Hydraulic Pump

10,000 PSI Heavy Duty 4 Horse Power Gasoline Engine

Pump: GP10

- Sturdy steel roll cage design
- Manual control valve
- Fast hose assembly; quick disconnect hydraulic coupler
- Large 8 quart reservoir

For Use With:

10,000 PSI Remote Heads:

Y34BH, Y35BH, Y35BH4, Y750BHXT,
Y750CBHXT, Y45, Y46LWSBH, Y46LWBH,
Y60LW, Y4PC834MBH, Y444SBH,
Y81K2MBH, RHCC Series Cutters

*Examples of some of the remote
crimping and cutting heads for use with
GP10 pump*

Y60LW

Y750BHXT

Models:

GP10 10,000 psi gas driven hydraulic pump

Specifications:

Engine:	4 H.P.; 4 Cycle
Weight:	77.8 lbs (overall dry weight)
Size:	21.00" x 22.25" x 16.00"
Reservoir Volume:	8 quarts
Warranty:	5 year limited warranty

Accessories:

**See Hydraulic Hoses; Pump Accessories for
Hose options**

Non Conductive Hydraulic Hoses

10,000 PSI Non Conductive Hoses

- 3 lengths available in 2 diameters
- Orange
- Stackable couplers (male/female)

Models:

PT2990010	10' length; 3/16" diameter
PT2990015	15' length; 3/16" diameter
PT2990025	25' length; 3/16" diameter
PT2990110	10' length; 1/4" diameter
PT2990115	15' length; 1/4" diameter
PT2990125	25' length; 1/4" diameter

Notes:

For proper care and maintenance of hydraulic hoses, consult the **Hydraulic Hose Care Manual; Form #7828**.

1/4" diameter (available for 10,000 PSI only) hose provides a higher flow rate for faster ram movement.

6,000 PSI Non Conductive Hoses

- Orange
- Stackable couplers (male/female)

Models:

PT2990210	10' length; 3/16" diameter
------------------	----------------------------

Conductive Hydraulic Hoses

10,000 PSI Conductive Hoses

- Stackable couplers (male/female)
- Steel braided with steel spring reinforced ends
- Black

Models:

PT91 8' length; steel braided with steel spring reinforced ends; stackable couplers (male/female); Black. No electrical rating.

DO NOT USE ON ENERGIZED CONDUCTOR

Notes:

For proper care and maintenance of hydraulic hoses, consult the **Hydraulic Hose Care Manual; Form #7828**.

8,800 PSI Conductive Hoses

- Stackable couplers (male/female)
- Steel braided with steel spring reinforced ends
- Black

Models:

PT76 8' length; steel braided with steel spring reinforced ends; stackable couplers (male/female); Black. No electrical rating.

DO NOT USE ON ENERGIZED CONDUCTOR

Accessories for Pumps / Hoses

PT290741 Insulated Hose Carrying Bag

- Designed for protection and cleanliness for non conductive hoses; maximum carrying capacity of 10 lbs.
- Accommodates 100 feet of non-conductive hose coiled to 17-1/2" OD and 3-3/4" wide

ALFLUID™ Hydraulic Fluid for Pumps

- **ALFLUIDQT** is quart size; **ALFLUIDGAL** is gallon size
- All weather hydraulic fluid for BURNDY® pumps types HP hand pump, FP foot pump, GP gasoline pump, and EPP electric pump

PT93 (Female) and PT94 (Male)

- Replacement couplers for 10,000 PSI operating pressure (sold separately)

PT11018 In-Line Pressure Gauge for 10,000 PSI Hydraulic Pumps

- Pressure gauge for 10,000 PSI operating hydraulic pumps

PT29091 (Male) and PT292141 (Female)

- Replacement couplers for 6,000 PSI operating pressure (sold separately)

Accessories MD6/MD7 Related

MD6CP1 Protective Jaw Covers

- Laminated vinyl jaw covers, supplied as set
- Compact, snap in place easily
- Fits all styles except Snub-Nose variations

PT6744 Jaw Cover (Snub-Nose)

- Semi-rigid Neoprene non-conductive material
- Fits all MD66 Snub-nose variations

PT49311 Die Button Repair Kit

- Replacement die button kit for MD6/MD7 tool variations

PT4925 Canvas Bag

- Sturdy canvas bag for MD6/MD7 tool variations with or without covers in place
- Holds up to 9 die sets (sold separately)

PT49521 Steel Carrying Case

- Provides storage for the following: MD6, MD66, MD68, MD614, MD637, MD638, MD7, and MD76 with or without covers (sold separately)
- Holds up to 18 die sets (sold separately)

PT6733 Hotstick Tool Carrying Bag

- Heavy-duty, adjustable canvas bag
- Accommodates 48", 60" and 72" variations of the MD6 and Y35 Hotstick tools

Accessories MD6/MD7 Related

WBG Die Set

- Double groove die set
- One (1) crimp per end on service entrance sleeves
- Requires half the number of crimps on other 5/8" sleeves

W687 & W702 Non-Bowing Die Sets

- Install one-piece, full-tension UNISPLICE™ sleeves on ACSR conductors without bowing (sold separately)

W687: Installs #4 ACSR 6/1, 7/1; YDS4RL and YDS4RLY
#2 ACSR 6/1; YS2RL and YDS2RLY

W702: Installs #2 ACSR 7/1; YDS021RL and YDS021RLY
1/0 ACSR; YDS25RL and YDS25RLY

W28K Cutter Die Set

- Cuts #4 - 4/0 ACSR, Aluminum or Copper

WDIETREE W Die Holder

- Innovative die holder as alternative to the standard die case
- Designed to hold up to 6 W dies
- Shown with die sets (not included)

CASEWDIES Compact Die Case

- Space for 12 W or X style dies (not included)

Accessories 12 and 15 Ton Related

PATPROBAG Heavy Duty Nylon Carry Bag

- Fits all PATRIOT® battery tools (excluding PATCUT4 series)
- Heavy Duty, Water-Resistant Nylon
- Corrosion Resistant Steel Hardware
- Dual Heavy Duty Zippers and Straps; Durable Base Liner and Reinforced Side Walls
- 19.4" x 11.5" x 11" and loaded with pockets for everything needed on the job

CASEUDIES15 Carry Case for U Dies

- Plastic case design for storage and protection of U dies
- Accommodates 15 die sets (standard or wide width U dies)
- Case is 11-1/4" x 7-1/2" x 3"
- Die sets sold separately
- **CASEUDIES8** also offered, holds 8 die sets

PT6545 Die Case for S or P Style Die Sets

- Metal carrying case
- Accommodates 8 S or P Style Die Sets typically used with the Y45 and Y46 series of tools

