

The background of the entire page is a collection of various Leviton electrical components. In the top left, there is a silver metal switch mechanism with "LEVITON" and "20A-120V 277VAC" printed on it. To its right is a white plastic switch component with a metal screw. In the top right, a stainless steel emergency switch is shown with a white rocker and the word "EMERGENCY" in red. In the center, a stainless steel switch plate with a single screw and a rectangular cutout is visible. In the bottom right, there is a white and black switch component with a metal screw and a yellow plastic cover. In the bottom left, a metal switch component with "LEVITON" and "702-402" is partially visible.

Commercial & Industrial Grade

ORDERING GUIDE

Commercial & Industrial Grade Switch Overview

PROBLEM SOLVING SOLUTIONS

Look for the **GREEN** icons shown below to assist you in browsing for the ideal switch.

PILOT LIGHT & ILLUMINATED

Featuring a light in the toggle or rocker, these switches illuminate to alert you from afar if your device is ON or OFF.

TAMPER-RESISTANT & KEY LOCKING

Switches designed to only be operated by authorized users.

ANTIMICROBIAL TREATED DEVICES

Made durable in order to withstand harsh chemical cleaning products, stringent washings, and UV lights with minimal wear and tear while inhibiting bacterial growth.

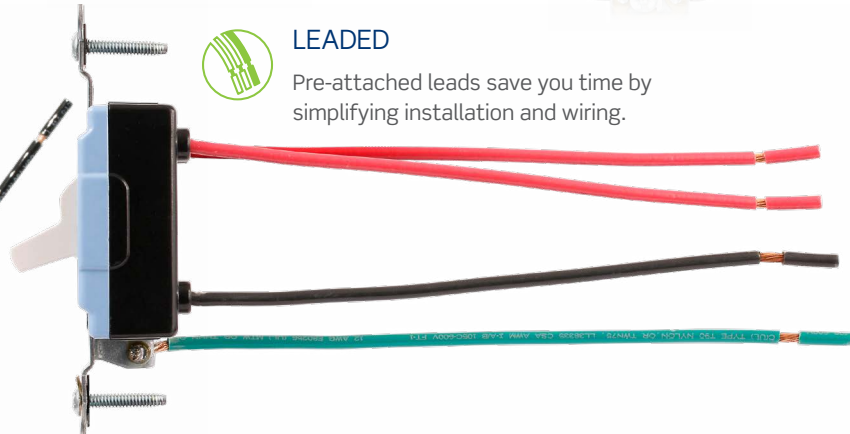

LEV-LOK MODULAR WIRING DEVICES

Features a simple twist-and-lock wiring module that allows for 3X faster installations and 5X faster swap outs than traditional wiring.

LEADED

Pre-attached leads save you time by simplifying installation and wiring.

MOMENTARY

Momentary switches are actuated when pressed, like a gym door or doorbell.

MAINTAINED

Maintained switches change position when actuated, and remain in that position until actuated again, like an ON/OFF button.

CANADIAN

A "Canadian" switch is CSA Listed only, Non-Grounding, rated 347 VAC, and has a strap for a 3.531 inch box mount.

FED SPEC

Leviton uses several Nationally Recognized Testing Labs (NRTLs) for certification of switches. UL and CSA are two of these NRTLs. When you see the UL, CSA, or cULus symbols, you can have the confidence that the devices adhere to strict scientific safety, quality or security standards.

In addition to complying with UL general use requirements, when you see the Fed Spec marking you are assured that the switch has been investigated for compliance with US Federal Specification W-S-896 for the purpose of more durability and service life.

COMMON CATEGORIES

COMMERCIAL SPECIFICATION GRADE

The perfect balance between performance and value. Commercial grade switches feature a galvanized steel strap, are available in Decora style, and go up to 20 Amp.

INDUSTRIAL SPECIFICATION GRADE

The ideal solution for demanding applications requiring robust construction and exceptional electrical performance. Industrial grade switches feature a heavy-duty thicker gauge galvanized steel strap for longer service life, and go up to 30 Amp.

KEY TERMINOLOGY

Wiring diagrams for the below switch types appear on page 23.

SINGLE POLE

Controls light(s)/load(s) from one location

DOUBLE POLE

Controls small motor loads

3-WAY

Controls light(s)/load(s) from two locations

4-WAY

Controls light(s) from three locations
One 4-way switch and two 3-way switches must be used in a 4-way application

lev-lok® switches

The perfect productivity solution for electrical construction and maintenance applications, the Lev-lok Modular Wiring Device System includes switches, receptacles, USBs, GFCIs and occupancy sensors. Simply connect the leaded wiring module to the back of the device for quick and easy assembly!

KEY FEATURES AND BENEFITS

Future Proof

It's 5x faster to replace devices in a facility to meet future needs, whether you're updating technology or meeting new requirements.

Compress Timelines

Accelerate installation and swap outs to complete projects faster than using traditional wiring.

Accurate & Secure Connection

Lev-lok lowers the risk of incorrect installation while providing a safe and secure connection.

SINGLE POLE AND SINGLE POLE ILLUMINATED

- ① Line Hot (Brass Screw)
- ② Load (Brass Screw)
- ③ Ground (Green Screw)

SINGLE POLE PILOT LIGHT

- ① Line Hot (Black Screw)
- ② Neutral (Silver Screw)
- ③ Load (Brass Screw)
- ④ Ground (Green Screw)

NOTE: Neutral connection required.

DOUBLE POLE AND DOUBLE POLE PILOT LIGHT

- ① Line Hot (Black Screw)
Circuit A
- ② Line Hot (Black Screw)
Circuit B
- ③ Load (Brass Screw)
Circuit A
- ④ Load (Brass Screw)
Circuit B
- ⑤ Ground (Green Screw)

3-WAY AND 3-WAY ILLUMINATED

- ① Line Hot / Common (Black Screw)
- ② Travelers (Brass Screw to Brass Screw)
- ③ Load / Common (Black Screw)
- ④ Ground (Green Screw)

NOTE: Do not use this wiring configuration with 3-Way Pilot Light switches.

3-WAY PILOT LIGHT

- ① Line Hot / Common (Black Screw)
- ② Travelers (Brass Screw to Brass Screw)
- ③ Ground (Green Screw)
- ④ Load / Common (Black Screw)
- ⑤ Black Lead from Switch
- ⑥ White Lead from Switch
- ⑦ Neutral (White Wire)

NOTE: Neutral connection required.
Black lead must connect to load at both switch locations.
May require additional wiring to work properly.

4-WAY

- ① Line Hot / Common (Black Screw)
- ② Travelers (Brass Screw from 3-Way to Brass Screw from 4-Way)
- ③ Ground (Green Screw)
- ④ Load / Common (Black Screw)

NOTE: Do not use 3-Way pilot light switches in a 4-Way application.
