

Fall Protection

Roofing Solutions

Roof solutions to help you stay on top.

Get the fall protection you need to stay successful and compliant.

Keeping up with the rules.

Walking-Working Surfaces and Personal Protective Equipment: OSHA's Final Rule, General Industry 29 CFR 1910.

Published in 2016, the final rule applies to all general industry workplaces and covers all walking-working surfaces, including floors, stairs, roofs, ladders, ramps, scaffolds and elevated walkways. This rule has provisions affecting fall protection systems.

The final rule covers a wide variety of general industry entities, including building management services, utilities, warehousing, retail, window cleaning, chimney sweeping and outdoor advertising.

Ladder Requirements

Applies to fixed ladders that extend over 24 feet.

Employers must equip existing fixed ladders with a cage, well, ladder safety system or personal fall arrest system.

Deadline:
► November 19, 2018

Employers must begin equipping new fixed ladders with a ladder safety system or personal fall arrest system.

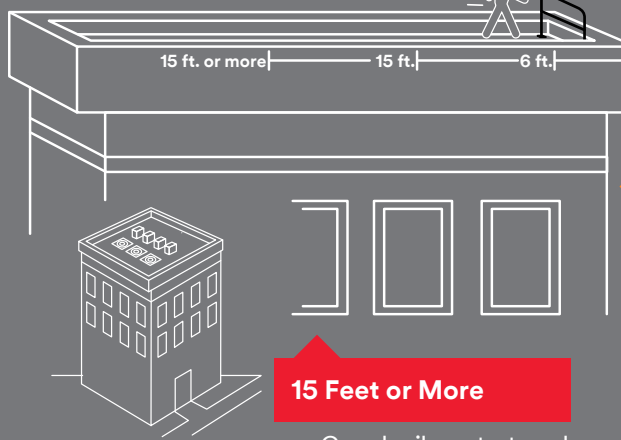

Deadline:
► November 19, 2018

All fixed ladders must be equipped with a ladder safety system or personal fall arrest system.

Deadline:
► November 18, 2036

Low-Slope Roof Requirements

<6 Feet

- Guard rails, nets, travel restraint or personal fall arrest system.

6 Feet to <15 Feet

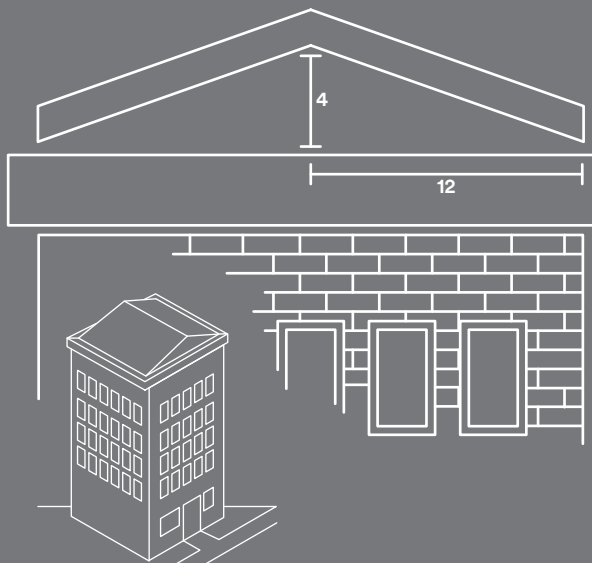

- Guard rails, nets, travel restraint or portable fall arrest system (Warning lines are permitted when performing work that is both infrequent and temporary).

15 Feet or More

- Guard rails, nets, travel restraint, PFAS or warning line.

Employer is not required to provide any fall protection if work is both infrequent and temporary, and they implement and enforce a work rule prohibiting employee from going within 15 feet of edge without using fall protection.

24 Feet or greater

4 units to every 12

Low-Slope Roof definition

A low-slope roof is defined as a roof with a slope less than or equal to a ratio of 4 in 12. This means a vertical rise of 4 units (inches, feet and meters) to every 12 units of horizontal run.

Rule your roof.

The 3M™ DBI-SALA® Fall Protection rooftop systems and equipment you need to protect your workers and meet OSHA's final rule.

To the rescue after a fall.

Unfortunately, the best fall protection can't keep falls from happening—but when they do, you need to be ready. Protect your crew and worksite with rescue solutions that you can rely on.

- **3M™ DBI-SALA® Rollgliss™ R550 Rescue and Descent Device**
3327050 | 50 ft.
3327100 | 100 ft.
Additional sizes available

- **3M™ DBI-SALA® Self-Rescue 50 & 10C**
3320052 | 100 ft.
3320051 | 50 ft.

When it comes to leading edge, we're leading the way.

If your crew is working at height around an unprotected side and edge of a floor, roof or other walking/working surface, you need leading edge fall protection. Get the SRLs that are specifically designed to address the hazards associated with leading edge applications.

- **3M™ DBI-SALA® Nano-Lok™ Edge Single-Leg Quick Connect Self Retracting Lifeline**