HYFLUID™ Hydraulic Fluid for HYPRESS™ Tools

- **HYFLUIDQT** - quart size; **HYFLUIDGAL** - gallon size
- Hydraulic fluid for HYPRESS™ hand tools types Y35, Y352, Y750HSXT, and Y750CHSXT

PT294021

Adjustable Head Grip for Hot Stick PT294021 for Y35 and Y750 Remote, PT10128 for Y46 Tool

- Adjustable head grip for joining HYPRESS™ heads to universal hot sticks

Y35/Y39REPKITA Seal Repair Kit

- Seal repair kit for Y35 tools or Y39 (now discontinued)

Steel Carrying Cases for Y35 and Y352

- **PT2972** - steel carrying case for Y35 tool
- **PT29360** - steel carrying case for Y352 tool

Force Test Gauges

For Battery Actuated and Self-Contained Hydraulic Tools Only

- Not recommended for remote powered heads*
- Easy to read dials
- Custom U die blanks with detent (12 & 15 ton tools)
- Custom ram puck and v-block gauge adapters (11 ton dieless tools)
- Comes complete with polymer carry case to protect blanks, adapters, and gauge; includes operating and maintenance manual.
- 1 year limited warranty

*see PT11018 in-line pressure gauge for 10,000 psi pumps

Models:

FORCEGAUGE1215 For 12 & 15 ton tools

Use with: Y750HSXT, PAT750 Series, and PAT46 Series (with PUADP1 Adaptor)

Weight & Size: 2.7 lbs; 8.30" x 4.30" x 1.50"

PT292792 For 12 ton tools

Use with: Y35

Weight & Size: 2.7 lbs; 9.25" x 3.88" x 2.00"

FORCEGAUGE11 For 11 ton dieless tools

Use with: Y644HSXT, PAT644 Series, and PAT444S Series

Weight & Size: 2.7 lbs; 9.00" x 3.98" x 1.24"

FORCEGAUGE1215 with die blanks (included)

PT292792 with die blanks (included)

FORCEGAUGE11 (adapters not shown, included)

WIREMIKE™ Stainless Steel Wire Micrometer

Available in multiple formats

- Strong, durable, high quality
- Most formats:
 - Allows for use as both caliper and ruler
 - Measures I.D. and O.D. of tubing
 - Measures thin-wall and rigid conduit including IPS
 - Measures ACSR, stranded and solid commercial cables

WIREMIKE

WIREMIKE, WIREMIKED and RK1942 are for use on:

ACSR

#6 to 336.4 (26/7) Stranded

Stranded AWG

#18 to 2000 kcmil

Solid

#20 to 4/0 AWG

IPS Tubing (Cu/Al) and Rigid Conduit:

1/4" to 2-1/2"

Tubing Sizes:

3-1/8" inside maximum; 2-15/16" outside maximum

Thin-wall Conduit:

3/8" to 2-1/2"

WIREMIKECI is for use on:

Compression Connectors and Splices (including Compression Grounding)

- #18 to 2500 kcmil Copper Class B
- #10 to 4/0 Solid Aluminum / Copper
- #18 to 3500 kcmil Concentric Aluminum
- #8 to 1100 kcmil Compact Aluminum
- #14 to 1111 kcmil Copper DLO

Also used for reference only* for inspection of completed crimp when using Butting Copper or Aluminum Dies with the 750, 46, or 35 series of tools.

- Copper Dies U8CRT to U44XRT
- Aluminum Dies U8CABT to U39ART-2

Models:

- WIREMIKE** Stainless Steel, inch/fraction markings
- WIREMIKECI** Stainless Steel, no ruler capabilities but may be used for reference on specific completed crimps (see more detail below for WIREMIKECI)
- WIREMIKED** Stainless Steel, decimal markings in place of fraction markings, same capabilities as catalog number WIREMIKE™
- RK1942** Convenience packaging of WIREMIKE™ (with inch markings) in packaging suitable for hanging on a rack; sold in multiples of 10 only

Close up for the Die Inspection Section (Used for Reference Only*)
Catalog # WIREMIKECI only

*WIREMIKECI tool is to provide measurements for reference only, not to confirm the suitability of connection. Customer is responsible to independently verify suitability of connection.

Hand Operated Torque Wrenches

Micro-Adjustable Professional Grade “Click-Type” Torque Wrenches

Tool Series: BTW

- Ratcheting, calibrated, dual direction
- Positive lock with spring-loaded pull-down lock ring
- Individually serialized with matching certificate of calibration traceable to N.I.S.T.
- ASME B107.14M-2004 and ISO 6789

For Use On:

Any mechanical connection with torque values within range of specific torque wrench. Including, but not limited to:

Types: SERVIT[®], OKLIP[™], VERSITAP[™], SCRULUG[™], Lay-In QIKLUG[™], VARITAP[™], VARILUG[™], KA-U Universal Terminals, UNITAP[™], POLYTAP[™], BARTAP[™], Type BIPC, Terminal Blocks, U-BLOK[™], SPEC-BLOK[™], VERSIPOLE[™]

Models:

BTW30150	Torque range 30 - 150 in-lbs; 10.25" long; 3/8" drive
BTW150750	Torque range 150 - 750 in-lbs; 16.00" long; 3/8" drive
BTW1575F12	Torque range 15 - 75 ft-lbs; 16.00" long; 1/2" drive

Specifications:

Accuracy:	±4% clockwise; ±6% counter clockwise of indicated value clockwise, from 20% to 100% of full scale
Applicable Standards:	ASME B107.14M-2004; ISO 6789
Calibration:	Traceable to N.I.S.T.
Warranty:	1 year limited warranty

WEJTAP™ Tooling and Accessories

WTB

- WEJTAP™ patented tool body
- One piece assembly
- Installs WEJTAP™ and STIRRUP™ connectors #8 AWG - 1590 kcmil ACSR with applicable tool head

WTBASY1

- WEJTAP™ ram replacement assembly

WTHY1S

- WEJTAP™ tool head
- Installs medium and large (yellow coded) connectors

WTHRBY1S

- WEJTAP™ tool head
- Installs small and medium (red/blue coded) connectors

WEJTAP™ Boosters

- The WEJTAP™ System requires use of boosters for installation of connectors (red, blue, and yellow boosters match connectors)
- Boosters are available packaged with connectors and also sold separately

- Red:** WPBRNBOX25
- Yellow:** WPBYNBOX25
- Blue:** WPBBNBOX25

WTOCBR and WTOCY

- WEJTAP™ removal clip for red/blue connectors (**WTOCBR**) with WTHRBY1S tool head
- WEJTAP™ removal clip for yellow connectors (**WTOCY**) with WTHY1S tool head

