Cover Closed

Easy to install

1 Determine box location. Cut a 4- 7/16" square opening in countertop. Insert box, bending the clip as necessary to go through opening.

2 Secure box to countertop by tightening two #10 screws inside box...

UNDERSIDE of COUNTER

3 ...drawing the box securely against the underside of the counter. NO GLUING!

4 Wire receptacle in accordance with National, State and local codes.

5 Install trapdoor coverplate to box using the two #6-32 screws provided.
Note: Round cover hides miscut openings

Arlington's **Countertop BOX KITS** with round covers give you *lots of options* for installing a device in a countertop.

Get your kit with an installed UL Listed tamper and weather resistant (TWR) decorator-style GFCI... Or tamper resistant (TR) receptacle... OR a combo with (TR) receptacle and two USB ports!

The gasketed, stainless steel **ROUND TRAPDOOR COVERS** look great! They close flush with the countertop, providing 'ingress protection' and preventing damage to the devices in the box. The round shape also covers a miscut opening.

Easy, secure installation

A spring clip holds the box securely against the surface when the screws are tightened. The clip is also 'bendable' so it's easy to insert into the opening in the countertop

- Fits granite or other countertop material up to 1-1/2" thick
- Easy 'No Glue' installation
- Complies with NEC section 406.5 (E) for use in countertops or similar work surfaces

- Ingress Protection Rated

Secure
'NO GLUE'
