

Achieve Reliable Lockout in More Circuit Breaker Applications

IDENTIFY YOUR CIRCUIT BREAKER MODEL TO SELECT THE RIGHT MASTER LOCK LOCKOUT DEVICE

Single Toggle
1-, 2- and
3-Pole Miniature
Breakers

Most Tie Bar
2- and
3-Pole Miniature
Breakers

**S3821 Lockout Device -
Miniature Circuit Breakers
(120/240 V)**

Compact size allows for locking out adjacent breakers. Suitable for locking out multi-pole breakers and works with most tie-bar toggles

Molded Case Breakers

**S3822 Lockout Device -
Molded Case Circuit Breakers
(480/600 V)**

Permanently fixed cleat adds physical blocking capability

Molded Case Breakers
with Oversized Handles

**S3823 Lockout Device -
Oversized Handle Circuit Breakers
(480/600 V)**

Fold-down cleat provides enhanced switch throw blocking when needed

Contact your Master Lock Representative to discuss lockout options for Tandem Miniature Breakers, AFCI or GFCI Miniature Breakers and ISO/DIN Breakers

DISCLAIMER:

The chart contained within this document should be used as a reference to match circuit breaker models with the circuit breaker lockout device. Please note that wear and tear of the circuit breaker and the lockout device as well as future revisions to the circuit breaker designs may affect fitment of the lockout device on the circuit breaker. Thus, the chart does not guarantee proper fitment and should only be used as a guide.

The circuit breaker manufacturer's product family as well as lockout device dimensions are also provided to help determine if this lockout device will fit to the switch handle of circuit breaker application. In cases where the switch handle does fit within the lockout device, proper fitment is still not guaranteed.

The user is responsible for verifying the lockout device is suitable for its intended use and for properly installing the device and ensuring that it protects against unintended equipment activation. Please refer to the product instruction sheet for proper lockout device / circuit breaker installation.