WTCK

- WEJTAP™ tool cleaning/maintenance kit for use with type WTB tool body
- Comes in clear carrying bag

WEJTAP™ Accessories and Kits

WHHWB

- Hand-held wire brush for cleaning surface contact areas on non-energized conductors

WTCC

- Plastic carrying case only; designed for rugged use in all weather conditions
- Accommodates WEJTAP™ installation tool, removal clips, and cleaning kit (sold separately)

WABAG

- Durable bag designed to carry installation tool(s), removal clips, cleaning kit, and hotstick accessories; Holders for power boosters located on outside of bag (all sold separately)

WEJTAP™ Hotstick Accessories

WHSCWH

- Hotstick connector clamp holds tap connector and wedge for installation on energized lines with shotgun hotstick

WHSPBC

- Hotstick dual cable clamp to hold run and tap conductors in place during installation; for all applications #8-1272 ACSR

WHSWHADP

- Hotstick angle wedge holder adapter attaches wedge clamp to universal hotstick for hotline installation

WCHAWAS

- Hotstick angle wedge holder adapter attaches wedge clamp to universal hotstick for installation using shotgun stick

WHSWB

- Hotstick wirebrush attaches to universal hotstick for cleaning the contact surface of the line conductor

WHSGB

- Hotstick breech drive; geared shotgun hotstick adapter latches to breech end of tool without disassembly for use on energized lines

WHSTA

- Hotstick tool (actuator) hammer attaches to universal hotstick for striking the actuator button to complete installation

WHSSADP

- Hotstick spring loaded 90 degree adapter; used to attach tool to universal hotstick for hotline installations

BURNDY Tool Service Gets It Done!

GET IT FIXED

Tools repaired at our Littleton, NH facility, or any of our authorized warranty repair centers, receive a one-year warranty at the time of servicing. This warranty is issued regardless of the age of the tool returned.

GET A REPLACEMENT

- Returned tools 1) beyond economic repair, or 2) discontinued and no longer repairable, can be replaced directly through the factory at a discounted price.
- Replacement tools are brand new and carry a new tool warranty.

GET A LOANER

- Tools are available for up to 60 days at no charge.
- Coverage during the repair of a returned tool and urgent customer needs, as available.

GET CALIBRATED

- Tool calibration can be factory checked for a flat fee of \$100.00.
- Calibrated tools will be returned with test data and a certificate of compliance.

GET TRAINED

- Tool repair training is offered at the factory in Littleton, NH at no charge.
- Hands-on and individualized to accommodate specific customer needs and schedules.
- On-site training and calibration options also available.

GET TECHNICAL

- Call 603-444-6781 or 800-426-8720 (toll-free) for any tooling related questions.
- Technical assistance is available for servicing and calibration questions. Talk directly with a service manager or senior service technician.

BURNDY® tools are designed, tested and assembled in the U.S. and most carry a 5-year limited warranty. Our PATRIOT® line of battery tools also have a lifetime warranty on the INFINITY DRIVE® transmission.

The Power of Our People - We Are Where You Are, When You Need Us

CUSTOMER SERVICE (24/7/365)

U.S.-based BURNDY Customer Service Professionals provide live assistance. Our customers have access to on-call 24/7 emergency support and an emergency response team equipped to initiate deliveries immediately.

FACTORY DIRECT SALES REPRESENTATIVES

With BURNDY Factory Direct Sales Representatives, you have open lines of communication with engineers, product managers, and technical service specialists to ensure that you have the best products for your applications.

INDUSTRY STANDARD COMMITTEE MEMBERS

BURNDY has representation on a wide variety of industry standard committees, such as NEMA, IEEE, CSA, UL, ANSI and IEC, and others, ensuring that our products are manufactured in accordance with these stringent industry standards.

SERVICE TO THE WEST COAST

BURNDY provides extended hours to service the West Coast. Live, New Hampshire-based BURNDY Customer Service Professionals answer your questions from 8 AM to 8 PM Eastern, Monday through Friday. BURNDY can also ship products to the West Coast until 7 PM Eastern.

STORM STOCK SERVICES — WE NEVER POWER DOWN!

Call BURNDY 24/7/365 at 800-346-4175 and press 2 to reach our Storm Emergency & Power Failure mailbox.*

Leave a voicemail message with the following information:

- Name and Company Name
- Phone Number
- Catalog Number and Quantity
- Nature of your emergency

A message in the Storm Emergency & Power Failure mailbox will activate the BURNDY Response Team. Within an hour, you will receive a call back from a BURNDY Customer Service Representative. Simultaneously, a distribution center person will be contacted to arrange for the shipping of the products ordered.

*Freight arrangements are the responsibility of the requester. A service charge of \$500 will apply to open the BURNDY warehouse.

Introduction - Basic Electrical Connections Principles

Introduction - Basic Electrical Connection Principles

Basic Factors:

The basic factors which influence the design and performance of pressure wire connections are as follows:

1. Creep
2. Surface Oxide
3. Corrosion

A fourth factor, known as thermal effects, is also a consideration, but due to the technical nature and length of this topic, it will not be discussed here.

At the outset it should be pointed out that these factors give rise to much more difficult problems in connections involving aluminum conductors than those encountered in copper to copper connections.

Creep (Cold Flow)

Creep is the cold flow of the metal under pressure and it continues until the pressure reduces to a value at which any further creep is negligible. Creep properties depend on the particular metal or alloy and on its hardness; alloys having less creep than pure metals, and harder metals have less creep than soft metals. In a typical connection, the conductors are generally of pure metal and often of soft temper and therefore, subject to considerable creep. In addition, the condition is further exaggerated when aluminum is the conductor as compared to copper, since its creep rate is many times that of copper.

Effect of Creep: Figure 2 shows typical curves of total contact resistance plotted against total contact force. Curve A shows how the contact resistance continually decreases with increasing contact force. When the full contact force F_1 is reached, the contact resistance reaches the low value of R_1 . In general, the full tightening force on a connector greatly exceeds the maximum force for which there is no appreciable creep. Therefore, the force will gradually settle down to a value after which there will be no further significant creep. Fortunately, however, the resistance does not climb back up along curve A, the tightening curve, but instead it follows a new curve B, the relaxing curve, along which the resistance changes very little until the force relaxes to a value such as F_2 .

Admittedly, the point of "no appreciable creep" is difficult to define. For pure metals, especially in the soft state, there is always some creep, even at very low pressures at room temperature. However, we do know that the pressure required to produce the same creep rate is several times greater for copper than for aluminum. Thus, to permit the same contact force F_2 for aluminum and copper, the contact area A required for aluminum can be expected to be considerably greater than that required for copper. This explains why the contact areas for connectors for aluminum must be considerably greater than for copper and why many light duty connectors for copper are entirely inadequate for aluminum, even when specially plated and when recommended compounds are used on the contact surfaces.

