Residential Electric Vehicle Charging Solutions

LEVITON
®

Connectivity

A smart solution for every room in your home, including your garage!

Leviton is proud to be a pioneer in the electric vehicle supply equipment (EVSE) industry, providing charging solutions for over a decade while keeping up with the latest technology. My Leviton enabled solutions offer a full portfolio of connected devices so any home, new or old, can be a smart home.

Flexible Control

Manage
your whole
smart home
with the
My Leviton
App

View all smart devices
on one dashboard

View charging status and
remotely start/stop

Schedule charging sessions
during off-peak utility hours
to save on electricity costs

Speed

Charge ANY electric vehicle faster!

What is the difference between a Leviton **Level 2** charging station and the **Level 1** charging station I received with my vehicle?

LEVEL 1

Averages ~5 miles of range per 1 hour of charging.*

- Typically provided with an EV purchase, using a J1772 connector
- Rated 120 Volts and can be plugged into a standard NEMA 5-15 household outlet

LEVEL 2

Averages ~25 miles of range per 1 hour of charging.*

- The most common type of charging stations in the U.S. and North America, using a J1772 connector
- Rated 240 Volts, are often hardwired, and charge faster than Level 1

With an industry standard SAE J1772 cable, the EV Series can charge any EV, including Audi, BMW, Ford, Honda, Subaru, and even Tesla using Leviton NACS Adapter (Part Number: NACSA)

LEVEL 2 EV CHARGING

Rebates & Incentives

LEVITON

Stay up to date on
the latest rebates
& incentives in
your area

Get money
back for your
station!

There are many Federal and State incentives being offered to promote the widespread adoption of electric and other alternative fuel vehicles, including tax breaks, reduced utility rates and more.

Depending on your location, you can get up to **100% off** your charging station!
