

An edge-lit wafer for every need.

The broadest field-adjustable wafer family out there.

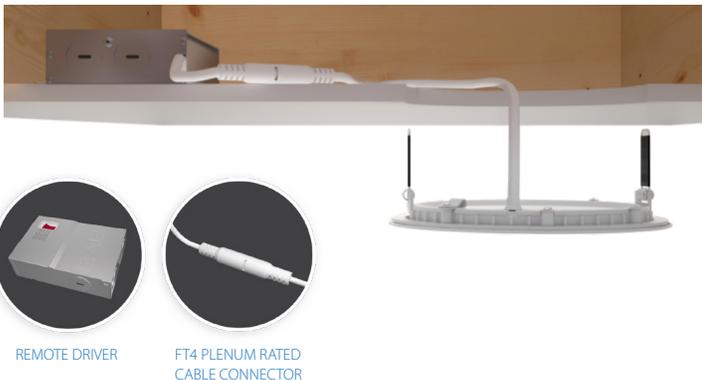

Five color temperatures to choose from.

These wafers all have field-selectable CCT, making changes as easy as the flick of a switch.

Countless design options.

This incredibly versatile line has an option for every need. Wafers are available in 3, 4, 5, 6, and 8" models with either smooth or baffle trims. Square models are also offered, and for a completely flush look, there are shallow wafers.

Remote driver.

Installations are super flexible with an off-board driver that minimizes installation height and eliminates the need for a traditional recessed housing.

Economy that performs.

All wafers are dimmable—with most common TRIAC/ELV (120V) and 0-10V (120-277V) dimmers*. All models are Title 20 & Title 24 compliant. 90 CRI provides accurate color rendering, making them ideal for commercial applications where color is critical.