Relaxation: Relaxation of pressure due to creep, or for any other reason, would be a much more difficult factor in a pressure connection were it not for the relationship of contact pressure to contact resistance on the relaxation curve as shown in Figure 2. It is frequently observed that some time after the bolts of a clamp type connector are tightened, the bolt tensions are relaxed appreciably. The question arises as to whether it is necessary to retighten the bolts to the original torque value. In a properly designed connector, retightening is unnecessary since the contact resistance should increase very little due to the relaxation of pressure, as shown by the relaxation curve of Figure 2.

This fact is largely responsible for the successful operation of a compression connector. The application of the compression tool applies very high pressure, establishing very low contact resistance. The removal of the compression tool releases a very large proportion of this pressure, and creep further relaxes this pressure. Fortunately, the contact resistance increases very little due to this pressure relaxation.

Contact Force: The previous analysis shows that the total contact force largely determines the contact resistance. Thus, to achieve the desired low value of contact resistance, the proper size and number of bolts in a clamp type connector must be supplied, and the compression tool must apply the proper force to a compression connector. In addition, the connector must be designed with sufficient structural strength, contact area, and resilience, to assure that the contact force cannot relax beyond the point where contact resistance begins to rise appreciably, as shown in Figure 2.

Surface Oxide

The contact of pure metallic surfaces cannot be assured in practical connections. Surface contamination must be expected, especially surface oxidation. These surface films are insulators as far as contact resistance is concerned, and they must be broken to achieve metal to metal contact to make an adequate electrical connection. The difficulty of breaking the film depends on the nature of the film, its thickness, and the metal on which it is formed.

Copper oxide is generally broken down by reasonably low values of contact pressure. Unless the copper is badly oxidized, good contact can be obtained with very little or no cleaning.

Silver oxide is even more easily broken down by the contact pressure; and since silver oxide forms less readily at elevated temperatures, silver contact surfaces are preferred over copper when used for high temperatures. For this reason, it is considered good practice to silver plate copper contact surfaces that must operate at temperatures over 200 ° C.

Figure 2

On the other hand, aluminum oxide is a hard, tenacious, high resistance film that forms very rapidly on the surface of aluminum exposed to air. In fact, it is the toughness of this film that gives aluminum its good corrosion resistance. The oxide film that forms after more than a few hours is too thick and tough to permit a low resistance contact without cleaning. The aluminum oxide film is transparent so that even the bright and clean appearance of an aluminum connector is no assurance that the low contact resistance can be attained without cleaning.

In addition to the necessity for cleaning the oxide from aluminum, the surface should be covered with a good connector compound to prevent the oxide from reforming. Common practice is to clean the surface

with a wire brush or emery cloth. The compound should be applied immediately after cleaning, or the compound should be put on first and the surface scraped through the compound. Present practice is to scratch brush dry and to apply the compound immediately thereafter. This allows a more thorough job of cleaning the conductor.

Introduction - Basic Electrical Connections Principles

Introduction - Basic Electrical Connection Principles (continued)

Contact Compounds: Petrolatum or No-Oxid are good contact surface compounds for aluminum, but BURNDY® PENETROX™ A, a petroleum type compound containing zinc dust, has the additional advantage of assisting in the breaking down of the contact resistance. How this is accomplished is not certain, but it

appears that the zinc particles of PENETROX™ A probably act as current bridges in the breaks in the oxide film. For more complete information about the PENETROX™ line of compounds, refer to the Accessories section of this catalog.

Interstrand Resistance: The high contact resistance due to the oxide on the strands of an aluminum cable may be responsible for a poor distribution of current among the strands on the cable. Thus, the outer strands may carry much more than their share of the current and overheating of the cable may result. Tests have shown that even on new cable this effect of interstrand resistance can be considerable unless a good contact compound is used. The clamping action tends to break down the oxide and force the compound between the strands. This is particularly true of compression connectors due to the very high unit pressures developed.

The most effective way to break down interstrand resistance of aluminum cable is to use compression connectors filled with a compound having zinc particles. Then, when the end of the cable is inserted in the connector, the compound is forced between the strands where it very effectively breaks down the interstrand resistance upon application of the compressive force.

Plating Aluminum: Plating the contact surfaces of aluminum connectors will prevent the formation of aluminum oxide. Electro-tin, cadmium and zinc platings have been used for this purpose. However, the use of a plated aluminum connector does not make it less necessary to scratch brush the aluminum conductor, nor does it reduce the need for a good contact compound. Additional problems are introduced due to the plating on aluminum which render it of very doubtful value over the proper use of base aluminum. This will be more fully discussed later.

Corrosion

The electrical conductivity and mechanical strength of an electrical connection must remain stable under the deteriorating influences of the environment. This deterioration is corrosion. It is the electrolytic action of moisture and other elements of the atmosphere in conjunction with the metals of the connection. If the conductors and connectors are of copper or a corrosion resistant copper alloy, corrosion is usually a minor factor. However, it is a very vital factor if aluminum is involved.

If moisture can be kept away from the connection, corrosion will not be a factor. The electrical connection of a high voltage splice on insulated cable is generally free from corrosion since the taping may be used to avoid corrosion on bare cable, provided it excludes moisture. It is difficult to get a good tape seal to the conductor itself, especially on stranded cable. If moisture does penetrate the taping, it will not dry out as readily as if the joint were untaped. Various plastic materials are available today for covering low voltage connections or for bare conductor connections on high voltage. Unless such coverings are completely moisture-proof, it is better to rely on installation with a good contact compound, using a connector designed to resist corrosion.

Galvanic Action: Whenever dissimilar metals are in the presence of an electrolyte, a difference in electric potential is developed. One metal becomes the cathode and receives a positive charge. The other becomes the anode and receives a negative charge. When these metals are in contact, an electrical current will flow, as in the case of any short-circuited electric cell. This electrolytic action causes an attack of the anodic metal, leaving the cathodic metal unharmed. The extent of the attack is proportional to the strength of the electrolytic current, which in turn is proportional to the electric potential difference developed.

The magnitude of the potential difference generated between two dissimilar metals can be seen by the position of these metals in the electrolytic series. Figure 3 is such a series. When two metals are in contact in an electrolyte, the one higher up in this series is the anode, the corroded metal, while the one lower is the cathode, the protected metal. The further apart the metals are in this series, the greater the electrolytic potential difference, and the greater the attack to the anodic metal.

Note that copper and aluminum are quite far apart in the series, copper being cathodic and aluminum anodic. Hence, when aluminum and copper are in contact in an electrolyte, the aluminum can be expected to be severely attacked.

