KNIPEX Quality – Made in Germany

Pliers Wrench – 7 1/4" length
New and improved: the pliers wrench with better performance and lighter weight

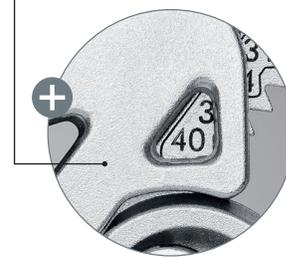

- ▶ Increased gripping capacity due to two additional setting positions: flexible gripping of all widths across flats up to 1 1/2" (40 mm)
- ▶ 10% less weight with the same box-joint stability
- ▶ Laser-etched scale allows the wrench opening to be set before gripping onto workpiece
- > Replaces a whole set of open ended wrenches metric and inch
- > Easier to use due to reduced weight and slim jaw profile
- > Zero backlash jaw pressure prevents damage to edges
- > Reliable catching of the hinge bolt: no unintentional shifting
- > Parallel jaws evenly distribute force for a secure grip that is 10x pressure applied to handles
- > Chrome vanadium electric steel, forged, oil-hardened
- > Now available with a black finish or chrome plating
- > Pliers wrenches are available in 5" to 16" lengths with capacities from 7/8" to 3 3/8"

Opening width laser-etched onto the pliers head (metric on the front and inch on the back)

Smooth jaws will not mar surfaces

Gripping capacity extended to 1 1/2" (40 mm)
