#### Footnotes

- For Indoor Use only.
- In base up operation, heat may eventually deteriorate paper-lined or plastic sockets.
- Approximate life for 130 volt tungsten halogen lamps operated at 120 volts is within the value calculated using the recommended equations for standard incandescent lamps, as set forth in the IES Handbook, 8th edition. Because of the uncertain nature of the halogen cycle on the coil

when operated at less than rated voltage, life of tungsten halogen lamps varies considerably and unpredictably. LEDVANCE does not recommend operation at other than rated voltage.

- @ 120 volts, approximate 53 watts, 495 lumens, 4000 hours