Crevice Corrosion: Electrolytic attack can also occur between like metals due to a phenomenon known as oxygen concentration cell or crevice corrosion. Since oxygen is necessary for corrosive action, a variation in the concentration of oxygen where a metal is exposed to an electrolyte will generate a difference of potential, and cause a corrosive attack in the oxygen starved area. Thus, since an electrolyte in a deep crevice is freely exposed to the air at the outside, the concentration of oxygen will be greatest at the mouth of the crevice. Then corrosion can be expected to occur in the crevice remote from the surface. Crevice corrosion can be prevented if the crevice is filled with a compound to exclude moisture. Thus, within the contact groove of an aluminum connector containing an aluminum conductor, there will be numerous crevices in which corrosion will take place unless a good connector compound is applied during installation. Copper, being a more noble metal, appears to be much less subject to crevice corrosion.

Corrosion Testing: The effectiveness of an electrical connection to resist corrosion can be tested in the laboratory under conditions designed to greatly accelerate the natural corrosive conditions of actual service. The most widely accepted means is the standard salt spray chamber. In this chamber the specimens are placed in a salt fog made by atomizing a 20% salt solution at 100° F.

BURNDY, as well as other manufacturers and utility companies, have done a great deal of testing and a considerable area of agreement has been reached. There are, however, minor differences in recommended practices. The problem is concerned with aluminum and aluminum to copper connections since the effect of corrosion on copper to copper connections is far less serious. Let us study the recommended practices.

Aluminum to Aluminum Connections: For joining aluminum to aluminum conductors, there is little disagreement that an aluminum bodied connector is the proper choice, since this obviously eliminates the galvanic corrosion of dissimilar metals. However, even in this case, care must be taken to prevent crevice corrosion and to select an alloy of aluminum for the connector body that is free from cracking due to stress corrosion.

Aluminum to Copper Connections: Similarly, for joining aluminum to copper conductors, an aluminum bodied connector is the best choice since it prevents galvanic corrosion of the aluminum conductor, the most vulnerable element to attack in the connection. Realizing this, BURNDY initiated a research program aimed at finding the best way to make an aluminum connector suitable for joining aluminum to copper conductors.

This led to the evolution of the "Massive Anode Principle" of connector design for joining conductors of dissimilar metal. On the basis of this principle, properly designed, all-aluminum connectors became available for universal use in joining aluminum to aluminum or aluminum to copper conductors.

Massive Anode Principle: By making the aluminum connector massive in comparison to the copper conductor, when the copper conductor emerges from the connector, the electrolytic current density over the exposed face of the aluminum connector is greatly reduced. This is schematically represented in Figure 4. Since the rate of corrosion is directly related to the current density on the surface of the anodic material, the relatively large face of the aluminum connector will suffer only minor attack.

Figure 3

In addition, because the aluminum connector body is massive in the region where the corrosion occurs, the small loss of metal caused by corrosion is insignificant, even after long periods of service. Furthermore, the connector design should be such that clamping bolts, and areas of high stress which provide structural strength, are not in the regions subject to galvanic attack.

The effectiveness of this theory has been amply demonstrated in salt spray corrosion tests in which the connectors were subject to 1,000 hours in the salt spray fog with only minor corrosive pitting adjacent to the copper conductor, as seen in Figure 5. In addition, the aluminum conductor was completely protected, and the joint resistance remained virtually unchanged. The test involved a wide variety of sizes and types of connectors showing the effectiveness for small service connectors as well as large power connectors. Figure 6 shows a large all aluminum clamp type T connector installed on 3-1/2" diameter copper run and 750 kcmil aluminum tap. The figure shows this connector which was opened up after 1,400 hours of the salt spray test. Note that the contact surfaces are bright and clean and the only evidence is minor pitting along the faces adjacent to the copper.

*It should be emphasized that a good compound should be used on the contact surfaces whether aluminum or copper is used in an aluminum connector.

Position of Conductor: A properly designed aluminum connector for joining aluminum to copper must provide adequate separation between the conductors to prevent electrolytic attack on the aluminum conductor. Even then, it is good practice to install the aluminum conductor above the copper conductor if possible. This will prevent pitting of the aluminum conductor due to copper salts being washed over the aluminum.

Figure 4

Plated Aluminum Connectors: Plating has been used as a means to make an aluminum connector suitable for copper conductor. Such platings as copper, zinc, tin and cadmium have been used. The plating of aluminum is much more critical than plating a more noble metal such as copper. In addition, a preplate, usually of copper or brass, must be applied, thus introducing numerous metals and further possibilities for galvanic corrosion.

To be effective in reducing galvanic corrosion between the copper conductor and the aluminum connector, the plated metal must be closer in the Electrolytic Series to copper than is aluminum. It must therefore, be cathodic to aluminum. Since porosity and minor scratches are always present, galvanic action can be expected in the presence of moisture, resulting in attack of the aluminum under the plating. Corrosion tests reveal attack in the form of a mottled appearance and flaking of the plating.

In addition, the presence of plated metal can cause galvanic attack of the aluminum conductor, thus reducing the protection offered to this conductor in an aluminum connector.

Introduction - Basic Electrical Connections Principles

Introduction - Basic Electrical Connection Principles (continued)

Cleaning and the Use of Compound: It should be emphasized that when aluminum connectors or conductors are involved, proper cleaning of the aluminum and the use of a good connector compound, such as BURNDY PENETROX™ A, are essential for trouble-free service. BURNDY, as well as other manufacturers, provide the contact grooves with a coating to make it unnecessary to clean the connectors, but in all cases the aluminum conductor should be cleaned by means such as scratch brushing, and immediately coated with the connector compound.

To simplify the application of the compound, and to assure its use, almost all BURNDY aluminum connectors, except the large clamp type substation connectors, are supplied factory filled with PENETROX™ compound. For the tubular compression connectors, the tubular barrels are sufficiently filled with PENETROX™ and capped. For other types, the contact grooves are filled with PENETROX™ and enclosed in plastic packaging in a process called 'stripsealing'.

Clamp vs. Compression: In general, a compression connection can be expected to be more corrosion resistant than a clamp connection. The high pressures applied to a compression connector more effectively seal the contact against the penetration of moisture. The tubular sleeve of a compression connector has no side openings such as exist in clamp connectors between the clamping members. On the other hand, the clamp connector can be made more corrosion resistant if the conductor grooves conform more closely with the conductor contour. Thus a clamp connector made to accommodate a wide range of conductor sizes cannot be expected to be as corrosion resistant as one designed for one specific conductor size. Nevertheless, the differences in effectiveness of various designs can be minimized if a good contact compound is used.

