

Product End-of-Life Instructions

Product Range: Thermal relay LR9F (30-630A)

Marketing Model/Name: (List of multiple models if applicable)

The End of Life Instruction (EOLI) covers the entire range of thermal overload relay Tesys LR9-F with currents between 30 and 630 A.

Purpose:

The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.

Note :

This product family is not in the scope of EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

Operations recommended for the end of life treatment

There are several steps to process the products at the end of life so as to recover components, materials or energy :
Reuse → Depollution → Dismantling → Shredding.

The components of the products that optimize the recycling performances are listed, identified and located hereunder.

This product contains a printed circuit boards and parts made of bromide materials which is recommended to be treated separately during the End of Life operations.

Number on drawing	Components	Weight (g)	Comment
Components listed for special treatment			
1	Printed circuit board	30.4 g	
2	Grey case	149.43 g	Contains brominated flame retardant
