

MP Meter-Pak

A right-sized solution for 2-6 unit multifamily jobs

SQUARE D™

Meet the next generation of Square D™ meter centers for 2-6 unit multifamily jobs. **MP Meter-Pak** is a pre-assembled, NEC-compliant meter center built to make small multifamily installs faster and tighter.

For years, contractors on small multifamily jobs had two choices: oversized systems built for 7+ units, or wide horizontal designs that don't fit the wall. MP Meter-Pak is right-sized for the job. All-in-one, pre-assembled, and compliant out of the box.

Built for easier installs

Up to **32% narrower*** than horizontal designs to better fit the wall

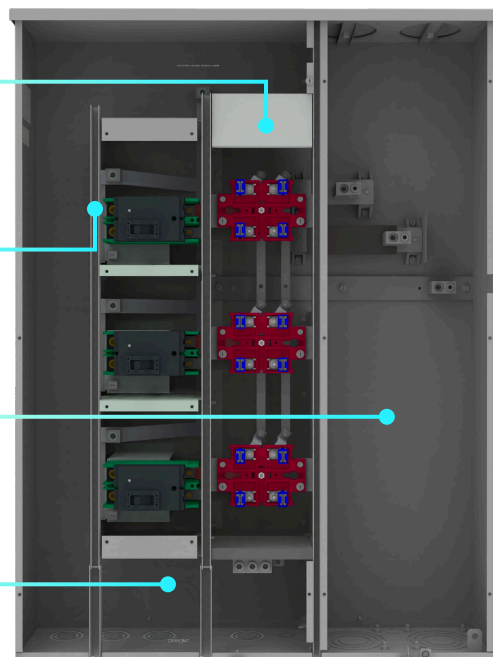

Every tenant's wires land in one place for **faster wiring**

Pre-assembled in an all-in-one enclosure, ready to hang

NEC-compliant, with 33 configuration options

*Based on a comparison of the Square D MP Meter-Pak to a comparable horizontal meter center configuration. Actual wall width savings vary by model, configuration, and application. "Up to 32%" represents the maximum observed reduction in the referenced comparison; in some cases reduction may be less.

What are the MP Meter-Pak specifications?

Feature	Specification
Compliance	UL 67 listed, NEC compliant (230.71(B), 230.85, 230.62); meets U.S. utility requirements, including EUSERC and MEG
Gangs	2G, 3G, 4G, 5G, 6G
Ampere ratings	125 A, 200 A, 225 A
Socket/bypass types	Ring, ringless (horn-bypass or no bypass), lever bypass
Wiring	Ground, neutral, and hot land in each disconnect compartment
Compatible tenant breakers	Accepts QBP, QDP, QGP, and QJP
Configurations	33 NEC-compliant configurations, 4 meter socket options

What accessories work with MP Meter-Pak?

MP Meter-Pak supports a full range of compatible accessories, including:

- A fifth jaw kit
- Horn bypass kit
- Slider-type manual circuit closing
- Sealing rings
- Meter Cover-Lexan™
- Optional lug kits
- NEMA/EUSERC lug landing kit
- MP Meter-Pak wireway (wall mount)

MP or EZM? Pick the right Meter-Pak for the job.

MP Meter-Pak and EZM are both Square D meter centers, each built for a different job size.

MP Meter-Pak

For 2–6 tenant units

- Single-phase residential
- All-in-one enclosure
- 33 NEC-compliant configurations

EZM Meter-Pak

For 7+ tenant units

- Residential or commercial, 1- or 3-phase
- Separate main and branches
- Mains up to 2000 A

Rule of thumb: 2–6 unit residential? It’s an MP. Bigger, mixed-use, or 3-phase? It’s an EZM.