Large Aluminum Bolted Connector Joining Copper Run to Aluminum Tap After Severe Salt Spray Test.

Hardware Data

HARDWARE DATA

Recommended Tightening Torque

The hardware used in connectors must be compatible with the connector material, have high mechanical strength and be corrosion resistant.

Copper alloy connectors have hardware made of DURIMUM™, which is the BURNDY trade name for silicon bronze alloy ASTM B99. This material was first introduced by BURNDY in 1927 for use in outdoor construction and today is the standard throughout the industry.

Aluminum connectors generally have aluminum alloy hardware. The bolts are 2024T4 and anodized to resist corrosion. The nuts are 6061T6, which is resistant to corrosion and does not require anodizing. Bolts are lubricated to eliminate galling and to provide consistent clamping forces.

The size material for clamping hardware are selected to provide the required force when tightened to the recommended torque. To reduce or greatly exceed the recommended torque can adversely affect the performance of the connector.

Steel Hardware	
Bolt Size	Recommended Torque (Inch Pounds)
1/4 - 20	80
5/16 - 18	180
3/8 - 16	240
1/2 - 13	480
5/8 - 11	660
3/4 - 10	1050

Aluminum Hardware	
Bolt Size	Recommended Torque (Inch Pounds)
1/2 - 13	300
5/8 - 11	480
3/4 - 10	650

Recommended Clamping on Bolted Connectors:

When installing a bolted connector, an appropriate sequence needs to be followed.

INSTALLATION INSTRUCTIONS:

1. Nuts need to be tightened up to 30% of expected torque.
2. A check needs to be done to ensure the clamping elements are even.
3. Tightening has to follow a sequence (1-6) as shown below. As a general rule, the torque has to be applied to the nut. For ease of installation most connectors are designed for one wrench installation. A torque wrench is recommended when tightening the nut to ensure the proper torque is applied.

1) Tightened up to 30%

BURNDY offers three sizes of professional grade torque wrenches, catalog number **BTW30150** to be used on connectors requiring 30-150 in-lbs., the **BTW150750**, designed for 150-750 in-lbs., and the **BTW1575F12**, designed for 15 - 75 ft-lbs. These are micro-adjustable “click-type” torque wrenches featuring an easy-to-read scale that can be easily matched to the recommended torque of our mechanical connector products.

[†] For compact-stranded constructions, the number of wires may be reduced as follows:

19-Wire Constructions - 18 Wires Minimum

61-Wire Constructions - 58 Wires Minimum

127-Wire Constructions - 122 Wires Minimum

37-Wire Constructions - 35 Wires Minimum

91-Wire Constructions - 87 Wires Minimum

† The designation "inch" is the approximate diameter in proper fraction of an inch.

‡ The designation AWG is a combination of the number of wires each of the American Wire Gauge size indicated by "No."

* Diameter of circumscribing.

** Breaking loads of 7-wire and 19-wire conductors are taken as 90% of the sum of the breaking loads of individual wires; breaking load of 3-wire conductors is taken as 95% of the sum of the breaking loads of the individual wires.

Die Index Reference

DIE INDEX REFERENCE

This chart provides a cross reference between die index numbers marked on **BURNDY® Compression Connectors** and corresponding **BURNDY® Die Sets** used with the various **BURNDY® Installation Tools**.

This is the only way to have complete connections with **The BURNDY® Engineered System**.

A die index number has been assigned to each required groove configuration. A prefix letter is used to indicate the specific installation tool for which the die has been designed, as shown.

DIE PROFILES

CHART I - Tool Type

B = Y34BH	U = 35 and 750 Series, 46 Series w/PUADP1 U-die Adapter
D = Y29BH	
L = 60 Series	UM = OEM840NCP, 750 Series, 46 Series w/PUADP1 U-die Adapter
N = M8ND	
P = 46 Series	W = MD and PATMD Series, PAT500SJ, PAT600
S = Y45	X = MD6 and MD7 Series

CHART II - Wire Size

12 = #12 AWG	27 = 3/0
10 = #10 AWG	28 = 4/0
8C = #8 AWG	29 = 250 kcmil
6C = #6 AWG	30 = 300 kcmil
5C = #5 AWG	31 = 350 kcmil
4C = #4 AWG	32 = 400 kcmil
3C = #3 AWG	34 = 500 kcmil
2C = #2 AWG	36 = 600 kcmil
1C = #1 AWG	39 = 750 kcmil
25 = 1/0	44 = 1000 kcmil
26 = 2/0	

Or INDEX NUMBER: Example U312 = **312** Die Index

CHART III - Die Style

- A** = Aluminum
- R** = Round (circumferential)
- T** = Twin Die (both halves)

Footnotes for the chart in the following pages:

- ① - Cat. No. Y35P3 Adapter is required to use "Y34PR" type indenters with "U" type nest dies in 35 and 750 Series
- ② - Cat. No. PT6515 Adapter is required to use "U" type dies in Y45
- ③ - Cat. No. PUADP1 Adapter is required to use "U" type dies in 46 Series
- ④ - These sizes (250 - 500 kcmil) are not recommended for use with MD6 & MD7 Series tools due to high handle force
- ⑤ - Hexagonal crimp
- ⑥ - Die 302 recommended for 1.84 O.D. barrel
- - Index 302 Dieless: can only be crimped with the 444S series, Y644MBH or Y644MBHF

BURNDY Standard Terms and Conditions of Sale

1. Applicability. **BURNDY, LLC** ("Seller") hereby offers for sale to the buyer named on the face hereof ("Buyer") the products listed on the face hereof (the "Products") on the express condition that Buyer agrees to accept and be bound by the terms and conditions set forth herein. Any provisions contained in any document issued by Buyer are expressly rejected and if these terms and conditions differ from the terms of Buyer's offer, this document shall be construed as a counter offer and shall not be effective as an acceptance of Buyer's document. Buyer's receipt of Products provided hereunder will constitute Buyer's acceptance of these terms and conditions. This is the complete and exclusive statement of the contract between Seller and Buyer with respect to Buyer's purchase of the Products. No waiver, consent, modification, amendment or change of the terms contained herein shall be binding unless in writing and signed by Seller and Buyer. Seller's failure to object to terms contained in any subsequent communication from Buyer will not be a waiver or modification of the terms set forth herein. All orders are subject to acceptance in writing by an authorized representative of Seller.

2. Prices. Prices in written quotations issued by Seller are valid for thirty (30) days. All other prices are subject to change at any time, unless otherwise expressly agreed by Seller. Any prices shown in published literature are maintained as a general source of information and are not quotations or offers to sell. Seller reserves the right to make corrections due to typographical, clerical or engineering errors or due to incomplete or inaccurate information from Buyer. Prices for accepted orders may change due to customer order, quantity, material or engineering changes.

