# BOLTS, MACHINE - Square Head Continued on next page

SUPPLEMENTAL CATALOG BULLETIN 5-53.24 December 2008

Sometimes referred to as "crossarm" bolts or "through" bolts, Hubbell Power Systems (HPS) square head and hex head machine bolts are manufactured to HPS specifications that meet the requirements of ANSI C135.1 and are available in a range of thread diameters and lengths. The head is marked with an identifying "C" and the bolt includes an

assembled square or hex nut that corresponds to the head shape. Threads are formed with the rolled thread process. Bolt length is measured from the underside of the head to the last thread. Semi-cone point comes on bolts 8" and longer in  $\frac{1}{2}$ ",  $\frac{5}{8}$ " and  $\frac{3}{4}$ " diameters. All others have chamfered or rounded ends. For lengths not shown, contact HPS Customer Service.

# BOLTS, DOUBLE-ARMING All-Thread Rods

Referred to as "D.A. bolts," double-arming bolts are used for double arm applications (one arm on each side of the pole) because of the ease of installation if replacement of the crossarm is necessary and offer flexibility of use. Hubbell Power Systems D.A. bolts are manufactured to HPS specifications that meet the requirements of ANSI C135.1. They are available in a range of thread diameters and lengths. Each bolt includes four assembled square nuts. Threads are formed with the rolled thread process. Bolt length is measured from the last thread, end to end. Semi-cone point comes on bolts 8" and longer in  $\frac{1}{2}$ ",  $\frac{5}{8}$ " and  $\frac{3}{4}$ " diameters. All others have chamfered or rounded ends. For lengths not shown, contact HPS Customer Service.