3. Taxes. Prices do not include any state, local, use or excise taxes, duties or other charges now or hereafter imposed for which Seller may be liable as a result of the sale, use or delivery of the Products ("Taxes"). In the absence of proper evidence of exemption supplied by Buyer to Seller, Buyer will be responsible for any and all such Taxes.

4. Minimum Order Quantity. Orders are subject to standard package sizes.

5. Payment Terms. Subject to credit approval, unless otherwise specified on the quotation or invoice, payment terms shall be Net 30 days from the date of invoice. All payment shall be in US dollars. If Buyer fails to pay any amounts when due, Buyer agrees to pay Seller interest thereon at a periodic rate of the greater of the maximum percentage allowed by law or 1% per month. Buyer will also be responsible for all costs and expenses, including attorneys' fees incurred by Seller in collecting any overdue amounts or otherwise enforcing Seller's rights hereunder.

6. Shipping and Delivery. Estimated delivery dates are provided in the quotation or acknowledgment, and shall not represent a fixed or guaranteed ship date. Unless otherwise agreed to by Seller, Seller reserves the right to ship at its convenience and/or ship and invoice for partial orders. All deliveries are FCA Seller's location (INCOTERMS 2010); freight may be pre-paid and added to invoice. Seller may stop delivery of Products in transit and/or withhold shipments in whole or in part if Buyer fails to make any payment to Seller when due or otherwise fails to perform under these terms. In the event of a delay due to any cause beyond Seller's reasonable control, Seller reserves the right to terminate the order or to reschedule the shipment within a reasonable period of time, and Seller shall not be responsible for any damages resulting from delay. If delivery is delayed due to any cause within Buyer's control, Seller may place the Products in storage at Buyer's risk and expense and for Buyer's account.

7. Title and Risk of Loss. Title and risk of loss to the Products shall pass to Buyer upon delivery by Seller to the carrier.

8. Cancellations>Returns. Orders may not be cancelled or modified once accepted by Seller unless agreed upon in writing by Seller. Any cancellation or return of Products shall be subject to Seller's return policies, and may be subject to Seller's cancellation or restocking fee. Seller's restocking policy is available upon request. Non-stock or special order items are non-cancellable and non-returnable. No returns shall be permitted without a Return Material Authorization (RMA).

9. Packaging.Allocation. All Products are packaged in accordance with Seller's standard packaging, unless otherwise agreed upon by the parties. Additional or modified packaging requirements may result in an increase in price. In the event of inability for any reason to supply the total demand for the materials or Products specified, Seller may allocate its available supply among any or all purchasers, at its discretion and without liability for failure of performance that may result therefrom.

10. Tooling. Any tooling required for an initial order will be billed to Buyer. Any Non-Recurring Engineering (NRE) charges invoiced by Seller shall not be deemed to grant any right, title or interest in any tools, dies, jigs, fixtures and items of like nature, or in any design, engineering, trade secret, patent or other proprietary rights embodied in the tooling, upon Buyer's payment of such charges and such items shall at all times be, and remain, the property of Seller.

11. Warranty.

11.1 Seller warrants that the Products will perform substantially in accordance with Seller's published specifications (or other applicable specifications as agreed upon in writing by Seller) and will be free from defects in material and workmanship, when subject to normal, proper and intended usage by properly trained personnel, for the following warranty period, which shall begin on the date of shipment by Seller (the "Warranty Period"): (a) Tools: The Warranty

Period shall be as specified in the product literature or, if no period is so specified, five (5) years; (b) UL Listed Products: the Warranty Period shall be two (2) years; (c) for all other products, the Warranty Period shall be 30 days. (d) For UL Certified Compression Connection (the "Connection"), provided that the Connection is made using (i) a recommended and properly calibrated tool, (ii) a recommended and properly calibrated die set, and (iii) a compression connector manufactured by Seller and specified in the UL Listing for such connection, and Buyer otherwise complies with the requirements set forth in the applicable UL Listing, Seller warrants that the Connection will conform with the UL Listing for a period of 5 years from the date the Connection is made, provided such Connection is made within one year of the purchase of the connector used in the Connection. 11.2 Remedies. During the Warranty Period, Seller agrees to repair or replace, at Seller's option, Products in order to ensure that the Products perform in accordance with the applicable specifications provided that Buyer shall (a) promptly notify Seller in writing upon the discovery of any defect, which notice shall include the product model and serial number (if applicable) and details of the warranty claim; and (b) after Seller's review, Seller will provide Buyer with a RMA. Buyer may return the defective Products to Seller with all costs prepaid by Buyer. In case of a defect in the Connection during the Warranty Period, Seller shall replace the connector used to make such connection. All replaced parts shall become the property of Seller. Shipment to Buyer of repaired or replacement Products shall be made in accordance with the Delivery provisions herein. Any consumables, including but not limited to, bulbs and batteries, are excluded from warranty. Seller will have no obligation to make repairs, replacements or corrections which are defective as a result of: (i) **normal wear and tear**, (ii) **Buyer's misuse, fault or negligence**, (iii) **use of the Products in a manner for which they were not designed**, or (iv) **improper storage, maintenance, installation and handling of the Products, and in the case of the Connection, Buyer's failure to use Seller's Tool, connector and die set Products, as specified in 11.1 (d) above, and in accordance with the requirements of the UL Listing for such Connection**. If Seller determines that Products for which Buyer has requested warranty services are not covered by the warranty hereunder, Buyer shall pay or reimburse Seller for all costs of investigating and responding to such request at Seller's then prevailing time and materials rates. If Seller provides repair services or replacement parts that are not covered by this warranty, Buyer shall pay Seller therefor at Seller's then prevailing time and materials rates. THE OBLIGATIONS CREATED BY THIS WARRANTY TO REPAIR OR REPLACE A DEFECTIVE PRODUCT SHALL BE THE SOLE REMEDY OF BUYER IN THE EVENT OF A DEFECTIVE PRODUCT OR SERVICE. EXCEPT AS EXPRESSLY PROVIDED HEREIN, SELLER DISCLAIMS ALL OTHER WARRANTIES, WHETHER EXPRESS OR IMPLIED, ORAL OR WRITTEN, WITH RESPECT TO THE PRODUCTS, INCLUDING WITHOUT LIMITATION ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. In no event will Seller's aggregate liability under warranty exceed the price paid by Buyer for the defective Product. Products supplied by Seller that are obtained by Seller from a third party supplier are not warranted by Seller. At its discretion and to the extent Seller is permitted, Seller agrees to assign to Buyer any warranty rights in such Product that Seller may have from the third party supplier. The Warranty Period for replacement Products shall be the remainder of the original Warranty Period.

12. Intellectual Property. Seller's specifications and design of the Products and any developments, improvements and intellectual property created under this order, whether made solely by a party or jointly by Buyer and Seller ("Intellectual Property") shall be owned by Seller. Buyer is not granted any interest, right or license with respect to any such intellectual property, except to the extent required to use the Products for the purpose for which it is specifically provided to Buyer in accordance with these terms and conditions.

13. Software. With respect to any software incorporated in or forming a part of the Products hereunder ("Software"), Seller and Buyer intend and agree that such Software is being licensed and not sold. Notwithstanding anything to the contrary contained herein, Seller or its licensor, as the case may be, retains all rights and interest in Software. Seller hereby grants to Buyer a royalty-free, non-exclusive, nontransferable license, without power to sublicense, to use Software provided hereunder solely in connection with the Products and to use the related documentation solely for Buyer's own internal business purposes. This license will terminate when Buyer's lawful possession of the Products ceases, unless earlier terminated as provided herein. Buyer agrees to not sell, transfer, license, loan or otherwise make available in any form Software to any third party. Buyer may not disassemble, decompile or reverse engineer, copy, modify, enhance or otherwise change or supplement the Software without Seller's prior written consent. Seller may terminate this license if Buyer fails to comply with any term or condition herein.

14. Indemnity. By Seller. Seller agrees to indemnify, defend and save Buyer from and against any and all damages, liabilities, actions, causes of action, suits, claims, demands, losses, costs and expenses (including without limitation reasonable attorney's fees) ("Claims") for (i) personal injury or death or damage to real property to the extent caused by the negligence or willful misconduct of Seller, its employees, agents or representatives in connection with the performance of services at Buyer's premises and (ii) claims that a Product infringes any valid United States patent, copyright or trade

BURNDY Standard Terms and Conditions of Sale

secret. Notwithstanding the foregoing, Seller shall have no liability to the extent any such Claims are caused by either (i) the negligence or willful misconduct of Buyer or third party, (ii) use of a Product in combination with equipment or software not supplied by Seller where the Product would not itself be infringing, (iv) Seller's compliance with Buyer's designs, specifications or instructions, (v) use of the Product in an application or environment for which it was not designed or (vi) service, installation or modification of any Product except by Seller. Buyer shall provide Seller prompt written notice of any Claims and Seller shall have the right to assume exclusive control of the defense of such claim or, at the option of the Seller, to settle the same. Buyer agrees to cooperate reasonably with Seller in connection with the performance by Seller of its obligations in this Section. Notwithstanding the above, Seller's infringement related indemnification obligations shall be extinguished and relieved if Seller, at its discretion and at its own expense (a) procures for Buyer the right, at no additional expense to Buyer, to continue using the Product; (b) replaces or modifies the Product so that it becomes non-infringing, provided the modification or replacement does not adversely affect the specifications of the Product or (c) if neither of the preceding is reasonably practicable, refund the purchase price for the Product. THE FOREGOING INDEMNIFICATION PROVISION STATES SELLER'S ENTIRE LIABILITY TO BUYER FOR THE CLAIMS DESCRIBED HEREIN.

By Buyer. Buyer shall indemnify, defend and hold harmless Seller from and against any and all Claims to the extent arising from or in connection with (i) the negligence or willful misconduct of Buyer; (ii) use of a Product in combination with equipment or software not supplied by Seller where the Product itself would not be infringing; (iii) Seller's compliance with designs, specifications or instructions supplied to Seller by Buyer; (iv) use of a Product in an application or environment for which it was not designed; or (v) modifications of a Product by anyone other than Seller.

15. Limitation of Liability. Notwithstanding anything to the contrary contained herein, Seller's aggregate liability for any claim of any kind shall not exceed the price paid by Buyer for the products giving rise to such claim. IN NO EVENT SHALL SELLER BE LIABLE FOR SPECIAL, INCIDENTAL, LIQUIDATED, OR CONSEQUENTIAL DAMAGES HOWSOEVER ARISING OUT OF SELLER'S PERFORMANCE (OR NON-PERFORMANCE) OF THE CONTRACT AND NOTWITHSTANDING WHETHER BUYER MAY HAVE BEEN ADVISED OR IS ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

16. Compliance with Laws. Export Laws. Seller agrees to observe and comply with all applicable federal, state and local laws, rules, regulations, including but not limited to all applicable laws, regulations, laws, treaties, and agreements relating to the export, re-export, and import of any Product or part of Product. Buyer shall not, without first obtaining any required license to do so from the appropriate U.S. government agency; (i) export or re-export any Product or part of a Product, or (ii) export, re-export, distribute or supply any Product or part of a Product to any restricted or embargoed country or to a person or entity whose privilege to participate in exports has been denied or restricted by the U.S. government. At Seller's request, Buyer will provide information on the end user and end use of any Product or part thereof exported or to be exported by Buyer. Buyer shall cooperate fully with Seller in any audit or inspection related to applicable export or import control laws or regulations, and shall indemnify and hold Seller harmless from, or in connection with, any violation of this section by Buyer or its employees, consultants, or agents.

17. Miscellaneous. (a) Any legal claim shall be controlled under the laws of the state of the Seller's primary place of business. Seller and Buyer agree to accept and be bound by the exclusive jurisdiction of the federal and state courts thereof. The application to this Agreement of the U.N. Convention on Contracts for the International Sale of Goods is hereby expressly excluded.

(b) In the event that any one or more provisions contained in these terms shall be held by a court of competent jurisdiction to be invalid, illegal or unenforceable in any respect, the validity, legality and enforceability of the remaining provisions contained herein shall remain in full force and effect.

(c) Seller's failure to enforce or waiver of a breach of any provision contained herein shall not constitute a waiver of any other breach or of such provision.

(d) Any notice or communication required or permitted hereunder shall be in writing and shall be deemed received when personally delivered or three (3) business days after being sent by certified mail, postage prepaid, to a party at the address specified herein or at such other address as either party may from time to time designate to the other. (e) Buyer may not assign or delegate any rights or obligations without Seller's prior written consent. (f) Seller reserves the right to place a Lien and notifications of liens should Seller not be paid for equipment provided hereunder. (g) Buyer agrees that all pricing, discounts, data, design and technical information, operations/maintenance manuals, testing procedures, drawings, schematics and any other information regarding the Products or Seller's processes provided by Seller to Buyer are the confidential and proprietary information of Seller. Buyer agrees to (a) keep such information confidential and not disclose such information to any third party, and (b) use such information solely for Buyer's internal purposes and in connection with the Products supplied hereunder. Nothing herein shall restrict the use of information available to the general public.
